

**APPENDIX E**  
**METHOD FOR THE DERIVATION OF ACTION LEVELS**

This appendix presents the standard procedure which shall be used by the Secretary when deriving an *Action Level*, in pounds of *emissions* per eight hours, for a *hazardous air contaminant*.

*Action levels* shall be calculated for all *hazardous air contaminants* for which the Secretary has established an HAAS by one of the following methods:

- ~~1.~~ For ~~hazardous air contaminants with an HAAS based on an eight hour averaging period, the HAAS shall be multiplied by 0.042.~~
- 1.2. For *hazardous air contaminants* with an HAAS based on a twenty-four hour averaging period, the HAAS shall be multiplied by 0.052.
- 2.3. For *hazardous air contaminants* with an HAAS based on an annual averaging period, the HAAS shall be multiplied by 0.083.
