

**Eighteenth Annual Report on the  
Status of the Petroleum Cleanup Fund**

**10 VSA § 1941**

**January, 2006**

This report includes a review of Petroleum Cleanup Fund receipts and disbursements for the calendar and fiscal year 2005. An evaluation of the effectiveness of the Fund in meeting its legislative intent, and a review of the reasonableness of remediation costs is also included. This report also includes recommendations concerning aboveground storage tanks.

Prepared by: The Petroleum Cleanup Fund Advisory Committee

PETROLEUM CLEANUP FUND ADVISORY COMMITTEE MEMBERS

Thomas Torti: Secretary, Agency of Natural Resources

P. Howard Flanders: Designated representative of the Commissioner,  
Department of Environmental Conservation (DEC)

Walt Daly: Designated representative of the Commissioner,  
Department of Banking and Insurance

Joe Choquette: Vermont Petroleum Association

Senator Virginia Lyons

Representative Alice Nitka

Scott Bigger: Designated representative of Lowell T. Spillane,  
Retail gasoline dealer

Dick Barnes: A.R. Sandri, a licensed gasoline distributor

Shane Sweet: Vermont Fuel Dealers Association

Peter Bourne: Bourne's Incorporated, a licensed fuel dealer

Beth Austin Vermont Country Properties, a licensed real estate broker

Petroleum Cleanup Fund Advisory Committee  
Annual Report  
Executive Summary

This is the eighteenth annual Petroleum Cleanup Fund (PCF) report submitted in accordance with 10 V.S.A. § 1941; it includes a review of receipts and disbursements for 2005. The report also evaluates the effectiveness of the PCF in meeting its legislative intent, and reviews the reasonableness of remediation costs. This report summarizes the establishment of separate accounts within the PCF for motor fuel and heating oil related activities and includes proposed legislative changes.

In 2005 the motor fuel account remained healthy and was able to provide timely reimbursements for cleanups. The fund maintained the required \$1 million reserve and therefore satisfied EPA's requirement to remain a sound financial assurance mechanism for Vermont underground storage tank (UST) owners. Cleanup reimbursements continued at a steady pace, and moving the heating fuel cleanups to a separate account enabled the fund balance in the motor fuel account to grow.

In 2005 requests for reimbursement from the heating fuel account exceeded its income. The increased demands were due to an increase in the number and magnitude of heating fuel cleanups. To stabilize the heating fuel account, the Committee proposes to extend the tank fee currently charged to commercial motor fuel tanks to also include heating oil tanks used for commercial purposes.

In 2005 at the suggestion of the committee, the Agency of Natural Resources (ANR) contracted an actuarial analysis of the Petroleum Cleanup Fund and the risks associated with it. This study found that, under certain conditions, the fund would be insolvent based on actuarial standards. If all claims discovered (this includes both old sites as well as ones recently discovered) through 2005 were to be paid in full on December 31, 2005, the fund is projected to have a \$10.5 million deficit. If, however, the program continues as it currently structured and assuming timely reauthorization of existing fees, the fund should be adequately financed to cover petroleum cleanups and could begin to generate an annual surplus in 2011. This report also showed that although the PCF currently has a positive annual cash flow however overall liabilities are projected to exceed assets through 2009. The report also concluded that there is not enough income in the heating fuel account to support current year or future projected claims.

The Committee remains concerned that the cash balance in the fund will be a target for a future fund transfers; but the actuarial study and new provisions in federal law predict this will be more costly and less desirable. According to the actuarial analysis, **"The Fund is projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011. This does not consider any potential legislative transfer of assets from the fund. Such a transfer would extend the period that the fund is technically insolvent."** In addition, the new federal energy act contains language imposing sanctions against states that divert PCF-type funds. The Energy Policy Act of 2005 signed into law by President Bush on August 8, 2005 reads: **"The Administrator shall not distribute funds under subparagraph (A)(iii) of subsection (f)(1) to any State that has diverted funds from a State Fund or State Assurance program for purposes other than those related to the regulation of underground storage tanks covered by this subtitle, with the exception of those transfers that have been completed earlier than the date of enactment of this subsection."** ANR receives over \$400,000 LUST trust funds each year, which provides the funds for 9 employees that manage the cleanups at these sites. This work includes ensuring that human and environmental exposure to contamination is mitigated through such measures as providing alternative drinking water, drinking water treatment and requiring active remediation. Without these funds this valuable work would not be completed.

## **Description and Purpose**

This is the eighteenth annual report on the status of the PCF. This report will look at the effectiveness of the fund in meeting its intended purpose, will review the status of cleanups from motor fuel and heating oil releases from both aboveground and underground heating oil storage tanks, will review the farm and residential underground storage tank (UST) and aboveground (AST) grant program and will provide future PCF projections and recommendations for changes to the PCF.

In 1985, the General Assembly enacted Vermont's first law to regulate the construction, maintenance and operation of underground steel tanks used for the storage of petroleum products. Act 66 of the 1985 session established standards for new construction, and set a deadline of June 30, 1998, later amended to December 22, 1998, for the removal or replacement of unprotected USTs.

In 1988 the Legislature created the PCF, and appointed this Advisory Committee to oversee the financing, effectiveness and conduct of the program. The primary purpose of the PCF is to protect public health and the environment by paying for cleanup and restoration of contaminated soil and groundwater caused by releases from underground petroleum storage tanks, and to compensate third parties for property damage and bodily injury. Many changes have been made since 1988, including the inclusion of pollution coverage for aboveground storage tanks (ASTs) and a farm and residential UST and AST grant program. The Fund also provides loans to small marketers and small towns for tank replacement, and to all tank owners for upgrades to spill and overfill leak detection equipment.

The PCF provides financial assurance to UST owners, who are required by state and federal law to provide coverage for up to \$1 million for cleanup and \$1 million for third party liability. Since such affordable comprehensive insurance coverage continues to be difficult to access for tank owners, the PCF fund enables tank owners to meet their financial responsibility (FR) requirements. By law, the U.S. EPA must approve the operation and viability of a state fund before it may serve as a financial responsibility mechanism for UST owners. EPA accepted Vermont's fund as a financial assurance mechanism in 1990, with the requirement that a minimum balance of \$1 million be maintained.

In 2004, the Legislature enacted a fee on heating fuel to create a revenue source for the heating oil related activities funded under the PCF. The PCF was also divided into two separate accounts: a motor fuel account and a heating oil account, with both revenue and expenditures to be managed within each account.

Revenue for the motor fuel account comes from an annual assessment fee of up to \$200 per tank on most underground tanks, and a "distributor licensing fee" of one cent per gallon of motor fuel sold in the state. Additional revenue comes from the repayment of loans, recovery of some costs from responsible parties, and interest accruing upon any cash balance in the fund. Revenue for the heating fuel account comes a licensing fee of one-half cent per gallon of heating oil and kerosene sold in the state.

Expenditures include the cost of cleanup, third party payments, loans to businesses and municipalities, grants to homeowners to assist in the removal of heating oil USTs and modest administrative expenses. Each uninsured cleanup undertaken in the state becomes eligible for fund assistance after the party responsible for the tank meets a certain "deductible," a co-insurance payment based on the circumstances of ownership. For commercial entities, the deductible is set at \$10,000 per occurrence. For homeowners, a deductible of \$250 must be met. Owners of commercial heating oil ASTs meet a \$1,000 deductible.

The sunset date for collection of the motor fuel distributor licensing fee is April 1, 2011 while the sunset date for the licensing fee on heating fuels is April 1, 2008.

## **Risks to Fund Solvency**

The PCF currently maintains a sufficient cash balance in the motor fuel account to address its current obligations, while the heating fuel account is inadequate to address current demands. An actuarial study was completed in 2005. This study found that the fund is projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011.

The large number of contaminated properties that are eligible for reimbursement under the Fund will continue to require significant PCF monies. One hundred and twenty eight new sites were discovered in 2005 adding to the total of over 2,700 sites discovered statewide since 1988. This large number of contaminated properties will result in an increase in disbursements from the PCF as investigations and cleanups continue. A recent initiative was begun in 2003 at the request of EPA to address older sites in Vermont. Over 1,200 sites remain in an active status where further PCF eligible work needs to be completed. This work will likely cause an increase in claims against the PCF. There are also 15 different sites where extensive remediation is necessary, and the DEC has committed over \$1.2 million for future cleanups costs under the pay-for-performance program.

Providing reimbursements for releases at heating oil and kerosene sites remains a risk to the PCF. In 2005 the heating fuel account had demands for reimbursement which exceeded the income. The increased demands were due to both an increase in the number and the magnitude of the heating fuel cleanups. The increase in the number of claims is believed to be the result of increased awareness of this program. More and more owners of property in Vermont are removing their heating fuel tanks and many are found to have released petroleum into the environment. In addition, many private insurance companies are requiring that heating fuel USTs be removed as a condition of renewing the homeowner's insurance policy. There has also been an increase in the total cost of these claims. There have been a few commercial heating fuel tanks where a significant release had occurred resulting in a costly cleanup. The farm and residential grant program for heating fuel tanks continues to remain very successful, as the number of requests for grants exceeded the amount authorized for the year. \$150,000 of the annual income into the heating fuel account is devoted to this effort.

There also remains the threat of a large petroleum release in a critical area. Over the history of the program, the sites that have affected public water supplies or sensitive environmental areas have required extensive remediation at a high cost to the PCF. A site discovered in 2002 in Hartland has over 30 public and private wells that have been contaminated with a gasoline additive, MTBE. This site will require a large disbursement of PCF monies to address this problem. In addition, there are 3 sites with multiple occurrences that have received reimbursements totaling more than \$1 million each for remediation costs, 19 sites with cleanup costs less than \$1 million but greater than \$500,000 and 137 sites that have required cleanup costs less than \$500,000 but more than \$100,000 each (Attachments 2 & 3). When sites like these are discovered, cleanup work can continue, at a large fund expense, for as long as 5-10 years.

Third party claims constitute an uncertain risk. Cumulative third party claims of \$3.1 million to date represent only 4% of the total disbursements from the Fund. However, a major release in a critical area, such as a public water supply or high density residential area, could result in a costly third party claim. It is important to maintain an adequate balance in the PCF to ensure there are adequate funds to provide an immediate and effective response where public health is at risk.

Contaminated water supplies represent the majority of all third party claims. Future discovery of contaminated public water supplies is anticipated, since there are 42 leaking underground storage tank sites located in close proximity to public water supplies. There are an approximate 408 private wells at 136 sites serving an estimated population of over 1,200 people that have been contaminated by petroleum from leaking USTs. Attachment 6 shows the distribution of sites with a direct and immediate effect on public health and the environment over the past sixteen years. The Fund continued to provide reimbursements to municipalities where petroleum contaminated soils were encountered during public water or sewer lines projects. The added cost of properly handling the contaminated material as well as having proper personal protection for the on site workers is a third party cost eligible for reimbursement from the Fund. Each year this is an uncertain risk to the Fund.

Potential future legislative transfer of funds continues to be a risk to fund solvency. According to the actuarial study, "The Fund is projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011. This does not consider any potential legislative transfer of assets from the fund. Such a transfer would extend the period that the fund is technically insolvent." Maintaining a healthy cash balance is important to the long-term success of the fund.

### **Review of Receipts to the Fund**

A review of fund receipts for calendar year 2005 is summarized in Attachments 1 and 6. In 2005, total fund receipts for the motor fuel account were \$5,091,318. Owners of "Category One" storage tanks paid \$365,135 in tank assessment fees. The distributor licensing fee, a one cent assessment per gallon of motor fuel sold in the state, contributed \$4,312,855, a 3% increase as compared to 2004. Other income includes the repayment of loans, \$268,793, and interest income of \$124,872. In addition, the state successfully recovered \$19,664.

In 2005, total fund receipts for the heating fuel account were \$930,367. This represented the collection of the ½ cent per gallon fee on heating fuels.

### **Review of Disbursements from the Fund**

A review of fund disbursements for calendar year 2005 is summarized in Attachments 1, 2 and 3. A review of fund disbursements over the history of the PCF is summarized in Attachment 5. In 2005, motor fuel account disbursements totaled \$3,409,452 and heating fuel disbursements totaled \$1,579,587. These included \$2,903,051 for remedial action for UST motor fuel sites, \$64,591 for the UST replacement loan program, \$88,852 for the residential UST removal grant program, \$76,349 for the residential AST removal grant program, \$818,975 for remedial action for UST heating fuel sites, \$595,411 for remedial action for AST heating fuel sites, \$240,000 for administrative costs, and \$201,811 for third party claims.

Disbursements for remediation represented a total of 1,292 different sites (Attachment 2 & 3), which includes sites which began remediation in prior years. Three of these sites have received reimbursements totaling more than \$1 million each for remediation costs. One of these cost over \$1.5 million; however, this site involves two separate properties where releases occurred, but the contamination is being managed as one site due to their close proximity and their effect on a public water supply. One other site involves significant contamination to a bedrock aquifer. There are 15 different sites where extensive remediation is necessary, and the DEC has negotiated agreements to reimburse over \$1.2 million for these cleanups. The cleanups for these sites are under the pay-for-performance (PFP) cleanup program. Under PFP cleanup, contractors are paid based on the effectiveness of the cleanup and not on a traditional time and materials basis.

Lastly, 77 incentive grants were approved in 2005 for the closure of residential heating oil USTs with 89 grants being paid out (FY04 and FY05 grants) totaling \$88,851. This brings the total grants awarded since 1998 to \$545,370. In addition, 107 grants were approved in 2005 for the replacement of residential heating oil ASTs, with 78 grants being paid out, totaling \$76,349. This brings the total grants awarded since 2004 to \$89,583.

In all, 1,292 sites in 196 different towns have had investigations or cleanups that have benefited from the use of the Fund. Attachment 7 shows the distribution of these sites throughout the state.

In 2005 a total of \$65,591 in UST loans (including administrative fees) was advanced for tank replacement and/or upgrade work at three stations. A total of 194 facilities have taken advantage of UST replacement loans totaling over \$6.6 million. Of those 194, 123 have been repaid. There are currently 71 loans outstanding with a total balance owed of \$876,477.

Third party claims continue to represent a small portion of overall disbursements (4%). To date the PCF has paid \$3,150,425 for all third party claims, with \$201,811 in 2005 (Attachment 2).

### **Effectiveness of the Fund in Meeting Its Purpose**

The fund was effectively able to meet its purpose of funding cleanups and providing financial assurance for underground storage tank owners in Vermont. There was an adequate balance in the motor fuel account and claims were processed in a timely manner.

The fund was not able to effectively meet its purpose in addressing contamination from heating fuel tanks. Claims were not able to be processed in June 2005 as there were not adequate funds in this account. This resulted in delays in site cleanup which increased the risk of exposure to petroleum contamination in the environment. Although claims processing resumed in July 2005, without additional funding it is likely that the payment of claims will be stopped for the period of February to June 2006. This will further increase the risk of exposure to petroleum contamination in the environment.

### **Reasonableness of the Cost of Cleanup**

In past years, the committee has reviewed the written policies and procedures of the DEC related to UST replacement, eligible costs and reimbursement procedures. In assessing the reasonableness of the cost of cleanup, the committee has reviewed national averages and comparative data from other states. The PCF Advisory Committee has concluded that agency staff responsible for this program have exercised prudent cost containment measures. A review of an annual survey conducted by the Association of State Underground Storage Tank Cleanup Funds shows that Vermont's cost of cleaning up contaminated sites is below those of other states. The continued efforts of Agency staff have helped to maintain reasonable cleanup costs in Vermont. The implementation of Vermont's pay-for-performance cleanup agreements has also helped to control costs.

### **Recommended Statutory Changes to Chapter 59**

1. The Committee proposes the following statutory changes:

**A. Amend 10 VSA § 1941. Petroleum Cleanup Fund**

(1) costs incurred by taking corrective action as directed by the secretary for any release of petroleum into the environment from:

(A) an underground storage tank defined as a category one tank after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of tanks used for commercial purposes, or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities equal to or less than 1,100 gallons used for farms or residential purposes. Disbursements on any site shall not exceed \$990,000.00. These disbursements shall be made from the motor fuel account;

(B) an underground heating fuel tank used for on-premise heating:

(i) after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities over 1,100 gallons used for commercial purposes, or after the first \$250.00~~1,000~~ of the cleanup costs have been borne by the owners or operators of tanks with capacities equal to or less than 1,100 gallons used for commercial purposes, or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of residential and farm tanks. These disbursements shall be made from the heating fuel account; or

**B. Amend 10 V.S.A. § 1944. Underground storage tank loan assistance program § 1944. Underground storage tank loan assistance program**

(a) The secretary may make individual loans of up to \$40,000.00 for:

(1) the replacement or removal of underground motor fuel storage tanks used for the storage of petroleum products and permitted under section 1927 of this title and in existence on January 1, 1987. Such loans may be made only for the replacement or removal of motor fuel tanks at a retail gasoline outlet that sells less than 20,000 gallons of gasoline per month or at a municipal facility when the municipality has a population of less than 2,500 people;

(2) the removal, or the replacement or improvement, or both, of piping, tank-top sumps, and other components of the secondary containment and release detection systems, for the purpose of reducing the likelihood of a release of regulated substance to the environment.

(3) the replacement or removal of underground storage heating fuel tanks used for on-premise heating.

(4) the removal of abandoned underground storage tanks not eligible for reimbursement pursuant to subsection 1926(d) of this title.

(b) Loans shall be made to the person who owns the underground storage tank that meets the criteria of subsection (a) of this section ~~existing motor fuel tanks or will own the new motor fuel tanks~~. Loans will be in accordance with terms and conditions established by the secretary which shall include but not be limited to requirements that:

(1) loans be made only for the costs associated with the replacement or removal of an underground storage tank or improvement of piping and ancillary equipment used for the storage of petroleum products and associated facilities with a tank and facilities conforming to the requirements of this chapter;

- (2) loans be secured by means satisfactory to the secretary;
- (3) proposed projects comply with all planning, zoning, laws, and regulation of the municipality where they are located and of the state of Vermont;
- (4) loans have a satisfactory maturity date, in no case later than ten years from the date of the loan.

(c) The loans will be at a zero interest rate.

(d) The secretary shall deposit repayments to the petroleum cleanup fund.

(e) The secretary may contract with other state agencies or authorities or with a commercial lending institution to carry out all or any portion of this loan program.

(f) At no time shall the amount of outstanding loans exceed the total of the amount of funds deposited to the petroleum cleanup fund from the licensing fee established by section 1942 of this title.

(g) The secretary may refinance existing loans for motor fuel tanks used for the storage of petroleum products incurred after July 1, 1987 under the same terms, conditions, and limitations which apply to initial loans.

### **C. Amend 10 V.S.A. § 1943. Petroleum Tank Assessment**

#### § 1943. PETROLEUM TANK ASSESSMENT

(b) Each owner of an underground heating fuel tank used for on premises heating with a capacity over 1100 gallons shall remit to the secretary on October 1 of each year beginning October 1, 2006, \$300.00 per tank, which shall be deposited to the heating fuel account of the petroleum cleanup fund established by section 1941 of this title, except that:

(1) The fee shall be \$100.00 per tank for any double walled heating fuel tank used for on premises heating with a capacity over 1100 gallons.

(2) The fee shall be relieved if the owner provides, to the satisfaction of the secretary, evidence of financial responsibility to allow the taking of corrective action and the compensation of third parties for bodily injury and property damage each in the amount of \$1,000,000.00 per occurrence.

(c) For purposes of this section, an occurrence is an accident, including continuous or repeated exposure to conditions, which results in the release of petroleum from one or more underground storage tanks at the same site.

~~(e)~~(d) This tank assessment shall terminate on July 1, 2009.

~~(d)~~(e) The secretary shall establish forms and procedures for the payment of the petroleum tank assessment, including a notice of the obligation 30 days prior to being due. Failure to receive notice shall not waive the payment obligation.

<b>Total</b>	<b>42</b>	<b>136</b>	<b>169</b>	<b>112</b>

For each site with an affected receptor the number of actual Vermonters exposed to contamination can vary. The actual users for public water supplies can be as low as 25 people per system to as high as many thousands of users. For sites with affected private water supplies, the number of contaminated wells depends on the specific conditions of the site. On average there are approximately three contaminated wells discovered per site, with an average of 3 users per household. However, one of the 136 sites listed above involved contamination to over 80 wells affecting approximately 240 users, and a site discovered in 2002 involves contamination to over 30 wells, including a public water supply, affecting 100s of users. Sites with surface water impacts can affect both public health and the environment. High concentrations of petroleum in a stream can cause detrimental affects to biota, and lead to an increased exposure to stream users. Lastly, sites with indoor air impacts can lead to the greatest risk to public health. Petroleum vapors entering a home can be at levels that are explosive. More often petroleum vapors reach levels that pose a serious health risk. Of the 112 sites with indoor air impacts, the number of exposed individuals varied from site to site. An average site involves three homes affected with approximately three persons per home.

Sites that are discovered with contamination affecting a sensitive receptor requires immediate response. It is critical that the Petroleum Cleanup Fund maintain an adequate balance so that there are no delays in efforts to mitigate the serious public health and environmental presented at these sites.
