

**Twenty-fifth Report on the
Status of the Petroleum Cleanup Fund**

10 VSA § 1941

January, 2013

This report includes a review of Petroleum Cleanup Fund receipts and disbursements for the fiscal year 2012. An evaluation of the effectiveness of the Fund in meeting its legislative intent, and a review of the reasonableness of remediation costs is also included. This report also includes recommendations to address funding shortfalls in the heating fuel account.

Prepared by: The Petroleum Cleanup Fund Advisory Committee

PETROLEUM CLEANUP FUND ADVISORY COMMITTEE MEMBERS

Deb Markowitz:	Secretary, Agency of Natural Resources
George Desch:	Designated representative of the Commissioner, Department of Environmental Conservation (DEC)
Walt Daly:	Designated representative of the Commissioner, Department of Financial Regulation
Joe Choquette:	Vermont Petroleum Association
Senator Mark MacDonald	
Representative Gale Courcelle	
Scott Bigger:	Designated representative of Lowell T. Spillane, Retail gasoline dealer
Dick Barnes:	A.R. Sandri, a licensed gasoline distributor
Matt Cota:	Vermont Fuel Dealers Association
Peter Bourne:	Bourne's Incorporated, a licensed fuel dealer
Peter Tucker	A licensed real estate broker

Executive Summary

This is the twenty-fifth annual report for the Petroleum Cleanup Fund (PCF). This report will provide a review of receipts and disbursements for fiscal year 2012, in accordance with 10 V.S.A. § 1941 and will evaluate the effectiveness of the PCF in meeting its legislative intent. This report will highlight financial challenges within the fund and will include recommended solutions.

This report will also make recommendations on how to reduce risks to the fund posed by underground storage tank systems as required under H.769. This bill specifically requested the committee to consider the following: appropriate tank assessment fees for single-walled and combination tanks; appropriate deductibles for single-walled and combination tanks; a time-line laying out a process to remove single-walled and combination tanks; for tank system owners that have low throughputs or limited income from their underground storage tank system, the use of grants or negative interest loans for the upgrade of those systems; and, current tank technology and its impact on safety and the rate of current tank fees.

This report will discuss the impact Tropical Storm Irene had on the PCF in FY12. A large number of petroleum releases from aboveground heating oil storage tanks resulted from the storm. The PCF provided reimbursements of more than \$800,000 to address these releases. The 2012 legislature authorized the transfer into the PCF of \$750,000 which provided the additional funds needed to ensure Vermonters affected by Irene received the necessary assistance. The Agency of Natural Resources (ANR) filed a claim with Federal Emergency Management Administration (FEMA) in an attempt to recover these funds however the claim was denied by FEMA. ANR has appealed this decision.

Although the PCF remained financially sound in FY12, the events of the past year showed how vulnerable the fund is with its current low fund balance. The cleanups costs caused by Irene were significant. If not for the legislative transfer, the PCF would not have been able to reimburse Vermonters for the resulting cleanup expenses. In addition, a large-scale release from one facility with an unprotected single walled underground storage tank and piping system cost the fund more than \$820,000 in FY12. To address the later risk to the PCF, the committee recommends increasing the annual tank assessment fee and the deductible for certain higher risk tank systems. The committee also recommends establishing deadline dates for these tank systems to remain in operation. Further details concerning these recommendations are included in this report.

The PCF is due to sunset in 2014 with fees collected until 2016. The committee evaluated the availability of affordable private insurance to replace the PCF and concluded that private insurance remains either unavailable or unaffordable for most Vermonters. The committee recommends extending the sunset dates by five years.

In FY12 the PCF continued to be the primary financial responsibility mechanism for Vermont underground storage tank owners. The PCF also provided financial resources necessary to remediate petroleum contamination at schools, homes, businesses, farms, churches, public work facilities and many other locations. The PCF provides a means to remediate releases that threaten public health and the environment. Petroleum releases have been discovered at more than 3,700 separate properties, with contamination discovered in drinking water wells, in the indoor air of homes and businesses, seeping into surface water bodies and at dangerous levels in public utility lines. Without the PCF many Vermont businesses, homeowners and public entities would struggle to fund expensive cleanups. This was especially true this year as hundreds of Vermonters were faced with significant cleanup costs resulting from the Irene flooding.

Description and Purpose

This is the twenty-fifth annual report on the status of the PCF. This report will look at the effectiveness of the fund in meeting its intended purpose, will review the status of cleanups from motor fuel and heating oil releases from both aboveground and underground heating oil storage tanks, will review the farm and residential underground storage tank (UST) and aboveground (AST) grant program and will provide future PCF projections and recommendations for changes to the PCF.

In 1985, the General Assembly enacted Vermont's first law to regulate the construction, maintenance and operation of underground steel tanks used for the storage of petroleum products. Act 66 of the 1985 session established standards for new construction, and set a deadline of June 30, 1998, later amended to December 22, 1998, for the removal or replacement of unprotected USTs.

In 1988 the Legislature created the PCF, and appointed this Advisory Committee to oversee the financing, effectiveness and conduct of the program. The primary purpose of the PCF is to protect public health and the environment by paying for cleanup and restoration of contaminated soil and groundwater caused by releases from underground petroleum storage tanks, and to compensate third parties for property damage and bodily injury. Many changes have been made since 1988, including the inclusion of pollution coverage for aboveground storage tanks (ASTs) and a farm and residential UST and AST grant program. The Fund also provides loans to tank owners for tank removal, replacement, and upgrade of equipment.

The PCF provides financial assurance to UST owners, who are required by state and federal law to provide coverage for up to \$1 million for cleanup and \$1 million for third party liability. Since such affordable comprehensive insurance coverage continues to be difficult or impossible to find for tank owners, the PCF enables tank owners to meet their financial responsibility (FR) requirements. By law, the U.S. EPA must approve the operation and viability of a state fund before it may serve as a financial responsibility mechanism for UST owners. EPA accepted Vermont's fund as a financial assurance mechanism in 1990, with the requirement that a minimum balance of \$1 million be maintained.

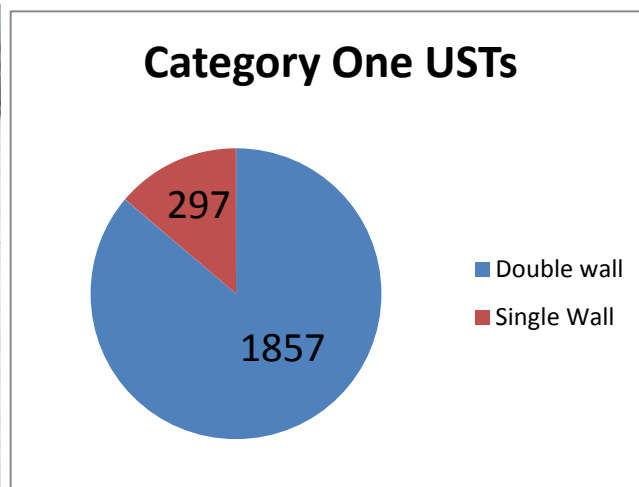

In 2004, the Legislature extended coverage to homeowner heating oil tanks and enacted a fee on heating fuel to create a revenue source for the heating oil related activities covered by the PCF. The PCF was also divided into two separate accounts: a motor fuel account and a heating oil account, with both revenue and expenditures to be managed within each account. In 2010, the fee on heating fuels was increased from a ½ cent per gallon to a full cent.

Revenue for the motor fuel account comes from an annual assessment fee of up to \$150 per tank on most underground tanks, and a "distributor licensing fee" of one cent per gallon of motor fuel sold in the state. Additional revenue comes from the repayment of loans, recovery of some costs from responsible parties, and interest accruing upon any cash balance in the fund. Revenue for the heating fuel account is generated from a licensing fee of one cent per gallon of heating oil and kerosene sold in the state. The sunset date for collection of the motor fuel and heating fuel fees is April 1, 2016.

Expenditures include the cost of cleanup, third party payments, loans to tank owners, grants to homeowners to assist in the removal of heating oil USTs and ASTs and administrative expenses. Each uninsured cleanup undertaken in the state becomes eligible for fund assistance after the party responsible for the tank meets a certain "deductible," a co-insurance payment based on the circumstances of ownership. For commercial entities, the deductible is set at \$10,000 per occurrence. For homeowners, a deductible of \$250 must be met. Owners of commercial heating oil ASTs meet a \$1,000 deductible.

Risks to Fund Solvency

One of the biggest risks to the fund is the remaining population of single-walled underground storage tank systems with single-walled piping. As depicted in the chart below 297 single-walled tank systems exist in VT. This represents 14 percent of the tank population. A leak from one of these systems might potentially be undetected due to the lack of secondary containment and can cause considerable harm in the environment. This was evident by the large scale cleanup of a catastrophic release in Essex Junction in 2011. More than \$800,000 of PCF funds have been expended to remediate this site, where a single-walled tank and piping system released gasoline which migrated to a local storm drain system.

Single-walled UST system without secondary containment and the number of these tanks in VT

Since Vermont adopted its first set of Underground Storage Tank Rules (1987) there have been few (approximately 30) releases to the environment from secondarily contained systems. Almost all of those originated either from leaks in dispensers that were not equipped with dispenser sumps, or from leaky spill buckets. For sites discovered over the past 5 years, 22 sites involved double-walled UST systems while 43 involved single-walled systems. Of those sites, there were no requests for PCF funds from the sites with double-walled tanks (any costs incurred were all less than the \$10,000 deductible) while the sites with single-walled tank systems have required nearly \$1.5M in PCF funds.

The solvency of the PCF also remains at risk due to the large number of contaminated properties that are eligible for reimbursement. Seventy-three new sites were discovered in 2012 adding to the total of over 3,700 sites discovered statewide since 1988. This large number of contaminated properties will result in continued disbursements from the PCF. A number of older sites remain that require remediation and hence future PCF disbursements. These older sites tend to be the most expensive sites to cleanup in part due to the size and complexity of the release. The USEPA Office of Underground Storage Tanks has made addressing the site backlog a priority. Of the 1,200 sites remaining in an active status where PCF eligible work needs to be completed; more than 600 of these are leaking motor fuel UST sites. Attachment 2 provides a detailed list of properties that have received reimbursements from the PCF for motor fuel releases.

The table below details disbursements from the fund from both the motor fuel account and the heating fuel account. This table highlights the shortfalls in the heating oil account from 2005 until the present, as years 2005 -2009 required a transfer of \$3,400,000 from the motor fuel account. This table also displays transfers of funds by the legislature since the fund was established in 1989. An actuarial study completed in 2005 found that the fund was technically insolvent (projected liabilities exceed assets

of the fund) through 2015. A \$2.8 million transfer of funds out of the PCF in FY09 has further increased the gap between projected liabilities and fund assets.

Annual Petroleum Cleanup Fund Expenses							
Year	Motor Fuel (MF)	Heating Fuel (HF)	3rd Party (MF)	UST Loans (MF)	UST/AST Grants	MF to HF Transfers	Legislative Transfers
1989	\$954,767			\$104,725			(\$700,000)
1990	\$854,456			\$1,091,742			\$1,000,000
1991	\$1,667,352		\$91,356	\$568,875			\$1,975,000
1992	\$2,735,743		\$246,653	\$473,567			\$750,000
1993	\$3,338,482		\$163,207	\$254,550			
1994	\$4,134,140	\$440,183	\$128,579	\$669,144			
1995	\$3,500,732	\$345,593	\$201,995	\$524,100			
1996	\$3,310,563	\$488,150	\$102,564	\$428,431			\$700,000
1997	\$3,214,204	\$204,487	\$183,473	\$989,125			
1998	\$3,522,001	\$229,284	\$180,275	\$208,740	\$6,412		(\$700,000)
1999	\$3,738,822	\$409,768	\$548,796	\$349,800	\$20,600		
2000	\$5,118,522	\$813,761	\$229,195	\$80,000	\$52,000		
2001	\$5,257,006	\$676,352	\$394,092	\$234,245	\$80,665		
2002	\$3,106,777	\$297,238	\$216,969	\$322,418	\$120,211		\$1,776,000
2003	\$4,207,188	\$467,880	\$313,835	\$114,170	\$79,860		
2004	\$4,252,202	\$904,078	\$184,517	\$132,596	\$116,502		(\$530,000)
2005	\$2,903,051	\$1,314,386	\$201,811	\$64,591	\$165,201	\$750,000	
2006	\$2,395,493	\$1,226,169	\$263,432	\$40,000	\$133,652	\$750,000	
2007	\$3,133,207	\$1,186,023	\$390,125	\$103,298	\$96,938	\$750,000	
2008	\$4,140,308	\$1,788,703	\$228,681	\$384,680	\$192,131	\$750,000	\$2,807,618
2009	\$4,576,012	\$1,330,821	\$687,895	\$103,730	\$281,101	\$400,000	(\$750,000)
2010	\$4,644,337	\$1,271,377	\$258,278	\$401,494	\$181,284		(\$300,000)
2011	\$3,029,500	\$1,257,481	\$263,049	\$161,312	\$332,908		
2012	\$2,425,452	\$1,345,474	\$364,641	\$30,850	\$297,945		(\$750,000)
Total	\$80,160,317	\$15,997,208	\$5,843,418	\$7,836,183	\$2,157,410	\$3,400,000	\$5,978,618

Reimbursements for releases at heating fuel sites remain consistent from year to year, averaging slightly more than \$1.2 million per year. The fee for heating fuel was increased in July 2010 from a half cent per gallon to one cent per gallon to address the consistent revenue shortfalls in this account. Tropical Storm Irene highlighted the vulnerability of the fund. Over \$800,000 of cleanup expenses were incurred from one storm. Without the additional revenue added to the heating oil account a large number of significant heating oil releases would not have been cleaned up resulting in contaminant exposure to public health and the environment.

AST release caused by Tropical Storm Irene, Roxbury, VT

It is anticipated that the PCF will be needed to provide reimbursements for heating fuel releases at a consistent level due in part to an aging heating fuel storage infrastructure as well as an increased awareness of this program. This trend will eventually be offset by new AST regulations which were adopted in October 2011 and established new installation standards and require routine inspection of old tanks. Although still too early to make a definitive conclusion, it appears that the new standards are also resulting in a large number of tank upgrades. This is certainly reflected in the number of AST replacement grants awarded in 2012. As more and more tanks are upgraded to the new standards, fewer and fewer tank releases will occur.

The PCF has provided cleanup funds for heating oil contamination at schools, homes, businesses, farms, churches, public works facilities and many other locations. Attachment 3 provides a detailed list of properties that have received reimbursements from the PCF for heating fuel releases. The farm and residential grant program for heating fuel tanks continues to remain very successful, as hundreds of tanks are removed each year.

The PCF's highest priority is to protect human health and the environment from exposure to petroleum from tank releases. This was highlighted this year at the Essex Junction site where explosive gasoline vapors were present in a storm drain system. Hundreds of people were at risk of severe injury and death had an explosion occurred in the shopping center. Immediate corrective action eliminated this significant risk to public health.

More than 3,700 separate properties have been discovered with contamination and many of these have affected drinking water wells, contaminated indoor air of homes and businesses, have migrated into surface water bodies and have been found at dangerous levels in public utility lines. For example, more than 200 separate sites have been discovered where nearly 1,000 public or private drinking water wells have been contaminated. Attachment 4 provides a list of the number of sites discovered each year that have had a direct affect on a sensitive receptor. To address human health and environmental exposures to releases the fund has authorized proactive measures which include rapid initial response to releases, providing bottled water and point-of-entry treatment for contaminated drinking water, aggressively recovering free product, protecting surface water bodies, indoor air remediation and mitigation of dangerous petroleum vapors.

Sites that have a direct affect on public health and the environment are the program's most critical priority and demand the greatest level of effort. These same sites also present the greatest risk to fund solvency. Over the history of the program, the sites that have affected public water supplies or sensitive environmental areas have required extensive remediation at a high cost to the PCF. A site discovered in Killington had over 80 private wells that were contaminated with a gasoline additive, MTBE. One home has had to endure the greatest disruption of use of their well, as this well was the most contaminated and at one point was used as the remediation well. As such, the owners were recently awarded a third party property damage claim of \$110,000.

Third party claims constitute an uncertain risk. Cumulative third party claims of \$5.1 million to date represent only 4.5 percent of the total motor fuel disbursements from the Fund. However, a major release in a critical area, such as a public water supply or high density residential area could result in a costly third party claim. In addition, diminutions of property value claims are difficult to predict. It is important to maintain a sufficient balance in the PCF, in excess of the required \$1 million federally mandated reserve, to ensure there are adequate funds to provide an immediate and effective response where public health is at risk.

Legislative transfer of funds continues to be a risk to fund solvency. In FY09, \$2.8 million was transferred out of the PCF and as a result some cleanups had to be delayed. According to a 2005 actuarial study, the Fund was **“projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011.”** This actuarial assessment was prior to the subsequent increases in AST heating oil releases and it did not foresee any potential legislative transfers of assets from the fund. Maintaining a healthy cash balance above the federally mandated \$1 million reserve is important to the long-term success of the fund. The \$2.8 million legislative transfer of PCF funds expands the gap between projected liabilities and fund assets.

Review of Receipts to the Fund

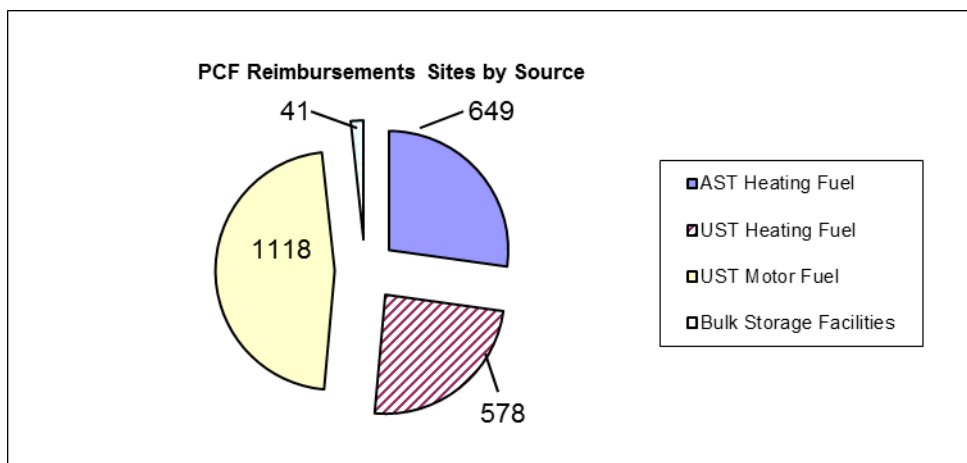

A review of fund receipts for FY12 is summarized in Attachment 1. In FY12, total fund receipts for the motor fuel account were \$4,392,864. This represents a 1 percent decline in revenue as compared to FY11. Owners of “Category One” storage tanks paid \$166,950 in tank assessment fees, which was also a reduction over past years tank assessment fees. The distributor licensing fee, a one cent per gallon assessment of all motor fuels sold in the state, contributed \$3,913,890, a slight increase over last years income. Other income includes the repayment of loans, \$224,987, and interest income of \$2,929. In addition, the state successfully recovered funds totaling \$84,107.

In FY12, total fund receipts for the heating fuel account were \$2,029,084. This includes the one cent per gallon fee on heating fuels which totaled \$1,279,084 and \$750,000 transferred from the general fund as part of the 2012 Budget Adjustment Act. This transfer was authorized to help cover the costs of responding to heating oil spills caused by Tropical Storm Irene.

Review of Disbursements from the Fund

A review of fund disbursements for FY12 is summarized in Attachments 1, 2, and 3. In FY12, motor fuel account disbursements totaled \$3,881,869 and heating fuel disbursements totaled \$2,158,656. These included \$3,340,811 for remedial action for UST motor fuel sites, \$30,850 for the UST replacement loan program, \$81,514 for the residential UST removal grant program, \$193,164 for the residential AST removal grant program, \$520,180 for remedial action for UST heating fuel sites, \$1,363,798 for remedial action for AST heating fuel sites, and \$288,726 for third party claims.

Disbursements for remediation represented a total of 2,386 different sites (Attachment 2 & 3), which includes sites where remediation occurred in prior years. The figure below provides a breakdown of the types of PCF reimbursement sites. These sites are located throughout Vermont in 196 different towns. Attachment 5 shows the distribution of these sites throughout the state.

Third party claims continue to represent a small portion of overall disbursements (five percent). At the end of FY12 the PCF has paid \$5,114,803 for all third party claims, with \$288,726 paid out in FY12.

Investing in Prevention Activities

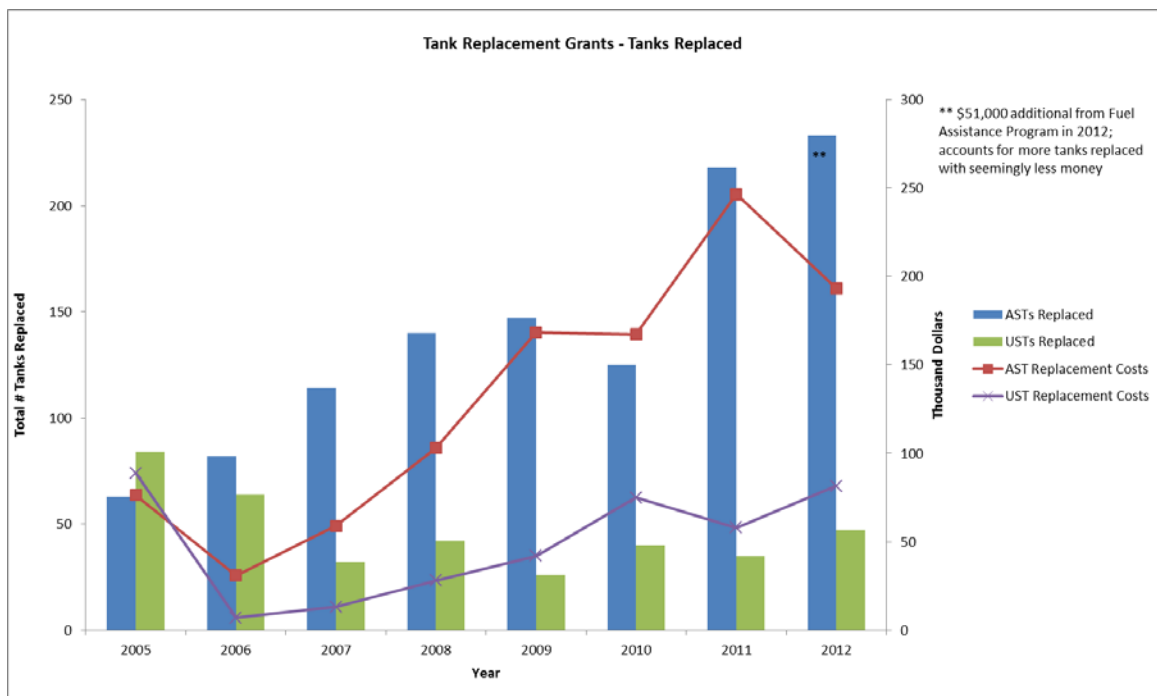

Important leak-prevention activities have been funded by the PCF over the years that have helped to mitigate risks and reduce future costs. These include providing grants to farm and residential properties to remove and replace aging aboveground and underground heating oil tanks, and providing interest free loans to upgrade underground storage tanks. With the adoption of new AST regulations in October 2011 which requires routine inspection of old tanks there has been an increase in demand for the AST replacement grant. In addition, the new requirements have increased the cost of the installation. This includes installing a concrete pad and a roof for outside tanks. Below is a picture of a new installation funded using the grant program.

2012 AST installation showing concrete pad and roof

The home heating oil tank removal grants were implemented (for USTs in 1998 and AST in 2004) to encourage the removal and replacement of aging tanks before leaks and releases occur. The average

cleanup cost for home heating USTs is \$16,083, and ASTs cleanup costs have averaged \$10,972. The committee believes these grants have been an excellent investment, as millions of dollars on cleanup costs have been avoided by removing these tanks before they leak. In total, 52 grants were approved in FY12 for the closure of residential heating oil USTs. Total reimbursement in FY12 for UST grants was \$81,514 which brings the total amount awarded for USTs since the program began to \$775,354. In addition, 251 grants were approved in FY12 for the replacement of residential heating oil ASTs. Total reimbursement in FY12 for AST grants was \$193,164 which brings the total amount awarded since the program began to \$1,098,162 in AST grant funds. In addition to these funds, the Vermont Fuel Assistance program provided an additional \$51,000 to be used for AST replacement at residential properties with low income homeowners. The demand for the AST grant program has continued to grow into the first half of FY13, with nearly the full annual \$300,000 awarded. The committee recommends increasing the annual cap to \$350,000 to ensure that ASTs get upgraded before a release occurs. In total the UST and AST grant program has funded the removal of more than 2,000 aging petroleum storage tanks. The figure below depicts the annual number of tanks removed and funds awarded from 2005-2012.

In FY12 only two UST loans were closed in the total amount of \$ 20,000. One loan was for tank removal and the other for upgrade to the tank systems corrosion protection. Five additional loan applications were processed in FY12 but each of the five tank owner chose not to close the UST loan. Two of these loans were for complete tank system replacement and the tank owners did go forward with the construction work but without the interest free loan. The first generation of double walled tanks are now 25 years old and some tank owners are interested in the loan program for upgrades to their systems but owners are reluctant to move forward with a voluntary upgrade because of the cost. The \$75,000 that is available for each facility is not enough money to cover the cost of tank replacement. As an example a small retail outlet has been approved for the \$75,000 loan to remove three small tank systems and replace with one two-compartment tank system. The quote for the construction work is over \$100,000. The cost of replacing tank systems has increased significantly in the last ten years and there is a need to increase the amount of the loan to \$150,000. The UST Program has received a number of inquiries from owners of commercial buildings, Churches and schools (public and private) who are seeking funding sources for the replacement of their large on-premises heating oil tank. To date one school district has received the interest-free loans for tank replacement and one private school will be closing a loan in December 2012. These loans are funded by the heating oil account. The agency continues to contract for services of a certified accountant to

review tank owner's financials for determination of ability to repay and suggested collateral for each loan.

Effectiveness of the Fund in Meeting Its Purpose

The fund was effectively able to meet its purpose of funding cleanups and providing financial assurance for **underground** gasoline storage tank owners in Vermont in FY12. For most of the year, there was an adequate balance in the motor fuel account and claims were processed in a timely manner. However, a number of motor fuel contaminated sites have approved corrective action plans yet are on hold due to the limited resources in the fund.

Without the addition of supplemental revenue, heating fuel cleanups would not have been properly addressed. There was an inadequate balance in the heating fuel account to cover all the costs of remediating heating fuel releases. A legislatively authorized transfer of \$750,000 from the general fund allowed for the continued cleanup at identified sites. Without this transfer, there would likely have been delays in site cleanup which would have increased the risk of exposure to petroleum contamination in the environment.

Reasonableness of the Cost of Cleanup

In past years, the committee has reviewed the written policies and procedures of the DEC related to UST replacement, eligible costs and reimbursement procedures. In assessing the reasonableness of the cost of cleanup, the committee has reviewed national averages and comparative data from other states. The PCF Advisory Committee has concluded that agency staff responsible for this program has exercised prudent cost containment measures. A review of an annual survey conducted by the Association of State Underground Storage Tank Cleanup Funds shows that Vermont's cost of cleaning up contaminated sites is below those of other states. The continued efforts of Agency staff have helped to maintain reasonable cleanup costs in Vermont.

Recommended Statutory Changes to Chapter 59

The following definitions can be found under **10 V.S.A. § 1922**. These definitions are necessary to understand the recommended statutory changes recommended below.

"Double-wall tank system" means an underground storage tank system consisting of a double-wall tank and acceptable piping.

"Combination tank system" means an underground storage tank system consisting of a single-wall tank and acceptable piping.

"Single-wall tank system" means an underground storage tank system consisting of a single-wall tank and single-wall pressurized piping.

The PCF Advisory Committee recommends the following legislative changes:

Sec. 1. 10 V.S.A. § 1927 is amended to read:

§ 1927. REGULATION OF CATEGORY ONE TANKS

* * *

(e) The following tank systems shall be closed in accordance with rules adopted by the secretary:

(1) Not later than January 1, 2016, single walled tank systems.

(2) Not later than January 1, 2018, combination tank systems, except combination tank systems where the tank has been lined which shall be January 1, 2018 or ten years from the date of lining the tank, whichever is later.

(f) For lined combination tank systems that are required to be closed in accordance with rules established by the secretary pursuant to (e)(2), the tank owner may petition the secretary to allow the tank to remain in service an additional five years. The secretary may grant the petition upon a determination that no release has occurred from the tank system, the tank system has passed an inspection for lined tank systems established by the secretary in rule, and no repairs are suggested or needed to the tank liner.

(g) After July 1, 2013, it is prohibited to line a single walled tank system.

Sec. 2. 10 V.S.A. § 1941 is amended to read:

§ 1941. PETROLEUM CLEANUP FUND

* * *

(b) The secretary may authorize disbursements from the fund for the purpose of the cleanup and restoration of contaminated soil and groundwater caused by releases of petroleum from underground storage tanks and aboveground storage tanks, including air emissions for remedial actions, and for compensation of third parties for injury and damage caused by a release. This fund shall be used for no other governmental purposes, nor shall any portion of the fund ever be available to borrow from by any branch of government; it being the intent of the legislature that this fund and its increments shall remain intact and inviolate for the purposes set out in this chapter. Disbursements under this section may be made only for uninsured costs incurred after January 1, 1987 and for which a claim is made prior to July 1, 2019 ~~2014~~ and judged to be in conformance with prevailing industry rates. This includes:

(1) costs incurred by taking corrective action as directed by the secretary for any release of petroleum into the environment from:

(A) an underground storage tank defined as a category one tank, provided disbursements on any site shall not exceed \$1,240,000.00 and shall be made from the motor fuel account, as follows:

(i) after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of double walled tank systems tanks used for commercial purposes;

(ii) after the first \$15,000.00 of cleanup costs have been borne by the owners or operators of combination tank systems, whether lined or unlined, used for commercial purposes;

(iii) after the first \$25,000 of cleanup costs have been borne by the owners or operators of lined combination tank systems when granted a five year extension to operate pursuant to 10 V.S.A. § 1927(f).

(iv) after the first \$25,000.00 of cleanup costs have been borne by the owners or operators of single walled tank systems used for commercial purposes ~~or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities equal to or less than 1,100 gallons used for farms or residential purposes. Disbursements on any site shall not exceed \$1,240,000.00. These disbursements shall be made from the motor fuel account;~~

(B) an underground motor fuel tank after the first \$250.00 of the cleanup costs have been borne by the owners or operators of tanks with a capacity equal to or less than 1,100 gallons and used for farming or residential purposes. Disbursements on any site shall not exceed \$990,000.00 and shall be made from the motor fuel account;

(C) an underground heating fuel tank used for on-premise heating after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities over 1,100 gallons used for commercial purposes, or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities equal to or less than 1,100 gallons used for commercial purposes, or after the first \$250.00 of the cleanup

costs have been borne by the owners or operators of residential and farm tanks. ~~These disbursements~~ Disbursements on any site shall not exceed \$990,000.00 and shall be made from the heating fuel account;

(D)~~(C)~~ an aboveground storage tank site after the first \$1,000.00 of the cleanup costs have been borne by the owners or operators of tanks used for commercial purposes, or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of residential and farm tanks. Disbursements under this subdivision (b)(1)~~(C)~~(D) on any individual site shall not exceed \$25,000.00. These disbursements shall be made from the motor fuel account or heating fuel account, depending upon the use or contents of the tank;

(E)~~(D)~~ a bulk storage aboveground motor fuel or heating fuel storage tank site after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of tanks used for commercial purposes. Disbursements under this subdivision (b)(1)~~(D)~~(E) on any individual site shall not exceed \$990,000.00. These disbursements shall be made from the motor fuel account;

(F)~~(E)~~ where a site is contaminated by petroleum releases from both heating fuel and motor fuel tanks, or where the source of the petroleum contamination has not been ascertained, the secretary shall have the discretion to disburse funds from either the heating oil or motor fuel account, or both;

* * *

(g) The owner of a farm or residential heating fuel storage tank used for on-premises heating or an underground or aboveground heating fuel storage tank used for on-premises heating by a mobile home park resident, as defined in section 6201 of this title, who desires assistance to close, replace, or upgrade the tank may apply to the secretary for such assistance. The financial assistance may be in the form of grants of up to \$2,000.00 or the costs of closure, replacement, or upgrade, whichever is less. Grants shall be made only to the current property owners, except at mobile home parks where a grant may be awarded to a mobile home park resident. To be eligible

to receive the grant, an environmental site assessment must be conducted by a qualified consultant during the tank closure, replacement, or upgrade if the tank is an underground heating fuel storage tank. In addition, if the closed tank is to be replaced with an underground heating fuel storage tank, the replacement tank and piping shall provide a level of environmental protection at least equivalent to that provided by a double wall tank and secondarily contained piping. Grants shall be awarded on a priority basis to projects that will avoid the greatest environmental or health risks. The secretary shall also give priority to applicants who are replacing their underground heating fuel tanks with aboveground heating fuel storage tanks that will be installed in accordance with the secretary's recommended standards. The secretary shall also give priority to lower income applicants. To be eligible to receive the grant, the owner must provide the previous year's financial information, and, if the replacement tank is an aboveground tank, must assure that any work to replace or upgrade a tank shall be done in accordance with industry standards (National Fire Protection Association, or NFPA, Code 31), as it existed on July 1, 2004, until another date or edition is specified by rule of the secretary. The secretary shall only authorize up to \$350,000.00 ~~\$300,000.00~~ in assistance for underground and aboveground heating fuel tanks in any one fiscal year from the heating fuel account for this purpose. The application must be accompanied by the following information:

* * *

Sec. 3. 10 V.S.A. § 1942 is amended to read:

§ 1942. PETROLEUM DISTRIBUTOR LICENSING FEE

(a) There is hereby established a licensing fee of one cent per gallon of motor fuel sold by a distributor or dealer or used by a user in this state, which will be assessed against every distributor, dealer or user as defined in 23 V.S.A. chapters 27 and 28, and which will be deposited into the petroleum cleanup fund established pursuant to subsection 1941(a) of this title. The secretary, in consultation with the petroleum cleanup fund advisory committee established pursuant to subsection 1941(e) of this title, shall annually report to the legislature on the balance

of the motor fuel account of the fund and shall make recommendations, if any, for changes to the program. The secretary shall also determine the unencumbered balance of the motor fuel account of the fund as of May 15 of each year, and if the balance is equal to or greater than \$7,000,000.00, then the licensing fee shall not be assessed in the upcoming fiscal year. The secretary shall promptly notify all sellers assessing this fee of the status of the fee for the upcoming fiscal year. This fee will be paid in the same manner, at the same time, and subject to the same restrictions or limitations as the tax on motor fuels. The fee will be collected by the commissioner of motor vehicles and deposited into the petroleum cleanup fund. This fee requirement shall terminate on April 1, 2021 ~~2016~~.

(b) There is assessed against every seller receiving more than \$10,000.00 annually for the bulk retail sale of heating oil, kerosene, or other dyed diesel fuel sold in this state a licensing fee of one cent per gallon of such heating oil, kerosene, or other dyed diesel fuel. This fee shall be subject to the collection, administration, and enforcement provisions of 32 V.S.A. chapter 233, and the fees collected under this subsection by the commissioner of taxes shall be deposited into the petroleum cleanup fund established pursuant to subsection 1941(a) of this title. The secretary, in consultation with the petroleum cleanup fund advisory committee established pursuant to subsection 1941(e) of this title, shall annually report to the legislature on the balance of the heating fuel account of the fund and shall make recommendations, if any, for changes to the program. The secretary shall also determine the unencumbered balance of the heating fuel account of the fund as of May 15 of each year, and if the balance is equal to or greater than \$3,000,000.00, then the licensing fee shall not be assessed in the upcoming fiscal year. The secretary shall promptly notify all sellers assessing this fee of the status of the fee for the upcoming fiscal year. This fee provision shall terminate April 1, 2021 ~~2016~~.

Sec. 4. 10 V.S.A § 1943 is amended to read:

§ 1943. PETROLEUM TANK ASSESSMENT

(a) Each owner of a category one tank used for storage of petroleum products shall remit to the secretary on October 1 of each year \$100.00 per double-wall tank system; ~~\$250.00~~ \$150.00 per combination tank system when the single walled tank has been lined and \$500.00 for all other combination tank systems; and ~~\$1,000.00~~ \$200.00 per single-wall tank system, which shall be deposited to the petroleum cleanup fund established by section 1941 of this title, except that:

(1) ~~For retail gasoline outlets that sell less than 40,000 gallons of motor fuel per month, the fee shall be:~~

~~(A) \$75.00 per double wall tank system;~~

~~(B) \$125.00 per combination tank system; and~~

~~(C) \$175.00 per single wall tank system.~~

~~(2)~~ The fee shall be reduced by 50 percent if the owner or permittee provides to the satisfaction of the secretary evidence of financial responsibility to allow the taking of corrective action in the amount of \$100,000.00 per occurrence and the compensation of third parties for bodily injury and property damage in the amount of \$300,000.00 per occurrence.

~~(3)~~ The fee shall be relieved if the owner provides to the satisfaction of the secretary, evidence of financial responsibility to allow the taking of corrective action and the compensation of third parties for bodily injury and property damage each in the amount of \$1,000,000.00 per occurrence.

~~(4) The fee for retail motor fuel outlets selling 20,000 gallons or less per month shall not exceed \$100.00 per year for all double wall tanks at a single location and shall not exceed \$300.00 for all combination tank systems at a single location. This cap shall not apply to a retail motor fuel outlet utilizing a single wall tank system.~~

~~(5) For any municipality that uses an annual average of less than 40,000 gallons of motor fuel per month, provided that all of the tanks of that municipality meet the requirements of this chapter, the fee shall be:~~

~~(A) \$50.00 per double wall tank system;~~

~~(B) \$100.00 per combination tank system; and~~

~~(C) \$150.00 per single wall tank system.~~

* * *

(c) This tank assessment shall terminate on July 1, 2019 ~~2014~~

* * *

Sec. 5. 10 V.S.A. § 1944(a) is amended to read:

(a) The secretary may make individual loans of up to \$150,000.00 ~~\$75,000.00~~ for:

(1) the replacement or removal of category one tanks used for the storage of petroleum products. These loans shall be made from the motor fuel account of the fund established under subsection 1941(a) of this title;

(2) the removal, or the replacement or improvement, or both, of piping, tank-top sumps, and other components of the secondary containment and release detection systems of category one tanks, for the purpose of reducing the likelihood of a release of regulated substance to the environment. These loans shall be made from the motor fuel account of the fund established under subsection 1941(a) of this title;

(3) the removal, replacement, or upgrade of an underground or aboveground storage tank used for the storage of petroleum products for the purpose of reducing the likelihood of a release of petroleum into the environment. These loans shall be made from the motor fuel account or heating fuel account of the fund established under subsection 1941(a) of this title, depending upon the use or contents of the tank.

Sec. 6. SINGLE WALL AND COMBINATION TANKS; TANK REMOVAL

(a) Notwithstanding the requirements of 10 V.S.A. § 1941(b)(1)(A)(iv) when a release is discovered during the closure and removal of a single wall underground storage tank, the fund may shall pay cleanup costs after the first \$10,000.00 and disbursements on any site shall not exceed \$1,240,000.00.

(b) Notwithstanding the requirements of 10 V.S.A. § 1941(b)(1)(A)(ii) when a release is discovered during the closure and removal of a combination tank system, whether lined or unlined, the fund cleanup costs after the first \$10,000.00 and disbursements on any site shall not exceed \$1,240,000.00.

Sec. 7. EFFECTIVE DATE.

Sec. 4 shall take effect on July 1, 2014.

Sec. 8. SUNSET.

(a) Sec. 6(a) shall expire on January 1, 2016.

(b) Sec. 6(b) shall expire on January 1, 2018.

For each site with an affected receptor the number of actual Vermonters exposed to contamination can vary. The actual users for public water supplies can be as low as 25 people per system to as high as many thousands of users. For sites with affected private water supplies, the number of contaminated wells depends on the specific conditions of the site. On average there are approximately three contaminated wells discovered per site, with an average of 3 users per household. However, one of the 161 sites listed above involved contamination to over 80 wells affecting approximately 240 users, and a site discovered in 2002 involves contamination to over 30 wells, including a public water supply, affecting hundreds of users. Sites with surface water impacts can affect both public health and the environment. High concentrations of petroleum in a stream can cause detrimental affects to biota, and lead to an increased exposure to stream users. Lastly, sites with indoor air impacts can lead to the greatest risk to public health. Petroleum vapors entering a home can be at levels that are explosive. More often petroleum vapors reach levels that pose a serious health risk. Of the 141 sites with indoor air impacts, the number of exposed individuals varied from site to site. An average site involves three homes affected with approximately three persons per home.

Sites that are discovered with contamination affecting a sensitive receptor requires immediate response. It is critical that the Petroleum Cleanup Fund maintain an adequate balance so that there are no delays in efforts to mitigate the serious public health and environmental threats presented at these sites.
