Appendix C

IDENTIFYING ARCHITECTURAL PAINT PRODUCTS UNDER PAINTCARE For Manufacturers and Collection Sites

Architectural paint is defined under the Paint Stewardship Program as:

Interior and exterior architectural coatings sold in containers of five gallons or less.

Architectural paint does not include:

Industrial maintenance (IM), original equipment manufacturer (OEM) or specialty coatings.

In order to distinguish between what is an architectural coating under the Paintcare program, definitions and terminology from the U.S. Environmental Protection Agency, California Air Resources Board and other state and local Architectural and Industrial Maintenance (AIM) rules were used to develop the following list. The decision table page 2 uses the definitions on page 3.

Program Products (maximum container size of 5 gallons):

1. Water-based paint (Interior and exterior): latex, acrylic
2. Oil-Based paint (Interior and exterior): alkyd, enamel
3. Clear Coatings: Shellac, Lacquer, Varnish, Urethane
4. Deck coatings and floor paints (including elastomeric)
5. Field and lawn marking coatings
6. Melamine/metal coatings and rust preventative
7. Primers, sealers and undercoaters
8. Sealers
9. Stains
10. Water repellents (not-tar-based or bitumen-based)
11. Waterproofing sealers for concrete, masonry, and wood

Non-Program Products (regardless of container size):

1. Empty, leaking or unlabeled containers
2. Industrial Maintenance (IM) coatings labeled as:
(a) For industrial use, (b) Professional use, or (c) Not for residential use
3. Original Equipment Manufacturer (OEM) (shop application) paints and finishes
4. Aerosol paint (spray cans)
5. Automotive paints
6. Marine paints
7. Arts and Craft paints
8. Caulking compounds, epoxies, glues or adhesives
9. Drywall / joint compounds
10. Semi-solid products: spackle, patching compounds for roofing, stucco, wood, etc.
11. Paint additives, colorants and tints
12. Resins
13. Paint thinners, solvents, mineral spirit
14. Wood preservatives containing pesticides
15. Tar, asphalt or bitumen based products
16. Two-component coatings (epoxy)
17. Deck cleaners
18. Other non-coating products (motor oil, pesticides, cleaning solutions)

Decision Table for Identifying Architectural Paint Products for Manufacturers and Collection Sites

1. Is it a coating?

If YES, go to 2. If NO, it is not in the program.

These non-coatings are excluded:

Paint thinner	Solvents
Wood preservatives	Mineral spirits
Wood treatment oils	Deck cleaners
Drywall compounds	Epoxies, glues
Roof patch, stucco patch	Wood patch
Caulking compounds	Adhesives

Manufacturers: Non-coatings are not assessed

Collection Sites: Non-coatings are not acceptable.

2. Is it an architectural coating?

If YES, go to 3. If NO, it is not in the program.

These non-architectural paints are excluded:

Auto paint Marine paint Aerosols

Manufacturers: Coatings that are not architectural are not assessed a fee.

Collection Sites: Coatings that are not architectural are not acceptable.

3. Is it an industrial maintenance (IM) coating?

If NO, go to step 4. If YES, then it is not in the program.

Products with these labels are excluded:

Professional use only Not for residential use
For industrial use only

Manufacturers: IM coatings are not assessed.

Collection Sites: IM coatings are not acceptable.

4. Is it for Original Equipment Manufacturing (OEM)?

If NO, go to step 5. If YES, then it is not in the program.

Manufacturers: If a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

Collection Sites: A collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

5. Is it a specialty coating or specifically excluded?

If NO, then it is in the program. If YES, then it is not in the program.

These are excluded:

Products in containers larger than 5 gallons
Aerosol (spray) cans
Craft paints
Two component coatings (epoxy)
Tar, asphalt, bitumen-based coatings
Resins
Paint tints, colorants, additives
Wood preservatives containing pesticides

Manufacturers: Excluded products are not assessed a fee

Collection Sites: Excluded products are not acceptable at collection sites.

DEFINITIONS

I. Architectural Coatings

Architectural coating means a coating recommended for application to stationary structures and their appurtenances, portable buildings, pavements, curbs, fields and lawns. This definition excludes adhesives, aerosols and coatings recommended by the manufacturer or importer solely for shop applications or solely for application to non-stationary structures, such as airplanes, ships, boats, and railcars.

II. Industrial Maintenance Coatings

Industrial Maintenance (IM) coating means a high performance architectural coating, including primers, sealers, undercoaters, intermediate coats, and topcoats formulated and recommended for application to substrates exposed to one or more of the following extreme environmental conditions in an industrial, commercial, or institutional setting:

1. Immersion in water, wastewater, or chemical solutions (aqueous and non-aqueous solutions), or chronic exposure of interior surfaces to moisture condensation;
2. Acute or chronic exposure to corrosive, caustic, or acidic agents, or to chemicals, chemical fumes, or chemical mixtures or solutions;
3. Repeated exposure to temperatures above 120 °C (250 °F);
4. Repeated (frequent) heavy abrasion, including mechanical wear and repeated (frequent) scrubbing with industrial solvents, cleansers, or scouring agents; or
5. Exterior exposure of metal structures and structural components.

One of the primary ways AIM rules distinguish IM coatings from other architectural coatings is the manufacturer's recommendation for restricted usage. IM coatings must be labeled under the rules as:

1. "For industrial use only."
2. "For professional use only."
3. "Not for residential use" or "Not intended for residential use."

Thus, if the product is not intended for and not labeled as an IM coating, it should be deemed a

covered architectural coating and the fee should be assessed, unless it is specifically excluded (see below).

III. Original Equipment Manufacturer (OEM) Coatings

Shop application means that a coating is applied to a product or a component of a product in a factory, shop, or other structure as part of a manufacturing, production, finishing or repairing process (e.g., original equipment manufacturing coatings).

Since OEM (shop application) coatings may be intended but not labeled for industrial or professional use, and may be sold in containers of 5 gallons or less, then...

For manufacturers:

...if a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

For collection sites:

...a collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

IV. Specialty Coatings

Lastly, in order to identify Specialty or Special Purpose Coatings, we have used the definition from the Federated Society of Coating Technology's Coatings Encyclopedic (since AIM rules don't have a definition), which states that these coatings include aerosols, crafts paints.

Drywall Primer-Surfacers

June 2012

Purpose

The purpose of this notice is to clarify that “Drywall Primer-Surfacers” are included in the PaintCare Program. As part of the Program, manufacturers of these products must register with PaintCare and collect and remit the Assessment (“PaintCare Recovery Fee”) as with other architectural paints in states with active Paint Stewardship programs (Oregon is currently active, California is anticipated to start in Fall 2012, Connecticut is anticipated to start in 2013).

Background

In order to assist companies with determining what coatings were architectural coatings subject to the PaintCare Recovery Fee for the Oregon program and what coatings were not, PaintCare developed a factsheet detailing what factors should be taken into consideration when making these determinations. In addition, the factsheet listed examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare, however, relies on individual manufacturers to determine what products are part of the program and what products are not, depending on their specific product lines. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of Drywall Primer-Surfacers, based on these calls, it has come to our attention that some manufacturers were assessing the fee believing they were program products and some were not assessing the fee believing that they were non-program products. It appears that confusion arose when trying to distinguish drywall primer from drywall compound.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is indeed placed on all program products subject to the assessment, PaintCare herein clarifies that Drywall Primer-Surfacer is considered a program product and the PaintCare Recovery Fee must be assessed and remitted by all manufacturers of Drywall Primer-Surfacers. The reason for including this category under the architectural coatings that are subject to the program is as follows:

- The Drywall Primer-Surfacer products are primers. Primers are considered architectural coatings.
- MSDS sheets, either in their title and or elsewhere in the product description, for these products indicate that they are paint or primers.
- MSDS sheets indicate that they contain some type of binder or resin.

- Marketing information published by manufacturers for their own products indicate that they are vapor barriers or coatings.
- Information published by manufacturers for their own products indicate that they are vinyl, acrylic, and/or latex-based.
- Competitors have reported that they make and sell equivalent products that are not excluded by PaintCare.
- Consumers with leftover/unwanted Drywall Primer-Surfacers may bring them to a PaintCare collection site for proper recycling/disposal.

Action

Starting August 1, 2012, manufacturers of “Drywall Primer-Surfacers” need to ensure that these products are registered with PaintCare and add the PaintCare Recovery Fee to the wholesale price of these products to all distributors and retailers. Manufacturers are not required to pay the fee on past sales because the fees were not charged to distributors, retailers, or consumers.

Masonry and Concrete Sealers labeled “For Professional Use Only”

Purpose

The purpose of this notice is to clarify that masonry and concrete sealers that are labeled “for professional use” are excluded from the PaintCare Program. Manufacturers of these products are not required to register with PaintCare and they are not required to collect and remit the Assessment (“PaintCare Recovery Fee”) in California or Oregon, the two states with active Paint Stewardship programs implemented by PaintCare.

Background

In order to assist companies with determining what products are architectural coatings subject to the PaintCare Recovery Fee for the Oregon and California programs and what products are not, PaintCare developed a definition of architectural paint detailing what factors should be taken into consideration when making these determinations. In addition, the definition lists examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare relies on individual manufacturers to determine which, if any, of their products are part of the program. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of products used as sealers for masonry and concrete — and based on inquiries from many industry representatives and manufacturers of these products — it has come to our attention that manufacturers of these sealers desire clarification on whether their products are considered architectural coatings for the purposes of active and future state PaintCare programs.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is placed on all program products subject to the assessment, PaintCare herein clarifies that masonry and concrete sealers labeled for professional use are not considered program products and the PaintCare Recovery Fee is not required to be assessed and remitted by manufacturers of these products. Excluding these products from the definition of architectural coatings is based on the following:

- Originally PaintCare’s definition excluded products that are both (1) Industrial Maintenance Coatings and (2) labeled “for professional use only.” [Other acceptable phrases are (a) for industrial use only, (b) not for residential use, and (c) not intended for residential use].
- The definition of an IM coating varies somewhat from one state to another and from one regulatory air district to another. Generally, determining if a coating meets the criteria for IM is

based on the manufacturers recommended use for the product and whether it meets any one of certain criteria (simply put these criteria are: regular exposure to heat, chemicals, moisture, or abrasion). Masonry sealers are intended to act as waterproofing agents and are applied where water exposure is anticipated. Thus as a category they can generally be considered by manufacturers to be IM coatings and therefore meet the first criteria.

- Some manufacturers label these products for professional use. Others do not label them for professional use. There is no prohibition on a manufacturer from labeling a product for professional use. Therefore if a manufacturer chooses to change the product label on a product that they consider IM in order to also comply with the second criteria above (in the first bullet), they may do so in order to have these products excluded from the PaintCare Program. The manufacturer may change their regular container label or use an additional sticker.
- If PaintCare finds that manufacturers start to change their labels on other products that are clearly not for professional use or industrial maintenance coatings (e.g. house paint), the professional use labeling will not exclude such products.
- An important purpose of the paint stewardship programs is to collect and recycle unused paint, stains, and coatings that are normally managed through government-sponsored household hazardous waste (HHW) programs. Sealers for masonry and concrete are not known to be a problem at HHW programs.

Conclusion

Concrete and masonry sealers that are IM coatings and labeled for professional use using one of the phrases indicated above are categorically exempt from PaintCare.

Appendix D

Vermont Paint Stewardship Program

Information for HHW Programs

Vermont's paint stewardship law benefits Household Hazardous Waste Programs.

A law passed in June 2013 requires paint manufacturers to establish a Paint Stewardship Program in Vermont. Municipal Household Hazardous Waste Programs that participate can save money on paint management costs. Program funding comes from an "PaintCare Recovery Fee" on the sale of architectural paint sold in Vermont starting when the program begins in the spring 2014.

Paint Stewardship Program in Vermont

PaintCare Inc. is a non-profit 501(c)(3) organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in each state that adopts a paint stewardship law.

Vermont is the sixth state to pass such a law. Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in Oregon, California and Connecticut, and programs are being planned for Vermont, Rhode Island, Minnesota and Maine.

When Does the Program Begin?

The Program must begin on or before July 1, 2014; PaintCare aims to begin the program on May 1, 2014. A detailed Stewardship Plan must be submitted by PaintCare, on behalf of paint manufacturers, to the Vermont Department of Natural Resources on December 1, 2013. The Department must approve the Plan for the Program to begin.

Making Paint Recycling More Convenient

PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint.

Although most drop-off sites will be at paint retailers, municipal household hazardous waste (HHW) programs and waste transfer stations may also volunteer to be PaintCare drop-off sites and have their paint transportation and recycling/disposal costs paid by PaintCare.

Benefits to HHW Programs

- Make recycling of leftover paint more convenient
- Save on transportation and recycling/disposal
- Conserve resources and keep paint out of the solid waste stream
- Allow residents to bring paint with other HHW in one trip to one site

PaintCare Partners Receive

- Collection bins
- Transportation and recycling/disposal services
- Staff training at your site
- Program guidelines
- Free publicity of HHW site or event (optional)

MORE INFORMATION:

(855) 724-6809 or (855) PAINT09
www.paintcare.org or info@paintcare.org

PAINTCARE INC.
1500 RHODE ISLAND AVENUE N.W.
WASHINGTON, DC 20005

Drop-off Site Responsibilities

- Provide secure storage area for collection bins (cubic yard boxes or drums)
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork related to tracking outgoing paint shipments
- Ensure staff are trained in PaintCare program guidelines and operating procedures

Will PaintCare Require Operational Changes?

- If your program does not currently accept latex paint, PaintCare will not require you to do so. If you wish to start accepting latex paint, PaintCare will cover the transportation and disposal costs.
- If your program does not currently accept paint from businesses, PaintCare will not require you to do so. If you wish to start accepting paint from businesses, PaintCare will cover the transportation and disposal costs.
- PaintCare may choose to only contract with one transporter to pick up paint from all PaintCare sites in the state, whether retail or HHW. If your current hazardous waste transporter is not the same company, a second hauler may transport paint from your event or facility.

Water-Based (Latex) Paint is a Resource

An important goal of the PaintCare Program is to conserve resources and increase the volume of paint that is recycled. Not all HHW programs accept water-based paint because it is expensive to manage and is not classified as hazardous. Residents and businesses are often instructed to let water-based paint dry out and then dispose of the dry paint in the trash. Through the PaintCare program, all paint including latex will be treated as a resource and recycled to the maximum extent possible.

What Products are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings. Here are examples:

PROGRAM PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PROGRAM PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

WASHINGTON, DC 20005

October 2013

RE: Vermont Paint Stewardship Law

Dear Vermont Paint Retailer:

Enclosed are materials to inform you and your customers about a new law and program to make it more convenient to recycle unused paint in Vermont. PaintCare runs similar programs in California, Connecticut and Oregon; we are also planning programs for Rhode Island, Minnesota and Maine. The Vermont program is expected to start May 1, 2014.

Factsheet and Webinars for Retailers. This enclosed factsheet introduces how the program works and how it affects your business. In addition to providing print materials, PaintCare will host webinars for retailers before the program launches. We encourage your participation. These webinars will explain the program, review the responsibilities of retailers under the law, and provide you with an opportunity to ask questions. The first two webinars are next month:

Webinar 1. Tuesday, November 5, 1-2 pm

Webinar 2. Thursday, November 7, 10-11 am

To sign up for a webinar, please go to: www.paintcare.org/nextstates/#vermont

Factsheet for Trade Painters. Enclosed are copies of a factsheet we developed at the request of other retailers to help answer common questions from professional painters. Some retailers hand these out at the counter; others insert them with monthly statements. The most common questions you may receive will be about the new fees that will be applied to the purchase price of new paint when the PaintCare program starts. The fee amounts will not be known until the Vermont Agency of Natural Resources approves the Program Plan that PaintCare will submit to them on December 1, 2013.

Although it would be better to inform the public about both the fee amounts and how the program works at the same time, the time that it takes for the Program Plan to be approved leaves too little lead time for professional painters who plan jobs well ahead of time. Therefore, while we work out what the actual fees will be, we are starting outreach for trade painters now, and we suggest that they discuss the pending fees in advance with their customers to allow for an adjustment to any quotes or job bids for future projects. We anticipate the fees in Vermont to be similar to those in the other states – 35 cents per quart container; 75 cents per one-gallon container; and \$1.60 per five-gallon container – however, we will not be certain about the fees until the Program Plan is finalized, submitted, and approved by the state, which we anticipate being done in early in 2014.

We look forward to working with you to establish a successful and convenient program for Vermont. For more information, please visit our website at www.paintcare.org or call us at 855-724-6809.

Sincerely,

Marjaneh Zarrehparvar
Executive Director

Enclosures

Vermont's Paint Stewardship Program starts in May 2014

How will the Vermont Paint Stewardship Program Affect Paint Retailers?

Paint Stewardship Programs in the United States

For several years the American Coatings Association (ACA) has worked with stakeholders interested in the management of leftover paint. This work has led to development of an industry-led paint stewardship program for the United States.

PaintCare Inc., a non-profit organization, was established by the ACA to implement this program on behalf of paint manufacturers in each "PaintCare State" (those that adopt paint stewardship laws). PaintCare currently operates in Oregon, California, and Connecticut and is planning programs for Rhode Island, Vermont, Minnesota, and Maine.

Starting on May 1, 2014, Vermont retailers will be required to add a fee to the architectural paint products they sell, and to make sure they are not selling unregistered brands. Serving as a drop-off site is optional.

Providing Convenient Paint Recycling

PaintCare's major effort is to establish paint drop-off sites throughout each PaintCare state, at paint retailers and other locations, in order to provide convenient recycling opportunities. Other locations are often waste transfer stations and municipal household hazardous waste facilities. As of October 2013, there are more than 100 drop-off sites in both Oregon and Connecticut, and more than 500 in California.

ROLES OF RETAILERS

Participation as a Drop-Off Site is Voluntary

Most retailers who wish to serve as drop-off sites are able to do so if they have space and can provide minimal staff time to accept paint from the public. By doing so, retailers increase foot traffic and sales and provide an environmentally-beneficial service to their community. They make recycling of leftover paint convenient for their customers and help relieve local governments who are often managing leftover paint. PaintCare provides storage bins, site training, and support; promotes the sites to the local community; and pays for paint transportation and recycling.

Check Registered Manufacturers & Brands

Under the program, paint manufacturers must register their company and the brands they sell into Vermont. Retailers may not sell architectural paints that are not registered. PaintCare and the state will publish lists of registered manufacturers and brands on their websites so that retailers can confirm that the products they sell are registered.

Pass on the Assessment Fee

As required by law, a fee must be assessed and added to the wholesale price of architectural paint sold into Vermont. This fee pays for all aspects of running the program. The fee is paid by manufacturers to PaintCare and then passed to their dealers. Retailers will see this fee on invoices from suppliers starting on the first day of the program. The law also requires that retailers and distributors add the fee to the purchase price of architectural paint. The fee paid by the consumer to the retailer offsets the fee charged by the manufacturer or distributor to the retailer. All manufacturers, distributors, and retailers selling architectural paint in the state must pay and pass through the PaintCare Recovery Fee, ensuring a level playing field for all affected parties.

COMMON QUESTIONS ABOUT FEES

How much are the fees?

Although fees may change and vary by state, currently fees in the three states with active programs are the same. Fees are per container and based on container size as follows:

CONTAINER SIZE	FEE
half pint or less	\$ 0.00
more than half pint and less than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
more than 1 gallon up to 5 gallons	\$ 1.60

Note: The fees in Vermont may be different than those of the three current states.

When will fees for Vermont be known?

Fees will be proposed in PaintCare's Program Plan to be submitted on December 1 of this year and approved by the Vermont Agency of Natural Resources within 90 days.

How will the fees be calculated?

Fees are set to cover the cost of a fully operating program on a state-by-state basis. Working with paint manufacturers, PaintCare will estimate the annual sales of architectural paint in Vermont and divide the estimated total cost of the program by the number of containers to be sold in the state – taking into account the typical amount of leftover paint for each size container. Since PaintCare is a non-profit organization, eventually the fees may be decreased if they were set at a level higher than what is needed to cover expenses, or fees may be increased if they were set too low and do not cover the expenses.

Is the fee a deposit to be returned to customers?

No, the fee is not a deposit. The fees are used entirely to cover the cost of running the program. The retailer is not collecting the fee, but merely recovering their costs by adding it to the retail price.

Must we show the fee on receipts?

No, but many stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as "PaintCare Recovery Fee" to ensure transparency and aid in customer education.

Do we return the fee if a product is returned?

Yes, the fee should be returned because it is part of the purchase price.

Is sales tax applied to the fee itself?

Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

Do we add the fee on sales on the first day of the program for inventory purchased before the first day of the program, even though we didn't pay a fee on it to the distributor or manufacturer?

Yes, in order to provide for a hard start date, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the distributor or manufacturer.

How will the public know about the fee?

PaintCare provides printed materials to retailers to help explain the purpose of the fee, how the program works, and how to find a paint drop-off site. Before the program starts, PaintCare provides a free "starter pack" of public information materials to all paint retailers. Additional materials can be ordered as needed for no charge.

How do I know which products have fees?

Your supplier's invoice will indicate that you are being charged the fee, so you simply pass on the fee for those items. PaintCare and each state's oversight agency post lists of registered paint manufacturers and brands on their websites. Please visit paintcare.org for examples of registration lists of active state programs.

What Products Are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

Program Products

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-Program Products

These products have no fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Note: Leaking, unlabeled and empty containers are not accepted at drop-off sites.

Vermont Paint Recycling Program Information for Trade Painters

A new Vermont law affecting trade painters takes effect in 2014.

The new law requires paint manufacturers to establish a paint stewardship program in Vermont. The program is funded by a fee on each container of architectural paint sold in the state. The program will set up drop-off sites at retail stores and other sites throughout the state where residents and businesses will be able to take most leftover paint for recycling, free of charge. The program is expected to begin in May 2014.

Paint Stewardship Led by Industry

The American Coatings Association (ACA) worked with various stakeholders interested in the management of postconsumer paint to develop a Paint Stewardship Program in the United States. PaintCare Inc. is a non-profit 501(c)(3) organization established by the ACA to implement the program on behalf of paint manufacturers in states that adopt paint stewardship laws. These states include California, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont.

The main goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in each state.

The program in Vermont is expected to start in May 2014, following approval of a state-required Program Plan to be submitted by PaintCare to the Vermont Agency of Natural Resources by December 1, 2013. Although the program is required by state law, it is designed and operated by the paint manufacturing industry through PaintCare.

PaintCare Recovery Fee and Funding

When the program starts, a paint stewardship assessment ("PaintCare Recovery Fee") must be added by manufacturers to the wholesale price of all architectural paint sold in Vermont. This fee funds the transportation, recycling, and proper disposal of architectural paint. It also pays for consumer education and administrative costs. The law requires retailers and distributors to include the fee in the price of architectural paint. Showing the fee on customer receipts is not mandatory; however, PaintCare encourages retailers to do so to ensure consumers are aware of the fee and inform them about the program.

The fee amounts in Vermont will be proposed in PaintCare's Program Plan. Once the Plan is approved by the state, the fees will be known and PaintCare will make that information available to trade painters and other stakeholders. Fees must be added to the price of paint when the program starts. Fees will vary by container size.

Advance Notice for Trade Painters

It is expected that trade painters will pass the fees on to their customers. If you are estimating jobs for which architectural paint will be purchased after the program starts, you should take these fees into account by checking with your suppliers to make sure the quotes for paint products include the fees.

Since fees may not be known in time for bids on future jobs, PaintCare suggests that painters discuss these fees with customers in advance and incorporate language into bids and contracts to allow for an adjustment to the contract price once the fees are known and approved by the state. Copies of this notice are available at www.paintcare.org to provide to customers.

New Paint Drop-Off Sites

PaintCare will establish paint drop-off sites across the state. Most drop-off sites will be at paint retail stores. Other sites may be solid waste transfer stations, recycling centers, and government-run household hazardous waste programs. Participation as a drop-off site is voluntary.

Use of Retail Collection Sites by Businesses

Retail sites will provide a convenient and no cost recycling option for trade painters and other businesses. CESQG* businesses will be able to use these sites to recycle all program products (both water and solvent-based) with some restrictions on quantities per month. Larger businesses (those that generate more than 220 pounds of hazardous waste per month) will be able to use the PaintCare sites for their water-based program products only; they will not be able to use the sites for their solvent-based program products.

Pick-Up Service for Large Volumes

Businesses with at least 300 gallons of postconsumer paint to recycle may qualify to have their paint picked directly from their site at no additional cost. This includes old and accumulated paint. Once the program starts, call (855) 724-6809 to learn more or to request this service.

**A Conditionally Exempt Small Quantity Generator or CESQG is a business that generates less than 220 pounds of hazardous waste per month. (220 pounds is about 20-30 gallons, depending on the product type.) Most small to medium-sized trade painters are CESQGs. Note: Latex paint is not a hazardous waste in Vermont and does not count toward the 220 pound limit.*

What Products are Covered?

Architectural paints (“Program Products”) are interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), or specialty coatings. Examples are below.

PROGRAM PRODUCTS

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PROGRAM PRODUCTS

These products do not have fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

RE: Vermont Paint Stewardship Law

Dear Vermont Paint Retailer:

Enclosed is a factsheet to inform you about a new law and program to make it more convenient to recycle unused paint in Vermont. PaintCare runs similar programs in California, Connecticut and Oregon, and we are also planning programs for Rhode Island, Minnesota and Maine.

The Vermont program is expected to start May 1, 2014.

Updated Factsheet

This is the second mailing we are sending to Vermont paint retailers. The first mailing sent in October contained a similar Retailer Factsheet. However, the first factsheet left off an important requirement of the state law – that retailers must provide consumers information about the program. The enclosed updated factsheet discusses this requirement and explains that consumer materials will be provided free of charge by PaintCare to all paint retailers.

Information for Trade Painters

Also enclosed is a copy of our updated Trade Painter Factsheet. In our previous mailing, we sent 25 copies to each store. If you didn't receive the previous mailing and/or if you would like additional copies, please contact me and I will provide as many as you need.

This factsheet was developed at the request of paint retailers in our other program states to help answer common questions from professional painters. Some retailers hand these out at the counter; others insert them with monthly billing statements. The most common questions you are likely to receive will be about the new fees that will be applied to the purchase price of new paint when the program starts. The updated factsheet contains the fees proposed to the state. We expect fees to be approved and official in March. We suggest that trade painters discuss the fees in advance with their customers to allow for an adjustment to any quotes or job bids for future projects.

We look forward to working with you to establish a convenient and successful postconsumer paint management program for Vermont. For more information, please visit our website at www.paintcare.org or contact me at (802) 245-4821 or by email at jhurd@paint.org.

Sincerely,

John Hurd
Vermont Program Manager

Vermont's Paint Stewardship Program starts in May 2014

How will the Vermont Paint Stewardship Program Affect Paint Retailers?

Paint Stewardship Programs in the United States

For several years the American Coatings Association (ACA) has worked with stakeholders interested in the management of leftover paint. This work has led to development of an industry-led paint stewardship program for the United States.

PaintCare Inc., a non-profit organization, was established by ACA to implement this program on behalf of paint manufacturers in each "PaintCare State" (those that adopt paint stewardship laws). PaintCare currently operates in Oregon, California, and Connecticut and is planning programs for Rhode Island, Vermont, Minnesota, and Maine.

Starting on May 1, 2014 Vermont paint retailers will be required to add a fee to the architectural paint products they sell, make sure they are not selling unregistered brands, and provide customers information about the program. Serving as a drop-off site is optional.

Convenient Paint Recycling

PaintCare's major effort is to establish paint drop-off sites throughout each PaintCare state – at paint retailers and other locations – in order to provide convenient recycling opportunities for the public. Other locations include waste transfer stations and municipal household hazardous waste facilities and events. As of January 2014, there are more than 100 paint drop-off sites in both Oregon and Connecticut, and more than 500 in California.

Participation as a Drop-Off Site is Voluntary

Most retailers who wish to serve as drop-off sites are able to do so if they have space and can provide minimal staff time to accept paint from the public. By doing so, retailers increase foot traffic and sales, and they provide an environmentally-beneficial service to their community. They make recycling of leftover paint convenient for their customers and help relieve local governments that manage leftover paint. PaintCare provides storage bins, site training, and support; promotes the sites to the local community; and pays for paint transportation and recycling.

REQUIREMENTS OF RETAILERS

1. Check Registered Manufacturers & Brands

Under the program, paint manufacturers must register their company with PaintCare and list the brands they sell in Vermont. Retailers may not sell architectural paints that are not registered. PaintCare and the Vermont Agency of Natural Resources will publish lists of registered brands and manufacturers on their websites so that retailers can confirm that the products they sell are registered.

2. Pass on the Assessment Fee

As required by law, when the program starts, a fee must be assessed and added to the wholesale price of architectural paint sold in Vermont. This fee pays for all aspects of running the program. The fee is paid by manufacturers to PaintCare and then passed to their dealers. Retailers will see the "PaintCare Recovery Fee" on invoices from suppliers starting on the first day of the program. The law also requires that retailers and distributors add the fee to the purchase price of architectural paint. The fee paid by the customer to the retailer offsets the fee charged by the manufacturer or distributor to the retailer. All retailers, distributors, and manufacturers selling architectural paint in the state must pay and pass through the fee, ensuring a level playing field for all parties.

3. Provide Information to Customers

Paint retailers must provide customers with information regarding the program and how paint is managed. PaintCare will develop the materials, ensure they meet the state's requirements, and provide them free of charge to all paint retailers.

COMMON QUESTIONS ABOUT FEES

How much are the fees?

Although fees may change and vary by state, fees in the three states with active programs are the same, and PaintCare has proposed the same fees in Vermont.

CONTAINER SIZE	FEE
half pint or less	\$ 0.00
more than half pint to less than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
more than 1 gallon up to 5 gallons	\$ 1.60

When will fees for Vermont be known?

The above fee structure has been proposed in PaintCare's Program Plan. The Plan was submitted in early December to the Vermont Agency of Natural Resources. The Agency is expected to approve the Plan and fee structure in March.

How will the fees be calculated?

Fees are set to cover the cost of a fully operating program on a state-by-state basis. PaintCare estimated the annual sales of architectural paint in Vermont and divided the estimated total cost of the program by the number of containers to be sold in the state – taking into account the typical amount of leftover paint for each size container. Since PaintCare is a nonprofit organization, the fees may be decreased in the future if they were set at a level higher than what is needed to cover expenses, or fees may be increased if they were set too low and do not cover expenses.

Is the fee a deposit to be returned to customers?

No, the fee is not a deposit. Fees are used entirely to cover the cost of running the program and not given back as a deposit for the return of paint or empty paint cans – a common misunderstanding.

Must we show the fee on receipts?

No, but in other states, most stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as "PaintCare Recovery Fee" to aid in customer education and to ensure consistency and transparency.

Do we return the fee if a product is returned?

Yes, the fee should be returned because it is part of the purchase price.

Is sales tax applied to the fee itself?

Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

Do we apply the fee to sales on the first day of the program for inventory purchased before the first day of the program, even though we didn't pay a fee for the product to the distributor or manufacturer?

Yes, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the distributor or manufacturer.

How will the public know about the fee?

PaintCare provides printed materials for retailers to distribute to the public to help explain the purpose of the fee, how the program works, and how to find a paint drop-off site. Before the program starts, PaintCare provides a free "starter pack" of public information materials to all paint retailers. Additional materials can be ordered as needed for no charge.

How do I know which products have fees?

Invoices from your suppliers will show fees for program products, so you simply pass on the fees for those items. PaintCare and the Agency of Natural Resources will also post lists of registered paint manufacturers and brands on their websites – fees should be included on these products. Please visit www.paintcare.org for examples of registration lists of active state programs.

What Products Are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

Program Products

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

⊘ Non-Program Products

These products have no fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Note: Leaking, unlabeled and empty containers are not accepted at drop-off sites.

Vermont Paint Recycling Program Information for Trade Painters

A new Vermont law affecting trade painters takes effect in May 2014.

The new law requires paint manufacturers to establish a paint stewardship program in Vermont. The program is funded by a fee on each container of architectural paint sold in the state. The program will set up drop-off sites at retail stores and other sites throughout the state where residents and businesses will be able to take most leftover paint for recycling, free of charge.

Paint Stewardship Led by Industry

The American Coatings Association (ACA) worked with various stakeholders interested in the management of postconsumer paint to develop a Paint Stewardship Program in the United States. PaintCare Inc. is a non-profit 501(c)(3) organization established by ACA to implement the program on behalf of paint manufacturers in states that adopt paint stewardship laws. These states include California, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont.

The main goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in each state.

Vermont's program is expected to begin on May 1, 2014, following approval of PaintCare's Program Plan by the Vermont Agency of Natural Resources. Although the program is required by state law, it is being designed and operated by the paint manufacturing industry.

PaintCare Recovery Fee and Funding

As required by the law, on May 1, 2014, a paint stewardship assessment fee ("PaintCare Recovery Fee") must be added by manufacturers to the wholesale price of all architectural paint sold in Vermont. This fee is paid by manufacturers to PaintCare to fund setting up drop-off sites for leftover, postconsumer architectural paint, and for the transportation, recycling, and proper disposal of that paint. It also pays for consumer education and program administrative costs.

The fees are based on container size as follows:
(Fees are the same in California, Connecticut, and Oregon.)

Half pint or less	\$ 0.00
More than half pint to less than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
More than 1 gallon to 5 gallons	\$ 1.60

The law also requires that each distributor and retailer include the PaintCare Recovery Fee with their sale price of architectural paint sold in Vermont. While displaying the fee on invoices and receipts is not mandatory for distributors or retailers, PaintCare encourages this action, and for the fee to be listed as "PaintCare Recovery Fee" to aid in customer and dealer education and to ensure transparency.

Advance Notice for Trade Painters

It is expected that trade painters will pass the fees on to their customers in order to recoup the fees they paid on the product.

If you are estimating job costs for which architectural paint will be purchased after May 1, 2014, you should take these fees into account by checking with your supplier to make sure the quotes for paint products include the fees. You should also let your customers know that you will be including these fees in your quotes.

New Paint Drop-Off Sites

PaintCare will establish paint drop-off sites across the state. Most drop-off sites will be at paint retail stores. Others sites may include solid waste transfer stations, recycling centers, and government-sponsored household hazardous waste programs. Participation as a drop-off site is voluntary.

Use of Retail Drop-Off Sites by Businesses

Retail sites will provide a convenient and no cost recycling option for trade painters and other businesses. CEG* businesses will be able to use these sites to recycle all program products (both water and solvent-based) with some restrictions on quantities per month. Larger businesses (those that generate more than 220 pounds of hazardous waste per month) will be able to use the PaintCare sites for their water-based program products only; they will not be able to use the sites for their solvent-based program products.

**A Conditionally Exempt Generator or CEG is a business that generates less than 220 pounds of hazardous waste per month. (220 pounds is about 20-30 gallons, depending on the product type.) Most small to medium-sized trade painters are CEGs. Note: Latex paint is not a hazardous waste in Vermont and does not count toward the 220 pound limit.*

Pick-Up Service for Large Volumes

Businesses with at least 300 gallons of postconsumer paint to recycle, may qualify to have their paint picked up by PaintCare at no additional cost. Call (855) 724-6809 to learn more or to request this service.

What Products Are Covered?

Architectural paints (“Program Products”) are interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), or specialty coatings. Examples are below.

PROGRAM PRODUCTS

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PROGRAM PRODUCTS

These products do not have fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Vermont Paint Stewardship Program

Information for Transfer Stations

Vermont's paint stewardship law supports paint collection activities at waste transfer stations.

Paint Stewardship Program in Vermont

A law passed in June 2013 requires manufacturers of paint to establish a Paint Stewardship Program in Vermont. Waste transfer stations can participate by offering paint recycling to their customers and municipal agencies. The cost of transportation and recycling of program products will be paid by the Program. Program funding comes from the "PaintCare Recovery Fee" on the sale of architectural paint sold in Vermont starting when the program begins in the spring 2014.

PaintCare Inc. is a non-profit 501(c)(3) organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in each state that adopts a paint stewardship law.

When Does the Program Begin?

The Program must begin on or before July 1, 2014; PaintCare aims to begin the program on May 1, 2014. A detailed Stewardship Plan must be submitted by PaintCare, on behalf of paint manufacturers, to the Vermont Department of Natural Resources on December 1, 2013. The Department must approve the Plan for the Program to begin. Vermont is the sixth state to pass such a law. PaintCare currently operates programs in Oregon, California and Connecticut, and programs are being planned for Vermont, Rhode Island, Minnesota and Maine.

Making Paint Recycling More Convenient

PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint. Although most drop-off sites will be at paint retailers, municipal and private transfer stations, and household hazardous waste (HHW) programs may also volunteer to be PaintCare drop-off sites.

Benefits to Transfer Stations

- Make recycling of leftover paint more convenient for your community
- Help your state conserve resources and keep paint out of the solid waste stream
- Save money on municipally generated leftover paint

Appendix E

DATE December 26, 2013**PROJECT No.** 1214410013-002-TM-Rev0**TO** PaintCare Inc.**FROM** Aaron Licker**EMAIL** aaron_licker@golder.com**TECHNICAL MEMO TO PAINTCARE: GIS METHOD USED TO CALCULATE CONVENIENCE CRITERIA OF PAINTCARE SERVICE LOCATIONS IN VERMONT**

The following GIS analysis was to undertaken to evaluate a service area-based distance criterion (90% of State-wide population with access to a paint collection site) and a population density criterion (one site per additional 10k population in cities and towns).

To complete this analysis, service areas were defined as 15 mile driving distances from a paint collection site. Once all sites were located, and service areas were established, the distance criterion was evaluated based on the coverage of all combined service areas and a population distribution layer. While researching approaches to conduct the service area analysis, the authors evaluated a common approach which is to use county borders as a population distribution layer. This approach, however, was discarded due to two main reasons.

- First, most service areas, especially in urban areas such as Burlington, ignore county lines.
- Second, population counts at the county scale are not fine grained enough, in some instances, to account for varied settlement patterns and urban population ranges.

As such, it was determined that a more fine-grained population distribution layer with urban population ranges was required.

To create this layer, the authors settled upon the creation of a population coverage layer comprised of both Census Population Places and Census Block Groups. This combination resulted in a population distribution that not only covers the entire State, but also classifies populated places by population range (<10,000 persons, 10,000-20,000 person etc.) So, if an entire populated place was entirely covered by the combined service areas, the authors assumed that 100% had access to a collection site. If 90% of a populated place was covered by combined service areas we assumed that 90% of its residents had access to a collection and so on.

The density criterion was evaluated by locating Towns within Vermont that have populations over 10,000 persons and adding an additional site for each 10,000 persons above that amount. Table 1 below shows the requirements for new sites by each large Town in the State.

Table 1: Additional Sites based on population

Town	Population (2010 Census)	Additional Sites
Bennington Town	15,764	1
Burlington City	42,417	4
Milton Town	10,352	1
South Burlington City	17,904	1
Rutland City	16,495	1
Brattleboro Town	12,046	1
Colchester Town	17,067	1
Essex Town	19,587	2
Hartford Town	10,367	1

To complete this analysis, two authors used a GIS algorithm to find the optimal amount of sites that satisfied the distance criterion and then added in additional sites to satisfy the density criterion. It should be noted that two criterion are mutually exclusive and have been evaluated separately. Ultimately 32 sites were identified for the distance criterion and the additional 13 sites were added in to satisfy the density criterion. In total, 45 paint collection sites will be required to meet PaintCare's baseline service level goals for convenience.

Washington, DC 20005

RE: INDEPENDENT AUDIT, PAINT STEWARDSHIP PROGRAM, VERMONT
(HRP #PAI2001.RC)

Dear Ms. Bernardo:

HRP Associates, Inc. (HRP) has completed an Independent Audit of PaintCare's calculations of the Paint Stewardship Assessment to be placed on the sale of each container of architectural paint sold in the State of Vermont (State) to administer a Paint Stewardship Program. A summary of the Audit Findings are provided below.

Paint Processing Services Bids

To accomplish the goals of the Paint Stewardship Program, within the timeframe set forth under the State of Vermont's Legislature, PaintCare was required to forego a formal Request For Proposal (RFP) format for hazardous waste management services and a Public Relations/Outreach firm. Instead, PaintCare solicited pricing from experienced and reputable firms for the hazardous waste service provider. For the PR firm, PaintCare received recommendations from State contacts managing waste collection programs and/or involved in the development of the Paint Stewardship legislation. After two (2) years of program implementation, PaintCare will implement a formal RFP process.

HRP reviewed the contract prices that were received from the hazardous waste service providers. The two providers were pre-qualified and have extensive experience handling, transporting, and disposing of hazardous and universal wastes. The contractors also have the infrastructure in place to accommodate the start-up of a Paint Stewardship Program within the five (5) month timeframe. In order to accommodate a state-wide program, more than one qualified company may be contracted to implement the Stewardship Program. The names of the vendors discussed in letter are being withheld as contracts have not yet been established between them and PaintCare.

The hazardous waste service providers will collect paint from retail stores, waste transfer stations, and household hazardous waste programs throughout the state. The exact distribution of the sites and events among the two companies will be determined over the next few months. This anticipated distribution of services and corresponding pricing structure was used in PaintCare's calculations of the Paint Stewardship Assessment, discussed below.

The Stewardship Program will also contract with the Chittenden Solid Waste District (CSWD) to provide in-state paint processing services, including manufacturing a recycled-content paint sold locally. CSWD may also manage paint from other household hazardous waste programs and from retailers in their area. In the case of retailers, the paint will be delivered to CSWD by PaintCare's contracted hazardous waste hauler(s).

Program Costs

The calculations and assumptions made to determine the program costs were reviewed and found to be reasonable. HRP reviewed the calculations for the first 14 months of the program (May 1, 2014 – June 30, 2015).

PaintCare's anticipated expenses took into account the costs for collection, transportation, processing, collection containers, one-day event setup fees, communications (education and outreach), personnel & professional fees, state permitting, and travel, in addition to corporate budget expenses. The expenses and assumptions made are acceptable and within industry standards. Savings were realized by utilizing an existing network of household hazardous waste collection facilities.

Paint Assessment

The anticipated volume of paint containers expected to be collected in Vermont and the number of each type of paint container sold were based off of market research. The amount of actual paint collected was derived from Paint Stewardship Programs that have already been implemented. A reasonable estimate of the percent of postconsumer paint to be recycled was developed based upon experience from previous programs and industry studies. The Contractor prices were then used to analyze the actual operating costs as well as the Program Administrative Costs.

HRP independently reviewed the calculations performed by PaintCare for accuracy and the calculations were deemed sufficient. Based on our review, we find the Paint Stewardship Assessment, determined by PaintCare, to be reasonable and not to exceed the actual operational costs to administer the Paint Stewardship Program. The Paint Stewardship Assessment (fee structure) is identical to the fee assessed in California, Connecticut and Oregon.

If you have any questions or require additional information, please feel free to contact HRP at (860) 674-9570.

Sincerely,

HRP ASSOCIATES, INC.
