

Recycling Resimplified.

Every day the combined weight of every moose in Vermont (estimated at 2800) is thrown away, about 2,000,000 pounds.

FACT In 2013 in Vermont, 69% of all waste generated was put into a landfill. Recycling reduces the need for landfills.

FACT Increased participation in Vermont recycling programs will increase the need for recycling sector jobs.

FACT Cardboard can be recycled up to 7 times and aluminum cans can be recycled forever with zero loss in quality.

FACT Recycled glass containers require 40% less energy to create than using all new materials.

FACT Vermont's Recycling & Composting Initiative is dedicated to helping residents understand how to better recycle.
