3. Can all new cleared area or impervious surface be set back at least 100 feet from MWL? Yes No

5d. If no above (5c), describe the best management practices used to manage, treat and control erosion from stormwater from the portion of impervious that exceeds 20% (attach support information as needed):

with the deck it will only be 50 sq.ft. over the 20% threshold and with the slope being about 5% we will continue what we do now as we have no erosion problem.

The landowners already planted one maple tree and one crabapple tree on shore. They will plant an additional red maple on shore. mbs 7/11/16
