

Lake Encroachment Individual Permit

Under 29 V.S.A. § 401 *et seq.*

VERMONT DEPARTMENT OF
ENVIRONMENTAL CONSERVATION
**WATERSHED
MANAGEMENT DIVISION**
LAKES & PONDS PROGRAM

<p>Permittee(s): Newport Marina Condominium Association, c/o Mitch Wonson</p> <p>Waterbody: Lake Memphremagog</p> <p>Permit Number: 2161-LEP</p>	<p>Project Description: Dredging</p> <p>Project SPAN: 435-136-15190</p> <p>Project Location: 197 Farrant Street, Newport</p>
<p>Based upon the findings contained in this permit, it is the decision of the Department of Environmental Conservation (the Department) that the project described herein, as set forth in the following findings and in the application on file with the Department, complies with the criteria of 29 V.S.A. § 405 and is consistent with the public trust doctrine, and is hereby approved under the following conditions and specifications.</p>	
<p>a. Specific Conditions</p> <ol style="list-style-type: none">1. The project shall be carried out in accordance with the final application received by the Department on August 15, 2016 (the Approved Application); and the conditions and specifications of this permit.2. Dredging shall be completed in accordance with the Approved Application, the additional permit terms and conditions contained herein, and the following conditions:<ol style="list-style-type: none">A. The permittee shall install a turbidity curtain or Department approved equivalent barrier, in the lake around the area/site prior to dredging. The barrier shall extend above the lake's surface and be secured to the bottom of the lake to contain turbidity during the project. If turbidity is observed beyond the work area, work shall be stopped immediately and shall not recommence until the source of the turbidity is identified and corrected. The barrier shall not be installed in a way that blocks navigation in a channel, if applicable. The barrier shall remain in place and be maintained until dredging is complete and observations indicate turbidity within the barrier has decreased to the level of turbidity outside the barrier.B. The permittee shall exercise caution when dredging areas/sites near outlet structures, and shall remain at least ten feet away from any spillway, dam, or similar control structure, unless explicitly approved in the Approved Application or as otherwise covered by a Dam Safety Permit.C. The permittee shall exercise caution around any and all existing water intake pipes and dry hydrants, if present, and clearly mark such structures prior to dredging and take all necessary and appropriate measures to avoid damaging or impairing function of these structures.D. The permittee's dredging activity shall not injure or kill turtles, mussels, fish, or other wildlife. The permittee shall promptly and safely remove from the designated dredging area all turtles, mussels, fish, and wildlife found during dredging.E. Dredging shall not involve the removal of large rocks, boulders, or large woody debris from the lake bottom manually or otherwise.F. The dredged material shall be transported to a dry upland site, at least 50 feet from surface waters, and utilized or disposed of in accordance with applicable local, state, and federal regulations. Dredged material shall not be dewatered to a waterbody, wetland, wetland buffer, or conveyance without treatment and shall be managed in accordance with the Approved Application.G. Dredging of an area/site shall only occur once during the life of this permit.	

b. Standard Conditions

1. Completion of construction. The project authorized by this permit must be completed within 5 years of the effective date of this permit.
2. Initiation of construction. Initiation of the project authorized by this permit is restricted until after July 1 of any calendar year unless explicitly approved in writing by the Department, and/or specified in the Approved Application.
3. Permit modification. All permit modifications, shall be treated as a new permit application.
4. Nuisance species spread prevention. Prior to placing any equipment (e.g., boat, trailer, vehicle, or gear) that has been in or on any other waterbody into public waters for project implementation/construction, the permittee shall decontaminate the equipment in compliance with the [Voluntary Guidelines to Prevent the Spread of Aquatic Invasive Species through Recreational Activities, Aquatic Nuisance Species Task Force, November 2013.](#)
5. Erosion prevention and sediment control. Erosion prevention and sediment control best management practices shall be utilized and maintained to prevent erosion and control sediment to minimize and prevent adverse impacts to water quality during construction of the authorized project. In addition, the permittee shall comply with the following conditions:
 - A. Areas disturbed by the construction activities shall be protected from erosion through the application of seed and mulch upon completion of construction, and shall be temporarily mulched during construction in advance of precipitation events.
 - B. Work shall stop immediately if visible turbidity occurs in the lake as a result of construction activity and shall not recommence until the source of the turbidity is identified and corrected.
6. Heavy equipment operation. Heavy equipment shall work from shore, and shall not work lakeward of mean water level unless explicitly approved in writing by the Department, and/or specified in the Approved Application.
7. Spill prevention. Fuel and lubricants from equipment shall not be discharged into the water. Any spills shall be managed in accordance with all applicable local, state, and federal regulations.
8. Waste management. Any pieces of concrete, stone, construction debris, or other waste materials deposited into the lake during project implementation/construction shall be removed from the lake and disposed of properly, in accordance with all applicable local, state, and federal regulations.
9. Compliance with other regulations. This permit does not relieve the permittee from obtaining all other approvals and permits prior to commencement of activity or from the responsibility to comply with any other applicable federal, state, and local laws or regulations, including but not limited to the Vermont Solid Waste Management Rules, the Vermont Wetland Rules, and the Vermont Shoreland Protection Act.
10. Transfer of permit. Prior to transferring ownership over the encroachment authorized by this permit or the portion of property associated with the encroachment authorized by this permit, the permittee shall give the Department notice of the transfer. The notice shall include the name and contact information for the current permittee and prospective permittee, the proposed date of permit transfer, and a statement signed by the prospective permittee stating that he/she has read and is familiar with this permit and agrees to comply with and be bound by its terms and conditions.
11. Access to property. The permittee shall allow the Commissioner of the Department, or a duly authorized representative, at reasonable times and upon presentation of credentials, to enter upon permittee's property, or to otherwise access the authorized encroachment, if necessary, to inspect the project to

determine compliance with this permit.

12. Legal responsibilities for damages. The Department, by issuing this individual permit, accepts no legal responsibility for any damage direct or indirect of whatever nature and by whoever suffered arising out of the approved project.
13. Rights and Privileges. This permit does not authorize any damage to private property or invasion of private rights or the violation of federal, state, or local laws or regulations. In addition, this permit does not convey any title or interest to the lands lying under public waters or waters affected.
14. Duty to comply and enforcement. The permittee shall comply with all terms and conditions of this permit. Any permit noncompliance shall constitute a violation of 29 V.S.A. Chapter 11 and may be cause for an enforcement action and revocation, modification, or suspension of this permit. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the conditions of this permit.
15. Reopener. If, after granting this permit, the Department determines that there is evidence indicating that an authorized activity does not comply with the requirements of 29 V.S.A. Chapter 11, the Department may reopen and modify this permit to include different limitations and requirements.
16. Revocation. This permit is subject to the conditions and specifications herein and may be suspended or revoked at any time for cause including: failure by the permittee to disclose all relevant facts during the application process which were known at that time; misrepresentation of any relevant fact at any time; non-compliance with the conditions and specifications of the permit; or a change in the factors associated with the encroachment's effect on the public trust or public good so that on balance the Department finds that the encroachment adversely affects the public trust or public good.
17. Severance. The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
18. Appeals.
 - A. Renewable Energy Projects – Right to Appeal to Public Service Board. If this decision relates to a renewable energy plant for which a certificate of public good is required under 30 V.S.A. § 248, any appeal of this decision must be filed with the Vermont Public Service Board pursuant to 10 V.S.A. § 8506. This section does not apply to a facility that is subject to 10 V.S.A. § 1004 (dams before the Federal Energy Regulatory Commission), 10 V.S.A. § 1006 (certification of hydroelectric projects), or 10 V.S.A. Chapter 43 (dams). Any appeal under this section must be filed with the Clerk of the Public Service Board within 30 days of the date of this decision; the appellant must file with the Clerk an original and six copies of its appeal. The appellant shall provide notice of the filing of an appeal in accordance with 10 V.S.A. § 8504(c)(2), and shall also serve a copy of the Notice of Appeal on the Vermont Department of Public Service. For further information, see the Rules and General Orders of the Public Service Board, available online at www.psb.vermont.gov. The address for the Public Service Board is: 112 State Street, Montpelier, Vermont, 05620-2701; Telephone #: 802-828-2358.
 - B. All Other Projects – Right to Appeal to Environmental Court. Pursuant to 10 V.S.A. Chapter 220, any appeal of this decision must be filed with the clerk of the Environmental Division of the Superior Court within 30 days of the date of the decision. The Notice of Appeal must specify the

parties taking the appeal and the statutory provision under which each party claims party status; must designate the act or decision appealed from; must name the Environmental Division; and must be signed by the appellant or the appellant's attorney. The appeal must give the address or location and description of the property, project, or facility with which the appeal is concerned and the name of the applicant or any permit involved in the appeal. The appellant must also serve a copy of the Notice of Appeal in accordance with Rule 5(b)(4)(B) of the Vermont Rules for Environmental Court Proceedings. For further information, see the Vermont Rules for Environmental Court Proceedings available at www.vermontjudiciary.org. The address for the Environmental Division is: 32 Cherry Street; 2nd Floor, Suite 303; Burlington, VT 05401 Telephone #: 802-951-1740.

c. Findings

1. Jurisdiction - 29 V.S.A. § 403: Lake Memphremagog in Newport is a public water of the state of Vermont. The project encroaches beyond the shoreline as delineated by the mean water level for Lake Memphremagog, 682.0 feet National Geodetic Vertical Datum (NGVD) 1929. Therefore, the Department has jurisdiction under 29 V.S.A. Chapter 11.
2. Application Receipt and Review - 29 V.S.A. § 404: On August 15, 2016 the Department received an application from Newport Marina Condominium Association (permittee), under the provisions of 29 V.S.A. Chapter 11, for authorization to dredge and remove accumulated sediment located within the public waters of Lake Memphremagog, Newport.
3. Public Notification - 29 V.S.A. § 405(a): The Department gave written notice of this application to the municipality in which the proposed encroachment is located, abutting property owners, and others having an interest in this matter and provided an opportunity for interested persons to file written comments or request a public information meeting. The notice period began on August 16, 2016 and closed at 4:30 PM on September 14, 2016. No comments were received. No request for a public information meeting was received.
4. Background; Lake Encroachment Permit History:

Application 1996-01 (issued 12/13/1996); dredge and remove 400 cubic yards of accumulated sediment negatively impacting the use of six (6) boat slips.

Application 2006-038 (issued 4/12/2007); dredge and remove 350 cubic yards of accumulated sediment negatively impacting the use of four (4) boat slips and the adjacent boat launch.
5. Project Description: This project consists of the removal of 350 cubic yards of accumulated sediment from several existing boat slips belonging to the Newport Marina, on the west side Lake Memphremagog. The property has been the subject of numerous local, state, and federal permits since 1982, and periodic maintenance dredging has previously been approved; the latest being issued in 2007. A silt curtain will be installed around the project area prior to dredging, and will remain until water clarifies. A temporary installation of a rip rap pad will be extended into the lake approximately 130 feet from the existing boat launch to allow a tracked excavator to access the area. All excavated sediment and rip rap will be hauled away and disposed of at an off-site location greater than 50 feet away from the boat launch. The disposal site is an existing cleared area comprised of grass lawn. A silt fence will be installed around the disposal site.
6. Project Purpose: The purpose of the project is to reestablish depth to restore public uses, primarily

boating access, for four boat slips and an adjacent boat launch at the Newport Marina that is currently impeded due to excess sediment that has accumulated over time.

7. Effect of Encroachment – Whether Excessive for Stated Purpose: The removal of sediment from preexisting boat slips and a boat launch is not considered excessive for the purpose of improving public access to Lake Memphremagog.
8. Effect of Encroachment – Less Intrusive Feasible Alternatives: No less intrusive alternative has been identified to achieve the stated purpose of restoring access to the boat launch and slips.
9. Effect of Encroachment – Measures to Reduce Impacts on Public Resources: A silt curtain will be installed and maintained around the entire dredged area to contain any increased turbidity. The area contains no vegetation; an area of emergent vegetation to the north of the dredge site is outside the silt curtain boundary. An excavator will enter the lake via the existing boat launch and access the dredging site via a temporary rip rap pad installed on the lake bottom, eliminating the need to disturb nearby shoreline.
10. Placement of Fill: There will be a temporary installation of a rip rap pad extending approximately 130 feet beyond mean water level to allow a tracked excavator access to the project area. All temporary fill associated with this will be removed after project completion. No permanent fill will be added below mean water level. Approximately 350 cubic yards of sediment will be removed to a bottom elevation of 676 feet. All excavated sediment will be disposed of at an off-site location (200 Farrant Street, Newport), and will be contained within silt fencing. Fill will be leveled, covered by top soil, and properly seeded.
11. Effects on Water Quality - 29 V.S.A. § 405(b): A silt curtain will be placed in the lake to contain turbidity prior to placing temporary fill or dredging activities. The silt screen curtain will be maintained until the project is completed and turbidity within the curtain has decreased to the background level of turbidity outside the silt curtain. The project is not expected to have long-term impacts on water quality.
12. Effects on Fish and Wildlife Habitat - 29 V.S.A. § 405(b): The project will not have an adverse impact on fish and wildlife habitat beyond the temporary and localized disturbance that will occur during the dredging. The Department has further conditioned the project to be completed no earlier than July 1 within the calendar year, to protect fish and wildlife spawning activity. The dredging is anticipated to occur in the fall of 2017, so as not to impact spring fish spawning. An excavator will enter the lake via the existing boat launch and temporary rip rap pad, eliminating the need to disturb habitat outside of the project area.
13. Effects on Aquatic and Shoreline Vegetation - 29 V.S.A. § 405(b): The project is located within an existing public boat launch with a sandy mud bottom and will not have a measurable new adverse impact on aquatic vegetation. The nearest patch of aquatic vegetation is north of the dredge site, outside of the silt curtain. The project is not expected to have long-term impacts on aquatic plants, as aquatic plants are expected to reestablish after project completion. No shoreline vegetation will be removed to complete the project, therefore the project will not adversely impact shoreline vegetation.
14. Effects on Navigation and Other Recreational and Public Uses, Including Fishing and Swimming - 29 V.S.A. § 405(b): The project will have a positive long-term effect on boating, fishing, and other public recreational uses. Once completed, the dredged public boat launch and adjacent boat slips will allow improved access to the lake.
15. Consistency with the Natural Surroundings - 29 V.S.A. § 405(b): No new construction will take place; all dredging activities will occur within the existing boat slips and launch area. The project is expected to be

consistent with the natural surroundings.

16. Consistency with Municipal Shoreland Zoning Ordinances and Applicable State Plans - 29 V.S.A. § 405(b): No adverse comments were received during the investigation from local and state officers and the project is therefore considered to be consistent with municipal shoreland zoning ordinances and applicable state plans.
17. Cumulative Impact - 29 V.S.A. § 405(b): Cumulative impacts at the existing site will be minimal, and will be outweighed by safer and improved public access to Lake Memphremagog. Any increased turbidity as a result of the proposed dredging will be temporary and well-contained. No new shoreline disturbances are proposed; all dredging activities will occur within the existing boat slips and launch area.
18. Public Good Analysis Summary - 29 V.S.A. § 405(b): Based upon findings c. 11-17, the project will not adversely affect the public good.
19. Public Trust Analysis: The public trust doctrine requires the Department to determine what public trust uses are at issue, to determine if the proposal serves a public purpose, to determine the cumulative effects of the proposal on the public trust uses, and to balance the beneficial and detrimental effects of the proposal. The public trust uses relevant to this proposal include boating/kayaking, fishing, navigation, and all boating-related recreation. The completed project will remove built-up sediment from several boat slips and a public boat launch, thereby improving access to the lake and enhancing public use of the public water. The public benefits associated with this project outweigh any potential or temporary negative effects on public trust uses. The Department has therefore determined that the project is consistent with the public trust doctrine.

d. Authorization

Based upon the foregoing findings, and in consideration of the Department's Interim Procedures for the Issuance or Denial of Encroachment Permits, dated October 4, 1989, excluding Section 3, which was invalidated by Lamoille County Superior Court, Docket No. S96-91, 9/04/92, it is the decision of the Department that the project described herein, as set forth in the above findings and in the plans on file with the Department, complies with the criteria of 29 V.S.A. § 405, and is consistent with the public trust doctrine.

In accordance with 29 V.S.A. § 401 *et seq.*, the Department hereby issues this decision and permit to Newport Marina Condominium Association for the above named project. The Department has approved the project subject to the conditions contained herein.

This permit shall not be effective until 10 days after the Department's notice of action and permit issuance in accordance with 29 V.S.A. § 405(c) and shall expire 5 years thereafter. If the permittee wishes to modify the encroachment or conduct other jurisdictional activities not authorized by this permit, the permittee must submit a new permit application.

Alyssa B. Schuren, Commissioner
Department of Environmental Conservation
