

Shoreland Protection Individual Permit

Under 10 V.S.A. § 1441 *et seq.*

VERMONT DEPARTMENT OF
ENVIRONMENTAL CONSERVATION
**WATERSHED
MANAGEMENT DIVISION**
LAKES & PONDS PROGRAM

Permittee: City of Burlington

Waterbody: Lake Champlain

Permit Number: 298

Parcel SPAN: 114-035-13642

Parcel Address: 645 Pine Street, Burlington

Based upon the findings contained in this permit, the Secretary has determined that the proposed project will comply with 10 V.S.A. § 1441 *et seq.* and is hereby approved under the following conditions and specifications.

a. Specific Conditions

1. All cleared area and impervious surface associated with this project shall be maintained in accordance with the approved application to provide access to the water for the general public and promote the public trust uses of the water, be necessary to achieve the recreational purpose, and conform to best management practices.
2. All cleared area and impervious surface associated with this project shall be located on a site with a slope of 15% or less.
3. All impervious surface associated with this project in the state-protected shoreland area as identified in the Delegation Agreement (Section 2. Special Condition) shall not exceed 1,725 square feet. In accordance with the plan proposed in the permit application, the permittee shall remove existing impervious surface as described in the site plans for the entire project including the state-protected shoreland area and city-protected shoreland area. The overall project will result in a net decrease of impervious surface of 0.67 acre or 29,185 square feet within the entire protected shoreland area of the parcel.
4. All cleared area associated with this project in the state-protected shoreland area as identified in the Delegation Agreement (Section 2. Special Condition), including that area cleared for the purposes of creating impervious surface, shall not exceed 2,425 square feet. In accordance with the plan proposed in the permit application, the permittee shall revegetate with 200 trees and shrubs within the entire protected shoreland area of the parcel as described in the site plans. Cleared areas are those areas not managed in accordance with the Vegetation Protection Standards in 10 V.S.A. § 1447.
5. The project shall be completed as shown on the application, plans, and support documents as submitted by the permittee, and approved by this permit.

b. Standard Conditions

1. Demarcation of project areas. All authorized impervious surfaces and/or cleared areas shall be visibly demarcated prior to the commencement of the project.
2. Erosion control and bank stability management. Best management practices shall be used to provide erosion control and bank stability of the project area while completing the project and be maintained as necessary.
3. Requirement to record in the land records. The conditions of this permit shall run with the land and shall be binding upon and enforceable against the permittee and all assigns and successors in interest. The permittee shall record and index this permit in the associated municipal land records within 30 days of issuance of this permit and prior to the conveyance of any parcel subject to the jurisdiction of this permit.

The permittee, or any other interested party, may request a copy of the approved application plans and support documents from Shoreland Permitting.

4. Compliance with other regulations. This permit does not relieve the permittee from obtaining all other approvals and permits prior to construction or the responsibility to comply with any other applicable federal, state, and local laws or regulations.
5. Authorization for substantial changes. No alterations to existing structures other than those indicated in this permit that would change or affect the authorized impervious surface or cleared area shall be allowed without prior written approval by Shoreland Permitting. Construction of additional nonexempt impervious surface or cleared area may not be granted unless the proposal conforms to the applicable laws and regulations.
6. Transfer of parcel. Each purchaser of the parcel associated with this permit shall be provided a copy of this permit and related support materials prior to conveyance of any portion of the parcel to that purchaser.
7. Access to property. By acceptance of this permit, the permittee agrees to allow representatives of the state of Vermont access to the property covered by the permit, at reasonable times and upon presentation of credentials, for the purpose of ascertaining compliance with Vermont's statutes, regulations, and this permit.
8. Legal responsibilities for damages. The Secretary, by issuing this individual permit, accepts no legal responsibility for any damage direct or indirect of whatever nature and by whoever suffered arising out of the approved activity.
9. Rights and Privileges. This permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state, or local laws or regulations.
10. Duty to comply and enforcement. The permittee shall comply with all terms and conditions of this permit. Any permit noncompliance shall constitute a violation of 10 V.S.A. Chapter 49A and may be cause for an enforcement action and revocation, modification, or suspension of the permit. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the conditions of this permit.
11. Reopener. If, after granting this permit, the Secretary determines, at his or her discretion, that there is evidence indicating that an authorized activity does not comply with the requirements of 10 V.S.A. Chapter 49A, the Secretary may reopen and modify this permit to include different limitations and requirements. A reduction in the size of the parcel by dividing the land by sale, gift, lease, mortgage foreclosure, court-ordered partition or decree, or by filing of a plot, plan, or deed in the records of the municipality in which the act of division occurred, may require the reopener and modification of this permit to ensure compliance with the requirements of 10 V.S.A. Chapter 49A.
12. Municipal Delegation. If the Secretary delegates shoreland permitting authority to the municipality in which the permitted activity is located, this permit shall remain in effect and continue to be enforceable by the Secretary until such time that the municipality issues a new permit for the creation of cleared area or impervious surface for the same parcel. If the permittee has yet to commence construction of the project authorized by this permit, then, pursuant to 3. V.S.A. § 814, the permittee may request that the Secretary revoke the permit, and if it the Secretary revokes the permit, the permittee may proceed with his or her project under the requirements of the delegated municipality's bylaw/ordinance and any other applicable federal, state, and local laws and regulations.
13. Appeals. Pursuant to 10 V.S.A. Chapter 220, any appeal of this decision must be filed with the clerk of the Environmental Division of the Superior Court within 30 days of the date of the decision. The Notice of Appeal must specify the parties taking the appeal and the statutory provision under which each party

claims party status; must designate the act or decision appealed from; must name the Environmental Division; and must be signed by the appellant or the appellant's attorney. In addition, the appeal must give the address or location and description of the property, project, or facility with which the appeal is concerned and the name of the applicant or any permit involved in the appeal. The appellant must also serve a copy of the Notice of Appeal in accordance with Rule 5(b)(4)(B) of the Vermont Rules for Environmental Court Proceedings. For further information, see the Vermont Rules for Environmental Court Proceedings, available on line at www.vermontjudiciary.org. The address for the Environmental Division is: 32 Cherry St.; 2nd Floor, Suite 303; Burlington, VT 05401; Telephone # 802-951-1740.

c. Findings

1. The Secretary received an application from City of Burlington for a Shoreland Permit under 10 V.S.A. 1443(g), Public Recreational Areas, on May 19, 2016. It was reviewed in accordance with the Department of Environmental Conservation's Permit Application Review Procedure, adopted May 22, 1996.
2. Within the protected shoreland area (as identified under the Delegation Agreement [Section 2. Special Condition] found within the Approved Application), and as described in Permit Application #298, the project involves the creation of 2,425 square feet of new cleared area located 1 foot from mean water level and 1,725 square feet of new impervious surface located from 1 foot from mean water level. In accordance with 10 V.S.A. § 1441, a permit is required for the creation of cleared area or impervious surface.
3. The subject parcel has a surface area of 5,200 square feet, 2,000 square feet of existing impervious surface, and 2,775 square feet of existing cleared area located within the protected shoreland area.
4. 10 V.S.A. 1443(g)(1): The project, located at the Burlington Bike Path between the skate park near the Moran Plant to North Beach, provides access to the water for the general public and promotes the public trust uses of the water. The project provides access to the water for the general public by creating a non-vehicular recreation path along the Burlington waterfront in summer and winter that connects public beach areas along the waterfront. The public trust uses relevant to this proposal are swimming and recreational access to Lake Champlain. The project promotes these uses by consolidating existing impervious surfaces into one path including rehabilitation of the existing Bike Path and realignment of one segment onto the alignment of an unused railroad track; then removing excess impervious surface after consolidation; and construction of stepped "pause places" for path users to rest and access the lake and shoreline.
5. 10 V.S.A. 1443(g)(2): The impervious surface and cleared area is necessary to achieve the recreational purpose of the project, and the project must be constructed within the Protected Shoreland Area to achieve its recreational function, which includes swimming and recreational access to Lake Champlain.
6. 10 V.S.A. 1443(g)(3): The project conforms with best management practices approved by the Secretary that protect the habitat and water quality of the lake while achieving the public recreational purposes. The project area is located on a slope of 15%, a less than 20% slope. The project and existing impervious surface consist of no more than 3,725 square feet, 71.6% of the total parcel within the Protected Shoreland Area, more than 20%. The permittee has demonstrated that a best management practice will be used to manage, treat, and control erosion due to stormwater runoff from impervious surface within the Protected Shoreland Area of the parcel by removing 0.67 acre or 29,185 square feet of impervious surface. The project and existing cleared area consist of no more than 5,200 square feet, 100% of the parcel within the Protected Shoreland Area, resulting in more than 40%. The permittee has demonstrated that a best management practice will be used by planting 200 trees and shrubs within the Protected Shoreland Area of the parcel using a replacement mitigation ratio of greater than 1:1 for planted woody stems.

7. 10 V.S.A. § 1443(c)(3): No public comments were received in response to this permit application during the 30-day public notice period.

d. Authorization

By delegation from the Secretary, the Vermont Department of Environmental Conservation has made a determination that the project above qualifies for individual shoreland permit coverage if conducted in accordance with the Shoreland Protection Act, 10 V.S.A. § 1441 *et seq.*, and is subject to the conditions herein specified.

This permit shall be effective on the date of signing.

Alyssa B. Schuren, Commissioner
Department of Environmental Conservation
