The Secretary of the Vermont Agency of Natural Resources (VT ANR) has determined that:

1. This project authorizes the emergency repair of a slope failure. The slope is very steep and will require a stacked stone or staggered block revetment.
2. The proposed activity is eligible for coverage under the VT ANR Stream Alteration General Permit – Next Flood Measures.
3. The proposed activity will meet the terms and conditions of Section F of the General Permit provided:
   a) The project will be completed and approved as shown on the plan ~~dated~~ IN PROGRESS, prepared by TOWN / CONTRACTOR, and approved by the Vermont Agency of Natural Resources.
   b) The project is proportional to the threat and conditioned to cease when the threat to life or to improved property has ended.
   c) The project will not result in a threat to life, public health or safety.
   d) The project will meet the standards detailed in subsection E.2.1 and E.2.2 of the General Permit.
   e) The project will meet Stream Alteration Standards to the greatest extent possible.
   f) A pre-construction meeting is held between the contractor, owner/applicant, and the ANR River Management Engineer.
   g) The River Management Engineer is notified by phone or email when construction begins and when the project is complete.
   h) A final construction inspection is required for any culvert and bridge related work.
   i) Additional conditions: _____

If there are any changes in the project plan or deviation in construction from the plan, the Permittee must notify the River Management Engineer immediately.

If the project is constructed as you have described, as shown on the above referenced approved plans and according to the above conditions, there is no reason to expect any violation of Vermont Water Quality Standards.
