

# New Hampshire's Dam Removal and River Restoration Program Pearl Lake Brook Dam – Lisbon, NH

**Deb Loiselle**  
River Restoration Coordinator  
NHDES – Dam Bureau

Pearl Lake Brook Dam 1936

## Pearl Lake Brook Dam

Height = 14 ft

Width = 21 ft

Constructed of split stone and concrete

- In 1886 the Town of Lisbon voted to use Mink Pond (aka Pearl Lake) as a water supply
- Pearl Lake Brook Dam was built in 1935 to provide a settling basin for the Town of Lisbon's water supply originating at Pearl Lake
- Pearl Lake Brook Dam had not been used as a settling basin since 1981
- The Town of Lisbon contacted the NHDES Dam Removal and River Restoration Program in 2005
- Pearl Lake Brook Dam was removed during the Summer of 2008

### Cost

Design & Engineering – \$15,000

Deconstruction- \$25,000

### Funding

New Hampshire Charitable  
Foundation/Upper Connecticut River  
MEF - \$21,300

Town used their DPW personnel  
and equipment to remove the dam
