UPDATES:

1. Access your 2019 data through WinLIMS using the attached instructions.

REMINDERS:

1. Submit any important forms, information, and questions to Jim.

ABOUT THE LAROSA PARTNERSHIP PROGRAM

Since 2003, this partnership has helped watershed associations and monitoring groups across the state of Vermont implement new and/or ongoing surface water monitoring projects for waters in need of water quality assessment by helping to alleviate the financial burden of laboratory analysis costs.

Farewell from Kristen

Next week is my last week in this position! It's been a pleasure working with you all and I wish you the best of luck in your future years of water quality sampling. I will no longer be responding to my government email after August 9th.

I'll be starting graduate school at Montana State University in a couple weeks to get a Master of Science in Biological Sciences. More specifically, I will be studying pollinator ecology. I hope to work in bumble bee conservation!

2019 Field Season Photos

Please send any photos you have from your 2019 field season to Kristen!
