

Questions & Answers

School Stormwater Permit Early Adoption through the Green Schools Program

Release Date: October 10, 2019

Responses Due: November 15, 2019

1. With regards to this RFI, is DEC transmitting it directly to school staff as well?
 - A. DEC is working to distribute this RFI directly to schools, relevant municipalities, and known school partners.
2. Since the permit requirements are in draft form, how would a school define how much work, and resources, would be needed for compliance when looking for funding sources?
 - A. To determine overall costs, the goal would be to start sequentially by beginning the planning process. This RFI seeks input on how to assist schools with costs of compliance and this begins with permit application and its associated planning process. Once that process is complete, the school will have an informed foundation for compliance costs.
