
Vermont Agency of Natural Resources
2019 Air Pollutant Emissions Inventory

Process Source
For Criteria Pollutants

The information requested below will allow the Agency to estimate your actual annual air contaminant emissions. Please fill out this form providing the information requested for calendar year 2019 for each air pollution source at your facility. Use a single, duplicated form for each source at your facility that you did not receive a pre-filled form for in the annual mailing. In following years, if your facility emissions are greater than 5 tons annually, your facility will continue to receive these forms with information from the prior year displayed on them.

If you have further questions about the required data see the enclosed Source Identification and Criteria Pollutant Form Instruction Sheets, which are also available at : <http://dec.vermont.gov/air-quality/point-source-registration>

Facility Name :

Person Completing Inventory Form :

Source Description:

Operational Data :

Supply Annual Hours of Operation for Process Source :

(Over)

Process Source (continued)

Raw Materials Input*:

Type	Quantity

Product Materials Output* :

Type	Quantity

*Information in this section only necessary if accurate figures for stack flow rate and hours of operation cannot be supplied.

Stack Parameters :

Stack Number :

Stack/Duct Discharge Height (Feet) :

Stack/Duct Inner Diameter at Exit (Inches) :

Exit Gas Temperature (Deg. F) :

Flow Rate at Exit (Actual FT³/Min) :

If there is an air pollution control device on this source please supply the following information:

PM Control Device:

Theoretical Efficiency (%) :

If available, supply theoretical efficiency for:

PM2.5 Efficiency (%):

**NOTE: This information will not affect the Air Registration fee estimate*

If an estimated emission rate exists for PM, supply the information below.

Estimated Emission Rate* :

Basis of Estimate :

* If test data 4 years old or less is available.
