

STATE OF VERMONT

Agency of Natural Resources

Hazardous Waste Management Regulations

Proposed August __, 2016

Waste Management & Prevention Division

Department of Environmental Conservation

1 National Life Drive – Davis 1
Montpelier, Vermont 05620-3704
(802) 828-1138

<http://www.anr.state.vt.us/dec/wmd.htm>

Subchapter 1: GENERAL PROVISIONS

§ 7-101 AUTHORITY

These regulations are promulgated by the Secretary of the Vermont Agency of Natural Resources pursuant to the authority granted by **3 V.S.A. § 2853(5) and 10 V.S.A. chapter 159**.

Note: The term “these regulations,” when used within this document, means chapter 7 of the Vermont Environmental Protection Rules (Hazardous Waste Management Regulations).

§ 7-102 PURPOSE

These regulations are intended to protect public health and the environment by comprehensively regulating the generation, storage, collection, transport, treatment, disposal, use, reuse, and recycling of hazardous waste in Vermont.

§ 7-103 DEFINITIONS

As used in these regulations, all terms not defined herein shall have the meaning given them in **40 CFR Parts 260 through 266, 268, and 270**. Terms that are used only in **subchapter 8** (used oil management standards) or **subchapter 9** (universal waste management standards) are defined therein.

“**Active life of a facility**” means the period from the initial receipt of hazardous waste at the facility until the Secretary receives certification of final closure.

“**Agency**” means the Vermont Agency of Natural Resources.

“**Board**” means the solid waste and air quality variance board established by **10 V.S.A. § 553**.

“**Boiler**” means an enclosed device using controlled flame combustion and either:

(a) Having the following characteristics:

- (1) Having physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and
- (2) Being of integral design, in that the combustion chamber and the primary energy recovery section(s) (such as waterwalls and superheaters) are physically formed into one manufactured or assembled unit, except that process heaters (units that transfer energy directly to a process stream) and fluidized bed combustion units are not precluded from being boilers solely because they are not of integral design. A unit in which the combustion chamber and the primary energy recovery section(s) are joined

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- only by ducts or connections carrying flue gas is not of integral design; however, a unit may be of integral design even though secondary energy recovery equipment (such as economizers or air preheaters) is not physically formed into the same unit as the combustion chamber and the primary energy recovery section; and
- (3) Maintaining while in operation a thermal energy recovery efficiency of at least 60 percent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and
 - (4) Exporting and utilizing at least 75 percent of the recovered energy, calculated on an annual basis, not including recovered heat used internally in the same unit, such as the preheating of fuel or combustion air, the driving of induced or forced draft fans or feed-water pumps; or
- (b) The device is one which the Secretary has determined, on a case-by-case basis, to be a boiler, after considering the standards in **40 CFR § 260.32**.

“Carbon regeneration unit” means any enclosed thermal treatment device used to regenerate spent activated carbon.

“CERCLA” means the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended.

“Certificate of need” means a certificate issued by the Secretary pursuant to **10 V.S.A. § 6606a** that must be obtained before a person may begin site preparation for or construction of a hazardous waste management facility.

“Certified hazardous waste facility” means a treatment, storage, or disposal facility which is authorized to operate under a federally approved state hazardous waste program, the federal hazardous waste program, or a foreign government.

“College/University” means a private or public, post-secondary, degree-granting, academic institution, that is accredited by an accrediting agency listed annually by the U.S. Department of Education.

“Completed copy” means any copy of the manifest which has been signed by the generator, designated transporter, any continuing transporters, and the designated certified hazardous waste treatment, storage, or disposal facility.

“Consignee” means the ultimate treatment, storage or disposal facility in a receiving country to which the hazardous waste will be sent.

“Container” means any portable device in which a material is stored, transported, treated, disposed of or otherwise handled.

“Containment building” means a hazardous waste management unit that is used to store or treat hazardous waste under the provisions of subpart DD of parts 264 or 265 of 40 CFR (incorporated by reference in subchapter 5).

“Control” over a waste means the possession, ownership or physical control of such waste, including but not limited to the following activities: (a) generation; (b) treatment; (c) storage; (d) transportation; or (e) disposal, whether or not such activity is authorized by law.

“Debris” means solid material exceeding a 60 mm particle size that is intended for disposal and that is: A manufactured object; or plant or animal matter; or natural geologic material. However, the following materials are not debris: Any material for which a specific treatment standard is provided in **40 CFR §§ 268.40 through 268.49**, namely lead acid batteries, cadmium batteries, and radioactive lead solids; Process residuals such as smelter slag and residues from the treatment of waste, wastewater, sludges, or air emission residues; and intact containers of hazardous waste that are not ruptured and that retain at least 75% of their original volume. A mixture of debris that has not been treated to the standards provided by **40 CFR § 268.45** and other material is subject to regulation as debris if the mixture is comprised primarily of debris, by volume, based on visual inspection.

“Designated facility” means:

- (a) A hazardous waste treatment, storage, or disposal facility which:
 - (1) Has received a permit (or interim status) in accordance with the requirements of **40 CFR Parts 270 and 124**;
 - (2) Has received a permit (or interim status) from a State authorized in accordance with **40 CFR Part 271**; or
 - (3) Is regulated under **§ 7-606(a)** or **Subpart F of 40 CFR Part 266** (Refer to **§ 7-204(g)** / Recyclable Materials Utilized for Precious Metal Recovery); and
 - (4) Has been designated on the manifest by the generator pursuant to **§ 7-702**.
- (b) A generator site designated on the manifest to receive its waste as a return shipment from a facility that has rejected the waste in accordance with **40 CFR § 264.72(f)** or **40 CFR § 265.72(f)** (Refer to **§ 7-704(g)(4)**)
- (c) If a waste is destined to a facility in an authorized State which has not yet obtained authorization to regulate that particular waste as hazardous, then the designated facility must be a facility allowed by the receiving State to accept such waste.

“Destination facility” means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in **§ 7-912(d)(3)**. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

“Discarded” A material is discarded if it is:

- (a) Abandoned by being:
 - (1) Disposed of; or
 - (2) Burned or incinerated; or
 - (3) Accumulated, stored, or treated before or in lieu of being abandoned by being disposed of, burned, or incinerated;
- (b) Recycled, until the recycling process has been completed;
- (c) Considered inherently waste-like as described in **40 CFR § 261.2(d)**;
- (d) Applied to or placed on the land in a manner that constitutes disposal or used to produce products that are applied to or placed on the land or are otherwise contained in products that are applied to or placed on the land or
- (e) A military munition identified as a solid waste in **40 CFR § 266.202**.

“Discharge” or **“hazardous waste discharge”** means the accidental or intentional spilling, leaking, pumping, pouring, emitting, emptying, or dumping of hazardous waste into or on any land or water.

“Disposal” means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any ground or surface waters.

“Disposal facility” means a facility or part of a facility at which hazardous waste is intentionally placed into or on any land or water, and at which waste will remain after closure. The term disposal facility does not include a corrective action management unit into which remediation wastes are placed.

“Drip pad” is an engineered structure consisting of a curbed, free-draining base, constructed of non-earthen materials and designed to convey preservative kick-back or drippage from treated wood, precipitation, and surface water run-on to an associated collection system at wood preserving plants.

“Economic poison” means

- (a) Any substance produced, distributed or used as a plant regulator, defoliant, or desiccant;
- (b) Any substance produced, distributed or used for preventing, destroying, or repelling any insects, rodents, nematodes, fungi, weeds, or other forms of plant or animal life or viruses,

except viruses on or in living man or other animals, which the Secretary of Agriculture, Food & Markets shall declare to be a pest.

“Elementary neutralization unit” means a device which:

- (a) Is used for neutralizing wastes that are hazardous only because they exhibit the corrosivity characteristic defined in § 7-206, or they are listed in §§ 7-210 through 7-215 only for this reason; and
- (b) Meets the definition of tank, tank system, container, transport vehicle, or vessel.

“Eligible academic entity” means a college or university, or a non-profit research institute that is owned by or has a formal written affiliation agreement with a college or university, or a teaching hospital that is owned by or has a formal written affiliation agreement with a college or university.

“Environmental Protection Agency” or **“EPA”** means the United States Environmental Protection Agency.

“EPA Acknowledgement of Consent” means the cable sent to EPA from the U. S. Embassy in a receiving country that acknowledges the written consent of the receiving country to accept the hazardous waste and describes the terms and conditions of the receiving country's consent to the shipment.

“EPCRA” means the federal Emergency Planning & Community Right to Know Act of 1986, as amended.

“Explosives or munitions emergency” means a situation involving the suspected or detected presence of unexploded ordnance (UXO), damaged or deteriorated explosives or munitions, an improvised explosive device (IED), other potentially explosive material or device, or other potentially harmful military chemical munitions or device, that creates an actual or potential imminent threat to human health, including safety, or the environment, including property, as determined by an explosives or munitions emergency response specialist. Such situations may require immediate and expeditious action by an explosives or munitions emergency response specialist to control, mitigate, or eliminate the threat.

“Explosives or munitions emergency response” means all immediate response activities by an explosives and munitions emergency response specialist to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency. An explosives or munitions emergency response may include in-place render-safe procedures, treatment or destruction of the explosives or munitions and/or transporting those items to another location to be rendered safe, treated, or destroyed. Any reasonable delay in the completion of an explosives or munitions emergency response caused by a necessary, unforeseen, or uncontrollable circumstance will not terminate the explosives or munitions emergency. Explosives and munitions emergency responses can occur on either public or private lands and are not limited to responses at RCRA facilities.

“Explosives or munitions emergency response specialist” means an individual trained in chemical or conventional munitions or explosives handling, transportation, render-safe procedures, or destruction techniques. Explosives or munitions emergency response specialists include Department of Defense (DOD) emergency explosive ordnance disposal (EOD), technical escort unit (TEU), and DOD-certified civilian or contractor personnel; and other Federal, State, or local government, or civilian personnel similarly trained in explosives or munitions emergency responses.

“Facility” means:

- (a) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste. A facility may consist of several treatment, storage, or disposal operational units (e.g., one or more landfills, surface impoundments, or combinations of them).
- (b) For the purpose of implementing corrective action under **40 CFR § 264.101** (incorporated by reference under subchapter 5), all contiguous property under the control of the owner or operator seeking certification under subchapter 5 of these regulations. This definition also applies to facilities implementing corrective action under **RCRA § 3008(h)**.

“Final closure” means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under subchapter 5 of these regulations are no longer conducted at the facility unless subject to the requirements for hazardous waste generators in subchapter 3.

“Generator” means any person, by site, whose act or process produces hazardous waste or whose act first causes hazardous waste to become subject to regulation. This includes any person who imports hazardous waste into Vermont from a foreign country.

“Hazardous material” means all petroleum and toxic, corrosive or other chemicals and related sludge included in any of the following:

- (a) Any substance defined in **CERCLA § 101(14)**;
- (b) Petroleum, including crude oil or any fraction thereof; or
- (c) Hazardous waste, as defined in this section.

Note: “Hazardous material” does not include herbicides and pesticides when applied consistent with good practice conducted in conformity with federal, state and local laws and regulations and according to manufacturers' instructions. Nothing in this subsection shall affect the authority granted and the limitations imposed by **10 V. S. A. § 6608a**.

“Hazardous waste” means any waste or combination of wastes of a solid, liquid, contained gaseous, or semi-solid form, including but not limited to those which are toxic, corrosive, ignitable, reactive, strong sensitizers, or which generate pressure through decomposition, heat or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

other means, which in the judgment of the Secretary may cause, or contribute to, an increase in mortality or an increase in serious irreversible or incapacitating reversible illness, taking into account the toxicity of such waste, its persistence and degradability in nature, and its potential for assimilation, or concentration in tissue, and other factors that may otherwise cause or contribute to adverse acute or chronic effects on the health of persons or other living organisms, or any matter which may have an unusually destructive effect on water quality if discharged to ground or surface waters of the state. All special nuclear, source, or by-product material, as defined by the Atomic Energy Act of 1954, as amended, codified in 42 U. S. C. § 2014, is specifically excluded from this definition.

“Hazardous waste management” means the systematic and comprehensive management of the generation, storage, transport, treatment, including recycling and recovery, or disposal of hazardous waste materials.

“Hazardous waste management unit” is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed.

“Household sewage” means untreated sanitary wastes from a household which pass through a sewage system to a sewage treatment plant.

“Household waste” means any waste material (including garbage, trash and sanitary wastes in septic tanks) derived from households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds and day-use recreation areas). Business waste generated at a household is not household waste.

“Identification number” means the location specific number assigned by either EPA or the Secretary to each generator, transporter and treatment, storage, or disposal facility.

“Impervious surface” means a surface that is sufficiently impervious to any waste material stored thereon to prevent that material from migrating to the soil, groundwater, or surface water.

“Incinerator” means any enclosed device that:

- (a) Uses controlled flame combustion and neither meets the criteria for classification as a boiler, sludge dryer, or carbon regeneration unit, nor is listed as an industrial furnace; or
- (b) Meets the definition of infrared incinerator or plasma arc incinerator as defined in **40 CFR § 260.10**.

“Incompatible waste” means a hazardous waste which is unsuitable for:

- (a) Placement in a particular device or facility because it may cause corrosion or decay of containment materials (e. g., container inner liners or tank walls); or
- (b) Commingling with another waste or material under uncontrolled conditions because the commingling might produce heat or pressure, fire or explosion, violent reaction, toxic dusts, mists, fumes, or gases, or flammable fumes or gases.

(See **Appendix VII** for examples of potentially incompatible waste.)

“Industrial furnace” means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:

- (a) Cement kilns;
- (b) Lime kilns;
- (c) Aggregate kilns;
- (d) Phosphate kilns;
- (e) Coke ovens;
- (f) Blast furnaces;
- (g) Smelting, melting and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machine, roasters, and foundry furnaces);
- (h) Titanium dioxide chloride process oxidation reactors;
- (i) Methane reforming furnaces;
- (j) Pulping liquor recovery furnaces;
- (k) Combustion devices used in the recovery of sulfur values from spent sulfuric acid;
- (l) Halogen acid furnaces (HAFs) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least 3%, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of 20% as-generated; and

- (m) Such other devices as the Secretary may, after notice and comment, add to this list on the basis of one or more of the following factors:
- (1) The design and use of the device primarily to accomplish recovery of material products;
 - (2) The use of the device to burn or reduce raw materials to make a material product;
 - (3) The use of the device to burn or reduce secondary materials as effective substitutes for raw materials, in processes using raw materials as principal feedstocks;
 - (4) The use of the device to burn or reduce secondary materials as ingredients in an industrial process to make a material product;
 - (5) The use of the device in common industrial practice to produce a material product; and
 - (6) Other factors, as appropriate.

“Investigator” means an investigator designated and duly authorized by the Secretary pursuant to **10 V.S.A. § 8002(3)**.

“Laboratory” means an area owned by an eligible academic entity where relatively small quantities of chemicals and other substances are used on a non-production basis for teaching or research (or diagnostic purposes at a teaching hospital) and are stored and used in containers that are easily manipulated by one person. Photo laboratories, art studios, and field laboratories are considered laboratories. Areas such as chemical stockrooms and preparatory laboratories that provide a support function to teaching or research laboratories (or diagnostic laboratories at teaching hospitals) are also considered laboratories.

“Land disposal” means placement in or on the land and includes, but is not limited to, placement in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, underground mine or cave, concrete vault or bunker intended for disposal purposes.

“Landfill” means a disposal facility or part of a facility where hazardous waste is placed in or on land and which is not a pile, a land treatment facility, a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground mine, a cave, or a corrective action management unit.

“Low-level mixed waste (LLMW)” is a waste that contains both low-level radioactive waste and RCRA hazardous waste.

“Manifest” means the shipping document EPA Form 8700–22 (including, if necessary, the continuation sheet document EPA Form 8700–22A), originated and signed by the generator or

offer or in accordance with the instructions in the appendix to **40 CFR Part 262** and the applicable requirements of **40 CFR Parts 262 through 265**.

“Manifest tracking number” means the alphanumeric identification number (i.e., a unique three letter suffix preceded by nine numerical digits), which is pre-printed in Item 4 of the Manifest by a registered source.

“Manufacturing or mining by-product” is a material that is not one of the primary products of a particular manufacturing or mining operation, is a secondary and incidental product of the particular operation and would not be solely and separately manufactured or mined by the particular manufacturing or mining operation. The term does not include an intermediate manufacturing or mining product which results from one of the steps in a manufacturing or mining process and is typically processed through the next step of the process within a short time.

“Media” means environmental media (e.g., soil, groundwater).

“Military munitions” means all ammunition products and components produced or used by or for the U.S. Department of Defense or the U.S. Armed Services for national defense and security, including military munitions under the control of the Department of Defense, the U.S. Coast Guard, the U.S. Department of Energy (DOE), and National Guard personnel. The term military munitions includes: confined gaseous, liquid, and solid propellants, explosives, pyrotechnics, chemical and riot control agents, smokes, and incendiaries used by DOD components, including bulk explosives and chemical warfare agents, chemical munitions, rockets, guided and ballistic missiles, bombs, warheads, mortar rounds, artillery ammunition, small arms ammunition, grenades, mines, torpedoes, depth charges, cluster munitions and dispensers, demolition charges, and devices and components thereof. Military munitions do not include wholly inert items, improvised explosive devices, and nuclear weapons, nuclear devices, and nuclear components thereof. However, the term does include non-nuclear components of nuclear devices, managed under DOE's nuclear weapons program after all required sanitization operations under the Atomic Energy Act of 1954, as amended, have been completed.

“Miscellaneous unit” means a hazardous waste management unit where hazardous waste is treated, stored, or disposed of and that is not a container, tank, surface impoundment, pile, land treatment unit, landfill, incinerator, boiler, industrial furnace, underground injection well with appropriate technical standards under **40 CFR Part 146**, containment building, corrective action management unit, or unit eligible for a research, development, and demonstration certification under **§ 7-511(c)**.

“Mixed waste” means a waste that contains both RCRA hazardous waste and source, special nuclear, or byproduct material subject to the Atomic Energy Act of 1954, as amended.

“Notice of Intent” means the notice required in **10 V.S.A § 6606a(b)(2)**.

“Obsolete pesticide products” means concentrated pesticide products which are unusable due to damage to containers or the pesticide formulation; in damaged containers; pesticide products

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

whose U. S. EPA registration number has been canceled or suspended leaving no valid registered uses on the label; or unwanted registered pesticide compounds which the generator wishes to dispose of.

“On-site” means the same or geographically contiguous property which may be divided by public or private right-of-way, provided the entrance and exit between the properties is at a cross-roads intersection, and access is by crossing as opposed to going along, the right-of-way. Non-contiguous properties owned by the same person but connected by a right-of-way which that person controls and to which the public does not have access, is also considered on-site property.

“Partial closure” means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of subchapter 5 of these regulations at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

“Person” means any individual, partnership, company, corporation, association, unincorporated association, joint venture, trust, municipality, the State of Vermont or any agency, department, or subdivision of the state, federal agency, or any other legal or commercial entity.

“Pesticide” means an “economic poison” as defined in this section.

“Pesticidal wastes” means unwanted pesticide dilutions, rinses, and improperly rinsed containers.

“Pile” means any non-containerized accumulation of solid, nonflowing hazardous waste that is used for treatment or storage and that is not a containment building.

“Primary exporter” means any person who is required to originate the manifest for a shipment of hazardous waste in accordance with subchapter 7 when the manifest specifies a treatment, storage, or disposal facility in a receiving country as the facility to which the hazardous waste will be sent and any intermediary arranging for the export.

“RCRA” means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended, **42 U.S.C. § 6901 et seq.**

“Reclaimed” means that a hazardous waste is processed to recover the hazardous component of the waste as a usable product, or that it is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

“Receiving country” means any foreign country to which hazardous waste is sent for the purpose of treatment, storage, or disposal (except short-term storage incidental to transportation).

“Registration” means, for the purposes of **10 V.S.A. § 6608(f)**, notifying the Secretary of hazardous waste activity using the Vermont Hazardous Waste Handler Site ID Form referenced in **§ 7-104(a)**, and paying the annual fee specified in **3 V.S.A. § 2822** (refer to **§ 7-708(e)**).

“Release” means any intentional or unintentional action or omission resulting in the spilling, leaking, pumping, pouring, emitting, emptying, dumping, or disposing of hazardous materials into the surface or groundwaters, or onto the lands in the state, or into waters outside the jurisdiction of the state when damage may result to the public health, lands, waters or natural resources within the jurisdiction of the state.

“Replacement unit” means a landfill, surface impoundment, or waste pile unit (1) from which all or substantially all of the waste is removed, and (2) that is subsequently reused to treat, store, or dispose of hazardous waste. “Replacement unit” does not apply to a unit from which waste is removed during closure, if the subsequent reuse solely involves the disposal of waste from that unit and other closing units or corrective action areas at the facility, in accordance with an approved closure plan or EPA or State approved corrective action.

“Re-refining distillation bottoms” means the heavy fraction produced by vacuum distillation of filtered and dehydrated used oil. The composition of still bottoms varies with column operation and feedstock.

“Scrap metal” is bits and pieces of metal parts (e. g., bars, turnings, rods, sheets, wire) or metal pieces that may be combined together with bolts or soldering (e. g., radiators, scrap automobiles, railroad box cars), which when worn or superfluous can be recycled.

“Secretary” means the Secretary of the Agency of Natural Resources or his or her duly authorized representative. When implementing the provisions of **10 V. S. A. §§ 6608a and 6608b** relating to economic poisons and low-level radioactive wastes, the term Secretary includes the Secretary of Agriculture, Food & Markets and the Commissioner of Health.

“Sludge” means any solid, semi-solid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant.

“Sludge dryer” means any enclosed thermal treatment device that is used to dehydrate sludge and that has a maximum total thermal input, excluding the heating value of the sludge itself, of 2,500 Btu/lb of sludge treated on a wet-weight basis.

“Soil” means unconsolidated earth material composing the superficial geologic strata (material overlying bedrock), consisting of clay, silt, sand, or gravel size particles as classified by the U.S. Natural Resources Conservation Service, or a mixture of such materials with liquids, sludges or solids which is inseparable by simple mechanical removal processes and is made up primarily of soil by volume based on visual inspection. Any deliberate mixing of prohibited hazardous waste with soil that changes its treatment classification (i.e., from waste to contaminated soil) is not allowed under the dilution prohibition in **40 CFR § 268.3**.

“Solid waste” means any discarded garbage, refuse, septage, sludge from a waste treatment plant, water supply plant, or pollution control facility and other discarded material including solid, liquid, semi-solid, or contained gaseous materials resulting from industrial, commercial, mining, or agricultural operations and from community activities but does not include animal manure and absorbent bedding used for soil enrichment or solid or dissolved materials in industrial discharges which are point sources subject to permits pursuant to **10 V.S.A. chapter 47**.

“Sor bent” means a material that is used to soak up free liquids by either adsorption or absorption, or both. Sorb means to either adsorb or absorb, or both.

“Staging” means the temporary placement of off-site generated recyclable materials within a recycling facility for a period of time no longer than three (3) days.

“Storage” means the actual or intended containment of wastes, either on a temporary basis or for a period of years; in such a manner as not to constitute disposal of such wastes. Hazardous waste that is being staged at a recycling facility for no more than three (3) days is not considered to be in storage.

“Storage above ground” means the containment of hazardous waste in a discrete vessel on or above ground level, excluding surface impoundments.

“Sump” means any pit or reservoir that meets the definition of tank and those troughs/trenches connected to it that serve to collect hazardous waste for transport to hazardous waste storage, treatment, or disposal facilities; except that as used in the landfill, surface impoundment, and waste pile rules, “sump” means any lined pit or reservoir that serves to collect liquids drained from a leachate collection and removal system or leak detection system for subsequent removal from the system.

“Surface impoundment” means a natural topographic depression, artificial excavation, or dike arrangement, including a pit, pond, or lagoon, whether or not it has a permeable bottom or sides allowing seepage of its contents, which is:

- (a) Used primarily for the storage, treatment, or disposal of hazardous waste in liquid, semi-solid, or solid form; and
- (b) Constructed on, below, or partially in the ground.

“Tank” means a stationary device, designed to contain an accumulation of hazardous waste, which is constructed primarily of non-earthen materials (e. g., wood, concrete, steel, plastic) that provide structural support.

“Tank system” means a hazardous waste storage or treatment tank and its associated ancillary equipment and containment system.

“Transfer facility” means any transportation related facility including loading docks, parking areas, storage areas and other similar areas where shipments of hazardous waste are held during the normal course of transportation.

“Transit country” means any foreign country, other than a receiving country, through which a hazardous waste is transported.

“Transport” or **“transportation”** means the movement of wastes by air, rail, highway, or water.

“Treatment” means any method, technique, or process, including neutralization, designed to change the physical, chemical or biological character or composition of any hazardous or solid waste, so as to neutralize such waste, or so as to recover energy or material resources from the waste, or so as to render such waste safer for transport, amenable for recovery, amenable for storage, or reduced in volume, or for hazardous wastes, so as to render such waste non-hazardous.

“TSCA” means the Toxic Substances Control Act of 1976, as amended, **15 U.S.C. 2601 et seq.**

“Universal waste” means any of the following hazardous wastes that are subject to the universal waste requirements of **subchapter 9**:

- (a) Batteries as described in § 7-902;
- (b) Pesticides as described in § 7-903;
- (c) Thermostats as described in § 7-904;
- (d) PCB-containing fluorescent light ballasts as described in § 7-905;
- (e) Lamps as described in § 7-906;
- (f) Mercury-containing devices as described in § 7-907; and
- (g) Cathode ray tubes (CRTs) as described in § 7-908.

“Used” or **“reused”** means that a hazardous waste is either:

- (a) Employed as an ingredient (including use as an intermediate) in an industrial process to make a product (for example, distillation bottoms from one process used as feedstock in another process). However, a hazardous waste will not satisfy this condition if distinct components of the waste are recovered as separate end products (as when metals are recovered from metal-containing secondary materials); or

- (b) Employed in a particular function or application as an effective substitute for a commercial product (for example, spent pickle liquor used as phosphorous precipitant and sludge conditioner in wastewater treatment).

“**Used oil**” means any petroleum product that has been refined from crude oil (in whole or in part), or any synthetic oil that has been used and as a result of such use is contaminated by physical or chemical impurities. Used oil is a free-flowing liquid at standard temperature and pressure and has a flash point of greater than 100 degrees (F). Used oil includes oils used as lubricants, heat transfer fluids, hydraulic fluids, and for other similar uses, but does not include materials derived from crude or synthetic oils that are used as fuels (e.g., gasoline, jet fuel and diesel fuel), cleaning agents or solvents (e.g., naphtha or mineral spirits). These materials are subject to regulation under subchapters 1 through 7, as applicable.

“**Waste**” means a material that is discarded or is being accumulated, stored, or physically, chemically or biologically treated prior to being discarded or has served its original intended use and is normally discarded or is a manufacturing or mining by-product and is normally discarded.

“**Wastewater evaporation unit**” means a tank or tank system that:

- (a) Heats wastewater to intentionally evaporate water to reduce the volume of the wastewater;
- (b) Receives and treats or stores an influent wastewater that is a hazardous waste as described in § 7-202(a), or that generates and accumulates a wastewater treatment sludge that is a hazardous waste as described in § 7-202(a), or treats or stores a wastewater treatment sludge which is a hazardous waste as described in § 7-202(a); and
- (c) Is not used to dispose of hazardous waste.

Wastewater evaporation unit does not mean a sludge dryer.

“**Wastewater treatment unit**” means a device which:

- (a) Is part of a wastewater treatment facility that is subject to regulation under either §§ 402 or 307(b) of the Clean Water Act;
- (b) Receives and treats or stores an influent wastewater that is a hazardous waste as described in § 7-202(a), or that generates and accumulates a wastewater treatment sludge that is a hazardous waste as described in § 7-202(a), or treats or stores a wastewater treatment sludge which is a hazardous waste as described in § 7-202(a);
- (c) Meets the definition of tank or tank system; and
- (d) Is not a wastewater evaporation unit.

§ 7-104 NOTIFICATION REQUIREMENTS

- (a) Except for persons who have been issued a temporary identification number pursuant to **subsection (d) of this section**, any person who generates or transports hazardous waste or who owns or operates a transfer facility or a facility for the treatment, storage, use, disposal, or recycling of hazardous waste shall notify the Secretary of such activity. In addition, persons managing waste under the provisions of either the used oil management standards of subchapter 8, or the universal waste management standards of subchapter 9, shall notify the Secretary of such activity as required under those subchapters. Notification shall be made by accurately and completely filling out the **Vermont Hazardous Waste Handler Site ID Form** (provided by the Secretary) in accordance with the form's instructions.
- (b) Notification is required upon transfer of ownership of an entity that was required to notify the Secretary under **subsection (a) of this section**.
- (c) Persons subject to the requirements of this section shall maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** filed with the Secretary that accurately describes current waste activity and waste generation. A generator may notify the Secretary of a change in generator status by marking the appropriate status level on the **Hazardous Waste Generator Registration Fee Assessment** form that is sent to generators each year pursuant to § 7-708(e).
- (d) The Secretary may issue a temporary identification number to persons who have generated hazardous waste only from an episodic event.

§ 7-105 EMERGENCY AND CORRECTIVE ACTIONS

- (a) Emergency actions
 - (1) In the event of a discharge of hazardous waste or a release of a hazardous material, the person in control of such waste or material shall:
 - (A) Take all appropriate immediate actions to protect human health and the environment including, but not limited to, emergency containment measures and notification as described below; and
 - (B) Take any further clean-up actions as may be required and approved by federal, state, or local officials, or corrective actions as specified under **subsection (b) of this section** so that the discharged waste or released material and related contaminated materials no longer present a hazard to human health or the environment.

(2) Reporting

- (A) All discharges and/or releases that meet any of the following criteria shall be immediately reported to the Secretary by the person or persons exercising control over such waste by calling the Waste Management & Prevention Division at (802) 828-1138, Monday through Friday, 7:45 a.m. to 4:30 p.m. or the Department of Public Safety, Emergency Management Division at (800) 641-5005, 24 hours/day:
- (i) A discharge of hazardous waste, or release of hazardous material that exceeds 2 gallons;
 - (ii) A discharge of hazardous waste, or release of hazardous material that is less than or equal to 2 gallons and poses a potential or actual threat to human health or the environment; or
 - (iii) A discharge of hazardous waste, or release of hazardous material that equals or exceeds its corresponding reportable quantity under CERCLA as specified under **40 CFR § 302.4**.

Note: Under the Federal Water Pollution Control Act, certain spills of “oil” and/or “hazardous substances” are prohibited and must be reported pursuant to the requirements of **40 CFR Part 110 / Discharge of Oil**. Certain spills of hazardous substances must also be reported pursuant to CERCLA. In both cases, the National Response Center must be notified at (800) 424-8802. Finally, in addition to federal and state spill reporting, EPCRA requires that spills are also reported to local authorities.

- (B) A written report shall be submitted to the Secretary within ten (10) days following any discharge or release subject to **subsection (a)(1) of this section**. The report should be sent to: The Vermont Department of Environmental Conservation, Waste Management & Prevention Division, 1 National Life Drive – Davis 1, Montpelier, VT 05620-3704. The person responsible for submitting the written report may request that it not be submitted for small discharges and/or releases that were reported pursuant to **subsection (a)(2)(A) of this section**, and that have been entirely remediated within the ten (10) day period immediately following the discharge and/or release.
- (3) If the discharge or release occurred during transportation, the transporter shall, in addition to notifying the Secretary:
- (A) Notify the National Response Center at (800) 424-8802 or (202) 426-2675, if required by **49 CFR § 171.15**; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (B) Report in writing to the Director, Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington, D.C. 20590, if required by **49 CFR § 171.16**; and
 - (C) A water (bulk shipment) transporter who has discharged hazardous wastes must give the same notice as required by **33 CFR § 153.203** for oil and hazardous substances.
- (4) If a discharge or release occurs and the Secretary determines that immediate removal of the waste is necessary to protect human health or the environment, the Secretary may authorize its removal by unpermitted transporters without the preparation of a manifest. Such hazardous waste may be transported to a site authorized by the Secretary under the emergency certification provisions of **§ 7-503** to temporarily accept hazardous waste generated during an emergency clean-up of a discharge or release.
- (5) In the case of an explosives or munitions emergency response, if a Federal, State, Tribal or local official acting within the scope of his or her official responsibilities, or an explosives or munitions emergency response specialist, determines that immediate removal of the material or waste is necessary to protect human health or the environment, that official or specialist may authorize the removal of the material or waste by transporters who do not have EPA identification numbers or hold Vermont hazardous waste transportation permits and without the preparation of a manifest. In the case of emergencies involving military munitions, the responding military emergency response specialist's organizational unit must retain records for three years identifying the dates of the response, the responsible persons responding, the type and description of material addressed, and its disposition.
- (6) All clean-up debris and residues that are hazardous waste must be stored in leak-proof containers that are covered so as to prevent contact of the waste with precipitation or run-on from precipitation.
- (7) All clean-up debris and residues that are hazardous waste must be transported ultimately to:
- (A) A designated facility;
 - (B) A person authorized by the Secretary to use such waste if the waste has been delisted pursuant to **§ 7-218**;
 - (C) Some other location specified and authorized by the Secretary to receive clean up debris and residues if the waste has been delisted pursuant to **§ 7-218**; or
 - (D) For hazardous waste not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), to a facility, that is not a designated

facility, located in a state other than Vermont provided the facility can receive such waste under applicable state and local laws, regulations and ordinances.

(b) Corrective actions

- (1) If a discharge of hazardous waste, or a release of hazardous material has not been adequately addressed under **subsection (a)(1)(A) of this section** the Secretary shall require that the person or persons responsible pursuant to **10 V.S.A. § 6615** complete the following:
 - (A) Engage the services of an environmental consultant experienced in the investigation and remediation of hazardous waste-contaminated sites; and
 - (B) Within thirty (30) days from either the date of the discharge/release or the date that the release was discovered if the date of discharge/release is not known, or within a period of time established by an alternative schedule approved by the Secretary, submit for approval by the Secretary a work plan for an investigation of the contaminated site (i.e., site investigation) prepared by the environmental consultant. The site investigation shall define the nature, degree and extent of the contamination; and shall assess potential impacts to human health and the environment (refer to **Chapter 2** of the Agency's "**Investigation and Remediation of Contaminated Properties Procedure**" which is available from the Secretary upon request); and
 - (C) Perform the site investigation within either ninety (90) days of receiving written approval of the work plan by the Secretary, or a period of time established by an alternative schedule approved by the Secretary. A report detailing the findings of the site investigation shall be sent to the Secretary for review; and
 - (D) Within either thirty (30) days from the date of final acceptance of the site investigation report by the Secretary, or a period of time established by an alternative schedule approved by the Secretary, submit a corrective action plan prepared by the environmental consultant (refer to **Chapter 4** of the Agency's "**Investigation and Remediation of Contaminated Properties Procedure**" which is available from the Secretary upon request); and
 - (E) Implement the corrective action plan within either ninety (90) days of receiving written approval of the plan by the Secretary, or a period of time established by an alternative schedule approved by the Secretary. The corrective action activity shall continue until the contamination is remediated to levels approved by the Secretary; and
 - (F) Submit to the Secretary all investigative, corrective action and monitoring reports, and all analytical results related to **subsections (b)(1)(C) through (E) of this section**, as they become available.

- (2) A used or fired military munition is a waste and is potentially subject to corrective action authorities pursuant to **10 V.S.A. § 6615**, and the process described by **subsection (b)(1) of this section** if the munition lands off-range and is not promptly rendered safe or retrieved. Any imminent and substantial threats associated with any remaining material must be addressed. If remedial action is infeasible, the operator of the range must maintain a record of the event for as long as any threat remains. The record must include the type of munition and its location (to the extent the location is known).

§ 7-106 LAND DISPOSAL RESTRICTIONS

- (a) Certain hazardous wastes shall not be disposed of in or on the land. **40 CFR Part 268**, which is hereby incorporated by reference, except for **40 CFR §§ 268.5, 268.6, and 268.42(b)**, identifies those wastes which shall not be land disposed and describes the limited circumstances under which an otherwise prohibited waste may continue to be land disposed. The authority for implementing the CFR sections not incorporated by reference remains with the EPA.

Note: A copy of 40 CFR Part 268 (the Land Disposal Restrictions rule), as incorporated by these regulations, is available from the Secretary upon request.

- (b) In addition to the prohibitions of **40 CFR Part 268**, the Secretary may restrict the land disposal of any hazardous waste in the State of Vermont:
 - (1) Which may present an undue risk to human health or the environment, immediately or over a period of time; or
 - (2) Which would be incompatible with the **groundwater protection rule and strategy** of chapter 12 of the environmental protection rules.
- (c) Dilution of hazardous waste subject to the land disposal restrictions of 40 CFR Part 268 is prohibited pursuant to **40 CFR § 268.3**.

§ 7-107 ENFORCEMENT

- (a) Information that the generation, transportation, treatment, storage or disposal of hazardous waste may present an actual or potential threat to human health or the environment, or is a violation of the **10 V.S.A. chapter 159**, or these regulations, or any term or condition of certification, order, or assurance, may serve as grounds for an enforcement action by the Secretary, including, but not limited to:
 - (1) After notice and opportunity for hearing, issuing an order directing any person to take such steps as are necessary to:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (A) Immediately cease and desist any operation or practice;
 - (B) Correct or prevent environmental damage likely to result from any deficiency in operation or practice;
 - (C) Suspend or revoke any certification and require temporary or permanent cessation of the operation of such facility;
- (2) A request that the Attorney General or appropriate State's Attorney commence an action for injunctive relief, the imposition of penalties and fines provided in **10 V.S.A. § 6612** and other relief as may be appropriate.
- (3) An order for reimbursement to any agency of federal, state, or local government from any person whose act caused governmental expenditures under **10 V.S.A § 1283**.
- (4) All other powers of enforcement available to the Secretary through **10 V.S.A., chapter 201**.
- (b) The hearing by the Secretary identified under **subsection (a)(1) of this section** shall be conducted as a contested case. Pursuant to **10 V.S.A. § 6610(b)**, the Secretary may issue an emergency order without a prior hearing when an ongoing violation presents an immediate threat of substantial harm to the environment or an immediate threat to public health. An emergency order shall be effective upon actual notice to the person against whom the order is issued. Any person to whom an emergency order is issued shall be given the opportunity for a hearing within five (5) business days of the date the order is issued.
- (c) Inspections, investigations, and property access (**10 V.S.A. § 8005**)
- (1) Inspections and investigations
 - (A) An investigator may perform routine inspections to determine compliance.
 - (B) An investigator may investigate upon receipt or discovery of information that an activity is being or has been conducted that may constitute or cause a violation.
 - (C) An investigator, upon presentation of credentials, may seek permission to inspect or investigate any portion of the property, fixtures, or other appurtenances belonging to or used by a person whose activity is required to be in compliance. The investigator shall state the purpose of the inspection or investigation. An inspection or investigation may include monitoring, sampling, testing, and copying of any records, reports, or other documents relating to the purposes to be served by compliance.
 - (D) If permission for an inspection or investigation is refused, the investigator may seek an access order from the district or superior court in whose jurisdiction the

property is located enabling the investigator to perform the inspection or investigation.

- (2) Access orders
 - (A) If access has been refused, an access order may be sought pursuant to either **10 V.S.A. § 8005** or **10 V.S.A. § 6609**.
 - (B) Issuance of an access order shall not negate the Secretary's authority to initiate criminal proceedings in the same matter by referring the matter to the office of the attorney general or a state's attorney.
- (d) In an action to enforce these regulations, anyone raising a claim that a certain material is not a hazardous waste, or is exempt from regulation as hazardous waste, must demonstrate that there is a known market or disposition for the material, and that they meet the terms of the exclusion or exemption. Appropriate documentation (such as contracts showing that a second person uses the material as an ingredient in a production process) to demonstrate that the material is not a waste, or is exempt from regulation, must be provided. Owners and operators of facilities claiming that they are actually recycling materials must show that they have the necessary equipment to do so.

§ 7-108 SIGNATORIES TO CERTIFICATION APPLICATIONS AND REPORTS

- (a) Certification applications and information required by **subsection (b) of this section** shall be signed as follows:
 - (1) For a corporation, by a responsible corporate officer. A responsible corporate officer means:
 - (A) A president, secretary, treasurer or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or
 - (B) The manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having a gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.
 - (2) For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or
 - (3) For a municipality, state, federal, or other public agency, by either a principal executive officer or ranking elected official. A principal executive officer of a federal agency includes:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (A) The chief executive officer of the agency; or
 - (B) A senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.
- (b) All reports required by certifications and other information requested or required by the Secretary shall be signed by a person described in **subsection (a) of this section** or by a duly authorized representative of that person. A person is a duly authorized representative only if:
- (1) The authorization is made in writing by a person described in **subsection (a) of this section**;
 - (2) The authorization specifies either an individual or a position having responsibility for overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or well field, superintendent, or position of equivalent responsibility. (A duly authorized representative may thus be either a named individual or any individual occupying a named position); and
 - (3) The written authorization is submitted to the Secretary.
- (c) If an authorization described in **subsection (b) of this section** is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirement of **subsection (b) of this section** must be submitted to the Secretary prior to or together with any documents signed by an authorized representative.
- (d) Certification. Any person signing a document pursuant to **subsections (a) or (b) of this section** shall make the following certification:
- I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
- (e) The certification described in **subsection (d) of this section** need not appear on a manifest completed in accordance with subchapter 7 of these regulations.

§ 7-109 INCORPORATIONS BY REFERENCE

- (a) When reference is made to CFR titles, their parts, subparts, or sections, the reference is to titles of the Code of Federal Regulations as they existed on July 1, 2011.
- (b) The following federal regulations are incorporated by reference:
 - (1) Hazardous waste that is burned or processed in a boiler or industrial furnace (as defined in **§ 7-103**) shall be managed pursuant to **40 CFR §§ 266.100 through 266.107 and 266.109 through 266.112**. Any person in control of hazardous waste subject to this subsection also shall comply with all applicable provisions of the Vermont Air Pollution Control Regulations. The Secretary may, on a case-by-case basis, grant a variance from classification as a boiler. The standards and criteria used for this variance and the procedures followed can be no less stringent than those in **40 CFR §§ 260.32 and 260.33**.
 - (2) The Mixed Waste Rule of **40 CFR §§ 266.210 through 266.360 (Subpart N)** except:
 - (A) When the terms “we” or “us” are used within incorporated material, those terms mean the Secretary.
 - (B) When incorporated materials reference “261.3” the reference shall mean subchapter 2 of these regulations.
 - (C) When incorporated materials reference “parts 260 – 270” as a phrase, it means subchapters 1 through 7 of these regulations.
 - (3) The **40 CFR § 262.21** requirements for manifest tracking numbers, manifest printing, and obtaining manifests.
 - (4) The Alternative Requirements for Hazardous Waste Determination and Accumulation of Unwanted Material for Laboratories Owned by Eligible Academic Entities of **40 CFR §§ 262.200 through 262.216 (Subpart K)** except:
 - (A) When the term “EPA Regional Administrator” is used within incorporated material, that term means the Secretary.
 - (B) The Laboratory Management Plan, and all amendments to the procedures required by **40 CFR § 262.214(a)** and **subsection (C) of this section**, must be reviewed and approved by the Secretary.
 - (C) The Laboratory Management Plan must, in addition to the elements required by **40 CFR § 262.214(a)**, include procedures for:
 - (i) Inspecting at a specified frequency all laboratories covered by the requirements of the Laboratory Management Plan to assess conformance with the requirements of the Laboratory Management Plan; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (ii) The identification of Laboratory Management Plan non-compliance, and the assignment of responsibility, timelines and corrective actions to prevent their reoccurrence.
- (D) Each academic entity must maintain records that identify those laboratories covered by the requirements of the Laboratory Management Plan.

§ 7-110 IMPLEMENTATION

The Secretary shall consult with other agencies of state government if he or she has reason to conclude that any action or decision hereunder may conflict with any statute or regulation within the authority of such other agency.

§ 7-111 ACCESS TO PUBLIC RECORDS

(a) Purpose, scope, applicability

- (1) All public records relating to these regulations shall be available to the public unless they are exempt pursuant to **subsection (b) of this section**.
- (2) This section describes requirements for the availability of public information concerning facilities and sites where hazardous wastes are generated, handled, treated, stored, recycled, or disposed, or where wastes are managed pursuant to either the used oil management standards of subchapter 8 or the universal waste management standards of subchapter 9.
- (3) As specified in **1 V.S.A. § 316(k)**, information concerning facilities and sites for the treatment, storage, and disposal of hazardous waste shall be made available to the public in substantially the same manner and to the same degree as such information is made available under the Resource Conservation and Recovery Act of 1976, as amended, **42 U.S.C. section 82, subchapter 3**, and the Federal Freedom of Information Act, **5 U.S.C. section 552 et seq.** In the event that there is a conflict between state requirements for access to public records under **1 V.S.A. chapter 5**, subchapter 3 and the cited federal laws, federal law shall govern.
- (4) For the purposes of this section, the term "public record" or "public document" means all papers, documents, machine readable materials or any other written or recorded matters, regardless of their physical form or characteristics, that are produced or acquired in the course of Agency business. Individual salaries and benefits of and salary schedules relating to elected or appointed officials and employees of public agencies shall not be exempt from public inspection and copying.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

(b) Exemption categories

No request for the review or a copy of an existing public record in the Secretary's possession shall be denied unless the public record contains material that is exempt from disclosure under **1 V.S.A. § 317(c)**.

(c) Procedural requirements

- (1) In responding to requests for public records, the Secretary shall use the procedures established by **1 V.S.A. § 318** and this section.
- (2) If a request for a public record is denied by the Secretary, the requestor may appeal to the Secretary as specified in **1 V.S.A. § 318**.
- (3) If the Secretary denies an appeal, or if the Secretary fails to comply with the applicable time limit provisions of **1 V.S.A. § 318**, the requestor may appeal to the appropriate superior court as specified in **1 V.S.A. § 319**.

(d) Public review of files

- (1) The public may review files in possession of the Secretary, except those exempted under **subsection (b) of this section**, after having set up an appointment with the documents control officer for the Division in which the documents are located. The documents control officer may waive the requirement for an appointment if they determine that a waiver is appropriate. Factors to be considered in making such a determination include the time involved to locate and make available requested files, other duties or responsibilities at the time of the request, and whether the files have been reviewed to assure that no records exempted under **subsection (b) of this section** are present.
- (2) In responding to requests for appointments to review files, the Secretary shall use the procedures established in **1 V.S.A. § 318**.
- (3) When reviewing files, the public may not remove any records from the files, nor may the public remove any of the files from the area designated by the Secretary for file review. If copies are desired, the appropriate records shall be tagged or otherwise designated and presented to the document control officer for copying.

(e) Reserved

(f) Confidential business information

- (1) As is specified by **subsection (b) of this section**, certain confidential business information may be exempted from public disclosure. Any such information shall be determined by the Secretary to be confidential if it is determined to be confidential business information under **1 V.S.A. § 316(k)** or **§ 317(c)**.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) If a business does not assert a claim of business confidentiality at the first opportunity provided by the Secretary, the information will be released upon request without further notice to the business. In addition, for any information submitted in connection with an application for certification pursuant to **§ 7-505**, any business confidentiality claim must be asserted at the time of submission of the information to the Secretary.
- (3) Claims of confidentiality for the name and address of any applicant for certification or certified facility shall be denied.

§ 7-112 RESERVED

§ 7-113 SEVERABILITY

The provisions of any section of these regulations are severable. If any provision of these regulations is invalid or if any application of these regulations to any person or circumstance is invalid, the invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.

§ 7-114 VARIANCES

A person may seek a variance from these regulations in accordance with **10 V.S.A. § 6613**.

Subchapter 2: IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

§ 7-201 PURPOSE, SCOPE, APPLICABILITY

This subchapter identifies or otherwise describes those wastes subject to regulation as hazardous wastes under this chapter and assigns EPA or Vermont “hazardous waste codes” to them. It establishes procedures for determining whether a waste is hazardous waste and for petitioning the addition or removal of a waste to or from the lists of hazardous wastes identified in this subchapter. It also identifies or references sampling, analytical and testing methods and procedures to be used for the purpose of establishing whether or not a waste is hazardous.

§ 7-202 HAZARDOUS WASTE DETERMINATION

- (a) “Hazardous Waste” means any waste or combination of wastes which meets the definition in § 7-103, including but not limited to:
- (1) Any waste which exhibits one or more of the characteristics described in §§ 7-205 through 7-208; except waste that is regulated because it exhibits one or more of the characteristics of hazardous waste identified in §§ 7-205 through 7-208, when the waste no longer exhibits any characteristic. However, wastes that exhibit a characteristic at the point of generation may still be subject to the requirements of **40 CFR Part 268**, even if they no longer exhibit a characteristic at the point of land disposal. Moreover, a waste that exhibits the characteristic of toxicity that has been land disposed shall never cease to be a hazardous waste;
 - (2) Any waste which is listed in §§ 7-210 through 7-215 except waste that is listed solely because it exhibits one or more of the characteristics of ignitability as defined under § 7-205, corrosivity as defined under § 7-206, or reactivity as defined under § 7-207 is not a hazardous waste, if the waste no longer exhibits any characteristic of hazardous waste identified in §§ 7-205 through 7-208 of these regulations. However, wastes excluded under this section are subject to the requirements of **40 CFR Part 268** (as applicable), even if they no longer exhibit a characteristic at the point of land disposal;
 - (3) Any mixture of a solid waste and a hazardous waste except as exempted in § 7-203(k);
 - (4) Any waste generated from the treatment, storage, disposal, or use of a hazardous waste (i.e., sludge, spill residue, ash, emission control dust, leachate, and precipitation runoff which comes in contact with the waste itself) except:
 - (A) A material that is reclaimed from a waste and that is used beneficially is not a waste and hence not a hazardous waste under this provision unless

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

the reclaimed material is burned for energy recovery or used in a manner constituting disposal; and

- (B) Any waste generated from the treatment, storage, or disposal of hazardous waste that is listed in §§ 7-210 through 7-215 solely because it exhibits one or more of the characteristics of hazardous waste identified in §§ 7-205 through 7-207, is not a hazardous waste if the waste no longer exhibits any characteristic of hazardous waste. However, wastes that exhibit a characteristic at the point of generation are subject to the requirements of 40 CFR Part 268, even if they no longer exhibit a characteristic at the point of land disposal;
 - (5) Any waste derived from a waste listed in §§ 7-210 through 7-215;
 - (6) Any waste generated from the discharge or release of a material which exhibits a characteristic described in §§ 7-205 through 7-208 or is listed in §§ 7-210 through 7-215;
 - (7) Any residues from a container or from the inner liner of a container which held a material which exhibits a characteristic described in §§ 7-205 through 7-208 or is listed in §§ 7-210 through 7-215, except as exempted in § 7-203(j);
 - (8) Any waste transported into Vermont that is classified as hazardous waste in the state in which the waste was generated; and
 - (9) Rebuttable presumption for used oil. Used oil containing more than 1000 ppm total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in §§ 7-210 through 7-215. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste (for example, to show that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in **Appendix II**).
- (b) A person who generates or who is in control of a waste must determine if that waste is a hazardous waste as described in **subsection (a) of this section** by using the following procedure:
- (1) Determine if the waste is excluded from regulation under § 7-203 or § 7-204.
 - (2) If the waste is not excluded from regulation, determine if the waste is listed as a hazardous waste in §§ 7-210 through 7-215.
 - (3) For purposes of compliance with 40 CFR Part 268 (incorporated by reference through § 7-106 of these regulations), or if the waste is not listed in §§ 7-210 through 7-215, determine whether the waste exhibits a hazardous waste characteristic as identified in §§ 7-205 through 7-208 by either:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (A) Testing or analyzing the waste according to the methods and procedures set forth in §§ **7-205 through 7-208 and 7-219** as appropriate; or
- (B) Applying knowledge of the hazard characteristic of the waste in light of the materials or the processes used.

Note: Waste that is listed as Vermont regulated hazardous waste under § **7-211** must be evaluated to determine whether or not it exhibits a hazardous waste characteristic.

- (4) If the waste is determined to be hazardous, the generator must refer to **40 CFR part 268** (incorporated by reference through § **7-106** of these regulations), and **subchapters 1, 3, 5, 6, 8 and 9** for possible exclusions or restrictions pertaining to management of the specific waste.
- (c) The determination of whether a waste is hazardous waste shall be made using either suitable available product constituent information or the sampling, analytical and test methods and procedures specified in §§ **7-205 through 7-208 and 7-219**, as appropriate. The Secretary may require information to be submitted that either has been used to determine whether or not a waste is hazardous waste or that is necessary to make such a determination.
- (d) Copies of results from constituent analysis or testing of waste, or other product constituent information used to determine whether or not a waste is hazardous waste must be retained on-site by all generators in accordance with § **7-710(a)(2)**.
- (e) Each hazardous waste listed in §§ **7-210 through 7-215** is assigned an EPA or Vermont hazardous waste code that precedes the name of the waste. This code must be used in complying with the notification requirements of § **7-104**, the land disposal restriction requirements of § **7-106**, the marking requirements of § **7-311(f)**, and all applicable manifest, recordkeeping and reporting requirements under these regulations.
- (f) A waste that exhibits a hazardous characteristic as described in §§ **7-205 through 7-208** is assigned every EPA or Vermont hazardous waste code that is applicable pursuant to §§ **7-205 through 7-208**. This (these) code(s) must be used in complying with the notification requirements of § **7-104**, the land disposal restriction requirements of § **7-106**, the marking requirements of § **7-311(f)**, and all applicable manifest, recordkeeping and reporting requirements under these regulations.
- (g) If a waste is identified by both EPA and Vermont hazardous waste codes and descriptions, the EPA hazardous waste code and description shall be used for the purposes of these regulations.
- (h) A military munition is a waste, therefore subject to a hazardous waste determination, if unexploded ordinance and contaminants are buried or disposed of on-range and the burial or disposal is not a result of product use.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (i) An unused military munition is a waste, and subject to a hazardous waste determination, when any of the following occurs:
 - (1) The munition is abandoned by being disposed of, burned, detonated (except during intended use as specified in § 7-203(z)(1)), incinerated, or treated prior to disposal;
 - (2) The munition is removed from storage in a military magazine or other storage area for the purpose of being disposed of, burned, or incinerated, or treated prior to disposal;
 - (3) The munition is deteriorated or damaged (e.g., the integrity of the munition is compromised by cracks, leaks, or other damage) to the point that it cannot be put into serviceable condition, and cannot reasonably be recycled or used for other purposes; or
 - (4) The munition has been declared a waste by an authorized military official.
- (j) A used or fired military munition is a waste, and subject to a hazardous waste determination:
 - (1) When transported off range or from the site of use, where the site of use is not a range, for the purposes of storage, reclamation, treatment, disposal, or treatment prior to disposal; or
 - (2) If recovered, collected, and then disposed of by burial, or landfilling either on or off a range.

§ 7-203 CONDITIONAL EXEMPTIONS

The following wastes are exempted from the provisions of these regulations:

- (a) Household waste, including household waste that has been collected, transported, stored, treated, disposed, recovered (e.g., refuse-derived fuel) or reused.
- (b) Household sewage and any mixture of household sewage and other wastes that passes through a sewer system to a publicly owned treatment works for treatment in accordance with the provisions of a permit issued under **10 V.S.A. chapter 47**.
- (c) Fly ash waste, bottom ash waste, slag waste and flue gas emission control waste generated primarily from the combustion of coal or other fossil fuels, except residue derived from the burning or processing of hazardous waste in a boiler or industrial furnace as provided by **40 CFR § 266.112** (incorporated by reference through § 7-109(b)(1) of these regulations).

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (d) Mining overburden returned to the mine site.
- (e) Waste from the extraction, beneficiation, and processing of ores and minerals (including coal, phosphate rock and overburden from the mining of uranium ore), except residue derived from the burning or processing of hazardous waste in a boiler or industrial furnace as provided by **40 CFR § 266.112** (incorporated by reference through **§ 7-109(b)(1)** of these regulations). For purposes of this section, beneficiation of ores and minerals is restricted to the following activities: crushing; grinding; washing; dissolution; crystallization; filtration; sorting; sizing; drying; sintering; pelletizing; briquetting; calcining to remove water and/or carbon dioxide; roasting, autoclaving, and/or chlorination in preparation for leaching (except where the roasting [and/or autoclaving and/or chlorination]/leaching sequence produces a final or intermediate product that does not undergo further beneficiation or processing); gravity concentration; magnetic separation; electrostatic separation; flotation; ion exchange; solvent extraction; electrowinning; precipitation; amalgamation; and heap, dump, vat, tank, and in situ leaching. For the purposes of this section, waste from the processing of ores and minerals includes only those listed by **40 CFR § 261.4(b)(7)(ii)** as generated.
- (f) Waste containing radioactive waste when it meets the eligibility criteria and conditions of **40 CFR § 261.3(h)**.
- (g) In the case of any waste consisting of, containing, or derived from any waste or any product or constituent listed in **§§ 7-210 through 7-215** of this subchapter, when it has been determined by the Secretary that the waste is not hazardous pursuant to the delisting procedures of **§ 7-217 or § 7-218**.
- (h) A hazardous waste which is generated in a product or raw material storage tank, a product or raw material transport vehicle or vessel, a product or raw material pipeline, or in a manufacturing process unit or an associated non-waste treatment manufacturing unit until it exits the unit in which it was generated provided:
 - (1) The unit is not a surface impoundment; and
 - (2) The hazardous waste remains in the unit for less than ninety (90) days after the unit ceases to be operated for manufacturing, storage, or transportation of a product or raw material.
- (i) Samples as follows:
 - (1) Except as provided in **subsection (i)(2) of this section**, samples collected for the sole purpose of testing to determine their properties, characteristics or composition when:
 - (A) The sample is being transported to a laboratory for the purpose of testing;
 - (B) The sample is being transported back to the sample collector after testing;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (C) The sample is being stored by the sample collector before transport to a laboratory for testing;
 - (D) The sample is being stored in a laboratory before testing;
 - (E) The sample is being stored in a laboratory after testing but before it is returned to the sample collector; or
 - (F) The sample is being stored temporarily in the laboratory after testing for a specific purpose (for example, until conclusion of a court case or enforcement action where further testing of the sample may be necessary).
- (2) In order to qualify for the exemption in **subsections (i)(1)(A) and (B) of this section**, a sample collector shipping samples to a laboratory and a laboratory returning samples to a sample collector must:
- (A) Comply with U. S. Department of Transportation (DOT), U. S. Postal Service (USPS) and any other applicable shipping requirements; or
 - (B) Comply with the following requirements if the sample collector determines that DOT, USPS or other shipping requirements do not apply to the shipment of the sample:
 - (i) Assure that the following accompanies the sample:
 - (aa) The sample collector's name, mailing address and telephone number;
 - (bb) The laboratory's name, mailing address and telephone number;
 - (cc) The quantity of the sample;
 - (dd) The date of shipment; and
 - (ee) A description of the sample.
 - (ii) Package the sample so that it does not leak, spill, or vaporize from its packaging.
- (3) This exemption does not apply if the laboratory determines that the waste is hazardous but the laboratory is no longer meeting any of the conditions stated in **subsection (i)(1) of this section**.
- (4) Treatability study samples as provided in **40 CFR §§ 261.4(e) and (f)**.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (j) Containers and inner liners from containers of hazardous waste provided that the containers and inner liners are empty. Containers and inner liners are empty under the following conditions:
- (1) For those containers or inner liners which have held hazardous waste, when all material has been removed using the practices commonly employed to remove materials from that type of container, and
 - (A) No more than one inch of residue remains on the bottom of the container or inner liner; and
 - (B) No more than 3 percent by weight of the total capacity of the container remains in the container or inner liner if the container is less than or equal to 119 gallons in size; or
 - (C) No more than 0.3 percent by weight of the total capacity of the container remains in the container or inner liner if the container is greater than 119 gallons in size.
 - (2) For those containers that held a hazardous waste that is a compressed gas, when the pressure in the container approaches atmospheric pressure.
 - (3) For those containers or inner liners which have held acutely hazardous waste, pesticidal waste, or obsolete pesticide products:
 - (A) When the container or inner liner has been triple-rinsed with a solvent capable of removing the commercial chemical product or manufacturing chemical intermediate;
 - (B) When the container or inner liner is cleaned by a method which the generator has demonstrated to achieve equivalent removal; or
 - (C) In the case of a container, the inner liner that prevented contact of the commercial chemical product or manufacturing chemical intermediate with the container has been removed.
- (k) Mixtures of solid waste and hazardous waste provided that:
- (1) The hazardous waste in the mixture is listed in §§ **7-210 through 7-215** solely because it exhibits one or more of the characteristics of hazardous waste identified in §§ **7-205 through 7-207**, and the resultant mixture no longer exhibits any characteristic. However, wastes that exhibit a characteristic at the point of generation are subject to the requirements of **40 CFR Part 268**, even if they no longer exhibit a characteristic at the point of land disposal.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) The hazardous waste in the mixture is listed in §§ **7-210 through 7-215** solely because it exhibits one or more of the characteristics of hazardous waste identified in §§ **7-205 through 7-207**, and the solid waste is excluded from regulation under **subsection (e) of this section**, and the resultant mixture no longer exhibits any hazardous waste characteristic for which the hazardous waste in the mixture was listed. However, wastes that exhibit a characteristic at the point of generation are subject to the requirements of **40 CFR Part 268**, even if they no longer exhibit a characteristic at the point of land disposal.
- (3) The hazardous waste in the mixture is listed in §§ **7-210 through 7-215** and the generator can demonstrate that the mixture consists of wastewater the discharge of which is subject to regulation under either § **402** or § **307(b) of the Clean Water Act** (including wastewater at facilities which have eliminated the discharge of wastewater) as specified in **40 CFR § 261.3(a)(2)(iv)**.
- (4) Nonwastewater mixtures are still subject to the requirements of **40 CFR Part 268** (incorporated by reference by § **7-106** of these regulations), even if they no longer exhibit a characteristic at the point of land disposal.

Note: Dilution of hazardous waste subject to the land disposal restrictions of 40 CFR Part 268 is prohibited pursuant to **40 CFR § 268.3** (incorporated by reference through § **7-106** of these regulations).

- (1) Water-miscible metal cutting and grinding fluid waste that does not exhibit a characteristic of hazardous waste as defined in §§ **7-205 through 7-208** provided:
 - (1) It is recycled or treated on-site (e.g., centrifugation, evaporation, filtration and ultrafiltration) or sent off-site for treatment; and

Note: Evaporation equipment must be approved in accordance with Vermont's Air Pollution Control Regulations.
 - (2) Containers and/or tanks holding water-miscible metal cutting and grinding fluid are:
 - (A) Marked with words that identify the contents;
 - (B) Kept closed except to add or remove spent material;
 - (C) In good condition (i.e., no severe rusting, apparent structural defects or deterioration);
 - (D) Stored on an impervious surface, and if stored out-of-doors, within a structure that sheds rain and snow; and
 - (3) If the waste is subject to freezing and expansion, mechanical or physical means are employed to prevent freezing; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) Any residue resulting from on-site recycling or treatment is managed either as used oil in accordance with the requirements of **subchapter 8**, or in accordance with applicable hazardous waste management requirements of **subchapters 1 through 7**; and
 - (5) Any water resulting from on-site treatment is discharged in accordance with **10 V.S.A. chapter 47** (for indirect injection well, and direct discharges) and **chapter 48** (for groundwater protection); and
 - (6) Any water-miscible metal cutting and grinding fluid waste sent off-site for treatment are offered for transport only to a transporter permitted according to the requirements of **subchapter 4**.
- (m) Wood ash subject to regulation as hazardous waste only because it exhibits the characteristic of corrosivity described in **§ 7-206(a)(3)** provided the ash is stored in a location that is either:
- (1) Protected from precipitation; or
 - (2) Secure from public access (e.g., fenced) and has a sign posted warning of the corrosive hazard of wet wood ash.
- (n) Used oil that meets the criteria of the VT02 hazardous waste code and/or exhibits a hazardous waste characteristic, is not subject to the requirements of **subchapters 3 through 7** of these regulations, but is subject to the Used Oil Management Standards of **subchapter 8**.
- Note:** Pursuant to **10 V.S.A. § 6621a**, no person shall knowingly dispose of used oil in a landfill.
- (o) Non-terne plated used oil filters that are not mixed with wastes listed in **§§ 7-210 through 7-215** if:
- (1) These oil filters have been gravity drained using one of the following methods:
 - (A) Puncturing the filter anti-drain back valve or the filter dome end and hot-draining;
 - (B) Hot-draining and crushing;
 - (C) Hot-draining and dismantling; or
 - (D) Any other equivalent hot-draining method that will remove used oil; or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

(E) Draining and crushing using a mechanical, pneumatic, or hydraulic device designed for the purpose of crushing oil filters and effectively removing the oil; and

(2) All drained oils are collected and managed subject to these regulations.

Note: The Agency recommends that drained oil filters be recycled as scrap metal.

(p) Petroleum contaminated soil provided:

(1) The soil does not exhibit a characteristic of hazardous waste as defined in §§ **7-205 through 7-208**, with the exception that soil subject to the corrective action requirements of **40 CFR Part 280** is not subject to regulation as hazardous waste solely for the waste codes of D018 through D043 of §**7-208**; and

(2) The soil does not contain waste listed in §§ **7-210 through 7-215**, with the exception that soil may contain waste identified by the VT02 hazardous waste code; and

(3) The soil is evaluated by field screening, review of any available information about the contaminant (e.g., materials safety data sheet information) and, if necessary, laboratory analysis and/or testing to establish the type and concentration of the contaminant(s) present; and

Note: Field screening and laboratory analysis or testing must be conducted by an independent professional consulting firm or laboratory using a method or methods that are either identified under § **7-219** of these regulations or that are otherwise approved by the Secretary.

(4) The soil is managed (e.g., assessed, monitored, excavated, stored, treated, transported, or stockpiled) in a manner that is protective of human health and the environment (refer to **Chapter 3** of the Agency's "**Investigation and Remediation of Contaminated Properties Procedure**" which is available from the Secretary upon request).

(q) Industrial discharges in compliance with **10 V.S.A. chapter 47**. This exemption applies only to the actual point source discharge. It does not exclude wastewaters while they are being collected, stored, or treated before discharge nor does it exclude sludges that are generated by industrial wastewater treatment.

(r) Pesticidal wastes that are both generated and disposed of by the same farmer provided:

(1) The emptied pesticide container is triple-rinsed in accordance with the provisions of **subsection (j) of this section**; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) The pesticide residues are disposed of on the farmer's own farm in a manner consistent with the disposal instructions on the pesticide label.
- (s) The wastes listed below are exempt from regulation under **subchapters 1 through 7** of these regulations except as specified in **subchapter 9** of these regulations. The following wastes are subject to regulation as universal wastes under subchapter 9:
 - (1) Batteries as described in **§ 7-902**;
 - (2) Pesticides as described in **§ 7-903**;
 - (3) Thermostats as described in **§ 7-904**;
 - (4) PCB-containing fluorescent light ballasts as described in **§ 7-905**;
 - (5) Lamps as described in **§ 7-906**;
 - (6) Mercury-containing devices as described in **§ 7-907**; and
 - (7) Cathode ray tubes (CRTs) as described in **§ 7-908**.
- (t) PCB-containing dielectric fluid and, with the exception of fluorescent light ballasts, electric equipment containing such fluid authorized for use and regulated under **40 CFR Part 761** of the Toxic Substances Control Act and that are hazardous only because they either meet the criteria of the VT01 hazardous waste identification code or fail the test for the Toxicity Characteristic (hazardous waste codes D018 through D043 only). This exemption is not applicable to waste contaminated with PCB-containing dielectric fluid.
- (u) The following materials provided they do not exhibit a characteristic identified in **§§ 7-205 through 7-208**:
 - (1) Hazardous debris as defined in 40 CFR Part 268 (Land Disposal Restrictions incorporated by reference through **§ 7-106**) that has been treated using one of the required extraction or destruction technologies specified in **Table 1 of 40 CFR § 268.45**; persons claiming this exclusion in an enforcement action will have the burden of proving by clear and convincing evidence that the material meets all of the exclusion requirements; or
 - (2) Debris as defined in 40 CFR Part 268 (Land Disposal Restrictions incorporated by reference through **§ 7-106**) that the Secretary, considering the extent of contamination, has determined is no longer contaminated with hazardous waste.
- (v) Waste which consists of discarded arsenical-treated wood or wood products which fails the test for the toxicity characteristic for hazardous waste codes D004 through D017 and which is not a hazardous waste for any other reason if the waste is generated by persons

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

who utilize the arsenical-treated wood and wood products for these materials' intended end use.

- (w) Used oil contaminated rags or wipes that do not exhibit a hazardous waste characteristic provided:
 - (1) The rags or wipes are picked up and cleaned under a contractual agreement with a commercial laundering service;
 - (2) Free liquid is not present in the rags or wipes as per test method 9095 of EPA Publication SW 846 (the paint filter liquids test); and
 - (3) Prior to being picked up by the launderer, the rags or wipes are accumulated and stored on-site in containers that are:
 - (A) Marked with words that identify the contents as used rags or wipes destined for laundering;
 - (B) Kept closed except to add or remove spent material;

Note: If a bag is used to accumulate and/or store used oil contaminated rags or wipes, it must be kept in a closed container.

 - (C) In good condition (i.e., no rips, tears, severe rusting, apparent structural defects or deterioration); and
 - (D) Stored on an impervious surface, and if stored out-of-doors, within a structure that sheds rain and snow.
- (x) Reusable absorbent material contaminated with used oil that does not exhibit a hazardous waste characteristic provided that:
 - (1) The contaminated absorbent material is processed and reused on-site, any residual material that results from processing is managed in accordance with these regulations, and any contaminated water resulting from on-site processing is discharged in accordance with **10 V.S.A. chapter 47** (for indirect injection well, and direct discharges) and **chapter 48** (for groundwater protection); and
 - (2) Prior to being processed, the absorbent materials are accumulated and stored on-site in containers that are:
 - (A) Marked with words that identify the contents;
 - (B) Kept closed except to add or remove spent material;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (C) In good condition (i.e., no severe rusting, apparent structural defects or deterioration); and
 - (D) Stored on an impervious surface, and if stored out-of-doors, within a structure that sheds rain and snow.
- (y) Reserved
- (z) A military munition when:
- (1) Used for its intended purpose, including:
 - (A) Use for training military personnel or explosives and munitions emergency response specialists;
 - (B) Use in research, development, testing, or evaluation of military munitions, weapons, or weapon systems; or
 - (C) Recovery, collection, and on-range destruction of unexploded ordinance and munitions fragments during range clearance activities at active or inactive ranges.
 - (2) An unused military munition, or component of that munition, is being repaired, reused, recycled, reclaimed, disassembled, reconfigured or otherwise subjected to materials recovery activities, unless those activities include use constituting disposal or burning for energy recovery.
- (aa) Consumer products that are available to the general public in the marketplace which were treated with perfluorooctanoic acid, perfluorooctanesulfonic acid or a material containing perfluorooctanoic acid or perfluorooctanesulfonic acid.
- (bb) Remediation wastes from an environmental response action that contain perfluorooctanoic acid, perfluorooctanesulfonic acid or a material containing perfluorooctanoic acid or perfluorooctanesulfonic acid and when those remediation wastes disposed in accordance with an corrective action plan or disposal plan approved by the Secretary.
- (cc) Sludges and other residuals from a wastewater treatment or drinking water system that contain perfluorooctanoic acid, perfluorooctanesulfonic acid or a material containing perfluorooctanoic acid or perfluorooctanesulfonic acid and when those remediation wastes disposed in accordance with an corrective action plan or disposal plan approved by the Secretary.

§ 7-204 RECYCLING EXEMPTIONS

The following wastes are exempted from the provisions of these regulations if they are recycled as specified:

Note: Refer to **subchapter 6** for standards applicable to hazardous waste recycling activities not exempted under this section.

- (a) (1) Hazardous wastes, other than the wastes described in **subsections (a)(2)(A) through (D) of this section**, that are recycled on-site by being:
 - (A) Used or reused as ingredients in an industrial process to make a product, provided the wastes are not first being processed or reclaimed; or
 - (B) Used or reused as effective substitutes for commercial products, provided the wastes are not first being processed or reclaimed; or
 - (C) Returned to the original process from which they are generated, without first being reclaimed or land disposed. The wastes must be returned as a substitute for feedstock materials. In cases where the original process to which the material is returned is a secondary process, the wastes must be managed such that there is no placement on the land.
- (2) The following materials are not exempt from the provisions of these regulations, even if they are recycled according to **subsections (a)(1)(A) through (a)(1)(C) of this section**:
 - (A) Except as provided in **subsection (k) of this section**, materials used in a manner constituting disposal, or used to produce products that are applied to the land; or
 - (B) Except as provided in **subsection (l) of this section**, materials burned for energy recovery, used to produce a fuel, or contained in fuels; or
 - (C) Materials accumulated speculatively as defined in **40 CFR § 261.1(c)(8)**; or
 - (D) Inherently waste-like materials listed in **40 CFR §§ 261.2(d)(1) and (d)(2)**.
- (b) Spent wood preserving solutions that have been reclaimed and are reused for their original intended purpose provided those solutions are managed prior to reuse according to the requirements of **40 CFR § 261.4(a)(9)(iii)**.
- (c) Wastewaters from the wood preserving process that have been reclaimed and are reused to treat wood provided those wastewaters are managed prior to reuse according to the requirements of **40 CFR § 261.4(a)(9)(iii)**.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (d) Used chlorofluorocarbon refrigerants from totally enclosed heat transfer equipment, including mobile air conditioning systems, mobile refrigeration, and commercial and industrial air conditioning and refrigeration systems that use chlorofluorocarbons as the heat transfer fluid in a refrigeration cycle, provided the refrigerant is reclaimed for further use.
- (e) Scrap metal that is recycled.
- (f) Spent lead-acid batteries that are reclaimed or regenerated, provided:
 - (1) Persons who generate or collect spent lead-acid batteries, who regenerate spent lead-acid batteries, or who store spent lead-acid batteries but do not reclaim them (other than spent lead-acid batteries that are to be regenerated) store such batteries under cover on an impervious surface; and
 - (2) Transport of spent lead-acid batteries is done in compliance with **49 CFR Parts 171 through 177**; and
 - (3) Owners or operators of facilities which store lead-acid batteries (other than spent lead-acid batteries that are to be regenerated) before reclaiming them comply with the requirements of **40 CFR Part 266, Subpart G**.
- (g) Recyclable materials that are reclaimed to recover economically significant amounts of gold, silver, platinum, palladium, iridium, osmium, rhodium, ruthenium, or any combination of these metals provided:
 - (1) Persons who generate, transport, store or recycle these recyclable materials comply with **40 CFR Part 266, Subpart F**.
 - (2) Any generator or facility accumulating or storing these recyclable materials from which precious metals are reclaimed comply with any additional standards and requirements specified by the Secretary as necessary to protect human health and the environment. In making such determination, the Secretary shall use the standards and procedures specified in **40 CFR §§ 260.40 and 260.41**.
- (h) Intact or shredded circuit boards being recycled provided that they are:
 - (1) Stored in containers sufficient to prevent a release to the environment prior to recovery; and
 - (2) Free of mercury switches, mercury relays and nickel-cadmium batteries and lithium batteries.
- (i) Spent ethylene glycol or water-based ethylene glycol solutions (e.g., antifreeze) that are subject to regulation as hazardous waste for meeting only the criteria of the VT08 hazardous waste code provided that:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (1) The spent ethylene glycol or water-based ethylene glycol solution is recycled for reuse (e.g., filtered) and/or treated for reuse (e.g., additives added); and
 - (2) Containers and/or tanks used to hold spent ethylene glycol or water-based ethylene glycol solution are:
 - (A) Marked with words that identify the contents;
 - (B) Kept closed except to add or remove spent material;
 - (C) In good condition (i.e., no severe rusting, apparent structural defects or deterioration);
 - (D) Stored on an impervious surface, and if stored out-of-doors, within a structure that sheds rain and snow; and
 - (3) If the spent ethylene glycol or water-based ethylene glycol solution is subject to freezing and expansion, mechanical or physical means are employed to prevent freezing; and
 - (4) Any residue resulting from on-site recycling and/or treatment that is hazardous waste is managed as hazardous waste.
- (j) Used oil re-refining distillation bottoms that are used as feedstock to manufacture asphalt products.
- (k) Commercial chemical products that are applied to the land provided that land application is their ordinary manner of use.
- (l) Commercial chemical products that are themselves fuels (e.g., gasoline, aviation fuel, diesel fuel) provided:
- (1) The commercial chemical product is burned for energy recovery, or is mixed or reclaimed to produce a fuel;
 - (2) The commercial chemical product is not mixed with non-fuel hazardous waste;
 - (3) The generator maintains a written record of any commercial chemical product shipped off-site that includes:
 - (A) The type and amount of material shipped;
 - (B) The date of generation;
 - (C) The date of shipment; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (D) The name, address and phone number of the receiving facility;
- (4) Prior to shipment off-site, the commercial chemical product is accumulated and stored in containers and/or tanks that are:
 - (A) Marked to identify the date the container or tank becomes full and with words that identify the contents as a usable fuel product;
 - (B) Kept closed except when adding or removing material;
 - (C) In good condition (i.e., no severe rusting, apparent structural defects or deterioration);
 - (D) Kept on an impervious surface, and if stored out-of-doors, within a structure that sheds rain and snow; and
 - (E) Handled and stored in a manner that minimizes the possibility of fire, explosion or a release or discharge to air, soil, groundwater, or surface water;
- (5) If the commercial chemical product is subject to freezing and expansion, mechanical or physical means are employed to prevent freezing; and
- (6) The commercial chemical product is shipped within 45 days from the date the container or tank becomes full to: a facility that burns the product for energy recovery, or mixes or reclaims the product to produce a fuel; a designated facility; or an aggregation facility that meets the following:
 - (A) The owner of the facility has requested and received approval from the Secretary, using a form provided by the Secretary, to operate an aggregation facility. Any aggregation facility already in operations on the effective date of these regulations shall comply with the requirements of this section within 90 days of the effective date of these regulations.
 - (B) Commercial chemical product is not stored at the aggregation facility for more than 30 days.
 - (C) All commercial chemical product stored at the aggregation facility is shipped to: a facility that burns the product for energy recovery, or mixes or reclaims the product to produce a fuel; or a designated facility.
 - (D) All commercial chemical product stored at the aggregation facility meets the following requirements:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (i) Containers must kept closed except when adding or removing material, be marked with words that identify the contents as a usable fuel product, and be stored:
 - (aa) In a manner to prevent leakage or rupture;
 - (bb) Upon an impervious surface;
 - (cc) Such that the required marking is visible;
 - (dd) With sufficient aisle space between rows of containers to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment and decontamination equipment to any area of facility operation. In no circumstance shall the aisle space be less than twenty-four (24) inches wide;
 - (ee) In an area with secondary containment capable of holding 110% of the capacity of the largest container to be placed in temporary storage, or 10% of the total design capacity of the storage area, whichever is greater;
 - (ff) Only with wastes or other materials that are compatible with the commercial chemical product;
 - (gg) Within a structure that sheds rain and snow; and
 - (hh) If the commercial chemical product is subject to freezing and expansion, in an area where mechanical or physical means are employed to prevent freezing.
- (ii) Where applicable, underground storage tanks (USTs) holding commercial chemical product shall be:
 - (aa) Permitted, operated, and maintained in accordance with the Vermont Underground Storage Tank Regulations; and
 - (bb) Equipped with fill pipes that are marked or labeled to clearly identify the contents of the UST as a usable fuel product.
- (iii) Where applicable, above-ground storage tanks (including unregistered tank trailers) holding a commercial chemical product shall be:
 - (aa) Installed and operated in accordance with Vermont Department of Labor Standards;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (bb) Clearly marked with words that identify the contents as a usable fuel product;
 - (cc) Managed in such a manner as to prevent rupture of the tank and to ensure that no release occurs; and
 - (dd) If located out-of-doors, equipped with secondary containment as specified in **40 CFR §§ 279.45(e) and (f)**.
- (E) The owner or operator of the aggregation facility maintains a written operating log that identifies the date that commercial chemical product is received, the amount received, the location from where it was received, the date of shipment off-site, the amount shipped off site, and the location where it was sent.
- (F) The owner of the aggregation facility maintains a written contingency plan for the facility as described in **§ 7-308(b)(14)**.
- (G) The owner of the aggregation facility has certified, using the form submitted to the Secretary pursuant to subsection (A) of this section, that he or she will comply with the closure requirements of **§ 7-309(c)**.

§ 7-205 CHARACTERISTIC OF IGNITABILITY

- (a) A waste is an ignitable hazardous waste if a representative sample of the waste has any of the following properties:
- (1) It is a liquid and has a flash point of less than 60°C, which is approximately 140°F as determined by a Pensky-Martens Closed Cup Tester, using the test method specified in ASTM Standard D 93-79 or D 93-80 (incorporated by reference, see **§ 7-219(d)**), or a Setaflash Closed Cup Tester, using the test method specified in ASTM Standard D 3278-78 (incorporated by reference, see **§ 7-219(d)**). However, an aqueous solution of alcohol that contains less than 24 percent alcohol by volume will not be considered an ignitable waste;
 - (2) It is not a liquid and is capable under standard temperature and pressure of causing fire through friction, absorption of moisture, or spontaneous chemical changes and, when ignited, burns so vigorously and persistently that it creates a hazard, or it is a solid-phase material and is determined to be an “ignitable solid” using the SW-846 Method 1030 test method;
 - (3) It is an ignitable compressed gas as defined in **40 CFR § 261.21(a)(3)(i)** and shall be characterized as ignitable as determined by the test methods described in **40 CFR § 261.21(a)(3)(ii)**; or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) It is an oxidizer. An oxidizer for the purposes of this subchapter is a substance such as chlorate, perchlorate, nitrate, nitrite, permanganate, or inorganic peroxide that yields oxygen readily to stimulate the combustion of organic matter. An organic compound containing the bivalent -O-O- structure and which may be considered a derivative of hydrogen peroxide where one or more of the hydrogen atoms have been replaced by organic radicals must be classed as an organic peroxide unless:
- (A) The material meets the definition of a Class A explosive or a Class B explosive, as defined in **40 CFR § 261.23(a)(8)**, in which case it must be classed as an explosive;
 - (B) The material is forbidden to be offered for transportation according to **49 CFR 172.101 and 49 CFR 173.21**;
 - (C) It is determined that the predominant hazard of the material containing an organic peroxide is other than that of an organic peroxide; or
 - (D) According to data on file with the Pipeline and Hazardous Materials Safety Administration in the U.S. Department of Transportation, it has been determined that the material does not present a hazard in transportation.
- (b) A waste that exhibits the characteristic of ignitability has the EPA hazardous waste code of D001.

§ 7-206 CHARACTERISTIC OF CORROSIVITY

- (a) A waste is a corrosive hazardous waste if a representative sample of the waste has any of the following properties:
- (1) It is an aqueous solution which has a pH of less than or equal to 2 or greater than or equal to 12.5 as determined by a pH meter using Method 9040C in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846 (incorporated by reference, see **§ 7-219(d)**); or
 - (2) It is a liquid and corrodes steel (type SAE 1020) at a rate greater than 0.250 inch per year at a test temperature of 55°C (130°F) as determined by Method 1110A in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846 (incorporated by reference, see **§ 7-219(d)**); or
 - (3) It is a solid phase material at standard temperature and pressure which when mixed 50% by weight with distilled water yields a pH less than or equal to 2 or greater than or equal to 12.5 as determined by a pH meter using Method 9045 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846 (incorporated by reference, see **§ 7-219(d)**).

- (b) A waste that exhibits the characteristic of corrosivity because it meets the criteria of **subsection (a)(1) or (a)(2) of this section** has the EPA hazardous waste code of D002. A waste that exhibits the characteristic of corrosivity because it meets the criteria of **subsection (a)(3) of this section** has the hazardous waste code of VT20.

7-207 CHARACTERISTIC OF REACTIVITY

- (a) A waste is a reactive hazardous waste if a representative sample of the waste has any of the following properties:
- (1) It is normally unstable and readily undergoes violent change without detonating;
 - (2) It reacts violently with water;
 - (3) It forms potentially explosive mixtures with water;
 - (4) When mixed with water, it generates toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or to the environment;
 - (5) It is a cyanide or sulfide bearing waste which, when exposed to a pH condition between 2 and 12.5, can generate toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or to the environment;
 - (6) It is capable of detonation or an explosive reaction if it is subjected to a strong initiating source or if heated under confinement;
 - (7) It is readily capable of detonation or explosive decomposition or reaction at standard temperature and pressure;
 - (8) It is a forbidden explosive as defined in **49 CFR § 173.54**, or is a Division 1.1, 1.2 or 1.3 explosive as defined in **49 CFR §§ 173.50 and 173.53**.
- (b) A waste that exhibits the characteristic of reactivity has the EPA hazardous waste code of D003.

§ 7-208 CHARACTERISTIC OF TOXICITY

- (a) A waste is a hazardous waste if, using the Toxicity Characteristic Leaching Procedure (TCLP), test Method 1311 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846 (incorporated by reference, see **§ 7-219(d)**), the extract from a representative sample of the waste contains any of the contaminants listed in **Table 1** at the concentration equal to or greater than the respective value given in that Table. Where the waste contains less than 0.5% filterable solids, the

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

waste itself, after filtering using the methodology outlined in Method 1311, is considered to be the extract for the purposes of this section.

- (b) A waste that exhibits the characteristic of toxicity has all applicable EPA hazardous waste codes specified in **Table 1** which correspond to any of the toxic contaminants listed in Table 1 that cause it to be hazardous.

Table 1
MAXIMUM CONCENTRATION OF CONTAMINANTS
FOR THE CHARACTERISTIC OF TOXICITY

Hazardous Waste Code	Contaminant	CAS Number	Regulatory Level (mg/L)
D004	Arsenic	7440-38-2	5.0
D005	Barium	7440-39-3	100.0
D006	Cadmium	7440-43-9	1.0
D007	Chromium	7440-47-3	5.0
D008	Lead	7439-92-1	5.0
D009	Mercury	7439-97-6	0.2
D010	Selenium	7782-49-2	1.0
D011	Silver	7440-22-4	5.0
D012	Endrin(1,2,3,4,10,10-Hexachloro-1,7-epoxy-1,4,4a,5,6,7,8 8a-octahydro-1,4-endo, endo-5,8-dimethano-naphthalene)	72-20-8	0.02
D013	Lindane (1,2,3,4,5,6-Hexachlorocyclohexane, gamma isomer)	58-89-9	0.4
D014	Methoxychlor (1,1,1-Trichloro-2,2-bis[p-methoxyphenyl] ethane)	72-43-5	10.0
D015	Toxaphene (C ₁₀ H ₁₀ C ₁₈ , Technical chlorinated camphene, 67 to 69 percent chlorine)	8001-35-2	0.5
D016	2,4-D (2,4-Dichlorophenoxyacetic acid)	94-75-7	10.0
D017	2,4,5-TP Silvex (2,4,5-Trichlorophenoxypropionic acid)	93-72-1	1.0
D018	Benzene	71-43-2	0.5
D019	Carbon tetrachloride	56-23-5	0.5
D020	Chlordane	57-74-9	0.03
D021	Chlorobenzene	108-90-7	100.0
D022	Chloroform	67-66-3	6.0
D023	o-Cresol	95-48-7	200.0 ¹

¹ If o-, m-, and p-Cresol concentrations cannot be differentiated, the total cresol (D026) concentration is used. The regulatory level of total cresol is 200 mg/l.

D043	Vinyl Chloride	75-01-4	0.2

Note: “CAS” Number means Chemical Abstract Service Number.

§ 7-209 LISTS OF HAZARDOUS WASTES

- (a) Reserved.
- (b) The following hazardous wastes listed in **§ 7-210** are subject to the exclusion limits for acutely hazardous wastes established in **§ 7-306(a)**: hazardous waste codes F020, F021, F022, F023, F026, and F027.

² Quantitation limit is greater than the calculated regulatory level. The quantitation limit therefore becomes the regulatory level.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (c) The wastes listed in §§ 7-210, 7-211, 7-212, 7-214 and 7-215 are identified as toxicity characteristic waste (E), toxic waste (T), reactive waste (R), corrosive waste (C), ignitable waste (I), acutely hazardous waste (H), or a combination thereof.

§ 7-210 HAZARDOUS WASTES FROM NON-SPECIFIC SOURCES

The following wastes are listed hazardous wastes from non-specific sources:

Hazardous Waste Code	Hazardous Wastes from Non-Specific Sources	Hazard
Generic F001	The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichloroethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; all spent solvent mixtures/blends used in degreasing containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those solvents listed in F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(T)
F002	The following spent halogenated solvents: Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane, and 1,1,2-trichloroethane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those listed in F001, F004 or F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(T)
F003	The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/blends containing, before use, only the above spent non-halogenated solvents; and all spent solvent mixtures/blends containing, before use, one or more of the above non-halogenated solvents, and, a total of ten percent or more (by volume) of one or more of those solvents listed in F001, F002, F004 and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(I)*
F004	The following spent non-halogenated solvents: Cresols and cresylic acid and nitrobenzene; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(T)
F005	The following spent non-halogenated solvents: Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures.	(I,T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Hazardous Wastes from Non-Specific Sources	Hazard
F006	Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating of carbon steel; and (6) chemical etching and milling of aluminum.	(T)
F007	Spent cyanide plating bath solutions from electroplating operations.	(R,T)
F008	Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process.	(R,T)
F009	Spent stripping and cleaning bath solutions from electroplating operations where cyanides are used in the process.	(R,T)
F010	Quenching bath residues from oil baths from metal heat treating operations where cyanides are used in the process.	(R,T)
F011	Spent cyanide solutions from salt bath pot cleaning from metal heat treating operations.	(R,T)
F012	Quenching waste water treatment sludges from metal heat treating operations where cyanides are used in the process.	(T)
F019	Wastewater treatment sludges from the chemical conversion coating of aluminum except from zirconium phosphating in aluminum can washing when such phosphating is an exclusive conversion coating process.	(T)
F020	Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- or tetrachlorophenol, or of intermediates used to produce their pesticide derivatives. (This listing does not include wastes from the production of Hexachlorophene from highly purified 2,4,5-trichlorophenol).	(H)
F021	Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of pentachlorophenol, or of intermediates used to produce its derivatives.	(H)
F022	Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, penta-, or hexachlorobenzenes under alkaline conditions.	(H)
F023	Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the production or manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tri- and tetrachlorophenols. (This listing does not include wastes from equipment used only for the production or use of Hexachlorophene from highly purified 2,4,5-trichlorophenol).	(H)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Hazardous Wastes from Non-Specific Sources	Hazard
F024	Process wastes, including but not limited to, distillation residues, heavy ends, tars, and reactor clean-out wastes, from the production of certain chlorinated aliphatic hydrocarbons by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution. (This listing does not include wastewaters, wastewater treatment sludges, spent catalysts, and wastes listed in Appendix I).	(T)
F025	Condensed light ends, spent filters and filter aids, and spent desiccant wastes from the production of certain chlorinated aliphatic hydrocarbons, by free radical catalyzed processes. These chlorinated aliphatic hydrocarbons are those having carbon chain lengths ranging from one to and including five, with varying amounts and positions of chlorine substitution.	(T)
F026	Wastes (except wastewater and spent carbon from hydrogen chloride purification) from the production of materials on equipment previously used for the manufacturing use (as a reactant, chemical intermediate, or component in a formulating process) of tetra-, or hexachlorobenzene under alkaline conditions.	(H)
F027	Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing Hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component).	(H)
F028	Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. F020, F021, F023, F026, and F027.	(T)
F032	Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that currently use or have previously used chlorophenolic formulations (except potentially cross-contaminated wastes that have had the F032 waste code deleted in accordance with 40 CFR § 261.35 or potentially cross-contaminated wastes that are otherwise currently regulated as hazardous wastes (i.e., F034 or F035), and where the generator does not resume or initiate use of chlorophenolic formulations). This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote and/or pentachlorophenol.	(T)
F034	Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that use creosote formulations. This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote and/or pentachlorophenol.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Hazardous Wastes from Non-Specific Sources	Hazard
F035	Wastewaters (except those that have not come into contact with process contaminants), process residuals, preservative drippage, and spent formulations from wood preserving processes generated at plants that use inorganic preservatives containing arsenic or chromium. This listing does not include K001 bottom sediment sludge from the treatment of wastewater from wood preserving processes that use creosote and/or pentachlorophenol.	(T)
F037	Petroleum refinery primary oil/water/solids separation sludge-Any sludge generated from the gravitational separation of oil/water/solids during the storage or treatment of process wastewaters and oily cooling wastewaters from petroleum refineries. Such sludges include, but are not limited to, those generated in: oil/water/solids separators; tanks and impoundments; ditches and other conveyances; sumps; and stormwater units receiving dry weather flow. Sludge generated in stormwater units that do not receive dry weather flow, sludges generated from non-contact once-through cooling waters segregated for treatment from other process or oily cooling waters, sludges generated in aggressive biological treatment units as defined in 40 CFR § 261.31(b)(2) (including sludges generated in one or more additional units after wastewaters have been treated in aggressive biological treatment units) and K051 wastes are not included in this listing. (Refer to 40 CFR § 261.31(b) for listing specific definitions.)	(T)
F038	Petroleum refinery secondary (emulsified) oil/water/solids separation sludge-Any sludge and/or float generated from the physical and/or chemical separation of oil/water/solids in process wastewaters and oily cooling wastewaters from petroleum refineries. Such wastes include, but are not limited to, all sludges and floats generated in: induced air flotation (IAF) units, tanks and impoundments, and all sludges generated in dissolved air flotation (DAF) units. Sludges generated in stormwater units that do not receive dry weather flow, sludges generated from non-contact once-through cooling waters segregated for treatment from other process or oily cooling waters, sludges and floats generated in aggressive biological treatment units as defined in 40 CFR § 261.31(b)(2) (including sludges and floats generated in one or more additional units after wastewaters have been treated in aggressive biological treatment units) and F037, K048, and K051 wastes are not included in this listing. (Refer to 40 CFR § 261.31(b) for listing specific definitions.)	(T)
F039	Leachate (liquids that have percolated through land disposed wastes) resulting from the disposal of more than one restricted waste classified as hazardous under Subpart D of 40 CFR Part 261 (Leachate resulting from the disposal of one or more of the following EPA hazardous wastes and no other hazardous wastes retains its EPA hazardous waste code(s): F020, F021, F022, F026, F027, and/or F028.).	(T)

*(I, T) should be used to specify mixtures that are ignitable and contain toxic constituents.

§ 7-211 VERMONT LISTED HAZARDOUS WASTES

The following wastes are listed in Vermont as hazardous wastes:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Note: A waste that exhibits a hazardous waste characteristic or that is federally listed must be identified by its EPA hazardous waste code (refer to § 7-202(g)).

Hazardous Waste Code	Vermont Listed Hazardous Waste	Hazard
VT01	<p>Wastes containing polychlorinated biphenyls (PCB) in concentrations equal or greater than 50 parts per million.</p> <p>Note: Certain waste PCB-containing dielectric fluids, and electric equipment containing such fluid are exempted under § 7-203(t); PCB-containing fluorescent light ballasts managed in accordance with the universal waste management standards of subchapter 9 are exempted under § 7-203(s).</p>	(T)
VT02	<p>Waste containing greater than 5% by weight of petroleum distillates with melting points of less than 100°F, including but not limited to kerosene, fuel oil, hydraulic oils, lubricating oils, penetrating oils, tramp oils, quenching oils, and crankcase and automotive oils.</p> <p>Note: Wastes with a flashpoint less than 140°F are classified as D001 (ignitable).</p> <p>Note: Exemptions are provided for: used oil under § 7-203(n); oil filters under § 7-203(o); and petroleum contaminated soil under § 7-203(p).</p>	(I,T)
VT03	<p>Waste water-miscible metal cutting and grinding fluid.</p> <p>Note: Certain recycled or treated water-miscible metal cutting and grinding fluid wastes are exempted under § 7-203(l).</p>	(T)
VT06	<p>Pesticidal wastes and obsolete pesticidal products not specifically listed in subchapter 2.</p> <p>Note: Certain pesticides managed in accordance with the universal waste management standards of subchapter 9 are exempted under § 7-203(s).</p>	(T)
VT08	<p>Waste ethylene glycol and solutions containing greater than 700 parts per million of ethylene glycol (e.g., coolants, antifreeze).</p> <p>Note: Spent ethylene glycol and water-based ethylene glycol solutions that are recycled for reuse are exempted under § 7-204(i).</p>	(T)
VT11	<p>Wastes determined to be hazardous pursuant to § 7-216.</p>	(I,T,C,R,H)
VT20	<p>A solid material that when mixed with an equal weight of distilled water causes the liquid fraction of the mixture to exhibit the properties of the corrosivity characteristic as specified in § 7-206(a)(3).</p>	(C,R)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

<u>VT 21</u>	<u>Liquid wastes containing perfluorooctanoic acid (PFOA) in concentrations equal to or greater than 20 parts per trillion (ppt). For PFOA and PFOS, the standard of 20 ppt applies to the sum of the two substances (e.g. if the PFOA concentration is 15 ppt and the PFOS concentration is 6 ppt then there is an exceedance of the standard).</u>	(T)
<u>VT 22</u>	<u>Liquid wastes containing perfluorooctanesulfonic acid (PFOS) in concentrations equal to or greater than 20 parts per trillion (ppt). For PFOA and PFOS, the standard of 20 ppt applies to the sum of the two substances (e.g. if the PFOA concentration is 15 ppt and the PFOS concentration is 6 ppt then there is an exceedance of the standard).</u>	(T)
<u>VT99</u>	Non-hazardous waste. Note: This hazardous waste code is to be used only for non-hazardous waste shipped using a hazardous waste manifest.	N/A

§ 7-212 HAZARDOUS WASTES FROM SPECIFIC SOURCES

Hazardous wastes from specific sources are listed in **Appendix I**.

§ 7-213 HAZARDOUS CONSTITUENT WASTES

Wastes containing any of the hazardous constituents listed in **Appendix II** are hazardous wastes when:

- (a) The waste is not excluded from regulation under **§ 7-203 or § 7-204**; and
- (b) The Secretary concludes, following the listing procedures in **§ 7-216**, that the waste meets the definition of hazardous waste in **§ 7-103**.

§ 7-214 HAZARDOUS WASTES WHICH ARE DISCARDED COMMERCIAL CHEMICAL PRODUCTS

The following materials or items are hazardous waste if and when they are discarded or intended to be discarded, when they are mixed with waste oil or used oil or other material and applied to the land for dust suppression or road treatment, when they are otherwise applied to the land in lieu of their original intended use, when they are contained in products that are applied to the land in lieu of their original intended use, or when, in lieu of their original intended use, they are produced for use as (or as a component of) a fuel, distributed for use as a fuel, or burned as a fuel.

- (a) Any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix III**;

Note: The phrase "commercial chemical product or manufacturing chemical intermediate having the generic name listed in..." refers to a chemical substance which is

manufactured or formulated for commercial or manufacturing use which consists of the commercially pure grade of the chemical, any technical grades of the chemical that are produced or marketed, and all formulations in which the chemical is the sole active ingredient. It does not refer to a material, such as a manufacturing process waste, that contains any of the substances listed in **Appendix III**. Where a manufacturing process waste is deemed to be a hazardous waste because it contains a substance listed in **Appendix III**, such waste will be listed in either § 7-210 or § 7-212 or will be identified as a hazardous waste by the characteristics set forth in §§ 7-205 through 7-208.

- (b) Any off-specification commercial chemical product or manufacturing chemical intermediate which, if it met specifications, would have the generic name listed in **Appendix III**;
- (c) Reserved.
- (d) Any residue remaining in a container or in an inner liner removed from a container that has held any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix III**, unless the container is empty as defined in § 7-203(j).

Note: Unless the residue is being beneficially used or reused, or legitimately recycled or reclaimed; or being accumulated, stored, transported or treated prior to such use, re-use, recycling or reclamation, the Secretary considers the residue to be intended for discard, and thus, a hazardous waste. An example of a legitimate re-use of the residue would be where the residue remains in the container and the container is used to hold the same commercial chemical product or manufacturing chemical intermediate it previously held. An example of the discard of the residue would be where the drum is sent to a drum reconditioner who reconditions the drum but discards the residue.

- (e) Any residue or contaminated soil, water or other debris resulting from the clean-up of a release or discharge into or on any land or water of any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix III**, or any residue or contaminated soil, water or other debris resulting from the clean-up of a release or discharge into or on any land or water of any off-specification chemical product or manufacturing chemical intermediate which, if it met specifications, would have the generic name listed in **Appendix III**.

Note: The primary hazardous properties of these materials have been indicated by the letters T (Toxicity), R (Reactivity), I (Ignitability), and C (Corrosivity). Absence of a letter indicates that the compound is only listed for toxicity.

§ 7-215 ACUTELY HAZARDOUS WASTES

The following materials or items are acutely hazardous wastes if and when they are discarded or intended to be discarded, when they are mixed with waste oil or used oil or other material and

applied to the land for dust suppression or road treatment, when they are otherwise applied to the land in lieu of their original intended use, when they are contained in products that are applied to the land in lieu of their original intended use, or when, in lieu of the original intended use, they are produced for use as (or as a component of) a fuel, distributed for use as a fuel, or burned as a fuel.

- (a) Any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix IV**;

Note: The phrase "commercial chemical product or manufacturing chemical intermediate having the generic name listed in . . ." refers to a chemical substance which is manufactured or formulated for commercial or manufacturing use which consists of the commercially pure grade of the chemical, any technical grades of the chemical that are produced or marketed, and all formulations in which the chemical is the sole active ingredient. It does not refer to a material, such as a manufacturing process waste, that contains any of the substances listed in **Appendix IV**. Where a manufacturing process waste is deemed to be a hazardous waste because it contains a substance listed in **Appendix IV**, such waste will be listed in either § 7-210 or § 7-212 or will be identified as a hazardous waste by the characteristics set forth in §§ 7-205 through 7-208.

- (b) Any off-specification commercial chemical product or manufacturing chemical intermediate which, if it met specifications, would have the generic name listed in **Appendix IV**.
- (c) Reserved.
- (d) Any residue remaining in a container or in an inner liner removed from a container that has held any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix III**, unless the container is empty as defined in § 7-203(j).

Note: Unless the residue is being beneficially used or reused, or legitimately recycled or reclaimed; or being accumulated, stored, transported or treated prior to such use, re-use, recycling or reclamation, the Secretary considers the residue to be intended for discard, and thus, a hazardous waste. An example of a legitimate re-use of the residue would be where the residue remains in the container and the container is used to hold the same commercial chemical product or manufacturing chemical intermediate it previously held. An example of the discard of the residue would be where the drum is sent to a drum reconditioner who reconditions the drum but discards the residue.

- (e) Any residue or contaminated soil, water or other debris resulting from the clean-up of a release or discharge into or on any land or water of any commercial chemical product or manufacturing chemical intermediate having the generic name listed in **Appendix IV**, or any residue or contaminated soil, water or other debris resulting from the cleanup of a release or discharge into or on any land or water of any off-specification chemical

product or manufacturing chemical intermediate which, if it met specifications, would have the generic name listed in **Appendix IV**.

Note: The primary hazardous properties of these materials are indicated by the letters T (Toxicity), and R (Reactivity). Absence of a letter indicates that the compound is only listed for toxicity.

§ 7-216 LISTING OF A HAZARDOUS WASTE

- (a) Any person requesting the addition of a generic class of wastes to the lists at §§ 7-210 through 7-215, must file a petition for rulemaking with the Secretary. Prior to adopting a rule listing a generic class of wastes as a hazardous waste, the Secretary shall consider the following factors:
- (1) The toxicity of the waste;
 - (2) The waste's persistence and degradability in the environment;
 - (3) The waste's potential to concentrate or bioaccumulate in tissue;
 - (4) The waste's potential to cause or contribute to adverse acute or chronic effects on the health of persons or other living organisms; and
 - (5) The waste's potential to have an unusually destructive effect on water quality if discharged to ground or surface water.
- (b) For generators whose waste is not listed as a hazardous waste, the ~~The~~ Secretary, upon petition or on his or her own motion, may, on a case-by-case basis, make the determination that a waste generated by a particular generator or treated, stored or disposed of by a particular facility, meets the definition of hazardous waste at § 7-103.
- (1) Upon making the determination that a particular waste is hazardous, the Secretary shall notify the waste generator of this determination by certified letter. The letter shall include a fact sheet which briefly sets forth the principal facts and significant factual, methodological, and policy questions concerning the hazard determination.
 - (2) Within 30 days following receipt of a hazard determination, the generator may request a hearing before the Secretary to contest that determination. The request for hearing shall state the technical and legal questions at issue and shall contain the necessary documents to support the request.
 - (3) If no request for hearing is filed within 30 days, the generator shall be deemed to have accepted the hazard determination for the waste in question.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (c) When making a determination under subsection (b) of this section, the Secretary shall examine and consider the following factors:
- (1) The nature of the hazard presented by the waste;
 - (2) The amount and concentration of all hazardous constituents in the waste;
 - (3) The potential of all hazardous constituents in the waste or any toxic degradation product of such hazardous constituents to migrate from the waste into the environment;
 - (4) The persistence of all hazardous constituents in the waste or any toxic degradation product of such hazardous constituents;
 - (5) The degree to which all hazardous constituents in the waste or any toxic degradation product of such hazardous constituents bioaccumulate in ecosystems;
 - (6) The plausible types of improper management to which the waste could be subjected;
 - (7) The quantity of waste involved;
 - (8) The nature and severity of the damage to human health and the environment that has occurred as a result of the improper management of the type of waste involved;
 - (9) Actions taken by other governmental agencies or regulatory programs based on the hazard to human health or the environment posed by the waste or any hazardous constituent in the waste; and
 - (10) Such other factors as may be appropriate.
- (d) Prior to making any determination under subsection (b) of this section, the Secretary shall give notice to the Commissioner of Health and the Commissioner of Labor and may then receive advice and information on the health effects of such determination.

§ 7-217 DELISTING OF A HAZARDOUS WASTE

- (a) Generators may petition the Secretary to classify their waste as non-hazardous, if they generate either a waste listed at §§ **7-210 through 7-215** or a mixture which contains a waste listed at §§ **7-210 through 7-215**.
- (b) The Secretary, upon petition or his or her own motion, may make the determination that a waste which is generated by a particular generator or treated, stored, or disposed of by a

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

particular facility does not meet the definition of hazardous waste at § 7-103 subject to the restrictions listed below.

- (c) Any person seeking to exclude a waste at a particular generating facility from lists in **Subpart D of 40 CFR Part 261** may petition for a regulatory amendment under **40 CFR § 260.20 and § 260.22**. The Administrator of EPA shall retain the authority to exclude such wastes. Delisting determinations made by the EPA Administrator shall take effect in Vermont upon issuance of a “concurrence” letter sent by the Secretary to the EPA Administrator.
- (d) For any waste listed at §§ **7-210 through 7-215** of this subchapter and not listed by EPA as a hazardous waste, the petition to delist shall be made on the delisting form entitled “**Petition Procedures for the Listing and Delisting of Hazardous Waste**,” provided by the Secretary.
- (e) After receipt of a petition under this section, the Secretary may request any additional information which may be reasonably required to evaluate the petition.
- (f) The Secretary shall evaluate each delisting petition using the procedures described in § **7-216(b)**.
- (g) When making a determination under this section, the Secretary shall examine and consider the factors in § **7-216(c)**.
- (h) Except as provided in § **7-218**, prior to making any determination under this section, the Secretary shall give notice to the Commissioner of Health and the Commissioner of Labor and may then receive advice and information on the health effects of such determination.

§ 7-218 DELISTING OF SPILL CLEAN-UP DEBRIS AND RESIDUES

The Secretary may delist clean-up debris and residues which are not regulated by EPA as hazardous wastes resulting from an emergency action in § **7-105**, after considering the factors in § **7-216(c)**, without consulting the Commissioners of Health and Labor.

§ 7-219 SAMPLING, ANALYTICAL AND TESTING METHODOLOGIES

- (a) The appropriate analytical and test methods to determine whether a sample exhibits a hazardous waste characteristic are specified in §§ **7-205 through 7-208**.
- (b) The appropriate analytical procedures to determine whether a sample contains a given toxic constituent are specified in chapter two ("Choosing the Correct Procedure") of EPA Publication SW-846 ("Test Methods for Evaluating Solid Waste Physical/Chemical Methods"), as incorporated by reference in **subsection (d) of this section**. Prior to final sampling and analysis method selection, the individual should consult the specific section

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

or method described in SW-846 for additional guidance on which of the approved methods should be employed for a specific sample analysis situation.

(c) Representative Sampling Methods

The methods and equipment used for sampling waste materials will vary with the form and consistency of the waste materials to be sampled. Samples collected using the sampling protocols listed in **Appendix I to 40 CFR Part 261**, for sampling waste with properties similar to the indicated materials, will be considered by the Agency to be representative of the waste.

(d) When used in 40 CFR parts 260 through 270 or in these regulations, the publications listed in **40 CFR § 260.11** are hereby incorporated by reference.

(e) Any person seeking to add a sampling, analytical or test method to the methods referenced by this section shall petition the Administrator of EPA in accordance with **40 CFR §§ 260.20 and 260.21**.

Subchapter 3: HAZARDOUS WASTE GENERATOR STANDARDS

§ 7-301 APPLICABILITY, PURPOSE, SCOPE

(a) The requirements of this subchapter apply to hazardous waste generators and:

- (1) Any owner or operator of a treatment, storage or disposal facility who initiates a shipment of hazardous waste from such facility;
- (2) Any owner or operator of a facility, or a generator, that accepts hazardous waste from conditionally exempt generators; and
- (3) Any person that is required to meet generator standards as specified elsewhere in these regulations.

(b) This subchapter establishes requirements applicable to conditionally exempt generators, small quantity generators and large quantity generators of hazardous waste.

Note: A conditionally exempt generator may choose to comply with more stringent requirements applicable to small or large quantity generators, and a small quantity generator may choose to comply with more stringent requirements applicable to large quantity generators.

(c) Persons are not required to comply with the standards of this subchapter provided that they are responding to an explosives or munitions emergency:

- (1) That presents an immediate threat to human health, safety, property, or the environment from the known or suspected presence of military munitions, or other explosive materials or devices, as determined by an explosive or munitions emergency response specialist; or
- (2) When a federal, state or local official, acting within the scope of official responsibilities, or an emergency response specialist, determines that immediate removal of the material or waste is necessary to protect human health or the environment, that official may authorize the removal of the waste by transporters that do not have EPA identification numbers, and not subject to the manifest requirements of **subchapter 7** of these regulations.

(d) When a military response specialist responds to an emergency pursuant to **subsection (c)(2) of this section** the specialist's organizational unit shall retain records for three years that identify the dates of the response, the persons responding, the type and description of material addressed, and that material's disposition.

(e) **40 CFR § 266.205** identifies when the storage requirements, including the generator storage requirements of this subchapter, apply to the storage of hazardous waste military

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

munitions. The treatment and disposal of hazardous waste military munitions are subject to the applicable provisions of **subchapters 1 through 7** of these regulations.

§ 7-302 PROHIBITIONS

- (a) Disposal of hazardous waste by evaporation is prohibited.
- (b) Dilution of hazardous waste subject to the land disposal restrictions of 40 CFR Part 268 is prohibited pursuant to **40 CFR § 268.3** (incorporated by reference through **§ 7-106** of these regulations).
- (c) The release of hazardous material into the surface or groundwater, or onto the land of the state is prohibited pursuant to **10 V.S.A. § 6616**.

§ 7-303 HAZARDOUS WASTE DETERMINATION

Any person who generates a waste shall determine if that waste is a hazardous waste in accordance with **§ 7-202**.

§ 7-304 NOTIFICATION AND IDENTIFICATION NUMBERS

- (a) No generator shall treat, recycle, store, dispose of, transport, or offer for transport hazardous waste without having obtained a permanent EPA identification number by notifying the Secretary using the **Vermont Hazardous Waste Handler Site ID Form** in accordance with **§ 7-104**. As specified under **§ 7-104**, the Secretary may issue a temporary identification number to persons who have generated hazardous waste only from an episodic event.
- (b) In accordance with **§ 7-104**, a generator shall maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** filed with the Secretary that accurately describes current waste activity and waste generation.
- (c) When completing a manifest, a generator shall use the EPA identification number that is assigned to the generator site at the time of shipment.
- (d) In accordance with **§ 7-309(c)(2)**, a generator shall submit a **Pre-closure Notification Form** to the Secretary at least 90 days prior to the commencement of closure activities.

§ 7-305 DETERMINING GENERATOR STATUS

- (a) In determining the quantity of hazardous waste generated, a person shall count all hazardous wastes except:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (1) Wastes exempted from regulation under §§ 7-203 and 7-204;
- (2) Hazardous waste when it is removed from on-site short-term storage (it is counted when first generated);
- (3) Spent materials that are generated, reclaimed, and subsequently reused on-site, so long as such spent materials have been counted once;
- (4) Hazardous waste produced by on-site treatment, including reclamation, of hazardous waste, so long as the hazardous waste that is treated was counted once;
- (5) Used oil managed in accordance with the standards set forth under **subchapter 8** of these regulations;
- (6) Wastes managed in accordance with the universal waste standards set forth under **subchapter 9** of these regulations; or

Note: As provided for by § 7-203(s), wastes managed according to the standards of subchapter 9 are exempt from regulation under subchapters 1 through 7 except as specified in subchapter 9.

- (7) Hazardous waste that is an unused commercial chemical product (listed in §§ 7-210 through 7-215 or exhibiting one or more characteristics described in §§ 7-205 through 7-208) that is generated solely as a result of a laboratory clean-out conducted at an eligible academic entity pursuant to 40 CFR § 262.213. For purposes of this provision, the term eligible academic entity shall have the meaning as defined in § 7-103.
- (b) A generator is regulated as a conditionally exempt generator, small quantity generator, or large quantity generator based upon the types and quantities of hazardous waste produced or handled. For the purpose of establishing generator status, a person may evaluate either:
- (1) The amount of hazardous waste generated in each calendar month; or
 - (2) For any hazardous waste not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), the average amount generated over the six month period elapsed just prior to making the determination.

§ 7-306 CONDITIONALLY EXEMPT GENERATOR

- (a) A generator is a conditionally exempt generator if that person generates less than:
- (1) 220 pounds (100 kilograms) of hazardous waste in a calendar month; and
 - (2) 2.2 pounds (1 kilogram) of acutely hazardous waste in a calendar month; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) 220 pounds (100 kilograms) of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a discharge of any acutely hazardous waste in a calendar month; and

has accumulated less than 2,200 pounds (1000 kilograms) of hazardous waste, 2.2 pounds (one kilogram) of acutely hazardous waste, or 220 pounds (100 kilograms) of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a discharge of any acutely hazardous waste at any time.

- (b) If any person generates or accumulates hazardous wastes in amounts exceeding the limits specified in this section, that person becomes at least a small quantity generator and is subject to full regulation under these regulations.
- (c) A conditionally exempt generator is exempt from the requirements of these regulations except as provided for in **subsections (c)(1) through (4) of this section**:
- (1) A conditionally exempt generator must:
- (A) Except for laboratories owned by an eligible academic entity as allowed under **subsection (d) of this section**, determine if waste generated is hazardous waste in accordance with the requirement of **§ 7-303**;
 - (B) Maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** and obtain an identification number in accordance with **§7-304**;
 - (C) Conduct hazardous waste management operations in a manner that minimizes the possibility of fire, explosion or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, groundwater, or surface water, which could threaten human health or the environment.
 - (D) Manage containers holding hazardous wastes in accordance with the container management standards of **§§ 7-311(f)(2) through (4)**, and as follows:
 - (i) A container must be in good condition and chemically compatible with any waste stored therein;
 - (ii) A container must remain closed except to add or remove waste; and
 - (iii) Containers must be marked with the words "Hazardous Waste" and other words that identify the contents;
 - (E) Store wastes in an area that meets the design standards of **§§ 7-311(a)(1) through (3)**;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (F) Manage tanks holding hazardous waste in accordance with the tank management requirements of **40 CFR § 265.201**;
 - (G) Comply with the annual generator registration and fee requirements of **§ 7-708(e)**;
 - (H) Submit a biennial report, if requested by the Secretary under **§ 7-709**; and
 - (I) In the event of a discharge of hazardous waste or release of hazardous material, comply with the applicable emergency action requirements of **§ 7-105**.
- (2) A conditionally exempt generator shall manage his or her own hazardous waste by any one of the following methods:
- (A) Ensure delivery of the waste to an off-site hazardous waste treatment, storage or disposal facility which if located in the United States is permitted under **40 CFR Part 270**, is in interim status under **40 CFR Parts 270 and 265**, or is authorized to manage hazardous waste by a state with a hazardous waste management program approved under **40 CFR Part 271**;
 - (B) Ensure delivery of the waste to a certified solid waste management facility allowed to accept such waste under the terms of its certification;

Note: Waste that is identified as hazardous waste under these regulations, including that generated by conditionally exempt generators, is prohibited from disposal in all Vermont certified discrete disposal facilities (landfills).

Note: Hazardous waste may be sent by Vermont conditionally exempt generators to municipal solid waste landfills or to non-municipal non-hazardous waste landfills in other states only as authorized by **40 CFR §§ 261.5(f)(3)(iv) and (v) and (g)(3)(iv) and (v)**.
 - (C) Ensure delivery of the waste to a facility that beneficially uses or reuses or legitimately recycles or reclaims its waste or treats its waste prior to beneficial use or reuse, or legitimate recycling or reclamation;
 - (D) Ensure delivery of the waste to another site in Vermont that is owned and operated by the owner/operator of the conditionally exempt generator site and that meets either the small quantity generator standards set forth in **§ 7-307**, or the large quantity generator standards set forth in **§ 7-308**, and has notified the Secretary as such using the **Vermont Hazardous Waste Handler Site ID Form**. Hazardous waste delivered to a site that meets

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

either small or large quantity generator standards counts toward the generator status of that site.

- (E) Ensure delivery of the waste to a collection event authorized by the Secretary to accept conditionally exempt generator waste.
 - (F) Ensure delivery of universal waste to a universal waste handler or destination facility in accordance with the standards set forth in **subchapter 9**.
 - (G) Otherwise treat, store, or dispose of the waste if the generator has submitted a written request for an alternative handling method to the Secretary and the Secretary has determined that the proposed handling method will not have an adverse impact on human health and the environment. A conditionally exempt generator shall not treat, store, or dispose of waste under this section until receiving written approval from the Secretary for such method.
- (3) A conditionally exempt generator may transport his or her own hazardous waste to a facility or an event described under **§ 7-306(c)(2)** without complying with the transporter permitting requirements of **subchapter 4** provided he or she complies with the requirements of **§ 7-105** (in the event of a release), with all applicable federal Department of Transportation (DOT) regulations, the regulations of states he or she transports waste through or delivers waste to, and any applicable Vermont Agency of Transportation regulations. A manifest is not required for such transport.
- (4) If a conditionally exempt generator chooses to utilize a manifest, he or she must comply with all applicable manifest instructions.
- (d) Laboratories owned by an eligible academic entity that chooses to be subject to the requirements of **40 CFR §§ 262.200 through 262.216 (Subpart K)** are not subject to the requirements of **subsections (c)(1)(A) of this section**.

§ 7-307 SMALL QUANTITY GENERATOR

- (a) A generator is a small quantity generator if that person generates:
 - (1) Greater than or equal to 220 pounds (100 kilograms) but less than 2,200 pounds (1,000 kilograms) of hazardous waste in a calendar month;
 - (2) Less than 2.2 pounds (1 kilogram) of acutely hazardous waste in a calendar month;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) Less than 220 pounds (100 kilograms) of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a discharge of any acutely hazardous waste in a calendar month; and
 - (4) The quantity of hazardous waste accumulated on-site never exceeds 13,200 pounds (6,000 kilograms).
- (b) If any person generates or accumulates hazardous wastes in amounts exceeding the limits specified in this section, that person becomes a large quantity generator and is subject to the requirements of § 7-308.
- (c) A small quantity generator must:
- (1) Except for laboratories owned by an eligible academic entity as allowed under **subsection (d) of this section**, determine if any waste generated is a hazardous waste in accordance with the requirement of § 7-303;
 - (2) Store hazardous waste on-site no longer than:
 - (A) 180 days from the date when the waste first started to accumulate, or;
 - (B) For waste accumulated in containers according to § 7-310, 180 days from the date when the maximum amount of waste allowed under that section was reached.
- Note:** Hazardous waste may not be stored on-site for a period of time greater than 180 days without first obtaining certification under **subchapter 5**.
- (3) Maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** and obtain an identification number in accordance with § 7-304;
 - (4) Comply with the 40 CFR Part 268 Land Disposal Restrictions (incorporated by reference through § 7-106 of these regulations);
 - (5) Comply with the general management standards of § 7-309;
 - (6) Except for laboratories owned by an eligible academic entity as allowed under **subsection (d) of this section**, accumulate hazardous waste in accordance with § 7-310;
 - (7) Comply with the short-term storage area standards of § 7-311;
 - (8) Comply with the exports of hazardous waste requirements of § 7-705;
 - (9) Comply with the imports of hazardous waste requirements of § 7-706;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (10) Comply with the exception reporting requirements of § 7-707;
- (11) Comply with the annual generator registration and fee requirements of § 7-708(e);
- (12) Submit a biennial report, if required under § 7-709;
- (13) Comply with the recordkeeping requirements of § 7-710; and
- (14) Comply with the following emergency preparedness requirements:
 - (A) At all times there must be at least one employee either on the premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all applicable emergency response measures specified in **subsection (D) of this section**. This employee is the emergency coordinator.
 - (B) Post the following information in the immediate vicinity of all short-term storage areas and locations where hazardous wastes are accumulated:
 - (i) The name and telephone numbers (office, cellular and home) of the emergency coordinator(s);
 - (ii) Location of fire extinguishers and spill control material, and, if present, fire alarm; and
 - (iii) The telephone number of the fire department, unless the facility has a direct alarm.
 - (C) Ensure that each employee is thoroughly familiar with evacuation signals and routes, and proper waste handling and emergency procedures relevant to their responsibilities during normal facility operations as well as emergencies.
 - (D) The emergency coordinator must respond to any emergencies that arise. The applicable responses are as follows:
 - (i) In the event of a fire, call the fire department or, if appropriate, attempt to extinguish it using a fire extinguisher;
 - (ii) In the event of a discharge of hazardous waste or a release of hazardous material, comply with the applicable emergency action requirements of § 7-105;
 - (iii) In the event of a fire, explosion, or other release which could threaten human health outside the facility or when the generator has knowledge that a spill has reached surface water, the generator

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

must immediately notify the National Response Center (using their 24-hour toll free number 800/424-8802). The report must include:

- (aa) Name, address, and EPA identification number of the generator;
 - (bb) Date, time, and type of incident (e.g., spill or fire);
 - (cc) Quantity and type of hazardous waste involved in the incident;
 - (dd) Extent of injuries, if any; and
 - (ee) Estimated quantity and disposition of recovered materials, if any.
- (d) Laboratories owned by an eligible academic entity that chooses to be subject to the requirements of **40 CFR §§ 262.200 through 262.216 (Subpart K)** are not subject to the requirements of **subsections (c)(1) and (c)(6) of this section**.

§ 7-308 LARGE QUANTITY GENERATOR

- (a) A generator is a large quantity generator if:
- (1) That person generates 2,200 pounds (1,000 kilograms) or more of hazardous waste in a calendar month; or
 - (2) That person generates 2.2 pounds (1 kilogram) or more of acutely hazardous waste in a calendar month; or
 - (3) That person generates 220 pounds (100 kilograms) or more of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a discharge of any acutely hazardous waste in a calendar month; or
 - (4) The quantity of hazardous waste accumulated on-site exceeds 13,200 pounds (6,000 kilograms) at any one time; or
 - (5) The quantity of acutely hazardous waste accumulated on-site equals or exceeds 2.2 pounds (1 kilograms) at any one time; or
 - (6) The quantity of any residue or contaminated soil, waste, or other debris resulting from the cleanup of a discharge of any acutely hazardous waste, accumulated on-site equals or exceeds 220 pounds (100 kilograms) at any one time.

- (b) A large quantity generator must:
- (1) Except for laboratories owned by an eligible academic entity as allowed under **subsection (c) of this section**, determine if any waste generated is a hazardous waste in accordance with the requirement of **§ 7-303**;
 - (2) Store hazardous waste on-site no longer than:
 - (A) 90 days from the date when the waste first started to accumulate; or
 - (B) For waste accumulated in containers according to **§ 7-310**, 90 days from the date when the maximum amount allowed under that section was reached; or
 - (C) 180 days for wastewater treatment sludges from electroplating operations that meet the listing description for the hazardous waste code F006 and that are managed in accordance with the provisions of **40 CFR § 262.34(g)**.
- Note:** Hazardous waste may not be stored on-site for a period of time that exceeds any of the above timeframes without first obtaining certification under **subchapter 5**.
- (3) Maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** and obtain an identification number in accordance with **§ 7-304**;
 - (4) Comply with the **40 CFR Part 268** Land Disposal Restrictions incorporated by reference through **§ 7-106** of these regulations;
 - (5) Comply with the general management standards of **§ 7-309**;
 - (6) Except for laboratories owned by an eligible academic entity as allowed under **subsection (c) of this section**, accumulate hazardous waste in accordance with **§ 7-310**;
 - (7) Comply with the short-term storage area standards of **§ 7-311**;
 - (8) Comply with the exports of hazardous waste requirements of **§ 7-705**;
 - (9) Comply with the imports of hazardous waste requirements of **§ 7-706**;
 - (10) Comply with the exception reporting requirements of **§ 7-707**;
 - (11) Submit a biennial report in accordance with **§ 7-708(a)**;
 - (12) Comply with the annual generator registration and fee requirements of **§ 7-708(e)**;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (13) Comply with the recordkeeping requirements of § 7-710;
- (14) Maintain a written contingency plan for the facility as described below:

The written contingency plan for the facility shall be designed to minimize hazards to human health or the environment from fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste constituents to air, soil, ground water, or surface water. The plan must be carried out immediately whenever there is a fire, explosion or discharge of hazardous waste or hazardous waste constituents which could threaten human health or the environment.

(A) The contingency plan must contain:

- (i) A description of the actions facility personnel must take to comply with §§ 7-308(b)(14)(A) and 7-308(b)(14)(E) in response to fires, explosions or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, groundwater, or surface water at the facility.
- (ii) If the owner or operator has already prepared a Spill Prevention, Control and Countermeasures (SPCC) Plan in accordance with **40 CFR Part 112 or 1510**, or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements in this subchapter.
- (iii) Arrangements agreed to by local police departments, fire departments, hospitals, contractors and state and local emergency response teams to coordinate emergency services pursuant to § **7-309(a)(4)**.
- (iv) An up-to-date list of names, addresses, and phone numbers (office, cellular and home) of all persons qualified to act as emergency coordinator. Where more than one person is listed, one must be named as primary emergency coordinator and others must be listed in the order in which they will assume responsibility as alternates.
- (v) An up-to-date list of all emergency equipment at the facility, including location, physical description of each item listed and a brief outline of its capabilities.
- (vi) An evacuation plan including signals to be used to begin evacuation, evacuation routes and alternate evacuation routes.

(B) Copies of the contingency plan and all revisions must be maintained at the facility and submitted to all local police and fire departments, hospitals,

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

and state and local emergency response teams that may be called upon to provide emergency services. Documentation verifying that the most recent version of the contingency plan has been submitted to local emergency service providers must be maintained at the facility.

- (C) The contingency plan must be reviewed and immediately amended whenever:
- (i) Applicable regulations are revised;
 - (ii) The plan fails in an emergency;
 - (iii) The facility changes in a way that materially increases the potential for fires, explosions, or releases of hazardous waste or hazardous waste constituents, or changes the response necessary in an emergency;
 - (iv) The list of emergency coordinators changes; or
 - (v) The list of emergency equipment changes.
- (D) At all times there must be at least one employee either at the facility, or available to respond to an emergency by reaching the facility within a short period of time, with the responsibility for coordinating all emergency response measures. This emergency coordinator must be familiar with all aspects of the facility's contingency plan, all operations and activities at the facility, the locations and characteristics of waste handled, the location of all records within the facility and the facility layout. This person must have the authority to commit the resources needed to carry out the contingency plan.
- (E) Emergency Procedures

Whenever there is an imminent or actual emergency situation, the emergency coordinator (or his or her designee when the emergency coordinator is on call) must do the following immediately:

- (i) Activate internal facility alarms or communication systems;
- (ii) Notify appropriate state or local agencies with designated response roles if their help is needed;
- (iii) If a release has occurred, identify the source, character, amount and extent of any released materials by record review or chemical analysis;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (iv) Assess hazards to human health and the environment, considering all direct and indirect effects;
 - (v) If the emergency coordinator determines that the facility has had a fire, explosion or release which could threaten human health or the environment outside the facility, the coordinator must:
 - (aa) Determine if local evacuation may be necessary, and, if so, notify appropriate local authorities and be available to assist local authorities in evacuation measures; and
 - (bb) Notify the National Response Center (800-424-8802) and indicate his or her name and telephone number; name and address of the facility; time and type of incident; quantity of material(s) involved to the extent known; the extent of any injuries; and the possible hazards to human health or the environment outside the facility.
 - (vi) Take all reasonable measures necessary to ensure that fires, explosions and releases do not occur, recur, or spread to other hazardous waste at the facility. These measures must include, where applicable, stopping processes and operations, collecting and containing released waste, and removing or isolating containers;
 - (vii) If the facility stops operations in response to a fire, explosion or release, the emergency coordinator must monitor for leaks, pressure buildup, gas generation or ruptures in valves, pipes or other equipment, wherever this is appropriate;
 - (viii) Immediately after an emergency, the emergency coordinator must provide for treating, storing or disposing of recovered waste, contaminated soil or surface water, or any other material that results from a release, fire or explosion at the facility; and
 - (ix) Ensure that in the affected areas of the facility, no waste that may be incompatible with the released material is stored until cleanup procedures are completed and all emergency equipment is cleaned and restored to a useable condition.
- (F) Whenever there is an imminent or actual emergency situation, the owner or operator shall:
- (i) Notify the Secretary that the facility is in compliance with **subsection (b)(14)(E)(ix) of this section** before operations are resumed in the affected areas of the facility;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (ii) Maintain on file with the contingency plan a record of the time, date and details of any incident that requires implementing the contingency plan; and
 - (iii) Within 10 days after the incident, submit a written report on the incident to the Secretary. The report must include:
 - (aa) Name, address and telephone number of the owner or operator;
 - (bb) Name address and telephone number of the facility;
 - (cc) Date, time and type of incident (e.g., fire, explosion);
 - (dd) Name and quantity of material(s) involved;
 - (ee) The extent of injuries, if any;
 - (ff) An assessment of actual or potential hazards to human health or the environment, where this is applicable; and
 - (gg) Estimated quantity and disposition of recovered material that resulted from the incident.
- (15) Maintain a training program for facility personnel as described below:
- (A) Facility personnel must successfully complete a program of classroom or on the job instruction that teaches them to perform their duties in a way that ensures the facility's compliance with the requirements of these regulations.
 - (B) This program must be directed by a person trained in hazardous waste management procedures and must include instruction which teaches facility personnel hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed.
 - (C) At a minimum, the training program must be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment and emergency systems, including, where applicable:
 - (i) Waste handling procedures;
 - (ii) Procedures for using, inspecting, repairing and replacing facility emergency and monitoring equipment;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (iii) Key parameters for automatic waste feed cutoff systems;
 - (iv) Communications or alarm systems;
 - (v) Response to fires or explosions;
 - (vi) Response to groundwater contamination incidents; and
 - (vii) Shutdown of operations.
- (D) Facility personnel must successfully complete the program required in **subsections (b)(15)(A) through (C) of this section** within six months after the date of their employment or assignment to a facility or to a new position at a facility, whichever is later. Employees hired after the effective date of these regulations must not work in unsupervised positions until they have completed the training requirements of **subsections (b)(15)(A) through (C) of this section**.
- (E) At least once each calendar year, facility personnel must take part in a review of the initial training required under **subsections (b)(15)(A) through (C) of this section**.
- (F) The owner or operator must maintain the following documents and records at the facility:
- (i) The job title for each position at the facility related to hazardous waste management and the name of the employee filling each job;
 - (ii) A written job description for each position under **subsection (b)(15)(F)(i) of this section** which includes the requisite skill, education or other qualifications and duties of personnel assigned to each position;
 - (iii) A written description of the type and amount of both introductory and continuing training that will be given to each person filling a position listed under **subsection (b)(15)(F)(i) of this section**;
 - (iv) Records that document that the training or job experience required has been given to and completed by facility personnel in accordance with **subsections (b)(15)(A) through (E) of this section**; and

Note: Documentation of training is required for at least one employee per satellite accumulation area.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (v) Training records must be kept on current personnel until closure of the facility. Training records on former employees must be kept for at least three years from the date the employee last worked at the facility.
- (16) In the event of a discharge of hazardous waste or release of hazardous material, comply with the applicable emergency action requirements of **§ 7-105**.
- (c) Laboratories owned by an eligible academic entity that chooses to be subject to the requirements of **40 CFR §§ 262.200 through 262.216 (Subpart K)** are not subject to the requirements of **subsections (b)(1) and (b)(6) of this section**.

§ 7-309 GENERAL MANAGEMENT STANDARDS FOR SMALL AND LARGE QUANTITY GENERATORS

(a) Preparedness and Prevention

Small and large quantity generator facilities must be maintained and operated to minimize the possibility of fire, explosion or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, groundwater, or surface water which could threaten human health or the environment.

(1) Required equipment

All facilities must be equipped with the following, unless none of the hazards posed by waste handled at the facility could require a particular kind of equipment specified below:

- (A) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel;
- (B) A device, such as a cellular telephone, immediately available at the scene of operations, capable of summoning emergency assistance from local police departments, fire departments or state or local emergency response teams;
- (C) Portable fire extinguishers, fire control equipment (including special extinguishing equipment such as that using foam, inert gas or dry chemicals), spill control and decontamination equipment; and
- (D) Water at adequate volume and pressure to supply water hose streams or foam producing equipment, or automatic sprinklers or water spray systems.

(2) Testing and maintenance of equipment

All communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment, where required, must be tested and maintained as necessary to assure its proper operation in time of emergency.

(3) Access to communications or alarm system

- (A) Whenever hazardous waste is being poured, mixed, spread, or otherwise handled, all personnel involved in the operation must have immediate access to an internal alarm or emergency communication device, either directly or through visual or voice contact with another employee, unless such a device is not required under § 7-309(a)(1).
- (B) If there is ever just one employee on the premises while the facility is operating, that employee must have immediate access to a device, such as a cellular telephone (immediately available at the scene of operation) capable of summoning external emergency assistance, unless such a device is not required under § 7-309(a)(1).

(4) Arrangements with local authorities

The owner or operator must attempt to make the following arrangements as appropriate for the type of waste handled at their facility and the potential need for the services of these organizations. Refusal of any authorities to enter into such arrangements must be documented.

- (A) Arrangements to familiarize police departments, fire departments, and emergency response teams with the layout of the facility, properties of hazardous waste handled at the facility and associated hazards, places where the facility personnel would normally be working, entrances to roads inside the facility, and possible evacuation routes;
- (B) Agreements designating primary emergency authority to a specific police department and a specific fire department and agreements with any others to provide support to the primary emergency authority;
- (C) Agreements with emergency response teams, emergency response contractors and equipment suppliers; and
- (D) Arrangements to familiarize local hospitals with the properties of hazardous waste handled at the facility and the types of injuries or illnesses which could result from fires, explosions, or releases at the facility.

- (b) Offering Hazardous Waste for Transportation
- (1) Before transporting hazardous waste or offering hazardous waste for transportation off-site, small and large quantity generators shall:
- (A) Package the waste in accordance with the applicable Department of Transportation regulations under **49 CFR Parts 173, 178, and 179**;
- (B) Label each package in accordance with the applicable Department of Transportation regulations on hazardous materials under **49 CFR Part 172**.
- (C) Mark each package in accordance with the applicable Department of Transportation regulations on hazardous materials under **49 CFR Part 172**. For each container of 119 gallons or less used in such transportation, such marking shall include the following words and information displayed in accordance with the requirements of **49 CFR § 172.304**:
- HAZARDOUS WASTE—Federal Law Prohibits Improper Disposal. If found, contact the nearest police or public safety authority or the U.S. Environmental Protection Agency.**
- Generator's Name and Address _____.**
- Generator's EPA Identification Number _____.**
- Manifest Tracking Number _____.**
- (D) Placard or offer the initial transporter the appropriate placards according to federal Department of Transportation regulations for hazardous materials under **49 CFR Part 172, Subpart F**.
- (2) Small and large quantity generators shall not offer hazardous waste, as defined in 40 CFR Part 261, to:
- (A) Transporters or to treatment, storage, recycling, or disposal facilities that have not received an EPA identification number; or
- (B) Transporters that do not possess a permit to transport hazardous waste in Vermont.
- (3) For any hazardous waste not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), a small or large quantity generator shall not offer such waste to a transporter that does not possess a permit to transport hazardous waste in Vermont unless the Secretary has provided prior written authorization to do so after determining that the practice will not pose a threat to human health or the environment.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) Small and large quantity generators shall transport or offer for transport hazardous waste, as defined in 40 CFR Part 261, only to a designated facility.
- (5) Small and large quantity generators shall transport or offer for transport hazardous waste that is not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), to either:
 - (A) A designated facility; or
 - (B) A facility that is not a designated facility, located in a state other than Vermont provided the facility can receive such waste under applicable state and local laws, regulations and ordinances.
- (6) Except as provided in **subsection (b)(7) of this section**, small and large quantity generators shall not transport or offer for transport a hazardous waste for off-site treatment, storage, recycling, disposal or use without completing the generator's portion of the hazardous waste manifest in accordance with the applicable requirements of **subchapter 7**, unless exempted from these requirements under § **7-608** (Recycle/Reuse).

Note: Outside of Vermont, the hazardous waste manifest may not serve to replace the shipping papers required by the U. S. Department of Transportation under **Subpart C of 49 CFR Part 172**, if the waste being shipped is not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont).

- (7) In lieu of using a manifest, small or large quantity generators shipping hazardous waste, not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), to a facility other than a designated facility, as provided for under **subsection (b)(5)(B) of this section**, shall:
 - (A) Maintain a record on-site of each shipment as follows:
 - (i) The record for each shipment must include the following information:
 - (aa) The name, address, and telephone number of the facility to which the waste was sent;
 - (bb) The name, address, and EPA identification number of the transporter that picked up the waste;
 - (cc) The type and quantity of waste shipped; and
 - (dd) The date of shipment.
 - (ii) The record for each shipment must be retained for three years.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (B) Submit to the Secretary, within 10 days of the date of shipment, a copy of the DOT shipping papers required by the U. S. Department of Transportation under **Subpart C of 49 CFR Part 172** and the following information if it is not already addressed in the shipping papers:
 - (i) The name, address, and EPA identification number of the generator;
 - (ii) The type and quantity of waste shipped;
 - (iii) The Vermont hazardous waste identification code(s) for the waste shipped;
 - (iv) The name, address, and telephone number of the facility to which the waste was sent; and
 - (v) The treatment method to be used by the facility to which the waste was sent.

- (8) A small or large quantity generator who sends a shipment of hazardous waste to a designated facility with the understanding that the designated facility can accept and manage the waste and later receives that shipment back as a rejected load or residue in accordance with the manifest discrepancy provisions of § 7-704(g) may accumulate the returned waste on-site in accordance with §§ 7-307(c)(4), (7), and (14) or §§ 7-308(b)(4), (7), (14), (15) and (16), depending on the amount of hazardous waste on-site in that calendar month. Upon receipt of the returned shipment, the small or large quantity generator must:
 - (A) Sign **Item 18c** of the manifest, if the transporter returned the shipment using the original manifest; or
 - (B) Sign **Item 20** of the manifest, if the transporter returned the shipment using a new manifest.

- (c) Closure
 - (1) A generator who no longer generates or manages hazardous waste at a site must, within 90 days of cessation of hazardous waste activities, close the site in a manner that:
 - (A) Minimizes the need for further maintenance;
 - (B) Controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

hazardous waste decomposition products to the groundwater or surface waters or to the atmosphere; and

- (C) Complies with the closure requirements of this section, and for closure of tank systems, the requirements of **40 CFR §§ 265.197**.

An extension to the 90-day closure period may be granted on a case-by-case basis.

- (2) A **Pre-closure Notification Form** completed in conformance with **Vermont's Hazardous Waste Generator Closure Procedure** must be submitted to the Secretary at least 90 days prior to the commencement of closure activities. Based on the information provided in the **Pre-closure Notification Form**, the Secretary may require submittal of a closure plan.
- (3) A generator who no longer generates or manages hazardous waste at a site shall remove all hazardous waste to a designated facility. Remaining containers, tanks, liners, bases, materials, equipment, structures, soil and debris contaminated with hazardous waste or hazardous waste residues shall be decontaminated or disposed of at a designated facility.
- (4) A generator shall submit to the Secretary, within 90 days of completion of closure, certification, signed in accordance with **§ 7-108**, that closure was completed in accordance with the provisions of **subsections (c)(1) and (3) of this section**. The generator shall make this certification and the Secretary may also require certification by an independent professional engineer licensed in Vermont.
- (5) Any generator identified as a small or large quantity generator on or after October 15, 2006, is subject to the requirements of this section regardless of their generator status at the time of closure.
- (6) When a generator closes a portion of a facility, or ceases operations for an indefinite period of time, partial closure shall be conducted. The generator must notify the Secretary of any partial closure. Partial closure must, at a minimum, minimize the need for further maintenance of the facility, or the closed portion of the facility, and ensure that hazardous wastes from discontinued processes and activities are removed to a designated facility.

§ 7-310 ACCUMULATION OF HAZARDOUS WASTE

- (a) **Satellite Accumulation of Hazardous Waste**

Small and large quantity generators may accumulate as much as one cubic yard of non-liquid hazardous waste not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), one quart of acutely hazardous waste, or 55 gallons of any other hazardous waste in containers at or near any point of generation where wastes

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

initially accumulate, which is under the control of the operator of the process generating the waste, without obtaining certification as a storage facility provided that:

- (1) The waste and the container are chemically compatible;
- (2) The container is in good condition;
- (3) The container is both located within a structure that sheds rain and snow and upon an impervious surface;
- (4) The container holding the waste remains closed except to add or remove waste;
- (5) The container is marked with the words "Hazardous Waste" and other words that identify the contents;
- (6) The container is managed in accordance with the container management requirements of §§ **7-311(b)(3) and 7-311(f)(4)**;
- (7) The generator indicates on the container label the date, when one cubic yard of non-liquid hazardous waste that is not defined as hazardous in 40 CFR Part 261, one quart of acutely hazardous waste, or 55 gallons of any other hazardous waste has been accumulated in the container, and the generator moves the container to a short-term storage area within three days of reaching the specified amount. During the three-day period the generator must continue to comply with the §§ **7-311(b)(3) and 7-311(f)(4)** container management requirements. Once placed in a short-term storage area, the container shall be managed in accordance with all applicable requirements of § **7-311**; and
- (8) All full containers are dated when filled and moved to a short-term storage area within three days of becoming full.

(b) Accumulation of Hazardous Waste in a Short-Term Storage Area

Small and large quantity generators may accumulate as much as one cubic yard of non-liquid hazardous waste that is not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), one quart of acutely hazardous waste, or 55 gallons of any other hazardous waste in containers in a short-term storage area without obtaining certification as a storage facility provided that:

- (1) The waste is brought directly from the point of generation to the short-term storage area by the end of each work shift (not to exceed 12 hours) under the following conditions:
 - (A) The waste has been collected in a shift accumulation container that is:
 - (i) Chemically compatible with any accumulated waste;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (ii) In good condition;
 - (iii) Kept closed except to add or remove waste; and
 - (iv) Marked or labeled with the words “hazardous waste” and other words that identify the contents of the container;
- (B) The waste is brought directly to the short-term storage area by a trained employee; and
- (C) No more than one shift accumulation container is in use for each wastestream at each point of generation at any time;
- (2) Any accumulation container maintained in the short-term storage area is:
- (A) Managed in accordance with the short-term storage requirements of § 7-311 with the exception that the container need not be marked with the date that the container was first used to accumulate hazardous waste;
 - (B) Marked to indicate that it is an accumulation container, and provide information to describe the point of waste generation; and
 - (C) Marked to identify the date when one cubic yard of non-liquid hazardous waste that is not defined as hazardous in 40 CFR Part 261, one quart of acutely hazardous waste, or 55 gallons of any other hazardous waste has been accumulated in the container, or when a container of smaller capacity becomes full.
- (c) Only one accumulation container per process line wastestream may be used under this section at any one time. That is, a particular process line wastestream may be accumulated under the provisions of either **subsection (a) of this section** or **subsection (b) of this section**, but not both.

§ 7-311 SHORT-TERM STORAGE AREA STANDARDS FOR SMALL AND LARGE QUANTITY GENERATORS

- (a) Short-Term Storage Area Design Standards
- (1) Generators must accumulate and store hazardous waste upon an impervious surface except for spill clean-up debris that is generated in response to an emergency action completed pursuant to § 7-105.
 - (2) Hazardous waste containers may be placed out-of-doors only if they are within a structure that sheds rain and snow.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) Hazardous wastes subject to freezing and expansion may not be stored in containers or aboveground tanks unless mechanical or physical means are employed to prevent freezing.
- (4) The spill and fire control equipment required under §§ 7-309(a)(1)(A) and (C) shall be available in the immediate vicinity of each short-term storage area.

(b) Short-Term Storage Area Operating Standards

- (1) Containers or tanks holding incompatible hazardous wastes must not be stored in the same enclosure, building or structure unless they are segregated in a manner that prevents the wastes from coming into contact with one another under any circumstances (such as spillage or simultaneous leakage).
- (2) Containers of hazardous waste must be stored such that the hazardous waste labeling is visible.
- (3) Aisle space between rows of containers must be sufficient to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment and decontamination equipment to any area of facility operation. In no circumstance shall the aisle space be less than twenty-four (24) inches wide.

Note: Some local, state, and federal fire and safety codes and/or regulations require up to 36" of aisle space for the storage of flammable and combustible liquids.

(c) Short-Term Storage Time Limit Extensions

Small and large quantity generators may be granted up to a thirty (30) day extension of the short-term storage limits specified in §§ 7-307(c)(2) and 7-308(b)(2) at the discretion of the Secretary due to unforeseen temporary and uncontrollable circumstances.

(d) Inventory and Inspection

- (1) Small and large quantity generators shall maintain, at a location apart from the short-term storage area, a list of all hazardous waste currently in storage. For generators storing hazardous waste in containers, the list shall identify each container being stored and the type of hazardous waste held by each container. Any waste being accumulated within a short-term storage area must be included on the list of hazardous waste in storage.
- (2) Small and large quantity generators shall conduct daily inspections during regular business days of each short-term storage area. The inspections shall be recorded in a log that is kept at the facility for at least three years. The log shall contain a checklist of the items to be inspected which shall include:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (A) Visual inspection of the short-term storage area for rusting, bulging, or leaking containers or tanks;
- (B) Inspection of all safety and emergency equipment required under § **7-311(a)(4)**;
- (C) Inspection of adequate aisle space (minimum of 24 inches as specified in § **7-311(b)(3)**) between rows of containers;
- (D) Description of discrepancies or problem areas encountered in the inspection and the corrective actions taken; and
- (E) The signature or initials of the inspector and the date of the inspection.

Note: Regular business days are days when personnel are normally scheduled to be on site. Any facility where regular business days occur more than one week apart must still conduct inspections at least once per week.

(e) Security

- (1) Small and large quantity generators must post a sign at each short-term hazardous waste storage area, which must be visible from at least 25 feet with the legend, "Danger-Hazardous Waste Storage Area-Authorized Personnel Only". The legend must be written in both English and French in facilities located in counties bordering the Canadian province of Quebec. Existing signs with a similar legend may be used if the legend on the sign indicates that only authorized personnel are allowed to enter the storage area, and that entry into the storage area can be dangerous.
- (2) Small and large quantity generators storing ignitable waste (flash point less than 140°F) must also post a sign at each short-term hazardous waste storage area, which must be visible from 25 feet with the legend, "No Smoking". The legend must be written in both English and French in facilities located in counties bordering the Canadian province of Quebec.

(f) Use and Management of Containers

- (1) With the exception of satellite accumulation containers managed in accordance with § **7-310(a)**, containers, and packages used for the storage of hazardous wastes shall be clearly marked from the time they are first used to accumulate or store waste. Such marking shall include:
 - (A) The generator's name, address, and EPA identification number;
 - (B) The name and hazardous waste identification code(s) of the hazardous waste stored therein;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (C) The date when the container was first used to accumulate or store hazardous waste; and
- (D) The following language, "Hazardous Waste - Federal Law Prohibits Improper Disposal. If found, contact the nearest police or public safety authority or the U.S. Environmental Protection Agency."

Note: Containers used to store waste that is in the process of having a hazardous waste determination made, and for which the hazardous waste identification code(s) are not known, do not need to be marked to include the hazardous waste identification code(s). The hazardous waste identification code(s) must be marked on the container once the hazardous waste determination has been completed for the waste.

(2) Condition of containers

If a container holding hazardous waste is not in good condition, or if it begins to leak, the owner or operator must transfer the hazardous waste from this container to a container that is in good condition, or manage the waste in some other way that complies with the requirements of this section.

(3) Compatibility of waste with container

The owner or operator must use a container made of or lined with materials that will not react with and are otherwise compatible with the hazardous waste to be stored, so that the ability of the container to contain the waste is not impaired.

(4) Management of containers

- (A) A container holding hazardous waste must always be closed during storage except when it is necessary to add or remove waste;
- (B) A container holding hazardous waste must not be opened, handled or stored in a manner that may rupture the container or cause it to leak;
- (C) Incompatible wastes
 - (i) Incompatible wastes, or incompatible wastes and materials must not be placed in the same container. Examples of incompatible wastes are provided in **Appendix VII**.
 - (ii) Hazardous waste must not be placed in an unwashed container that previously held an incompatible waste or material; and
 - (iii) A storage container holding a hazardous waste that is incompatible with any waste or other materials stored nearby in other containers,

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

piles, open tanks or surface impoundments must be separated from the other materials or protected from them by means of a dike, berm, wall, or other device.

(5) Emissions from containers

A large quantity generator storing hazardous waste in containers must comply with **40 CFR Part 265 Subparts AA, BB, and CC**.

(6) Containers holding ignitable or reactive waste

A large quantity generator accumulating or storing ignitable or reactive waste in containers must keep the containers at least fifty (50) feet from the property line.

(g) Use and Management of Tanks

(1) Tanks used for the storage of hazardous wastes shall be clearly marked with the words "Hazardous Waste" and to identify the name and hazardous waste identification code(s) of the hazardous waste stored therein.

(2) A large quantity generator storing hazardous wastes in tanks must comply with:

(A) All secondary containment, monitoring, tank testing and other requirements in **40 CFR §§ 265.190 through 265.199 except 265.197(c)**; and

(B) **40 CFR Part 265 Subparts AA, BB and CC**.

(3) A small quantity generator storing hazardous wastes in tanks must comply with the standards of **40 CFR § 265.201**.

(h) Use and Management of Drip Pads and Containment Buildings

Large quantity generators placing hazardous wastes on drip pads or in containment buildings must comply with the requirements of **40 CFR Part 265 Subparts W and DD**, and **§§ 262.34(a)(1)(iii) and (iv)** as applicable.

§ 7-312 ADDITIONAL REQUIREMENTS

On a case-by-case basis, any person subject to this subchapter may be required to meet additional requirements when the Secretary determines that such actions are necessary to protect human health or the environment.

Subchapter 4: REQUIREMENTS FOR TRANSPORTERS OF HAZARDOUS WASTE

§ 7-401 PURPOSE, SCOPE, APPLICABILITY

- (a) This subchapter establishes requirements for persons transporting hazardous waste within or through Vermont.
- (b) This subchapter applies to:
 - (1) Transportation of hazardous waste accepted from:
 - (A) Conditionally exempt generators when the total amount accepted from all such generators in any shipment (i.e., combined in any single load in transport) exceeds the accumulation amounts allowed under in **§ 7-306(a)**;
 - (B) Any small or large quantity generator; or
 - (C) Any owner or operator of a facility;
 - (2) Transportation of recyclable hazardous wastes unless exempted from some or all provisions under **§ 7-608**;
 - (3) Transportation of used oil as specified under **§ 7-811**; and
 - (4) Any owner or operator of a transfer facility.
- (c) This subchapter does not apply to:
 - (1) Transportation of hazardous waste and used oil by generators within the site where the hazardous waste or used oil is generated;
 - (2) Transportation of hazardous waste within the site of a certified treatment, storage or disposal facility by the owner or operator of the facility;
 - (3) Self-transportation of hazardous waste by conditionally exempt generators, conducted in accordance with **§ 7-306(c)(3)**;
 - (4) Transportation of used oil by do-it-yourselfers, and used oil generators self-transporting up to 55 gallons of used oil, conducted in accordance with **§ 7-807(d)(1)**;
 - (5) Transportation of universal waste conducted in accordance with the universal waste management standards of **subchapter 9**;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (6) Transportation during an emergency response to a discharge or release, conducted in accordance with **§ 7-105(a)(4)**; and
 - (7) Transportation during an explosives or munitions emergency response, conducted in accordance with **§§ 7-105(a)(5) and 7-502(p)**.
- (d) Standards applicable to transportation of military munitions are specified under **40 CFR § 266.203**.
- (e) A transporter of hazardous waste shall comply with all applicable requirements of **49 CFR Parts 171 through 180**.

§ 7-402 APPLICABILITY OF OTHER SUBCHAPTERS

- (a) A transporter transporting hazardous waste into Vermont from a foreign country is a generator and must comply with the generator requirements of **subchapter 3**.
- (b) A transporter of hazardous waste shall comply with the manifest, reporting, and recordkeeping requirements of **subchapter 7**.
- (c) In the event of a release or discharge of hazardous waste during transport, a transporter shall comply with the emergency action requirements of **§ 7-105**.

§ 7-403 Reserved

§ 7-404 TRANSFER FACILITY STANDARDS

- (a) Any transporter who owns or operates a transfer facility located in Vermont must:
 - (1) Obtain an EPA identification number for the facility and maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** in accordance with **§ 7-104**;

Note: Written approval of the Secretary will not be granted for a transfer facility until a complete **Vermont Hazardous Waste Handler Site ID Form** is submitted for the facility.
 - (2) Ensure that all shipments of hazardous waste to the transfer facility comply with the manifest requirements of **subchapter 7**;
 - (3) Hold hazardous waste at the transfer facility for a period of ten days or less;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) Ensure that all hazardous waste managed at the transfer facility is packaged, labeled, and marked in accordance with **49 CFR Parts 172, 173, 178, and 179**; and
- (5) Comply with the personnel training requirement of **§ 7-308(b)(15)**.

(b) If containers of hazardous waste are off-loaded from a transport vehicle for temporary storage (10 days or less) at a transfer facility:

- (1) Prior to commencing container off-loading operations for the first time at a transfer facility, the owner or operator must submit a written request to, and receive written approval from, the Secretary to conduct such operations. The request for approval shall describe how the requirements of this subsection will be met;

Note: If the Secretary determines that the operations of a transfer facility are taking place in a manner that circumvents the requirements of this section the Secretary may require changes to the facility operations or require the activity cease.

(2) The containers must remain closed and be stored:

- (A) In a manner to prevent leakage or rupture;
- (B) Upon an impervious surface;
- (A) Such that the hazardous waste labeling is visible;
- (B) With sufficient aisle space between rows of containers to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment and decontamination equipment to any area of facility operation. In no circumstance shall the aisle space be less than twenty-four (24) inches wide;
- (C) In an area with secondary containment capable of holding 110% of the capacity of the largest container to be placed in temporary storage, or 10% of the total design capacity of the storage area, whichever is greater;
- (D) Within a structure that sheds rain and snow;
- (E) If the waste is subject to freezing and expansion, in an area where mechanical or physical means are employed to prevent freezing; and
- (F) If wastes are incompatible with any waste or other materials stored nearby in other containers, in separate enclosures, buildings or structures unless the wastes are separated by means of a dike, berm, wall, or other device capable of preventing the wastes from coming in contact with one another under any circumstances (such as spillage or simultaneous leakage).

- (3) The owner or operator of the transfer facility must maintain a written operating log that tracks all hazardous waste managed at the transfer facility by date of receipt, date of shipment off-site, and manifest tracking number, if applicable;
- (4) The owner or operator of the transfer facility must maintain a written contingency plan for the facility as described in § 7-308(b)(14);
- (5) The owner or operator of the transfer facility must comply with the closure requirements of § 7-309(c); and
- (6) *The owner or operator of the transfer facility must maintain a written closure cost estimate, in current dollars, of the cost of closing the facility in accordance with the standards of § 7-309(c) and 40 CFR § 265.142. This estimate must be adjusted annually for inflation, changes in operations, and changes in site conditions. The estimate must represent a worst-case scenario for closure. Proof of financial responsibility adequate to cover all costs of closure must be maintained until closure is complete. The financial responsibility mechanism must comply with the requirements of 40 CFR § 265.143. Proof of financial responsibility must be submitted by April 30th of each year.*

§ 7-405 PROHIBITIONS

No transporter subject to this subchapter shall:

- (a) Remove hazardous waste from the container in which it was placed once it has been manifested and moved from the site of generation until it is accepted at the designated facility except:
 - (1) Under the emergency provisions of § 7-105; or
 - (2) For wastes of like DOT shipping descriptions, at a transfer facility with written consent of the generator.
- (b) Transport or accept for transport hazardous wastes which are unlabeled or which are in damaged, bulging, leaking, unsuitable or otherwise unsafe containers; or
- (c) Transport or accept for transport hazardous wastes which are incompatible with each other such that a danger to public health or safety or the environment could result from their being transported together.
- (d) Accept hazardous waste from a small or large quantity generator unless it is accompanied by a manifest signed in accordance with the provisions of § 7-702. In the case of exports:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (1) A transporter may not accept such waste from a primary exporter or other person if the transporter knows the shipment does not conform to the EPA Acknowledgment of Consent; and
 - (2) A transporter may not accept such waste from a primary exporter or other person unless, in addition to a manifest signed in accordance with the provisions of § **7-702**, such waste is also accompanied by an EPA Acknowledgment of Consent which, except for shipment by rail, is attached to the manifest (or shipping paper for exports by water (bulk shipment)).
- (e) Dilute any hazardous waste subject to the land disposal restrictions of **40 CFR Part 268**, as prohibited under **40 CFR § 268.3** (incorporated by reference through § 7-106 of these regulations).
- (f) Release hazardous material into the surface or groundwater, or onto the land of the state in violation of **10 V.S.A. § 6616**.

§ 7-406 TRANSPORTATION PERMIT

- (a) With the exception of those persons and activities specified under § **7-401(c)**, no person shall transport to or accept for transport from any location in Vermont any hazardous waste or used oil without first obtaining a permit to do so from the Secretary, as required under **10 V.S.A. § 6607a**.
- (b) Any transporter who is required to obtain a permit shall complete, sign, and submit an application to the Secretary on the form provided. The application form shall include, but not be limited to, the following information:
- (1) The nature of the wastes to be transported;
 - (2) The method of transportation; and
 - (3) Specific information concerning the vehicles to be used.
- (c) Disclosure statement
- (1) With the exception of those persons exempted under **10 V.S.A. § 6605f(k)**, any transporter who is required to obtain a permit under this section shall complete, sign, and submit to the Secretary at the time of application a disclosure statement pursuant to the requirements of **10 V.S.A. § 6605f**. In the event of any change in ownership, a disclosure statement must be submitted pursuant to the requirements of **10 V.S.A. § 6605f(e)**.
 - (2) Any person who has received a transporter permit under this section shall file a statement annually within 30 days prior to the month and day of issuance of that

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

permit disclosing any changes in facts that would render the disclosure statement filed in connection with that permit inaccurate in any way, or stating that no such changes have occurred in the period of time covered by the annual statement. The annual statement shall be under oath or affirmation.

- (d) Any transporter who is required to obtain a permit under this section shall:
- (1) Maintain an up-to-date **Vermont Hazardous Waste Handler Site ID Form** filed with the Secretary as required in § 7-104;
 - (2) Obtain an EPA identification number either from the Secretary by applying on the **Vermont Hazardous Waste Handler Site ID Form** provided, or from the state in which the transporter's base of operations is located;
 - (3) Maintain liability insurance for sudden accidental occurrences as specified in § 7-410;
 - (4) Conduct a personnel training program for all employees handling either hazardous waste or used oil as specified in § 7-409; and
 - (5) *Report annually on the **Hazardous Waste Annual Report (Transporters) Form** provided by the Secretary.*
- (e) Reserved
- (f) A permit shall be issued for a period of time not to exceed five years.

§ 7-407 MODIFICATION, SUSPENSION, REVOCATION, OR DENIAL OF A PERMIT

- (a) The Secretary may modify any transporter permit upon his or her own motion or upon the receipt of a written request for modification that contains facts and reasons supporting the request. If the Secretary determines that modification is appropriate, only the conditions subject to modification are reopened. Cause for modification of a transporter's permit is:
- (1) Material alterations to the transporter's activities which occurred after issuance of the permit to the transporter which justify the application of permit conditions that are different or absent from the existing permit;
 - (2) The receipt of information concerning the transporter which was not available when the permit was issued; or
 - (3) A change in the standards or regulations on which the permit was based, by promulgation of amended standards or regulations or by judicial decision after the permit was issued;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (b) The Secretary may suspend or revoke any transporter permit or deny any application for a transporter permit upon his or her own motion or upon receipt of a written request for suspension, revocation, or denial which contains facts and reasons supporting the request. Cause for suspension, revocation or denial is:
- (1) Non-compliance by the transporter with the requirements of 10 V.S.A., chapter 159, these regulations, the regulations promulgated by the Vermont Agency of Transportation for the transportation of hazardous wastes, or any term or condition of a permit, order, or assurance;
 - (2) Failure by the transporter to disclose all relevant facts during the permit application process that were known at that time;
 - (3) A determination by the Secretary that:
 - (A) Any of the grounds for denial of a permit under **10 V.S.A. § 6605f(a)** either existed at the time of application or have arisen since that time; or
 - (B) The holder of the permit, or the applicant for the permit, knowingly omitted or falsified information required to be disclosed under **§ 7-406(c)**.
 - (4) Misrepresentation of any relevant fact at any time;
 - (5) A felony conviction of the transporter in any jurisdiction when the conviction concerns violations of hazardous waste statutes or regulations; or
 - (6) A determination by the Secretary that the transporter's activities constitute a serious threat to human health or the environment and that such threat can only be regulated to acceptable levels by suspension, revocation or denial of the permit.
- (c) The Secretary shall provide written notice of modification, suspension, revocation, or denial, including the reasons for such actions, to the transporter involved. Any transporter who receives such notification shall have thirty days from the receipt of the notice to submit a written request for a hearing to the Secretary. If requested, the Secretary shall provide an opportunity for a hearing. The submission of a request for a hearing does not stay the effective date of the Secretary's decision.
- (d) An appeal may be taken from a final decision on the approval or denial of a request for the modification of a permit.

§ 7-408 ACCEPTING SHIPMENTS OF HAZARDOUS WASTE

A transporter may accept hazardous waste only from the following:

- (a) *A generator who has an EPA identification number issued by the Secretary;*

- (b) Another transporter who at the time has a valid transporter permit from the Secretary;

§ 7-409 PERSONNEL TRAINING

- (a) Permitted hazardous waste and used oil transporters must provide employee training to all persons who in the course of employment directly affect hazardous waste transportation safety. The training program shall be consistent with DOT employee training requirements of **49 CFR § 172.700**. Such training, at a minimum, shall include:
 - (1) For hazardous waste transporters:
 - (A) DOT's labeling, packing, placarding and shipping requirements as set forth in **49 CFR Parts 171 through 179** and all other applicable DOT regulations;
 - (B) Familiarity with and use of the most recent edition of the North American Emergency Response Guidebook for hazardous materials published by the DOT;
 - (2) For hazardous waste and used oil transporters:
 - (A) Safe vehicle operations to avoid creating hazards to public health, safety, or welfare or the environment;
 - (B) Safe handling of hazardous waste and used oil; and
 - (C) Emergency handling procedures in the event of a release or discharge of hazardous waste or used oil during transportation.
- (b) For each person required to be trained pursuant to **subsection (a) of this section**, a record of current training inclusive of the preceding three (3) years shall be kept on file by the transporter while these individuals are employed by the transporter, and for 90 days after these individuals cease being employed by the transporter. This period shall be extended automatically for the duration of any unresolved enforcement action, or as ordered by the Secretary. These records shall include the following:
 - (1) Name of employee;
 - (2) Date of most recent training;
 - (3) Description of training materials;
 - (4) Name and address of person providing training; and

- (5) Certification that the employee has been trained and tested.

Note: It is recommended that each person required to be trained pursuant to **subsection (a) of this section** have knowledge of the Vermont Hazardous Waste Management Regulations, in particular: **subchapter 4** (requirements for transporters of hazardous waste), **§ 7-105** (emergency and corrective actions), **§ 7-211** (Vermont listed hazardous wastes), and **subchapter 7** (manifest, reporting and recordkeeping requirements).

§ 7-410 LIABILITY INSURANCE REQUIREMENTS

- (a) All permitted hazardous waste transporters shall carry liability insurance, as required by U.S. DOT regulations, for sudden and accidental occurrences, exclusive of legal defense costs, for claims arising out of bodily injury and property damage from the hazardous waste transport operations of the transporter. Such insurance policy shall carry an approved DOT endorsement (Form MCS 90 - DOT) covering liability for accidents, including environmental restoration, bodily injury, and property damage.
- (b) The insurance policy shall be maintained in full force at all times during the term of the permit.

§ 7-411 EMERGENCY PREPAREDNESS

No transporter shall transport hazardous waste in Vermont without being in possession of the following on each vehicle:

- (a) Telephone numbers of:
- (1) The generator of the waste being transported; and
 - (2) The Vermont Agency of Natural Resources and the telephone numbers specified in **§ 7-105**.
- (b) A copy of the most recent edition of the North American Emergency Response Guidebook for hazardous materials published by DOT.
- (c) All of the following equipment in good operating condition:
- (1) A first aid kit with eyewash;
 - (2) An Underwriters' Laboratory listed explosion proof flashlight; and
 - (3) A fire extinguisher of appropriate size and type for the vehicle and wastes carried.

***Subchapter 5: REQUIREMENTS FOR HAZARDOUS WASTE TREATMENT, STORAGE,
AND DISPOSAL FACILITIES***

§ 7-501 PURPOSE, SCOPE, APPLICABILITY

- (a) This subchapter establishes requirements for the design, construction, operation, and maintenance of hazardous waste treatment, storage, and disposal facilities. This subchapter also describes the procedures for certification of hazardous waste facilities.
- (b) The requirements of this subchapter apply to owners and operators of hazardous waste facilities including all facilities which treat, store, or dispose of hazardous wastes referred to in **40 CFR Part 268** (incorporated by reference through **§ 7-106**).
- (c) The requirements of this subchapter apply to any person who accepts, treats, stores, or disposes of hazardous waste unless the person or activity is exempted under **§ 7-502**.
- (d) **40 CFR § 266.205** identifies when storage requirements, as incorporated by reference through **§ 7-504(e)(1)**, apply to the storage of hazardous waste military munitions. The treatment and disposal of hazardous waste military munitions are subject to the applicable provisions of **subchapters 1 through 7 of these regulations**.

§ 7-502 EXEMPTIONS

The following facilities and activities are exempted from the provisions of this subchapter:

- (a) A resource recovery facility managing municipal solid waste provided:
 - (1) The facility receives and burns only household waste, and solid waste from commercial or industrial sources which does not contain hazardous wastes; and
 - (2) The facility does not accept hazardous wastes, and the owner or operator of such facility has established contractual requirements or other appropriate notification or inspection procedures to assure that hazardous wastes are not received at or burned in such facility.
- (b) A totally enclosed treatment facility. A totally enclosed treatment facility is a facility for the treatment of hazardous waste which is directly connected to an industrial production process and which is constructed and operated in a manner which prevents the release of hazardous waste or any constituent thereof into the environment during treatment.
- (c) The owner or operator of an elementary neutralization unit or wastewater treatment unit as defined in **§ 7-103** provided that if the owner or operator is diluting hazardous ignitable (D001) wastes (other than the D001 High TOC Subcategory defined in **40 CFR § 268.40**, Table Treatment Standards for Hazardous Wastes), or reactive (D003) waste, to remove the

characteristic before land disposal, the owner/operator must comply with the general requirements for ignitable, reactive, or incompatible wastes set out in **40 CFR § 264.17(b)**.

- (d) Any person engaged in treatment or containment activities during an immediate response to a release of hazardous material or discharge of a hazardous waste and during an imminent and substantial threat of a release of hazardous material or discharge of hazardous waste, provided that the person:
 - (1) Complies with **§ 7-105** on emergency actions; and
 - (2) Obtains certification under this subchapter when he or she continues or initiates treatment or containment activities after the immediate response is over.
- (e) The treatment of hazardous waste by mixing absorbent material with containerized hazardous waste provided:
 - (1) The mixing occurs when the waste is first placed in the container; and
 - (2) The person treating the waste complies with **40 CFR §§ 264.17(b), 264.171, and 264.172**.
- (f) A solid waste management facility that accepts hazardous waste only from conditionally exempt generators provided the facility is certified by the Secretary to accept such waste.
- (g) Generators who accumulate or place in short-term storage hazardous waste on-site in compliance with the applicable timeframes specified in **subchapter 3** of these regulations.
- (h) Farmers who dispose of hazardous waste pesticides from their own use as provided in **§ 7-203(r)** of these regulations.
- (i) Transporters storing manifested shipments of hazardous waste at a transfer facility for a period of ten days or less and in accordance with **§ 7-404**.
- (j) Universal waste handlers and universal waste transporters managing the wastes listed below. Universal waste handlers and universal waste transporters are subject to regulation under **subchapter 9** of these regulations.
 - (1) Batteries as described in **§ 7-902**;
 - (2) Pesticides as described in **§ 7-903**;
 - (3) Thermostats as described in **§ 7-904**;
 - (4) PCB-containing fluorescent light ballasts as described in **§ 7-905**;
 - (5) Lamps as described in **§ 7-906**;

- (6) Mercury-containing devices as described in § 7-907; and
- (7) Cathode ray tubes (CRTs) as described in § 7-908.
- (k) Facilities that recycle hazardous waste in accordance with the standards of **subchapter 6** and as follows:
 - (1) Facilities that recycle hazardous waste on-site provided:
 - (A) Any hazardous waste being recycled is generated on-site;
 - (B) The hazardous waste to be recycled is not held in short-term storage for longer than the amount of time allowed under **subchapter 3** of these regulations; and
 - (C) The facility owner or operator complies with the applicable requirements of § 7-502(o); or
 - (2) Facilities that recycle hazardous waste received from off-site provided the hazardous waste is not stored prior to being recycled. Hazardous waste that is being staged at a recycling facility is not considered to be in storage.

Note: Owners or operators of recycling facilities that store hazardous wastes before they are recycled, or that otherwise treat, store or dispose of hazardous wastes are subject to certification under the requirements of this subchapter.

Note: Owners or operators of facilities that treat mercury-containing lamps using drum-top crushing equipment are subject to certification under the requirements of this subchapter. Drum-top crushing of mercury-containing lamps is considered a treatment activity rather than a recycling activity.

- (l) The evaporation of water from hazardous waste that is identified only by the VT02 or VT03 hazardous waste codes provided:
 - (1) The water component of the waste is evaporated on-site using evaporation equipment approved in accordance with Vermont's Air Pollution Control Regulations; and
 - (2) The oily residue resulting from the evaporation process is managed either as hazardous waste or in accordance with the Used Oil Management Standards of **subchapter 8**.
- (m) Oil-water separators provided:
 - (1) The waste oil-water mixture to be separated is identified only by the VT02 hazardous waste code; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) Any contaminated water resulting from the separation process is discharged in accordance with **10 V.S.A. chapter 47** (for indirect injection well, and direct discharges) **and chapter 48** (for groundwater protection); and
 - (3) The oily residue resulting from the separation process is managed either as hazardous waste or in accordance with the used oil management standards of **subchapter 8**.
- (n) Facilities conducting site investigation and/or corrective action pursuant to **§ 7-105(b)** of these regulations may be exempted by the Secretary from the permitting (but not the substantive) requirements of this subchapter, to the extent allowed under federal regulations incorporated by reference in this chapter.
- (o) Treatment of hazardous waste in containers or tanks by generators provided:
- (1) The generator provides written notification to the Secretary that includes:
 - (A) The facility name, EPA identification number, NAICS code(s), generator status classification, mailing address, street address, telephone number, contact person, legal owner or operator;
 - (B) A detailed description of the treatment process(es) to be used including process design drawings, plans or process flow diagrams;
 - (C) An estimate of the frequency that treatment will occur;
 - (D) The type(s) and estimated quantity of hazardous waste to be treated including a detailed description of the process(es) generating the waste; and
 - (E) A detailed description of how all treatment products and by-products will be managed following treatment.
 - (2) A revised written notification is provided to the Secretary if the information required under **subsection (o)(1) of this section** changes significantly.
 - (3) The hazardous waste being treated is generated and treated on-site.
 - (4) During treatment and during any storage prior to treatment, hazardous waste is:
 - (A) Counted for the purpose of determining generator status under **§ 7-305**; and
 - (B) Managed in accordance with the applicable requirements of **subchapter 3**.
 - (5) The generator determines if treatment by-products are hazardous waste in accordance with **§ 7-303**.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (6) The generator maintains records for three years documenting:
 - (A) The type(s) and quantity of waste treated;
 - (B) The method(s) of treatment used; and
 - (C) The date(s) that treatment occurred.
 - (7) All hazardous waste generated from the treatment is managed in accordance with the applicable standards of **subchapter 3**.
 - (8) If a generator is treating wastewater using a wastewater evaporation unit, the generator must:
 - (A) Ensure that treatment in the evaporation unit shall result in the concentration of hazardous waste constituents for proper recycling or disposal, and not allow evaporation of the hazardous waste constituents into the air. Air emissions of hazardous constituents shall be controlled through compliance with all applicable air emission control requirements under the **Clean Air Act, U.S. Code, Title 42, c. 85** as administered by USEPA, the emission thresholds established under **§ 5-261** (control of hazardous air contaminants) **of the Vermont Air Pollution Control Regulations** and, for large quantity generators, with the air emission control requirements in **40 CFR part 265, subparts AA, BB and CC** as applicable; and
 - (B) Ensure that operation of the evaporation unit or placement of hazardous waste within the unit does not:
 - (i) Result in the generation of extreme heat or pressure, fire or explosion, or violent reaction;
 - (ii) Produce uncontrolled toxic mists, fumes, or gases in sufficient quantities to threaten human health;
 - (iii) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosion; or
 - (iv) Damage the structural integrity of the unit, or cause the unit or any of its ancillary equipment to rupture, leak, abnormally corrode, or otherwise fail before the end of its intended life.
- Note:** Disposal of hazardous waste by evaporation is prohibited pursuant to **§ 7-302(a)**.
- (9) If a generator is managing and treating waste or contaminated soil in tanks or containers to meet Land Disposal Restriction treatment standards found at **40 CFR §**

268.40, the generator develops and follows a written waste analysis plan in accordance with the requirements of **40 CFR § 268.7(a)(5)**.

- (10) The generator does not treat hazardous waste using thermal treatment processes.

Note: Distillation and use of a wastewater evaporation unit pursuant to **subsection (8) of this section** are not considered a thermal treatment processes.

- (11) The generator does not treat mercury-containing wastes or devices (e.g., fluorescent lamps, thermostats).

- (12) Treatment does not result in any adverse impact to human health or the environment.

Note: The Secretary reserves the right, upon receiving written notification of treatment by a generator, to require that treatment-specific requirements be met.

Note: Owners or operators of facilities that treat mercury-containing lamps using drum-top crushing equipment are subject to certification under the requirements of this subchapter. Drum-top crushing of mercury-containing lamps is considered a treatment activity rather than a recycling activity.

- (p) A person engaged in treatment or containment activities during immediate response to an immediate threat to human health, public safety, property, or the environment, from the known or suspected presence of military munitions, other explosive material, or an explosive device, as determined by an explosive or munitions emergency response specialist as defined in **§ 7-103** of these regulations. An owner or operator of a facility otherwise regulated by this subchapter must comply with all applicable requirements of **40 CFR Part 264 subparts C and D**. In the case of emergency responses involving military munitions, the responding military emergency response specialist's organizational unit must retain records for three years identifying the dates of the response, the responsible persons responding, the type and description of material addressed, and its disposition.
- (q) A facility that meets either small or large quantity generator standards and that accepts hazardous waste from a conditionally exempt generator pursuant to **§ 7-306(c)(2)(D)**.

§ 7-503 EMERGENCY CERTIFICATION

- (a) Notwithstanding any other section of these regulations, in the event the Secretary finds an imminent and substantial endangerment to human health or the environment, the Secretary may issue a temporary emergency certification to an uncertified facility to allow the treatment, storage, or disposal of hazardous waste or to a certified facility to allow treatment, storage, or disposal of a hazardous waste not covered by an effective certification.

- (b) This emergency certification:
- (1) May be oral or written. If oral, it shall be followed in five days by a written emergency certification;
 - (2) Shall not exceed 90 days in duration;
 - (3) Shall clearly specify the hazardous wastes to be received, and the manner and location of their treatment, storage, or disposal;
 - (4) May be terminated by the Secretary at any time without process if he or she determines that termination is appropriate to protect human health and the environment;
 - (5) Shall be accompanied by a public notice published including:
 - (A) Name and address of the office granting the emergency authorization;
 - (B) Name and location of the facility;
 - (C) A brief description of the waste involved;
 - (D) A brief description of the action authorized and reasons for authorizing it; and
 - (E) The duration of the emergency certificate.
 - (6) Shall incorporate, to the extent possible and not inconsistent with the emergency situation, all applicable requirements of these regulations.

§ 7-504 GENERAL FACILITY CERTIFICATION STANDARDS

- (a) Except for the facilities and activities excluded under **§ 7-502**, certification from the Secretary is required to treat, store, dispose, or accept any hazardous waste as identified or listed under **subchapter 2** of these regulations.

Note: The terms “treatment”, “storage”, “disposal”, and “hazardous waste” are defined in **§ 7-103**.

- (b) Certificate of Need
- (1) Except as provided for in **subsection (b)(2) of this section**, no person shall begin site preparation for or construction of a hazardous waste management facility for the purpose of treatment or disposal of hazardous waste, without first obtaining a certificate of need pursuant to the requirements of **10 V.S.A. § 6606a**.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) The certificate of need requirement does not apply to:
 - (A) The replacement of an existing facility at the original site with an equivalent facility in the usual course of business; or
 - (B) A hazardous waste management facility that is operated only by or on behalf of the owner of the facility for the treatment or disposal of hazardous waste generated in Vermont by the owner of the facility. Such facility shall be located on a site of generation.
- (3) To determine that a proposed facility is needed for the general good of the state, the Secretary must find that:
 - (A) The proposed facility is consistent with any applicable provisions of the state hazardous waste management plan, if such plan has been adopted by the Secretary, or, if such plan has not been adopted by the Secretary, the proposed facility is consistent with the general goals and priorities of **10 V.S.A. chapter 159** as determined by the Secretary; and
 - (B) The proposed facility location:
 - (i) Is suitable for the type and amount of hazardous waste intended for treatment or disposal at the facility; and
 - (ii) Is accessible by transportation routes that minimize the threat to the public health and safety and to the environment; and
 - (iii) Reasonably accommodates the plans and preferences of the proposed host municipality, as expressed by local government entities; and
 - (C) The need for the facility is demonstrated by the need to assure the environmentally sound treatment or disposal of hazardous waste generated within Vermont, recognizing the effects of any state hazardous waste plan and:
 - (i) The further need to meet Vermont's obligations under an interstate agreement or regional compact; or
 - (ii) The lack of adequate current or projected treatment or disposal capacity within the region to handle the hazardous waste generated by Vermont generators which is proposed for the facility.
- (c) Disclosure Statement
 - (1) With the exception of those persons exempted under **10 V.S.A. § 6605f(k)**, any person who is required to obtain a certification under this subchapter shall complete, sign, and submit to the Secretary at the time of application a disclosure statement

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

pursuant to the requirements of **10 V.S.A. § 6605f**. In the event of any change in ownership, a disclosure statement must be submitted pursuant to the requirements of **10 V.S.A. § 6605f(e)**.

- (2) Any person who has received a certification under this subchapter shall file a statement annually within 30 days prior to the month and day of issuance of that permit disclosing any changes in facts that would render the disclosure statement filed in connection with that permit inaccurate in any way, or stating that no such changes have occurred in the period of time covered by the annual statement. The annual statement shall be under oath or affirmation.

- (d) No person shall initiate construction of a hazardous waste treatment, storage, or disposal facility without first applying for and receiving certification for such facility in accordance with §§ **7-505 and 7-506** of these regulations. In addition, any hazardous waste treatment, storage or disposal facility that was in existence on November 19, 1980, or any facility that treats, stores or disposes of a material that has been newly defined or listed as a Vermont or federal hazardous waste, must apply for interim certification in accordance with § **7-510** of these regulations.

- (e) Every hazardous waste treatment, storage, or disposal facility issued a certification under the provisions of this subchapter shall, at a minimum, be designed, constructed, operated, and maintained in accordance with all applicable requirements of:
 - (1) **40 CFR Part 264**;
 - (2) **40 CFR Part 266**;
 - (3) The land disposal restrictions (40 CFR Part 268) incorporated by reference under § **7-106**;
 - (4) The large quantity generator standards of § **7-308**; and
 - (5) All applicable sections of the Vermont Environmental Protection Rules, Chapters 1 through 19.

- (f) Certification is required during the active life (including the closure period) of all hazardous waste management units. Owners and operators of landfills, surface impoundments, land treatment units, and waste pile units must have post-closure permits (i.e., certification) as specified in **40 CFR § 270.1(c)**.

- (g) Certification shall be for a period not to exceed ten (10) years. Each certification for a land disposal facility shall be reviewed by the Secretary five years after the date of certification issuance or reissuance and shall be modified, if necessary, as provided in § **7-507**.

- (h) Continuation of Expiring Certificates
 - (1) If the certificate holder has submitted an administratively complete application to renew certification at least 180 calendar days prior to expiration of the effective certification and the Secretary, through no fault of the certificate holder, does not

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- issue a new certificate with an effective date prior to the expiration date of the previous certificate, the conditions of the expired certificate continue in force until the effective date of a new certificate.
- (2) Certificates continued under this section remain fully effective and enforceable.
 - (3) When the certificate holder is not in compliance with the conditions of the expired or expiring certification, the Secretary may do any or all of the following:
 - (A) Initiate an enforcement action based on the certificate that has been continued;
 - (B) Issue a notice of intent to deny the new request for certification. If the certification is denied, the activities authorized by the continued certificate would have to cease or become subject to an enforcement action;
 - (C) Issue a new certification with appropriate conditions; or
 - (D) Take other actions authorized by these regulations.
 - (i) A certification may be transferred by the permittee to a new owner or operator under the provisions of **40 CFR § 270.40**.
 - (j) For the purposes of construing **40 CFR Parts 260 through 270**, a person who receives certification (i.e., the certificate holder) under this chapter shall also be known as the permittee.
 - (k) In lieu of the negative assurance required by **40 CFR § 264.143(f)(3)(iii)(B)**, the Secretary shall accept a certified public accountant's report describing the procedures performed and related findings, including whether or not there were discrepancies found in the comparison.

§ 7-505 APPLICATION FOR INITIAL AND RENEWAL CERTIFICATION

- (a) Any person who is required to obtain or renew certification under **§ 7-504** shall sign and submit an application for certification to the Secretary. When a facility is owned by one person but is operated by another person, it is the operator's duty to obtain certification except that the owner must also sign any documents submitted for the purpose of applying for certification.
- (b) At the time of application, the applicant must:
 - (1) If seeking initial certification for a hazardous waste treatment or disposal facility, have already obtained a certificate of need pursuant to the requirements of **10 V.S.A. § 6606a** (refer to **§ 7-504(b)**);

- (2) Submit a disclosure statement pursuant to **§ 7-504(c)**;
 - (3) Have complied with the pre-application public meeting and notice requirements of **40 CFR § 124.31**.
- (c) An application for certification may be submitted in narrative form. Each application for certification must be signed in accordance with **§ 7-108**, and must contain all applicable information required under **40 CFR §§ 270.10(j), 270.13 (Part A) and 270.14 through 270.28 (Part B)**.
- (d) In addition to the requirements of **subsection (c) of this section**, each application for a hazardous waste land treatment or disposal facility shall include, but not be limited to, the following information:
- (1) A description of the provisions for hydrogeological studies, monitoring analysis, and protection of groundwater and surface waters;
 - (2) A description of the provisions for post-closure monitoring and maintenance of the facility; and
 - (3) A description of the actions taken by the facility to assure financial responsibility for the post-closure care monitoring period and civil liability arising from non-sudden incidents at the facility.
- (e) Certain technical data, such as design drawings and specifications and engineering studies that are required to be submitted in an application, shall be certified by a professional engineer registered in Vermont.
- (f) The Secretary shall not issue a draft certification until the applicant has fully complied to the Secretary's satisfaction with the specific application requirements for the type of facility involved, unless the only information not submitted is the information required for exposure assessments for surface impoundments or landfills.
- (g) Applicants shall keep records of all data used to complete certification applications and any supplemental information submitted to the Secretary for a period of at least three (3) years from the date the application is signed.

§ 7-506 PROCEDURE FOR CERTIFICATION

- (a) Upon completing review of each application for certification under **§ 7-505**, the Secretary shall either issue a draft certificate or deny certification. The Secretary shall prepare a written justification for any certification that has been denied and give public notice of the decision to deny.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (b) Each draft and final certificate shall contain:
 - (1) All standards, conditions, and requirements that the Secretary has determined to be the best control technology for the specific facility involved. At a minimum, best control technology shall be the design, construction, operation and maintenance requirements referenced in § 7-504(e);
 - (2) All standards, conditions, and requirements that the Secretary has determined necessary to protect human health and the environment, including the “conditions applicable to all permits” specified under **40 CFR § 270.30**; and
 - (3) When appropriate, a schedule of compliance leading to compliance with the Waste Management Act and these regulations. Any schedule of compliance shall meet the provisions of **40 CFR § 270.33**.
- (c) The Secretary shall consult with the commissioner of health and the commissioner of labor to avoid conflicts of the standards and conditions of any draft certification with requirements that may be imposed under **18 V.S.A. chapter 28** or any other applicable state safety or health regulation.
- (d) A fact sheet shall be compiled for every draft certificate prepared by the Secretary. The fact sheet shall briefly set forth the significant factual, legal, methodological, and policy questions considered in preparing the draft certificate. In addition, the fact sheet shall include the information described in **40 CFR § 124.8(b)**.
- (e) For preparing a draft certificate, the record shall consist of: the application, if required, and any supporting data furnished by the applicant; the draft certificate or notice of intent to deny the application or to revoke the certificate; the fact sheet; all documents cited in the fact sheet; and other documents contained in the supporting file for the draft certificate.
- (f) Public Notice
 - (1) The Secretary shall provide notice that a draft certificate has been prepared for a hazardous waste facility, of the opportunity for public comment on such draft certificate, and of the informational public hearing which shall be held for such draft certificate.
 - (2) Notice shall be provided by advertisement in major local newspapers of general circulation, broadcast over local radio station and by mailing a copy of a written notice to those persons listed in **40 CFR § 124.10**, who shall be included on the facility mailing list. The applicant shall reimburse the Secretary for all costs incurred under this subsection.
 - (3) At a minimum, for each draft certificate, the applicable public notice and public comment requirements of **40 CFR §§ 124.10 and 124.32** shall be met.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) The Secretary may assess the need, on a case-by-case basis, for an information repository, and may require that such a repository be maintained by the applicant, in accordance with the requirements of **40 CFR § 124.33**.

- (g) Copies of the fact sheet, draft certificate and written notice shall be sent to the applicant, the town in which the facility is located or proposed to be located, any other Agency or subdivision thereof which has issued or may be requested to issue a permit or certificate for the facility, the U.S. Environmental Protection Agency, and any other appropriate government authorities. Copies of the fact sheet, draft certificate and notice shall also be made available to any other interested party.

- (h) Prior to the issuance of each final certificate, the Secretary shall consider all comments raised during the public comment period and prepare a response to comments which specifies:
 - (1) The content of all significant comments;
 - (2) The Secretary's response to those comments;
 - (3) Any changes that will be made to the draft certificate; and
 - (4) The reasons for those changes.

- (i) An appeal may be taken from a final decision on the issuance or denial of a certificate.

§ 7-507 MODIFICATION OF CERTIFICATIONS

- (a) Based upon information received (e.g., findings of a facility inspection, or information submitted by the certificate holder), the Secretary may determine whether one or more of the causes listed in **subsection (e) of this section** to modify a certification exist. If cause exists, the Secretary may modify the certification accordingly, and may request an updated application if necessary.

- (b) When a certification is modified, only the conditions subject to modification are reopened.

- (c) Suitability of the facility location shall not be considered at the time of modification unless new information or standards indicate that a threat to human health or the environment exists which was unknown at the time when the certification was issued.

- (d) If cause does not exist under this section, the Secretary shall not modify the certification, unless the modification is at the request of the certificate holder.

- (e) The following are causes for modification of a certification:
- (1) There are material and substantial alterations or additions to the certified facility or activity which occurred after the certification was issued which justify the application of certification conditions that are different from or absent in the existing certification.
 - (2) Information is received by the Secretary that was not available at the time that the certification was issued (other than revised regulations, guidance, or test methods) and would have justified the application of different certification conditions at the time of issuance.
 - (3) The standards or regulations on which the certification was based have been changed by statute, through promulgation of new or amended standards or regulations, or by judicial decision, after the certification was issued.
 - (4) The Secretary determines good cause exists for modification of a certification, such as an act of God, strike, flood, or materials shortage or other events over which the certificate holder has little or no control and for which there is no reasonably available remedy.
 - (5) Cause exists for revocation under § 7-509, and the Secretary determines that modification of the certification is appropriate.
 - (6) The Secretary has received notification (as required in the certification) of a proposed transfer of the certification.
- (f) Modification Procedures
- (1) If a modification is requested by the permittee, the Secretary shall approve or deny the request according to the procedures of **40 CFR § 270.42**.
 - (2) For all modifications sought on the motion of the Secretary, a draft certification shall be prepared, and the procedures and requirements of § 7-506 shall be met.
 - (3) If a modification is requested to transfer a facility to a new owner or operator, the Secretary shall review the request according to the procedures of **40 CFR § 270.40**.
- (g) An appeal may be taken from a final decision on the approval or denial of a request for the modification of a certificate.

§ 7-508 REVOCATION AND REISSUANCE OF CERTIFICATIONS

- (a) Based upon information received (e.g., findings of a facility inspection, or information submitted by the certificate holder), the Secretary may determine whether one or more of

the causes listed in **subsection (e) of this section** to revoke and reissue a certification exist. If cause exists, the Secretary may revoke and reissue the certification accordingly, and may request an updated application if necessary.

- (b) If a certification is revoked and reissued, the entire certification is reopened and subject to revision and the certification is reissued for a new term. (**See 40 CFR § 124.5(c)(2)**)
- (c) Suitability of the facility location shall not be considered at the time of revocation and reissuance unless new information or standards indicate that a threat to human health or the environment exists which was unknown or which did not exist at the time when the certification was issued.
- (d) If cause does not exist under this section, the Secretary shall not revoke and reissue a certification, except at the request of the certificate holder.
- (e) The following are causes for revocation and reissuance of a certification:
 - (1) Cause exists for termination under **§ 7-509**, and the Secretary determines that revocation and reissuance of the certification is appropriate.
 - (2) The Secretary has received notification (as required in the certification) of a proposed transfer of the certification. When revocation and reissuance is used to transfer a certification to a new owner or operator, the requirements of **40 CFR § 270.41** shall be met.
- (f) The causes for modification listed under **§§ 7-507(e)(1) through (4)** may be causes for revocation and reissuance of a certification when the certificate holder requests or agrees.

§ 7-509 VOLUNTARY AND INVOLUNTARY TERMINATION OF CERTIFICATIONS

(a) Voluntary Termination of Certifications

The Secretary may terminate a certification upon request of the certificate holder provided the certificate holder:

- (1) Notifies the Secretary in writing of his or her intent to close the facility;
- (2) Closes the facility in accordance with the facility closure plan;
- (3) Requests and receives a determination by the Secretary that the facility has been successfully closed; and
- (4) Notifies persons included on the facility mailing list.

(b) Involuntary Termination of Certifications

- (1) The following are causes for terminating a certification during its term, or for denying an application to renew certification:
 - (A) Noncompliance by the certificate holder with any condition of the certification;
 - (B) Failure by the certificate holder to disclose fully all relevant facts in the application or during the certification process;
 - (C) Misrepresentation by the certificate holder of any relevant facts at any time; or
 - (D) A determination by the Secretary that the certified activity endangers human health or the environment and can only be regulated to acceptable levels by termination of the certification.
- (2) The Secretary shall follow the applicable procedures of **40 CFR § 124.5 and 3 V.S.A. § 814** when terminating any certification under this section.
- (3) The Secretary may, pursuant to the procedures of this subchapter, deny an application for renewal of certification either in its entirety or as to the active life of a hazardous waste management facility or unit only.

§ 7-510 INTERIM STATUS CERTIFICATION

- (a) The purpose of this section is to establish minimum standards that define the acceptable management of hazardous waste during the period of interim status and until certification of final closure or, if the facility is subject to post-closure requirements, until post-closure responsibilities are fulfilled.
- (b) The standards of **40 CFR Part 265, Subpart S of 40 CFR Part 264**, and this section apply to owners and operators of facilities that treat, store or dispose of hazardous waste who have fully complied with the requirements for interim status under **§ 3005(e) of RCRA and 40 CFR § 270.10** until either certification is made under this subchapter or until applicable Part 265 closure and post-closure responsibilities are fulfilled, and to those owners and operators of facilities in existence on November 19, 1980 who have failed to provide timely notification as required by **RCRA § 3010(a)** and/or failed to file an application for certification as required by **subsections (g) and (h) of this section**. These standards apply to all treatment, storage and disposal of hazardous waste at these facilities after the effective date of these regulations, except as specifically provided for in this subchapter or subchapter 2.
- (c) All hazardous waste facilities which were in operation or under construction as of November 19, 1980, which have been in operation or under construction since that date, or which are currently operating or under construction without certification shall, at a

minimum, be designed, constructed, operated and maintained in accordance with all applicable requirements of:

- (1) **40 CFR Part 265;**
 - (2) **40 CFR Part 266;**
 - (3) The land disposal restrictions (40 CFR Part 268) incorporated by reference under § **7-106**; and
 - (4) All applicable sections of the Vermont Environmental Protection Rules, **chapters 1 through 19**.
- (d) In order for a facility to qualify for interim status, the owner or operator must submit a **Vermont Hazardous Waste Handler Site ID Form**, an application for interim certification that meets the requirements of **subsection (g) of this section**, and must otherwise meet the requirements of **40 CFR §§ 270.70 through 270.73**.
- (e) The following hazardous wastes must not be managed at facilities subject to regulation under this section: EPA hazardous waste codes F020, F021, F022, F023, F026, or F027.
- (f) The requirements of this section apply to owners and operators of all facilities which treat, store or dispose of hazardous waste subject to the land disposal restrictions of **40 CFR Part 268** incorporated by reference under § **7-106**.
- (g) Owners and operators of hazardous waste management facilities in existence on November 19, 1980 must submit an application for certification or interim certification as required by **40 CFR § 270.10(e)**. Any person applying for interim certification under this section shall submit a document, signed in accordance with § **7-108**, that provides the information required by **40 CFR § 270.13**. This document shall be submitted in accordance with the requirements of **40 CFR § 270.10(e)**.
- (h) (1) If any owner or operator of a hazardous waste management facility has filed for interim status certification and has not yet filed for certification, the owner or operator shall file an amended interim status application:
- (A) With the Secretary no later than the effective date of regulatory provisions listing or designating wastes as hazardous in the state in addition to those already listed or designated hazardous by the Agency, if the facility is treating, storing or disposing of any of those newly listed or designated wastes; or
 - (B) As necessary to comply with provisions of **40 CFR § 270.72** for changes during interim status.
- (2) The owner or operator of a facility who fails to comply with the updating requirements of this section does not receive interim status as to the wastes not covered by a duly filed interim status application.

- (i) In lieu of the negative assurance required by **40 CFR § 265.143(e)(3)(iii)(B)**, the Secretary shall accept a certified public accountant's report describing the procedures performed and related findings, including whether or not there were discrepancies found in the comparison.

§ 7-511 SPECIAL CERTIFICATION

- (a) The Secretary may issue a certificate for a hazardous waste incinerator in accordance with **40 CFR § 270.62**.
- (b) The Secretary may issue a certificate for using field tests or laboratory analyses for a land treatment demonstration in accordance with **40 CFR § 270.63**.
- (c) The Secretary may issue a research, development, and demonstration certificate for any hazardous waste treatment facility which proposes to utilize an innovative and experimental hazardous waste treatment technology or process for which certification standards for such experimental activity have not been promulgated under **40 CFR Part 264 or 266**. Any such certificate shall include such terms and conditions as will assure protection of human health and the environment. Such certificates shall meet the requirements of **40 CFR § 270.65**.
- (d) The Secretary may issue a certificate for hazardous waste boilers and industrial furnaces in accordance with **40 CFR § 270.66**.

§ 7-512 ADDITIONAL REQUIREMENTS

On a case-by-case basis, any person subject to this subchapter may be required to meet additional requirements when the Secretary determines that such actions are necessary to protect human health or the environment.

Subchapter 6: STANDARDS FOR HAZARDOUS WASTES THAT ARE RECYCLED

§ 7-601 PURPOSE, SCOPE, APPLICABILITY

This subchapter defines “hazardous waste recycling,” establishes management standards for facilities that recycle hazardous waste, and provides a mechanism for the Secretary to, on a case-by-case basis, exempt a waste that is recycled or reused from part or all of these regulations.

§ 7-602 DEFINITION OF HAZARDOUS WASTE RECYCLING

Hazardous waste is recycled if it is used, reused, or reclaimed as follows:

- (a) A hazardous waste is used or reused if it is:
 - (1) Used or reused as an ingredient in an industrial process to make a product, provided the waste is not first being processed or reclaimed; or
 - (2) Used or reused as an effective substitute for a commercial product, provided the waste is not first being processed or reclaimed; or
 - (3) Returned to the original process from which the waste is generated, without first being reclaimed or land disposed. The waste must be returned as a substitute for a feedstock material. In cases where the original process to which the material is returned is a secondary process, the waste must be managed such that there is no placement on the land.

Note: Certain hazardous wastes that are recycled by being used or reused as described by **subsection (a) of this section** are exempted from regulation as hazardous waste under **§ 7-204(a)(1)**.

- (b) A hazardous waste is reclaimed if it is processed to recover the hazardous component of the waste as a usable product, or if it is regenerated. Examples are recovery of lead values from spent batteries and regeneration of spent solvents.

§ 7-603 OTHER SECTIONS OF THESE REGULATIONS APPLICABLE TO HAZARDOUS WASTE RECYCLING:

- (a) Definitions for the terms: “designated facility,” “discarded,” “reclaimed,” “staging,” and “used or reused” are provided in **§ 7-103**.
- (b) Exemptions for certain hazardous wastes that are recycled are provided in **§ 7-204**.

- (c) **Subsections (3) and (4) of § 7-305(a)** specify how on-site recycled waste is counted toward generator status.
- (d) Exemptions for certain recycling activities, from subchapter 5 certification requirements, are provided in **§ 7-502(k)**.

§ 7-604 GENERAL STANDARDS APPLICABLE TO ALL HAZARDOUS WASTE RECYCLING ACTIVITIES:

- (a) Any residual material resulting from a recycling process must be evaluated in accordance with **§ 7-303** to determine whether it is subject to regulation as hazardous waste.
- (b) Any facility that treats hazardous waste without recycling it, or that treats hazardous waste prior to recycling it, is subject to regulation under subchapter 5.

Note: Generators that treat hazardous waste in containers or tanks, and comply with **§ 7-502(o)**, are exempt from regulation under subchapter 5.

- (c) Owners or operators of facilities otherwise subject to subchapter 5 certification requirements are subject to the requirements of **Subparts AA, BB and CC of 40 CFR Part 264 or 265** for hazardous waste management units that recycle hazardous wastes.

§ 7-605 HAZARDOUS WASTE RECYCLING BY GENERATORS

- (a) Hazardous waste that is recycled on-site by the generator of the waste, and not exempt under **§ 7-204(a)**, must be managed in accordance with:
 - (1) The requirements of **§ 7-604**; and
 - (2) All applicable standards of **subchapter 3** (i.e., standards applicable to conditionally exempt, small quantity, or large quantity generators) until such time that the recycling process is complete.
- (b) Generators that recycle their own hazardous waste on-site according to **subsection (a) of this section** are not subject to certification under **subchapter 5** (refer to **§ 7-502(k)**) for the recycling process.
- (c) Generators shipping hazardous waste off-site for recycling shall ship such waste to:
 - (1) A designated facility;
 - (2) A facility approved by the Secretary under a recycle/reuse exemption issued according to the requirements of **§ 7-608**; or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) For hazardous waste that is not defined as hazardous in 40 CFR Part 261 (i.e., waste regulated as hazardous by Vermont), to a facility that is not a designated facility, located in a state other than Vermont provided the facility can receive such waste under applicable state and local laws, regulations and ordinances.

§ 7-606 HAZARDOUS WASTE RECYCLING AT OFF-SITE FACILITIES

- (a) Owners or operators of facilities that receive recyclable materials, stage such materials for no more than three days, and recycle them without storing them before they are recycled are subject to:

- (1) The requirements of **§ 7-604**;
- (2) The large quantity generator requirements of **§ 7-308**; and
- (3) Financial Assurance

Prior to staging any material, demonstrate financial assurance for closure of the facility by:

- (A) Maintaining a closure cost estimate that meets the requirements of **40 CFR § 265.142**, and that has been approved by the Secretary; and
- (B) Establishing financial assurance in accordance **40 CFR § 265.143**.

- (b) Owners or operators of facilities that store recyclable materials before they are recycled are subject to **§ 7-604** and all applicable provisions of **subchapters 1, 3, 5 and 7** of these regulations.

§ 7-607 RECYCLABLE MATERIALS USED IN A MANNER CONSTITUTING DISPOSAL

Any recyclable materials that are applied to or placed on the land before or after mixing or combination with any other substance(s) shall be managed in accordance with **40 CFR §§ 266.20 through 266.23**. These materials are referred to as "materials used in a manner that constitutes disposal."

§ 7-608 RECYCLE/REUSE EXEMPTIONS FOR RECYCLABLE HAZARDOUS WASTES AND/OR RECYCLING ACTIVITIES

- (a) The Secretary may, on a case by case basis, exempt from part or all of the regulations, a waste generated by a particular generator, transported by a particular transporter, or treated or stored by a particular facility if the waste is legitimately recycled provided that:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (1) The recycled material is:
 - (A) Vermont regulated waste listed under § 7-211 of these regulations; or
 - (B) Recycled material described by **40 CFR § 260.30**.
 - (2) The procedural and durational requirements and the criteria and standards used by the Secretary in exempting waste under this section shall be no less stringent than those specified in **40 CFR §§ 260.30, 260.31, and 260.33**;
 - (3) The standards and requirements which apply to these wastes can be no less stringent than those outlined in **40 § CFR 261.6 and Part 266**, if the waste in question is one addressed by these sections of 40 CFR; and
 - (4) The recycling, reclamation, or reuse of the waste does not present an actual or potential threat to human health or the environment.
- (b) Any person seeking an exemption under this section shall apply to the Secretary using the **Exemption Procedures for the Recycle and Reuse of Hazardous Waste Form**.
 - (c) Any generator or facility whose waste is exempted under this section shall comply with those additional management standards and requirements that the Secretary, after an examination of the factors listed in § 7-216(c), deems to be necessary to protect human health and the environment.
 - (d) Recycle/Reuse exemptions shall be issued for a period not to exceed five (5) years.
 - (e) If the holder of a Recycle/Reuse exemption has submitted an administratively complete application to renew the exemption at least 30 calendar days prior to expiration of the effective exemption and the Secretary, through no fault of the Recycle/Reuse exemption holder, does not issue a new exemption with an effective date prior to the expiration date of the previous exemption, the conditions of the expired exemption continue in force until the effective date of a new exemption.
 - (f) Any Recycle/Reuse exemption without a durational requirement shall expire on July 1, 2013.

Subchapter 7: MANIFEST, REPORTING AND RECORDKEEPING REQUIREMENTS

§ 7-701 PURPOSE, SCOPE, APPLICABILITY

This subchapter establishes requirements for the use of manifests by hazardous waste generators, transporters, and treatment, storage and disposal facilities to track the movement of hazardous waste from the point of generation to any intermediate points and finally to its ultimate point of disposition. This subchapter also establishes requirements for persons exporting or importing hazardous waste, for reporting and recordkeeping by generators and transporters, and for biennial reporting by generators and treatment, storage, and disposal facilities. Other reporting and recordkeeping requirements for treatment, storage, and disposal facilities are specified in subchapter 5.

§ 7-702 MANIFEST REQUIREMENTS FOR GENERATORS

- (a)
 - (1) Unless otherwise specified in these regulations, a small or large quantity generator who transports or offers for transport a hazardous waste for offsite treatment, storage, or disposal, or a treatment, storage, and disposal facility who offers for transport a rejected hazardous waste load, must prepare a manifest on EPA Form 8700–22, and, if necessary, EPA Form 8700–22A, according to the instructions included in **Appendix V**.
 - (2) Any conditionally exempt generator that chooses to utilize a manifest for shipping hazardous waste must comply with the manifest instructions included in **Appendix V**.
 - (3) When completing a manifest, a generator shall use the EPA identification number that is assigned to the generator site at the time of shipment.
 - (4) Manifests may be obtained from any source that is registered with the U.S. EPA as a supplier of manifests (e.g., states, waste handlers, and/or commercial forms printers).
 - (5) Any small or large quantity generator shipping hazardous waste using a manifest is subject to the requirements of the tax assessed pursuant to **32 V.S.A. chapter 237**. When completing a manifest, a generator of waste subject to an alternative tax rate must use the appropriate tax code listed in **Appendix VI** in order for the Secretary to recognize the alternative rate.
- (b) Any generator who transports or offers for transport hazardous waste to a designated facility using a manifest shall:
 - (1) Designate on the manifest one facility that is permitted to handle the waste described on the manifest.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) Obtain the initial transporter's name, signature, and date of acceptance on the manifest. Give the manifest to the transporter after retaining copies as described in **subsection (b)(5) of this section**.
- (3) Certify to one of the following statements in Item 15 of the manifest:
 - (A) "I am a large quantity generator. I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment;" or
 - (B) "I am a small quantity generator. I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford."
- (4) Sign the manifest and otherwise complete each manifest as required under **§ 7-702(a)**.
- (5) Retain a signed copy of the manifest for at least three (3) years from the date of initial shipment or until receipt of a completed copy. A completed copy of the manifest must be retained as a record for at least three years from the date the waste was accepted by the initial transporter.
- (6) For shipments of hazardous waste made within the United States solely by water (bulk shipments only), send three copies of the manifest dated and signed in accordance with this section to:
 - (A) The owner or operator of the designated facility; or
 - (B) The last water (bulk shipment) transporter to handle the waste in the United States if exported by water. Copies of the manifest are not required for each transporter.
- (7) For rail shipments of hazardous waste made within the United States which originate at the site of generation, send at least three copies of the manifest dated and signed in accordance with this section to:
 - (A) The next non-rail transporter; if any; or
 - (B) The designated facility if transported solely by rail; or
 - (C) The last rail transporter to handle the waste in the United States if exported by rail.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (8) If the transporter is unable to deliver the hazardous waste to the designated facility or the alternate facility, immediately either designate another facility or instruct the transporter to return the waste.
 - (9) Wait for confirmation of the shipment by the return of a completed copy of the manifest from the designated facility. All completed copies not returned by the facility within 35 days, or not returned by the foreign consignee within 60 days of the initial shipment, must be investigated and reported as provided in § 7-707.
 - (10) For each manifested shipment of hazardous waste, assure that a completed copy of each manifest is sent to the Secretary.
 - (11) For shipments of hazardous waste made to a designated facility in an EPA-authorized State which has not yet obtained authorization to regulate that particular waste as hazardous, assure that the designated facility agrees to sign and return the manifest to the generator, and that any out-of-state transporter signs and forwards the manifest to the designated facility.
 - (12) For rejected shipments of hazardous waste or container residues contained in non-empty containers that are returned to the generator by the designated facility (following the procedures of **40 CFR §§ 264.72(f) or 265.72(f)**), the generator must:
 - (A) Sign either:
 - (i) Item 20 of the new manifest if a new manifest is used for the returned shipment; or
 - (ii) Item 18c of the original manifest if the original manifest is used for the returned shipment;
 - (B) Provide the transporter a copy of the manifest;
 - (C) Within 30 days of delivery of the rejected shipment or container residues contained in non-empty containers, send a copy of the manifest to the designated facility that returned the shipment to the generator; and
 - (D) Retain at the generator's site a copy of each manifest for at least three years from the date of delivery.
- (c) The requirements of this section do not apply to:
- (1) Hazardous waste produced by small quantity generators of greater than 220 pounds (100 kilograms) but less than 2,200 pounds (1,000 kilograms) in a calendar month where:
 - (A) The waste is reclaimed under a contractual agreement pursuant to which:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (i) The type of waste and frequency of shipments are specified in the agreement; and
 - (ii) The vehicle used to transport the waste to the recycling facility and to deliver regenerated material back to the generator is owned and operated by the reclaimer of the waste; and
- (B) The generator maintains a copy of the reclamation agreement in his or her files for a period of at least three (3) years after termination or expiration of the agreement; and
- (2) The transport of hazardous waste on a public or private right-of-way within or along the border of contiguous property under the control of the same person, even if such contiguous property is divided by a public or private right-of-way. Nevertheless, the generator or transporter must comply with the requirements for transporters set forth in **§ 7-105(a)** in the event of a discharge of hazardous waste or release of hazardous material on a public or private right-of-way.
- (3) Hazardous waste produced by conditionally exempt generators when such waste is:
 - (A) Offered to a certified solid waste management facility that is allowed to accept such waste under the terms of its certification; or the operator of a collection event authorized by the Secretary to accept conditionally exempt generator waste;
 - (B) Transported by a transporter that possesses a permit to transport hazardous waste in Vermont; and
 - (C) Delivered to a hazardous waste treatment, storage or disposal facility as allowed under **§ 7-306(c)(2)(A)**; or a solid waste management facility as allowed under **§ 7-306(c)(2)(B)**.

§ 7-703 MANIFEST REQUIREMENTS FOR TRANSPORTERS

- (a) Unless otherwise specified in these regulations, a transporter may only accept hazardous waste from a generator if the transporter is provided with a manifest signed in accordance with the requirements of **§ 7-702**.
- (b) Any transporter of a shipment of hazardous waste for which a manifest is required shall comply with the following:
 - (1) Prior to accepting the shipment, check for discrepancies between the manifest and the wastes being offered for shipment. A transporter shall not accept a shipment if discrepancies exist.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) Before transporting the shipment, ensure that the manifest has been signed and completed by the generator as required by **§ 7-702(b)**;
 - (3) Sign and date the manifest and return a signed copy of the manifest to the generator before leaving the site with the shipment;
 - (4) Ensure that the manifest accompanies the shipment at all times;
 - (5) Deliver the entire quantity of hazardous waste accepted for transport and the manifest to:
 - (A) The designated facility listed on the manifest; or
 - (B) The alternate designated facility, if the hazardous waste cannot be delivered to the designated facility because an emergency prevents delivery; or
 - (C) The next designated transporter; or
 - (D) The place outside the United States designated by the generator.
 - (6) If the hazardous waste cannot be delivered in accordance with **subsection (5) of this section** because of an emergency condition other than rejection of the waste by the designated facility, contact the generator for further directions and revise the manifest according to the generator's instructions.
 - (7) If hazardous waste is rejected by the designated facility while on the facility's premises, comply with the requirements of **40 CFR § 263.21(b)(2)**.
 - (8) Upon delivering the hazardous waste shipment to another transporter or to the designated facility:
 - (A) Obtain the date of delivery and the handwritten signature of the transporter or the owner or operator of the designated facility after such person has had an opportunity to inspect the shipment for discrepancies; and
 - (B) Retain one copy of the manifest in accordance with **§ 7-710** and give the remaining copies of the manifest to the accepting transporter or designated facility.
- (c) A transporter transporting hazardous waste from a small quantity generator who generates greater than 220 pounds (100 kilograms) but less than 2,200 pounds (1,000 kilograms) of hazardous waste in a calendar month need not comply with the requirements of **§ 7-703** when:
- (1) The waste is being transported pursuant to a reclamation agreement as provided in **§ 7-702(c)(1)**; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) The transporter records on a log or shipping paper, the following information for each shipment:
 - (A) The name, address and EPA identification number of the generator of the waste;
 - (B) The quantity of waste accepted;
 - (C) All DOT-required shipping information;
 - (D) The date the waste is accepted; and
 - (3) The records required under **subsection (2) of this section** accompany the waste shipment to the reclamation facility; and
 - (4) The transporter retains a copy of the reclamation agreement and the records required under **subsection (c)(2) of this section** for a period of at least three (3) years after termination or expiration of the agreement.
- (d) A water (bulk shipment) transporter need not comply with §§ **7-703(b)(4) and (6)** provided the transporter complies with **40 CFR § 263.20(e)**. Any person utilizing this exemption need not comply with §§ **7-710(b), (c) and (e)**.
- (e) For shipments involving rail transportation, the requirements of §§ **7-703(b)(4) and (6)** do not apply provided the shipment complies with **40 CFR § 263.20(f)**. Any person utilizing this exemption need not comply with §§ **7-710(b), (c) and (e)**.

§ 7-704 MANIFEST REQUIREMENTS FOR DESIGNATED FACILITIES

- (a) If a facility receives hazardous waste accompanied by a manifest, the owner, operator or his/her agent must sign and date the manifest as indicated in **subsection (b) of this section** to certify that the hazardous waste covered by the manifest was received, that the hazardous waste was received except as noted in the discrepancy space of the manifest, or that the hazardous waste was rejected as noted in the manifest discrepancy space.
- (b) An owner or operator of a designated facility who accepts a shipment of hazardous waste for which a manifest is required shall comply with the following:
 - (1) Perform an inspection upon receipt of each shipment of hazardous waste, comparing the description appearing on the manifest and the waste actually received, noting any significant discrepancies, as defined in **subsection (g) of this section** on the manifest in the space provided. Any significant discrepancies shall be noted on each copy of the manifest and immediately reported to the Secretary as provided by **subsection (g) of this section**;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) Sign and date, by hand, each copy of the manifest to certify that the hazardous waste covered by the manifest was received;
 - (3) Immediately give the transporter at least one copy of the manifest;
 - (4) Immediately send the appropriate completed copy of the manifest to:
 - (A) The Secretary if the waste was generated in Vermont; or
 - (B) The appropriate state authority if the waste was generated in a state other than Vermont and that state requires a completed copy of the manifest;
 - (5) Immediately send the appropriate completed copy of the manifest to the appropriate state or federal authority for the state where the facility is located;
 - (6) Within 30 days of delivery, send a copy of the manifest to the generator;
 - (7) Retain at the facility a copy of each manifest for at least three years from the date of delivery.
- (c) If a facility receives hazardous waste imported from a foreign source, the receiving facility must mail a copy of the manifest and documentation confirming EPA's consent to the import of hazardous waste to the following address within thirty (30) days of delivery: Office of Enforcement and Compliance Assurance, Office of Federal Activities, International Compliance Assurance Division (2254A), Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460.
- (d) If a facility receives, from a rail or water (bulk shipment) transporter, hazardous waste which is accompanied by a shipping paper containing all the information required on the manifest (excluding the EPA identification numbers, generator's certification, and signatures), the owner or operator, or his agent, shall comply with **40 CFR § 264.71(b)** or **40 CFR § 265.71(b)**, as applicable.
- (e) Within three working days of the receipt of a shipment subject to **40 CFR part 262, subpart H**, the owner or operator of the facility must provide a copy of the movement document bearing all required signatures to the exporter, to the Office of Enforcement and Compliance Assurance, Office of Federal Activities, International Compliance Assurance Division (2254A), Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, and to competent authorities of all other concerned countries. The original copy of the movement document must be maintained at the facility for at least three years from the date of signature.
- (f) A facility must determine whether the consignment state for a shipment regulates any additional wastes (beyond those regulated by Vermont) as hazardous wastes under its state hazardous waste program. Facilities must also determine whether the consignment state or generator state requires the facility to submit any copies of the manifest to these states.

(g) Manifest discrepancies

(1) Manifest discrepancies are:

- (A) Significant differences (as defined by **subsection (g)(2) of this section**) between the quantity or type of hazardous waste designated on the manifest or shipping paper, and the quantity and type of hazardous waste a facility actually receives;
- (B) Rejected wastes, which may be a full or partial shipment of hazardous waste that the designated facility cannot accept; or
- (C) Container residues, which are residues that exceed the quantity limits for “empty” containers set forth in **§ 7-203(j)**.

(2) Significant differences in quantity are: For bulk waste, variations greater than 10 percent in weight; for batch waste, any variation in piece count, such as a discrepancy of one drum in a truckload. Significant differences in type are obvious differences which can be discovered by inspection or waste analysis, such as waste solvent substituted for waste acid, or toxic constituents not reported on the manifest or shipping paper.

(3) Upon discovering a significant difference in quantity or type, the facility owner or operator must attempt to reconcile the discrepancy with the waste generator or transporter (e.g., with telephone conversations). If the discrepancy is not resolved within 15 days after receiving the waste, the owner or operator must immediately submit to the Secretary a letter describing the discrepancy and attempts to reconcile it, and a copy of the manifest or shipping paper at issue.

(4) For any rejected wastes, or container residues described in **subsection (g)(1)(C) of this section**, the facility shall comply with the applicable requirements of **40 CFR §§ 264.72(d) through (g)** and **40 CFR §§ 265.72(d) through (g)**.

(h) If a facility accepts for treatment, storage, or disposal any hazardous waste from an off-site source without an accompanying manifest, or without an accompanying shipping paper as described by **40 CFR §263.20(e)** for water (bulk shipment) transporters, and if the waste is not excluded from the manifest requirement, then the owner or operator must prepare and submit a letter to the Secretary within 15 days after receiving the waste. The unmanifested waste report must contain the following information:

- (1) The EPA identification number, name and address of the facility;
- (2) The date the facility received the waste;
- (3) The EPA identification number, name and address of the generator and the transporter, if available;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (4) A description and the quantity of each unmanifested hazardous waste the facility received;
- (5) The method of treatment, storage, or disposal for each hazardous waste;
- (6) The certification signed by the owner or operator of the facility or his authorized representative; and,
- (7) A brief explanation of why the waste was unmanifested, if known.

§ 7-705 EXPORTS OF HAZARDOUS WASTE

(a) The export of any waste defined as hazardous in **40 CFR Part 261** is prohibited unless:

- (1) The primary exporter submits a notification in accordance with this section;
- (2) The receiving country has consented to accept the hazardous waste;
- (3) A copy of the “**EPA Acknowledgment of Consent**” (defined in **§ 7-103** of these regulations) accompanies the shipment in accordance with this section; and
- (4) The hazardous waste shipment conforms to the terms of the receiving country's written consent as reflected in the EPA Acknowledgement of Consent.

(b) Primary exporters

Each primary exporter of a waste, which is defined as hazardous in **40 CFR Part 261**, shall comply with the following requirements:

- (1) A primary exporter of hazardous waste shall notify EPA of an intended export before such waste is scheduled to leave the United States. A complete notification shall be submitted sixty (60) days before the initial shipment is intended to be shipped off-site. This notification may cover export activities extending over a twelve (12) month or lesser period. The notification must be in writing, signed by the primary exporter and include the following information:
 - (A) Name, mailing address, telephone number and EPA identification number of the primary exporter;
 - (B) By consignee, for each hazardous waste type:
 - (i) A description of the hazardous waste and the EPA hazardous waste code, U.S. DOT proper shipping name, hazard class and identification number (UN/NA) for each hazardous waste as identified in **49 CFR Parts 171 through 177**;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (ii) The estimated frequency or rate at which such waste is to be exported and the period of time over which such waste is to be exported;
 - (iii) The estimated total quantity of the hazardous waste in units as specified in the instructions to the uniform hazardous waste manifest;
 - (iv) All points of entry to and departure from each foreign country through which the hazardous waste will pass;
 - (v) A description of the means by which each shipment of the hazardous waste will be transported (e.g., mode of transportation vehicle, type(s) of container);
 - (vi) A description of the manner in which the hazardous waste will be treated, stored or disposed of in the receiving country;
 - (vii) The name and site address of the consignee and any alternate consignee; and
 - (viii) The name of any transit countries through which the hazardous waste will be sent and a description of the approximate length of time the hazardous waste will remain in such country and the nature of its handling while there.
- (2) Notifications submitted by mail should be sent to the following mailing address: Office of Enforcement and Compliance Assurance, Office of Federal Activities, International Compliance Assurance Division (2254A), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. Hand-delivered notifications should be sent to: Office of Enforcement and Compliance Assurance, Office of Federal Activities, International Compliance Assurance Division, Environmental Protection Agency, Ariel Rios Bldg., Room 6144, 12th St. and Pennsylvania Ave., NW., Washington, DC 20004. In both cases, the following shall be prominently displayed on the front of the envelope: "Attention: Notification of Intent to Export."
- (3) Except for changes to the telephone number in **subsection (b)(1)(A) of this section**, changes to **subsection (b)(1)(B)(v) of this section**, and decreases in the quantity indicated pursuant to **subsection (b)(1)(B)(iii) of this section**, when the conditions are specified on the original notification change (including any exceedance of the estimate of the quantity of hazardous waste specified in the original notification), the primary exporter must provide EPA with a written renotification of the change. The shipment cannot take place until consent of the receiving country to the changes (except for changes to **subsection (b)(1)(B)(viii) of this section** and in the ports of entry to and departure from transit countries pursuant to **subsection (b)(1)(B)(iv) of this section**) has been obtained and the primary exporter receives an EPA

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Acknowledgement of Consent reflecting the receiving country's consent to the changes.

- (4) Upon request by EPA, a primary exporter shall furnish to EPA any additional information that a receiving country requests in order to respond to a notification.
- (5) In conjunction with the Department of State, EPA will provide a complete notification to the receiving country and any transit countries. A notification is complete when EPA receives a notification that EPA determines satisfies the requirements of **subsection (b)(1) of this section**. Where a claim of confidentiality is asserted with respect to any notification information required by **subsection (b)(1) of this section**, EPA may find the notification not complete until any such claim is resolved in accordance with **40 CFR § 260.2**.
- (6) Where the receiving country consents to the receipt of the hazardous waste, EPA will forward an EPA Acknowledgement of Consent to the primary exporter for purposes of **subsection (b)(7)(H) of this section**. Where the receiving country objects to receipt of the hazardous waste or withdraws a prior consent, EPA will notify the primary exporter in writing. EPA will also notify the primary exporter of any responses from transit countries.
- (7) The manifest requirements of **§ 7-702** must be complied with except that:
 - (A) In lieu of the name, site address and EPA identification number of the designated permitted facility, the primary exporter must enter the name and site address of the consignee;
 - (B) In lieu of the name, site address, and EPA identification number of a permitted alternate facility, the primary exporter may enter the name and site address of any alternate consignee;
 - (C) In the International Shipments block of the manifest, the primary exporter must check the export box and enter the point of exit (city and State) from the United States;
 - (D) The following statement must be added to the end of the first sentence of the certification set forth in item 16 of the uniform hazardous waste manifest form: "and conforms to the terms of the attached EPA Acknowledgement of Consent;"
 - (E) The primary exporter may obtain the manifest from any source that is registered with the U.S. EPA as a supplier of manifests (e.g., states, waste handlers, and/or commercial forms printers);
 - (F) The primary exporter must require the consignee to confirm in writing the delivery of the hazardous waste to that facility and to describe any significant discrepancies (as defined in **40 CFR § 264.72(a)** and **40 CFR § 265.72(a)**),

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

between the manifest and the shipment. A copy of the manifest signed by such facility may be used to confirm delivery of the hazardous waste.

- (G) In lieu of the requirements of § 7-702(b)(8), where a shipment cannot be delivered for any reason to the designated or alternate consignee, the primary exporter must:
 - (i) Renotify EPA of a change in the conditions of the original notification to allow shipment to a new consignee in accordance with § 7-705(b)(3) and obtain an EPA Acknowledgement of Consent prior to delivery; or
 - (ii) Instruct the transporter to return the waste to the primary exporter in the United States or designate another facility within the United States; and
 - (iii) Instruct the transporter to revise the manifest in accordance with the primary exporter's instructions.
- (H) The primary exporter must attach a copy of the EPA Acknowledgement of Consent to the shipment to the manifest that must accompany the hazardous waste shipment. The primary exporter must assure that the hazardous waste shipment conforms to the terms of the receiving country's written consent as reflected in the EPA Acknowledgement of Consent. For exports by rail or water (bulk shipment), the primary exporter must provide the transporter with an EPA Acknowledgement of Consent which must accompany the hazardous waste but which need not be attached to the manifest except that for exports by water (bulk shipment) the primary exporter must attach the copy of the EPA Acknowledgement of Consent to the shipping paper.
- (I) The primary exporter shall provide the transporter with an additional copy of the manifest for delivery to the U.S. Customs official at the point the hazardous waste leaves the United States in accordance with § 7-705(c)(3)(D).

(c) Transporters

In addition to the requirements of § 7-703, a transporter transporting hazardous waste for export shall:

- (1) For shipments other than those subject to **Subpart H of 40 CFR Part 262**, not accept such waste from a primary exporter or other person if the transporter knows the shipment does not conform to the EPA Acknowledgement of Consent; and unless, in addition to a manifest signed by the generator as provided in this section, the transporter shall also be provided with an EPA Acknowledgment of Consent which, except for shipments by rail, is attached to the manifest (or shipping paper for exports by water (bulk shipment)). For exports of hazardous waste subject to the requirements of **Subpart H of 40 CFR Part 262**, a transporter may not accept hazardous waste

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

without a tracking document that includes all information required by **40 CFR § 262.84**.

- (2) Ensure that a copy of the EPA Acknowledgement of Consent accompanies the hazardous waste.
- (3) Do the following if transporting the hazardous waste out of the country:
 - (A) Indicate in the International Shipments block of the manifest the date that the shipment left the United States;
 - (B) Sign the manifest and retain one copy in accordance with **§ 7-710(c)**;
 - (C) Return a signed copy of the manifest to the generator; and
 - (D) Give a copy of the manifest to a U.S. Customs official at the point of departure from the United States.
- (d) International agreements
 - (1) Any person who exports hazardous waste subject to the manifest requirements of this subchapter, or universal waste subject to the management standards of **subchapter 9**, to designated member countries of the Organization for Economic Cooperation and Development (OECD) as defined in **40 CFR §§ 262.58(a)(1) and (2)** for purposes of recovery is subject to the requirements of **40 CFR Part 262 Subpart H** (Transfrontier Shipments of Hazardous Waste for Recovery within the OECD). The export requirements of this section do not apply.
 - (2) Any person who exports hazardous waste to: a designated OECD member country for purposes other than recovery (e.g., incineration, disposal), Mexico (for any purpose), or Canada (for any purpose) remains subject to the export requirements of this section.

§ 7-706 IMPORTS OF HAZARDOUS WASTE

- (a) Any person who imports hazardous waste from a foreign country into Vermont is a generator and must comply with the generator requirements of **subchapter 3** and the special requirements of this section.
- (b) When importing hazardous waste a person must meet all the requirements of **§ 7-702(b)(1)** for the manifest except that:
 - (1) In place of the generator's name, address and EPA identification number, the name and address of the foreign generator and the importer's name, address and EPA identification number must be used.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) In place of the generator's signature on the certification statement, the U.S. importer or his or her agent must sign and date the certification and obtain the signature of the initial transporter.
 - (3) A person who imports hazardous waste may obtain the manifest form from any source that is registered with the U.S. EPA as a supplier of manifests (e.g., states, waste handlers, and/or commercial forms printers).
 - (4) In the International Shipments block, the importer must check the import box and enter the point of entry (city and State) into the United States.
 - (5) The importer must provide the transporter with an additional copy of the manifest to be submitted by the receiving facility to U.S. EPA in accordance with **§7-704(c)**.
- (c) International agreements
- (1) Any person who imports hazardous waste subject to the manifest requirements of this subchapter, or universal waste subject to the management standards of **subchapter 9**, from designated member countries of the Organization for Economic Cooperation and Development (OECD) as defined in **40 CFR §§ 262.58(a)(1) and (2)** for purposes of recovery is subject to the requirements of **40 CFR Part 262 Subpart H** (Transfrontier Shipments of Hazardous Waste for Recovery within the OECD). The import requirements of this section do not apply.
 - (2) Any person who imports hazardous waste from: a designated OECD member country for purposes other than recovery (e.g., incineration, disposal), Mexico (for any purpose), or Canada (for any purpose) remains subject to the import requirements of this section.

§ 7-707 EXCEPTION REPORTING

- (a) Each generator who does not receive a completed copy of the manifest
 - (1) from the designated facility within 35 days, or
 - (2) from the foreign consignee within 60 days,of the initial shipment must take all actions necessary to locate the shipment and manifest, including contacting the designated transporter and designated facility.
- (b) Each generator who does not receive a completed copy of the manifest from the designated facility within 45 days of the initial shipment must immediately submit an exception report to the Secretary. The report must include a legible copy of the manifest and a cover letter signed by the generator or his or her authorized representative explaining the efforts taken to locate the waste and results of those efforts.

- (c) A primary exporter must immediately file an exception report with the Secretary and the EPA Administrator at the addresses listed under § 7-705(b)(2) if:
- (1) He or she has not received a copy of the manifest signed by the transporter stating the date and place of departure from the United States within forty-five (45) days from the date it was accepted by the initial transporter;
 - (2) Within ninety (90) days from the date the waste was accepted by the initial transporter, the primary exporter has not received written confirmation from the consignee that the hazardous waste was received;
 - (3) The waste is returned to the United States.
- (d) For rejected shipments of hazardous waste or container residues contained in non-empty containers that are forwarded to an alternate facility by a designated facility using a new manifest (following the procedures of **40 CFR §§ 264.72(e)(1) through (6) or 40 CFR §§ 265.72(e)(1) through (6)**), the generator must comply with the requirements of paragraph (a) or (b) of this section, as applicable, for the shipment forwarding the material from the designated facility to the alternate facility instead of for the shipment from the generator to the designated facility. For purposes of **subsections (a) or (b) of this section** for a shipment forwarding such waste to an alternate facility by a designated facility:
- (1) The copy of the manifest received by the generator must have the handwritten signature of the owner or operator of the alternate facility in place of the signature of the owner or operator of the designated facility, and
 - (2) The 35/45/60-day timeframes begin the date the waste was accepted by the initial transporter forwarding the hazardous waste shipment from the designated facility to the alternate facility.

§ 7-708 ANNUAL & BIENNIAL REPORTS

- (a) Every large quantity generator shall submit a biennial report, on **USEPA Form 8700-13A** provided by the Secretary. The report shall be submitted on or before March 1 of each even numbered year and shall describe all hazardous waste activity in the previous calendar year. The report shall accurately describe the composition, quantity, and destination of each hazardous waste stream generated and shall include a compilation of the data contained in all manifests prepared in such year.
- (b) Every designated facility shall submit a biennial report on **USEPA Form 8700-13B** provided by the Secretary. The report shall be submitted on or before March 1 of each even numbered year and shall describe all hazardous waste activity in the previous calendar year. The report shall accurately describe the composition, quantity, and management of each hazardous waste stream treated, stored, recycled, or disposed of, and shall include a compilation of the data contained in all manifests prepared in such year.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (c) Exports of hazardous waste shall be reported by the primary exporter to EPA annually in accordance with **40 CFR § 262.56**.
- (d) A transporter of either hazardous waste or used oil shall report annually to the Secretary as required in **§ 7-406(d)(5)**.
- (e) All generators of hazardous waste shall register with the Secretary, renew the registration annually, and pay the hazardous waste generator registration fee specified in **3 V.S.A. § 2822**. Initial registration shall be made by submitting a completed **Vermont Hazardous Waste Handler Site ID Form** (see **§ 7-104(a)**). Subsequent updates may be made by completing the form provided annually by the Secretary.

§ 7-709 ADDITIONAL REPORTING

The Secretary may require any generator, transporter or facility to submit such additional information as he or she deems necessary to implement and manage a hazardous waste program under these regulations.

§ 7-710 RECORDKEEPING

- (a) All generators shall keep the following records for the specified time periods:
 - (1) A copy of each biennial report and manifest exception report for at least three (3) years from the due date of the report; and
 - (2) A copy of any test result, waste analysis or other determination made under **§ 7-303** for at least three (3) years from the date the waste was last sent to an on-site or off-site treatment, storage or disposal facility.
- (b) All generators and transporters shall keep a copy of each manifest signed by the generator, transporter and designated facility for at least three (3) years from the date that the waste involved was accepted by the transporter except for:
 - (1) Water (bulk shipment) transporters who shall comply with **40 CFR § 263.22(b)**;
 - (2) Rail transporters who shall comply with **40 CFR § 263.22(c)**; and
 - (3) Initial transporters that deliver waste to a next designated transporter that shall retain a copy of the manifest which has been signed by the generator and next designated transporter.
- (c) A transporter who transports hazardous waste out of the United States must keep a copy of the manifest, indicating that the hazardous waste left the United States, for a period of three (3) years from the date the hazardous waste was accepted by the initial transporter.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (d) For all exports a primary exporter must:
- (1) Keep a copy of each notification of intent to export for a period of at least three (3) years from the date the hazardous waste was accepted by the initial transporter;
 - (2) Keep a copy of each EPA Acknowledgement of Consent for a period of at least three (3) years from the date the hazardous waste was accepted by the initial transporter;
 - (3) Keep a copy of each confirmation of delivery of the hazardous waste from the consignee for at least three (3) years from the date the hazardous waste was accepted by the initial transporter; and
 - (4) Keep a copy of each annual report for a period of at least three years from the due date of the report.
- (e) All record retention periods specified in this section shall be automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as requested by the Secretary, or as requested by the EPA Administrator in the case of records required for hazardous waste exports.

Subchapter 8: USED OIL MANAGEMENT STANDARDS

§ 7-801 PURPOSE AND APPLICABILITY

This subchapter provides an alternative to managing used oil as hazardous waste; it identifies those materials that may (and those that may not) be managed as used oil, and establishes standards for their handling, storage, transport, aggregation, collection, and burning as fuel. This subchapter presumes that used oil is reused, processed or burned for energy recovery. Since used oil that meets fuel burning specifications has value without prior processing; this subchapter distinguishes used oil fuel from used oil by allowing used oil fuel to be managed according to abbreviated standards. Used oil that is to be disposed of cannot be managed under this subchapter and must be evaluated to determine if it is subject to regulation as hazardous waste. Unless being managed as a hazardous waste, all used oil is subject to regulation under this subchapter.

The following rules incorporate provisions and exemptions from other environmental protection rules promulgated under the authority of 10 V.S.A. chapters 59 and 159.

§ 7-802 DEFINITIONS

Terms defined in § 7-103 of these regulations or in **40 CFR Parts 260 through 270 and Part 279** have the same meaning when used in this subchapter. For the purposes of this subchapter, the terms listed below are defined as follows:

“Burner” means a person who burns used oil fuel for energy recovery.

"Do-it-yourselfer used oil" means used oil that is derived from households, such as used oil generated by individuals through the maintenance of their personal vehicles.

"Do-it-yourselfer used oil generator" or **"do-it-yourselfer"** means an individual who generates "do-it-yourselfer used oil".

"Marketer" means any person, with the exception of do-it-yourselfers, who conducts either of the following activities:

- (a) Directs a shipment of off-specification used oil from their facility to a used oil burner; or
- (b) With the exception of used oil generators, and transporters who transport used oil received only from generators, any person who first claims that used oil that is to be burned for energy recovery meets the used oil fuel specifications set forth in **Table 1 of § 7-812(c)**.

"Off-specification used oil" is used oil that exceeds any maximum allowable level or that does not meet any minimum allowable level listed in **Table 1 of § 7-812(c)**.

"Processing" means chemical or physical operations designed to produce from used oil, or to make used oil more amenable for production of, fuel oils, lubricants, or other used oil-derived product. Processing includes, but is not limited to: blending used oil with virgin petroleum products, blending used oils to meet the used oil fuel specification, filtration, simple distillation, chemical or physical separation and re-refining.

"Small fuel burning equipment" means fuel burning equipment with a maximum operating heat input equal to or less than 500,000 BTU per hour.

Note: For provisions in this subchapter related to "small fuel burning equipment," the maximum operating heat input of all fuel burning equipment designated for burning used oil at a single location may not combine to more than 500,000 BTU per hour. If this threshold is exceeded, the "small fuel burning equipment" provisions of this subchapter no longer apply, and the fuel burning equipment is subject to the Vermont Air Pollution Control Regulations which include a requirement to demonstrate a minimum combustion efficiency of 99%.

"Specification used oil" is any used oil that does not exceed any maximum allowable level, and meets the minimum allowable levels listed in **Table 1 of § 7-812(c)**.

"Used Oil" means any petroleum product that has been refined from crude oil (in whole or in part), or any synthetic oil that has been used and as a result of such use is contaminated by physical or chemical impurities. Used oil is a free-flowing liquid at standard temperature and pressure and has a flash point of greater than 100 degrees (F). Used oil includes oils used as lubricants, heat transfer fluids, hydraulic fluids, and for other similar uses, but does not include materials derived from crude or synthetic oils that are fuels (e.g., gasoline, jet fuel and diesel fuel), cleaning agents or solvents (e.g., naphtha or mineral spirits). These materials are subject to regulation under **subchapters 1 through 7**, as applicable.

"Used Oil Aggregation Point" means any site or facility that accepts, aggregates, and/or stores used oil collected only from other used oil generation sites owned or operated by the owner or operator of the aggregation point, from which used oil is transported to the aggregation point in shipments of no more than 55 gallons. Used oil aggregation points may also accept do-it-yourselfer generated used oil.

"Used Oil Collection Facility" means any facility or site that accepts/aggregates and stores used oil collected from used oil generators who bring used oil to the collection facility in shipments of no more than 55 gallons. Used oil collection facilities may also accept used oil from do-it-yourselfers.

"Used Oil Fuel" means used oil shown to meet the **Table 1** specifications in accordance with **§ 7-812(c)** and that is burned for energy recovery.

"Used Oil Generator" means any person, by site, whose act or process produces used oil that is not "do-it-yourselfer used oil" or whose act first causes used oil to become subject to regulation.

"Used Oil Handler" means any person subject to **§§ 7-807 through 7-813** of this subchapter.

"**Used Oil Processor**" means a facility that processes used oil.

"**Used Oil Transfer Facility**" means any transportation related facility including loading docks, parking areas, storage areas and other areas where shipments of used oil are held for more than 24 hours and not longer than 35 days during the normal course of transportation. Transfer facilities that store used oil for more than 35 days are subject to the used oil processor requirements of § 7-813.

"**Used Oil Transporter**" means any person who transports used oil, any person who collects used oil from more than one generator and transports the collected oil, and owners and operators of used oil transfer facilities.

"**Vaporizing Used-Oil Burning Equipment**" means any equipment which generates heat by the introduction of fuel onto a heated device to produce vapors which are then burned for heat recovery.

§ 7-803 PROHIBITIONS

The following uses or activities are prohibited:

- (a) The mixing of hazardous wastes with used oil, with the exception that used oil may be mixed with waste that is hazardous solely because it exhibits the characteristic of ignitability (e.g., ignitable-only mineral spirits), provided that the resultant mixture does not exhibit the characteristic of ignitability;
- (b) The use of any used oil for road oiling or dust suppression;
- (c) Burning off-specification used oil in small fuel burning equipment;
- (d) Burning used oil for firefighter training;
- (e) Burning used oil for energy recovery in any food product processing unless approved by the Secretary in writing;
- (f) The sale or use of vaporizing used-oil burning equipment;
- (g) Management of used oil in anything other than containers or tanks as specified under § 7-806 unless the units are subject to regulation under **subchapter 5** of these regulations;
- (h) Pursuant to **10 V.S.A. § 6621a**, the knowing disposal of used oil in a solid waste landfill; and
- (i) Pursuant to **10 V.S.A. § 6616**, the release of hazardous material (including used oil) into the surface or groundwater, or onto the land of the state.

§ 7-804 EXEMPTIONS

- (a) Do-it-yourselfers who produce used oil (specification or off-specification) are exempt from the provisions of this subchapter. Once do-it-yourselfer used oil is accepted by a used oil aggregation point, collection facility, marketer, burner, or processor, the used oil is subject to regulation under this subchapter.
- (b) Small fuel burning equipment, in use prior to January 1, 1994, is exempt from **§ 5-261 of the Air Pollution Control Regulations**.
- (c) Used oil generated from normal shipboard operations, aboard vessels at sea, lake, or river or at port, is considered to be generated at the time it is transported ashore and is not subject to the requirements of this subchapter until the time it is transported ashore. The owner or operator of the vessel and the person(s) removing or accepting used oil from the vessel are co-generators of the used oil and are both responsible for managing the oil in compliance with the requirements of this subchapter once the used oil is transported ashore. The co-generators may decide among them which party will fulfill the requirements of this subchapter.
- (d) Farmers who, in a calendar year, generate an average of 25 gallons per month or less of used oil from vehicles or machinery used on the farm are not subject to the requirements of this subchapter.
- (e) Used oil re-refining distillation bottoms that are used as feedstock to manufacture asphalt products are not subject to the requirements of this subchapter.
- (f) Wastewater, the discharge of which is subject to regulation under either **§ 402 or § 307(b) of the Clean Water Act** (including wastewaters at facilities which have eliminated the discharge of wastewater), contaminated with de minimis quantities of used oil is not subject to the requirements of this subchapter. For purposes of this paragraph, "de minimis" quantities of used oils are defined as small spills, leaks, or drippings from pumps, machinery, pipes, and other similar equipment, during normal operations, or small amounts of oil lost to the wastewater treatment system during washing or draining operations. This exception will not apply if the used oil is discarded as a result of abnormal manufacturing operations resulting in substantial leaks, spills, or other releases, and will not apply to used oil recovered from wastewaters.
- (g) Used oil that is to be burned for energy recovery (i.e., "used oil fuel") in small fuel burning equipment provided:
 - (1) The requirements of **§ 7-812(a)** are met, and the used oil has been shown to meet the **Table 1** specifications in accordance with **§§ 7-812(c)(1) through (3)**;
 - (2) The person making that showing complies with any applicable marketer requirements of **§ 7-809**; and

- (3) The used oil is managed in accordance with the general used oil management standards of § 7-806.

§ 7-805 USED OIL DETERMINATION

This section identifies those materials that may be managed as used oil or used oil fuel under this subchapter. It also identifies certain materials that cannot be managed as used oil and indicates whether they may be subject to regulation as hazardous waste.

- (a) Used oil drained, separated, or removed from materials containing or otherwise contaminated with used oil may be managed as used oil under this subchapter.
- (b) Materials containing or otherwise contaminated with used oil from which the used oil has been properly drained or removed to the extent possible such that no visible signs of free-flowing oil remain in or on the material are not used oil, and are subject to the hazardous waste determination requirement of § 7-303.

Note: These materials may be subject to regulation as hazardous waste if the criteria for the VT02 hazardous waste code listed under § 7-211 are met and/or they exhibit a hazardous characteristic.

- (c) Mixtures of used oil and fuels or other fuel products are subject to regulation as used oil under this subchapter.
- (d) Used oil that contains PCBs at any concentration less than 50 parts per million may be managed as used oil under this subchapter unless, because of dilution, it is regulated under **40 CFR Part 761** as a used oil containing PCBs at 50 parts per million or greater. Used oil containing PCBs at concentrations equal to or greater than 50 parts per million is subject to regulation both as hazardous waste under § 7-211/VT01 (unless it is exempt pursuant to § 7-203(t)), and under **40 CFR Part 761**. No person may avoid these provisions by diluting used oil containing PCBs, unless otherwise specifically provided for in this subchapter or **40 CFR Part 761**. PCB-containing used oil subject to the requirements of this subchapter may also be subject to the prohibitions and requirements found at **40 CFR Part 761, including 40 CFR §§ 761.20(d) and (e)**.
- (e) Materials derived from used oil.
- (1) Materials that are reclaimed from used oil that are used beneficially and are not burned for energy recovery or used in a manner constituting disposal (e.g., re-refined lubricants) are:
- (A) Not used oil and thus are not subject to this subchapter, and
- (B) Not hazardous wastes and thus are not subject to the remainder of these regulations.

- (2) Materials produced from used oil that are burned for energy recovery (e.g., used oil fuels) are subject to regulation as used oil under this subchapter.
- (3) Except as provided in § 7-804(e), materials derived from used oil that are disposed of or used in a manner constituting disposal are not used oil, and are subject to the hazardous waste determination requirement of § 7-303 and to management as a hazardous waste when applicable.

(f) Rebuttable presumption

Used oil containing more than 1,000 parts per million total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in §§ 7-210 through 7-215 of these regulations. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste (for example, showing that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in Appendix II of these regulations). The rebuttable presumption does not apply to:

- (1) Metalworking oils/fluids containing chlorinated paraffins, if they are processed, through a tolling arrangement as described in § 7-807(e), to reclaim metalworking oils/fluids. The presumption does apply to metalworking oils/fluids if such oils/fluids are recycled in any other manner, or disposed.
- (2) Used oils contaminated with chlorofluorocarbons (CFCs) removed from refrigeration units where the CFCs are destined for reclamation. The rebuttable presumption does apply to used oils contaminated with CFCs that have been mixed with used oil from sources other than refrigeration units.

§ 7-806 GENERAL USED OIL MANAGEMENT STANDARDS

With the exception of do-it-yourselfers, the following requirements and standards apply to all used oil handlers:

- (a) Used oil shall be stored only in containers or tanks as specified by **subsections (b) through (d) of this section**.
- (b) Containers holding used oil shall be managed as follows:
 - (1) Containers shall be kept closed at all times, except when adding or removing used oil;
 - (2) A container holding used oil must not be opened, handled or stored in a manner which may rupture the container or cause a release. If a container begins to leak, the used oil must immediately be transferred from the leaking container to a container that is in good condition, or the used oil shall be managed in some other way that complies with the requirements of this section;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) A container holding used oil must be made of or lined with materials which will not react with and are otherwise compatible with used oil;
 - (4) Containers holding used oil must be in good condition (no severe rusting, apparent structural defects or deterioration);
 - (5) Containers holding used oil must be labeled or marked with the words "Used Oil" or "Used Oil Fuel," as appropriate, such that the label or marking is visible;
 - (6) Containers holding used oil must be stored on an impervious surface;
 - (7) A container holding used oil may be stored out-of-doors only if the container is placed within a structure that sheds rain and snow; and
 - (8) A container holding a mixture of used oil and water shall be placed within a structure that protects the container from freezing.
- (c) Underground storage tanks (USTs) holding used oil shall be managed as follows:
- (1) An UST holding used oil must be permitted, operated, and maintained in accordance with the Vermont Underground Storage Tank Regulations;
 - (2) Fill pipes used to transfer used oil into an UST must be marked or labeled to clearly indicate used oil storage; and
 - (3) Any residue removed from within an UST system being used (or that was last used) to hold used oil, that is generated as a result of normal operation, maintenance or closure of the UST and that cannot be managed as used oil under this subchapter, must be evaluated to determine if it is a hazardous waste and managed as a hazardous waste when applicable.
- (d) Above-ground storage tanks (including unregistered tank trailers) holding used oil shall be:
- (1) Installed and operated in accordance with Vermont Department of Labor Standards.
 - (2) Clearly marked with the words "Used Oil" or "Used Oil Fuel," as appropriate.
 - (3) Managed in such a manner as to prevent rupture of the tank and to ensure that no release occurs. If a tank begins to leak, the owner or operator must immediately either transfer the used oil from that tank to another tank or to containers that are in good condition, or manage the used oil in some other way that complies with the requirements of this section.
 - (4) If located out-of-doors, equipped with secondary containment as specified in **40 CFR §§ 279.45(e) and (f)**.

(e) Response to a Release of Used Oil

- (1) Upon detection of a release of used oil to the environment that is not subject to the requirements of **40 CFR Part 280 Subpart F** (Release Response and Corrective Action for UST Systems Containing Petroleum or Hazardous Substances), a used oil handler must perform the following cleanup steps:
 - (A) Stop the release;
 - (B) Contain the released used oil;
 - (C) Clean up and manage properly the released used oil and other materials so that they no longer present a hazard to human health or the environment; and
 - (D) If necessary, repair or replace any leaking used oil storage containers or tanks prior to returning them to service.

Note: Clean-up materials may be subject to regulation as hazardous waste if the criteria for the VT02 hazardous waste code listed under § 7-211 are met and/or they exhibit a hazardous characteristic.

- (2) A release of two (2) gallons or more of used oil to the lands or surface waters of the state shall be immediately reported to the Secretary by the person or persons exercising control of such oil by calling the Waste Management & Prevention Division at (802) 828-1138, Monday through Friday, 7:45 a.m. to 4:30 p.m. or the Department of Public Safety, Emergency Management Division at (800) 641-5005, 24 hours/day.
- (3) A written report shall be submitted to the Secretary within ten (10) days following any release subject to **subsection (e)(2) of this section**. The report should be sent to: The Vermont Department of Environmental Conservation, Waste Management & Prevention Division, 1 National Life Drive – Davis 1, Montpelier, VT 05620-3704.

Note: Under the Federal Water Pollution Control Act, certain discharges of “oil” are prohibited and must be reported pursuant to the requirements of **40 CFR Part 110 / Discharge of Oil**.

- (f) Used oil handlers are subject to all applicable Spill Prevention, Control and Countermeasure requirements of **40 CFR Part 112**.

(g) Disposal of Used Oil

The following requirements apply to used oils that cannot be processed or burned for energy recovery and therefore must be disposed of:

- (1) Used oils that cannot be recycled under this subchapter must be evaluated in accordance with the hazardous waste determination requirement of § 7-303 and managed as a hazardous waste when applicable.
- (2) Used oils that cannot be processed or burned for energy recovery under this subchapter and that are not hazardous wastes must be disposed in accordance with Vermont's Solid Waste Management Regulations.

Note: “Waste oil” is banned from landfill disposal under **10 V.S.A. § 6621a**. For the purposes of this note, “waste oil” means “used oil” (i.e., used oil is banned from landfill disposal).

§ 7-807 STANDARDS FOR USED OIL GENERATORS

- (a) This section applies to all used oil generators as defined under § 7-802 of this subchapter.
- (b) Used oil generators shall comply with the general standards set forth under § 7-806, and the following, as applicable:
 - (1) The marketer standards set forth under § 7-809; and
 - (2) The standards for burning used oil for energy recovery set forth under § 7-812.
- (c) Except as provided in **subsections (d) and (e) of this section**, used oil generators must ensure that their used oil is transported only by transporters who are permitted according to the requirements of § 7-811(b)(2).
- (d) A used oil generator may transport used oil that is either generated at the used oil generator's site or collected from household do-it-yourselfers to a used oil collection facility or an aggregation point without complying with the transporter requirements of § 7-811, provided that:
 - (1) The used oil is transported in a vehicle owned by the used oil generator or a vehicle owned by an employee of the used oil generator;
 - (2) Containers used to transport used oil must meet the standards set forth under § 7-806(b), and the applicable Department of Transportation regulations of **49 CFR Parts 173, and 178**;
 - (3) No more than 55 gallons of used oil is transported at any time; and
 - (4) The used oil is transported to either a used oil collection facility or to an aggregation point as defined under § 7-802.

(e) Tolling arrangements

A used oil generator may arrange for used oil to be transported by a transporter without an EPA identification number if the used oil is reclaimed under a contractual agreement pursuant to which reclaimed oil is returned by the processor to the generator for use as a lubricant, cutting oil, or coolant. The contract (known as a "tolling arrangement") must indicate:

- (1) The type of used oil and the frequency of shipments;
- (2) That the vehicle used to transport the used oil to the processing/re-refining facility and to deliver recycled used oil back to the generator is owned and operated by the used oil processor/re-refiner; and
- (3) That reclaimed oil will be returned to the generator.

(f) Used oil generators who transport more than 55 gallons of used oil at one time must comply with the transporter requirements of **§ 7-811**.

(g) Except as provided in **subsections (g)(1)(A) through (E) of this section**, used oil generators who process used oil shall comply with the requirements of **§ 7-813**.

(1) Used oil generators who perform the following activities are not processors provided that the used oil is generated on-site and is not being sent off-site to a burner of on- or off-specification used oil fuel:

- (A) Filtering, cleaning, or otherwise reconditioning used oil before returning it for reuse by the used oil generator;
- (B) Separating used oil from wastewater generated on-site, to make the wastewater acceptable for discharge or reuse pursuant to **§ 402 or § 307(b) of the Clean Water Act** or other applicable Federal or state regulations governing the management or discharge of wastewaters;
- (C) Using oil mist collectors to remove small droplets of used oil from in-plant air to make plant air suitable for continued recirculation;
- (D) Draining or otherwise removing used oil from materials containing or otherwise contaminated with used oil, in order to remove excessive oil to the extent possible pursuant to **§ 7-805**; or
- (E) Filtering, separating or otherwise reconditioning used oil before burning it in small fuel burning equipment pursuant to **§ 7-812**.

(h) Used oil generators who provide used oil or used oil fuel to an off-site facility shall retain records which document the amount of used oil or used oil fuel provided, the date of each

shipment, and the name, address, and telephone number of the facility to which the used oil or used oil fuel was provided for a period of three years.

§ 7-808 STANDARDS FOR USED OIL AGGREGATION POINTS

- (a) This section applies to owners or operators of used oil aggregation points as defined under **§ 7-802** of this subchapter.
- (b) Owners or operators of used oil aggregation points shall comply with the generator standards set forth under **§ 7-807** of this subchapter.

§ 7-809 STANDARDS FOR USED OIL FUEL MARKETERS

- (a) This section applies to marketers as defined under **§ 7-802**.
- (b) Persons who market used oil fuel shall notify the Secretary of such activity and obtain an EPA identification number using a **Vermont Hazardous Waste Handler Site ID Form** provided by the Secretary pursuant to the requirements of **§ 7-104**.
- (c) Marketers initiating or accepting a shipment of used oil fuel must maintain the following records for a minimum of three years:
 - (1) Copies of all test results applicable to the shipment of used oil fuel, and/or documentation of total halogen field screening results as required under **§ 7-812(c)**; and
 - (2) An operating log for all shipments of used oil fuel that includes the following information:
 - (A) The name, EPA identification number, and address of the facility to which used oil fuel is sent or from which used oil fuel is received;
 - (B) The quantity of used oil fuel shipped or received;
 - (C) The date of shipment or delivery; and
 - (D) The name, EPA identification number, and address of the transporter.
 - (3) The certification required by **subsection (f)(2) of this section**.
- (d) A marketer who stores used oil fuel shall manage his or her facility in accordance with the general standards set forth under **§ 7-806**.

- (e) Marketers shall comply with the following, as applicable:
 - (1) The used oil generator standards set forth under § 7-807;
 - (2) The used oil collection facility standards set forth under § 7-810;
 - (3) The used oil transporter standards set forth under § 7-811;
 - (4) The standards for burning used oil fuel for energy recovery set forth under § 7-812;
and
 - (5) The used oil processor standards set forth under § 7-813.
- (f) Off-specification used oil
 - (1) A marketer may initiate a shipment of off-specification used oil only to a used oil burner that meets the requirements of § 7-812(d).
 - (2) Before a marketer directs the first shipment of off-specification used oil to a burner, the marketer must obtain a one-time written and signed notice from the burner certifying that:
 - (A) The burner has notified EPA stating the location and general description of used oil management activities; and
 - (B) The burner will burn the off-specification used oil only in an industrial furnace or boiler identified in **40 CFR § 279.61(a)**.

§ 7-810 STANDARDS FOR USED OIL COLLECTION FACILITIES

- (a) This section applies to owners or operators of used oil collection facilities as defined under § 7-802 of this subchapter.
- (b) Persons who own or operate a used oil collection facility shall notify the Secretary of such activity and obtain an EPA identification number using a **Vermont Hazardous Waste Handler Site ID Form** provided by the Secretary pursuant to the requirements of § 7-104 of these regulations.
- (c) The owner or operator of a used oil collection facility shall manage such facility in accordance with the general standards set forth under § 7-806, and the following, as applicable:
 - (1) The generator standards set forth under § 7-807;
 - (2) The marketer standards set forth under § 7-809;

- (3) The standards for burning used oil for energy recovery set forth under § 7-812; and
 - (4) The processor standards set forth under § 7-813.
- (d) Used oil collection facilities shall be equipped with a fire extinguisher or other fire-control equipment, and spill control equipment to assure containment of used oil in the event of a release.

§ 7-811 STANDARDS FOR USED OIL TRANSPORTERS

- (a) This section applies to used oil transporters as defined under § 7-802 of this subchapter.
- (b) With the exception of persons transporting used oil on-site, do-it-yourselfers, used oil generators self-transporting up to 55 gallons of used oil according to the provisions of § 7-807(d), and persons transporting used oil pursuant to tolling agreements that meet the requirements of § 7-807(e), persons transporting used oil must comply with the following:
 - (1) Used oil transporters shall notify the Secretary of such activity and obtain an EPA identification number using a **Vermont Hazardous Waste Handler Site ID Form** provided by the Secretary pursuant to the requirements of §§ 7-104 and 7-406(d)(1) **and (2)**.
 - (2) Used oil transporters shall obtain a permit from the Secretary according to the requirements of **subchapter 4** of these regulations.
 - (3) Used oil transporters who operate transfer facilities shall comply with the requirements of **40 CFR § 279.45** (Used Oil Storage at Transfer Facilities).
 - (4) Used oil transporters shall comply with all applicable requirements under the U.S. Department of Transportation regulations in **49 CFR Parts 171 through 180**. Persons transporting used oil that meets the definition of a hazardous material in **49 CFR § 171.8** must comply with all applicable regulations in **49 CFR Parts 171 through 180**.
 - (5) Rebuttable presumption for used oil
 - (A) To ensure that used oil is not a hazardous waste under the rebuttable presumption of § 7-805(f), the used oil transporter must determine whether the total halogen content of used oil being transported or stored at a transfer facility is above or below 1,000 parts per million. The transporter must make this determination by:
 - (i) Testing the used oil; or

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (ii) Applying knowledge of the halogen content of the used oil in light of the materials or processes used.
- (B) Records of testing conducted or information used to comply with **subsection (b)(5)(A) of this section** must be maintained by the transporter for at least 3 years.
- (6) In addition to the above, used oil transporters are subject to the following, as applicable:
 - (A) The general standards set forth under **§ 7-806**;
 - (B) The generator standards set forth under **§ 7-807**;
 - (C) The marketer standards set forth under **§ 7-809**;
 - (D) The standards for burning used oil for energy recovery set forth under **§ 7-812**; and
 - (E) The processor standards set forth under **§ 7-813**.

Note: Subsection (b) of this section applies to the transportation of collected do-it-yourselfer used oil from regulated used oil generators, collection facilities, aggregation points, or other facilities where do-it-yourselfer used oil is collected.

- (c) Used oil transporters may consolidate or aggregate loads of used oil for the purposes of transportation but, with the following exceptions, may not process used oil unless the processor standards set forth under **§ 7-813** are met.
 - (1) Transporters may conduct incidental processing operations that occur in the normal course of used oil transportation (e.g., settling and water separation), but that are not designed to produce (or make more amenable for production of) used oil derived products or used oil fuel.
 - (2) Transporters may remove used oil from oil bearing electrical transformers and turbines and filter that used oil prior to returning it to its original use.
- (d) Transporters who generate residues from the storage or transport of used oil must manage the residues as specified in **§ 7-805**.
- (e) Transporters who import used oil from abroad or export used oil outside of the United States are subject to the requirements of this section from the time the used oil enters and until the time it exits Vermont.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (f) Unless trucks previously used to transport hazardous waste are emptied as described in § 7-203(j) of these regulations prior to transporting used oil, the used oil is considered to have been mixed with the hazardous waste and must be managed as hazardous waste.
- (g) A used oil transporter shall deliver used oil to:
 - (1) Another used oil transporter, provided that the transporter is permitted as specified by **subsection (b)(2) of this section**, and has obtained an EPA identification number; or
 - (2) A used oil collection facility that has obtained an EPA identification number, in shipments of no more than 55 gallons; or
 - (3) A used oil burner or processing facility which has been assigned an EPA identification number.
- (h) Used oil transporters shall maintain, for a period of three years, an operating log that documents the following information for each used oil shipment made:
 - (1) The name, address, and EPA identification number (if one is required) of the used oil generator, collection facility, transporter, or processor who provided the used oil for transport;
 - (2) The quantity of used oil accepted;
 - (3) The date that the transporter accepts a shipment of used oil for transport, and the name and signature of the person representing the used oil generator, transporter, or processor who offered the used oil for transport;
 - (4) The name, address, and EPA identification number (if one is required) of the used oil collection facility, transporter, burner, or processor to which the used oil was delivered;
 - (5) The quantity of used oil delivered; and
 - (6) The date of delivery and the name and signature of the person representing the used oil collection facility, transporter, burner, or processor who received the used oil.
- (i) Response to Releases of Used Oil during Transport
 - (1) In the event of a release of used oil during transport, a used oil transporter shall comply with the release response requirements of § 7-806(e).
 - (2) If a discharge of used oil occurs during transportation and an official (State or local government or a Federal Agency) acting within the scope of official responsibilities determines that immediate removal of the used oil is necessary to protect human

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

health or the environment, that official may authorize the removal of the used oil by transporters who do not have EPA identification numbers.

- (3) An air, rail, highway, or water transporter who has discharged used oil must:
 - (A) Give notice, if required by **49 CFR § 171.15** to the National Response Center (800-424-8802 or 202-426-2675); and
 - (B) Report in writing as required by **49 CFR § 171.16** to the Director, Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington, DC 20590.
- (4) A water transporter who has discharged used oil must give notice as required by **33 CFR § 153.203**.
- (j) A used oil transporter shall report to the Secretary as required by **§ 7-406(d)(5)**.

§ 7-812 STANDARDS FOR BURNING USED OIL FUEL FOR ENERGY RECOVERY

- (a) Any person burning used oil fuel for energy recovery in small fuel burning equipment is subject to the following:
 - (1) The types of used oil which may be burned as fuel in small fuel burning equipment is limited to:
 - (A) Used motor vehicle crankcase oil, transmission fluid, hydraulic oil or machine gearbox oil that meets the specifications listed in **Table 1** of this section;
 - (B) Mixtures of virgin fuel oil and specification used motor vehicle crankcase oil, transmission fluid, hydraulic oil or machine gearbox oil; and
 - (C) Types of specification used oil other than those listed in **subsections (a)(1)(A) and (B) of this section** that have been approved by the Secretary. Approval shall be granted on a case-by-case basis following the review by the Secretary of relevant material safety data information, if available, and a narrative description of the process generating the used oil.
 - (2) Specification used oil fuel from the following sources may be burned in small fuel burning equipment:
 - (A) On-site;
 - (B) Do-it-yourselfers;
 - (C) An off-site facility that is owned or operated by the burner;

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (D) An off-site facility that is not owned or operated by the burner provided the burner retains records for a period of three years which document the amount of used oil fuel accepted; the name, address, and telephone number of the facility from which the used oil fuel was accepted; and the specification testing results for the used oil fuel.
 - (3) The combustion gases from burning used oil fuel in small fuel burning equipment must be vented to ambient air.
 - (4) The owner or operator of any facility that burns used oil fuel in small fuel burning equipment shall maintain records for a period of three years documenting that the used oil fuel has been evaluated in accordance with **subsection (c) of this section**.
- (b) Any person burning or proposing to burn used oil fuel in fuel burning equipment other than small fuel burning equipment shall:
- (1) Comply with §§ **5-221(2) and 5-261 of the Vermont Air Pollution Control Regulations**; and
 - (2) Maintain records for a period of three years documenting:
 - (A) The amount of used oil fuel burned on-site; and
 - (B) That the used oil fuel has been evaluated in accordance with **subsection (c) of this section**.
- (c) Used Oil Fuel Specifications
- (1) Used oil fuel that is marketed or burned for energy recovery must be evaluated to determine if it meets the specifications listed in **Table 1** of this section as follows:
 - (A) Used oil generators that burn their own used oil on-site, or that burn off-site generated used oil received in shipments of less than or equal to 55 gallons, in small fuel burning equipment, must initially test the used oil from each source for total halogens. If there is reason to believe that any of the remaining **Table 1** specifications would not be met by a volume of used oil, the used oil generator must test the used oil for any suspected constituents or properties.
 - (B) Any used oil fuel delivered to burners in shipments greater than 55 gallons, must be initially tested to establish that all of the **Table 1** specifications are met.

Note: Field screening test kits may be used to determine if the allowable level for total halogens specified in **Table 1** is met.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (2) Used oil fuel from a specific source must be re-tested if there is reason to believe that the quality of the used oil, or the process that generates the used oil, has changed such that the **Table 1** specifications would not be met.

Note: “ppm” means “parts per million”, by weight on a water free basis.

TABLE 1 - USED OIL FUEL SPECIFICATIONS

<i>Constituent/Property</i>	<i>Allowable Level</i>
Arsenic	5 ppm maximum
Cadmium	2 ppm maximum
Chromium	10 ppm maximum
Lead	100 ppm maximum
Flash Point	100° F minimum
Total Halogens	1000 ppm maximum ³
Polychlorinated biphenyls (PCBs)	< 2 ppm maximum
Net Heat of Combustion	8000 BTU/lb minimum

- (3) As specified in § 7-804(g), once used oil fuel that meets the requirements of § 7-812(a) has been shown to meet the **Table 1** specifications in accordance with **subsections (1) through (3) of this section**, and the person making that showing complies with the applicable marketer requirements of § 7-809, the used oil fuel is only subject to the general used oil management standards of § 7-806.
- (4) Used oil that does not meet the specifications identified by **Table 1** (i.e., off-specification used oil) must be managed as follows:
- (A) As hazardous waste (identified by at least the VT02 hazardous waste code listed under § 7-211); or
 - (B) As used oil processed in a manner other than being burned for energy recovery; or
 - (C) In accordance with **subsection (d) of this section**.

³ Used oil containing more than 1,000 ppm total halogens is presumed to be a hazardous waste as specified under § 7-805(f).

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (d) Any person burning off-specification used oil must comply with **40 CFR Part 279, Subpart G** (Standards for Used Oil Burners Who Burn Off-Specification Used Oil for Energy Recovery), and §§ **5-221(2) and 5-261 of the Vermont Air Pollution Control Regulations**.

§ 7-813 STANDARDS FOR USED OIL PROCESSORS

- (a) A used oil processor (as defined in § **7-802**) must comply with **40 CFR Part 279 Subpart F** (Standards for Used Oil Processors and Re-Refiners).

Subchapter 9: UNIVERSAL WASTE MANAGEMENT STANDARDS

§ 7-901 PURPOSE, SCOPE AND APPLICABILITY

This subchapter establishes alternative management standards for certain batteries, pesticides, thermostats, PCB-containing fluorescent light ballasts, lamps, mercury-containing devices, and cathode ray tubes that would otherwise have to be managed as hazardous waste. As allowed by § 7-203(s), these “universal” hazardous wastes can be managed under the streamlined provisions of this subchapter in lieu of the hazardous waste management requirements set forth under **subchapters 1 through 7**. Specifically, this subchapter establishes standards for small and large quantity handlers, universal waste transporters, and destination facilities; it also provides a petition mechanism for amending these regulations to add a hazardous waste to the category of universal wastes.

§ 7-902 APPLICABILITY TO BATTERIES

With the exception of spent lead-acid batteries exempted under § 7-204(f) of these regulations, persons managing batteries, as defined in § 7-911, that are hazardous waste (due to exhibiting one or more of the hazardous waste characteristics identified by §§ 7-205 through 7-208), including spent lead acid batteries that are not managed according to the provisions of § 7-204(f), may comply with the requirements of **40 CFR Part 273** in lieu of managing those batteries as hazardous wastes under **subchapters 1 through 7** of these regulations.

§ 7-903 APPLICABILITY TO PESTICIDES

- (a) With the exception of the pesticides listed in **subsection (b) of this section**, the requirements of this subchapter apply to persons managing pesticides, as defined in § 7-911, that are hazardous waste, and that meet one or more of the following conditions:
- (1) Recalled pesticides that are stocks of a suspended and canceled pesticide that are part of a voluntary or mandatory recall under **FIFRA § 19(b)**, including, but not limited to those owned by the registrant responsible for conducting the recall.
 - (2) Recalled pesticides that are stocks of a suspended or canceled pesticide, or a pesticide that is not in compliance with FIFRA, that are part of a voluntary recall by the registrant.
 - (3) Stocks of other unused pesticide products that are collected and managed as part of a waste pesticide collection program.

- (b) The requirements of this subchapter do not apply to persons managing the following pesticides:
- (1) Pesticides described in **subsection (a) of this section** that are managed by farmers in compliance with § 7-203(r).
 - (2) Pesticides not meeting one or more of the conditions of **subsection (a) of this section**. These pesticides must be managed in compliance with the hazardous waste regulations set forth under **subchapters 1 through 7**.
 - (3) Pesticides that do not meet the criteria for waste generation in **subsection (c) of this section**.
- (c) Generation of waste pesticides
- (1) A recalled pesticide described in **subsections (a)(1) and (a)(2) of this section** becomes a waste on the first date on which both the generator of the recalled pesticide agrees to participate in the recall, and the person conducting the recall decides to discard the pesticide (e.g., burn the pesticide for energy recovery).
- Note:** A recalled pesticide is not waste if the person conducting the recall has made a decision to use a management option that causes the pesticide to be exempt from regulation under § 7-204(a). This pesticide, including a recalled pesticide that is exported to a foreign destination for use or reuse, remains subject to the requirements of FIFRA.
- (2) An unused pesticide product described in **subsection (a)(3) of this section** becomes a waste on the date the generator decides to discard it.

§ 7-904 APPLICABILITY TO MERCURY THERMOSTATS

- (a) The requirements of this subchapter apply to persons managing thermostats, as defined in § 7-911, that are hazardous waste (due to exhibiting one or more of the hazardous waste characteristics identified by §§ 7-205 through 7-208).
- (b) Both used and unused thermostats become waste on the date the handler decides to discard them.

§ 7-905 APPLICABILITY TO PCB-CONTAINING FLUORESCENT LIGHT BALLASTS

- (a) The requirements of this subchapter apply to persons managing intact and non-leaking fluorescent light ballasts with small capacitors that contain PCBs (the terms “fluorescent light ballast”, “PCB”, and “small capacitor” are defined in § 7-911), and that are hazardous waste due to meeting the criteria of only the VT01 hazardous waste code identified in § 7-211 of these regulations.

- (b) Both used and unused PCB-containing fluorescent light ballasts become waste on the date the handler decides to discard them.

Note: Various PCB-containing devices (including leaking waste fluorescent light ballasts of any size) and the disposal of the potting material in ballasts with a concentration of PCBs over 50 parts per million are subject to federal regulation under TSCA (**40 CFR Part 761**).

§ 7-906 APPLICABILITY TO LAMPS

- (a) The requirements of this subchapter apply to persons managing lamps, as defined in § 7-911, that are hazardous waste (due to exhibiting one or more of the hazardous waste characteristics identified by §§ 7-205 through 7-208).
- (b) Both used and unused lamps become waste on the date the handler decides to discard them.

§ 7-907 APPLICABILITY TO MERCURY-CONTAINING DEVICES

- (a) The requirements of this subchapter apply to persons managing mercury-containing devices, as defined in § 7-911, that are hazardous waste (due to exhibiting one or more of the hazardous waste characteristics identified by §§ 7-205 through 7-208).
- (b) Both used and unused mercury-containing devices become waste on the date the handler decides to discard them.

§ 7-908 APPLICABILITY TO CATHODE RAY TUBES (CRTs)

- (a) The requirements of this subchapter apply to persons managing CRTs, as defined in § 7-911, that are hazardous waste (due to exhibiting one or more of the hazardous waste characteristics identified by §§ 7-205 through 7-208).
- (b) Both used and unused CRTs become waste on the date the handler decides to discard them.
- (c) CRTs that have been collected, but still must be evaluated for reuse or repair (i.e., considered a commodity) are not waste provided:
 - (1) The CRTs are managed to prevent breakage and cosmetic damage;
 - (2) The CRTs remain intact;
 - (3) The CRTs are stored within a structure or transportation unit such that the CRTs are protected from precipitation; and

- (4) The person in control of the CRTs plans to evaluate the CRTs for reuse or repair on-site, or send the CRTs off-site for such evaluation.
- (d) CRTs that have been evaluated under **subsection (c) of this section** become waste on the date the handler determines that they cannot be reused or repaired.

§ 7-909 RESERVED

§ 7-910 HOUSEHOLD AND CONDITIONALLY EXEMPT GENERATOR WASTE

- (a) Persons managing the wastes listed below may, at their option, manage them under the requirements of this subchapter:
 - (1) Household wastes that are exempt under **§ 7-203(a)** and are also of the same type as the universal wastes described by **§§ 7-902 through 7-908**; and/or
 - (2) Conditionally exempt generator wastes of the same type as the universal wastes described by **§§ 7-902 through 7-908** (as allowed under **§ 7-306(c)(2)(F)**).
- (b) Persons who commingle the wastes described in **subsections (a)(1) and (a)(2) of this section** together with universal waste regulated under this subchapter must manage the commingled waste under the requirements of this subchapter.

§ 7-911 DEFINITIONS

Terms defined in **§ 7-103** of these regulations or in 40 CFR Parts 260 through 270 have the same meaning when used in this subchapter.

"Battery" means a device consisting of one or more electrically connected electrochemical cells which is designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections (electrical and mechanical) as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

"Cathode ray tube" or **"CRT"** means a vacuum tube, composed primarily of glass, which is the video display component of a television, computer monitor, or other electronic display device.

"Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in **§ 7-912(d)(3)**. A facility at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

"**FIFRA**" means the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. §§ 136-136y).

"**Fluorescent light ballast**" means a device that electrically controls fluorescent light fixtures (i.e., provides starting voltage and stabilizes electrical current) and that includes a capacitor containing 0.1 kg or less of dielectric material.

"**Lamp**" means the bulb or tube portion of an electric lighting device specifically designed to produce radiant energy, most often in the ultraviolet, visible, and infra-red regions of the electromagnetic spectrum. Examples of common universal waste electric lamps include, but are not limited to, fluorescent, high intensity discharge, neon, mercury vapor, high pressure sodium, and metal halide lamps.

"**Large quantity handler**" means a universal waste handler who accumulates 5,000 kilograms (11,000 pounds) or more total of universal waste other than CRTs (batteries, pesticides, thermostats, ballasts, lamps, or mercury-containing devices, calculated collectively), or who accumulates 36,288 kilograms (40 tons) or more of CRTs, at any time. This designation as a large quantity handler is retained through the end of the calendar year in which either 5,000 kilograms (11,000 pounds) or more total of universal waste other than CRTs, or 40 tons or more of CRTs, is accumulated.

"**Mercury-containing device**" means a device or part of a device (excluding batteries, thermostats, and lamps) that contains elemental mercury necessary for its operation.

"**PCB**" or "**polychlorinated biphenyl**" means any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substance.

"**Pesticide**" means an "economic poison" as defined under **6 V.S.A § 911**, **10 V.S.A § 6602**, and **§ 7-103**. The term pesticide does not include substances that are new animal drugs in accordance with § 201 of the Food, Drug and Cosmetic Act (FFDCA) or animal drugs regulated by the Secretary of Health and Human Services.

"**Small quantity handler**" means a universal waste handler who does not accumulate 5,000 kilograms (11,000 pounds) or more total of universal waste other than CRTs (batteries, pesticides, thermostats, ballasts, lamps, or mercury-containing devices, calculated collectively), and who does not accumulate 36,288 kilograms (40 tons) or more of CRTs, at any time.

"**Thermostat**" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of **§ 7-912(d)(3)(B)**.

"**TSCA**" means the Toxic Substances Control Act, 15 U.S.C. 2601 et seq.

"**Universal waste**" means any of the following hazardous wastes that are subject to the universal waste requirements of this subchapter:

- (a) Batteries as described in § 7-902;
- (b) Pesticides as described in § 7-903;
- (c) Thermostats as described in § 7-904;
- (d) PCB-containing fluorescent light ballasts as described in § 7-905;
- (e) Lamps as described in § 7-906;
- (f) Mercury-containing devices as described in § 7-907; and
- (g) Cathode ray tubes (CRTs) as described in § 7-908.

"**Universal waste handler**":

- (a) Means:
 - (1) A generator (as defined in § 7-103) of universal waste; or
 - (2) The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.
- (b) Does not mean:
 - (1) A person who treats, except under the provisions of § 7-912(d)(3), disposes of, or recycles universal waste; or
 - (2) A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

"**Universal waste transfer facility**" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

"**Universal waste transporter**" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

§ 7-912 STANDARDS FOR SMALL AND LARGE QUANTITY HANDLERS OF UNIVERSAL WASTE

(a) Applicability

This section applies to small and large quantity handlers of universal waste as defined above.

(b) Prohibitions

Small and large quantity handlers of universal waste are:

- (1) Prohibited from disposing of universal waste; and
- (2) Prohibited from diluting or treating universal waste, except by responding to releases as provided in **subsection (h) of this section**; or by managing specific wastes as provided in **subsection (d) of this section**.

Note: Intentional breaking or crushing of mercury-containing lamps is banned under this treatment prohibition.

Note: Owners or operators of facilities that treat mercury-containing lamps using drum-top crushing equipment are subject to certification under the requirements of **subchapter 5**. Drum-top crushing of mercury-containing lamps is considered a treatment activity rather than a recycling activity.

(c) Notification

- (1) A small quantity handler is not required to notify the Secretary of universal waste handling activities.
- (2) A large quantity handler must notify the Secretary as follows:
 - (A) Except as provided in **subsection (c)(2)(B) of this section**, a large quantity handler must have sent written notification of universal waste management to the Secretary, and received an EPA Identification Number, before meeting or exceeding the 5,000 kilogram storage limit.
 - (B) A large quantity handler who manages recalled universal waste pesticides as described in §§ 7-903(a)(1) and (a)(2) and who has sent notification to EPA as required by **40 CFR Part 165** is not required to notify for those recalled universal waste pesticides under this section.

Note: A large quantity handler of universal waste who has already notified EPA of his or her hazardous waste management activities and has received an EPA Identification Number is not required to re-notify under this section.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (3) A notification submitted by a large quantity handler must include:
- (A) The large quantity handler's name and mailing address;
 - (B) The name and business telephone number of the person at the large quantity handler's site who should be contacted regarding universal waste management activities;
 - (C) The address or physical location of the universal waste management activities;
 - (D) A list of all of the types of universal waste managed by the large quantity handler;
 - (E) A statement indicating that the large quantity handler is either accumulating 5,000 kilograms or more of universal waste other than CRTs, or 36,288 kilograms (40 tons) or more of CRTs, at one time and the types of universal waste the handler is accumulating above this quantity.

Note: The **Vermont Hazardous Waste Handler Site ID Form** specified under § 7-104 may be used to provide notification of universal waste management to the Secretary.

(d) Waste management

- (1) [Reserved]
- (2) Universal waste pesticides

Both small and large quantity handlers must manage universal waste pesticides in a way that prevents releases of any universal waste or component of a universal waste to the environment. The universal waste pesticides must be contained in one or more of the following:

- (A) A container that remains closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; or
- (B) A container that does not meet the requirements of **subsection (d)(2)(A) of this section**, provided that the unacceptable container is overpacked in a container that does meet the **subsection (d)(2)(A)** requirements; or
- (C) A tank that meets the requirements of **40 CFR part 265 subpart J, except for 40 CFR §§ 265.197(c), 265.200, and 265.201**; or

- (D) A transport vehicle or vessel that is closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.
- (3) Universal waste thermostats

Both small and large quantity handlers must manage universal waste thermostats in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

- (A) Package universal waste thermostats in containers that are structurally sound, adequate to prevent breakage, and compatible with the contents of the thermostats. Such containers must remain closed and must lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions.
- (B) A small or large quantity handler may remove mercury-containing ampules from universal waste thermostats, provided the handler:
 - (i) Removes the ampules in a manner designed to prevent breakage of the ampules;
 - (ii) Removes ampules only over or in a containment device (e.g., tray or pan sufficient to collect and contain any mercury released from an ampule in case of breakage);
 - (iii) Ensures that a mercury clean-up system is readily available to immediately transfer any mercury resulting from spills or leaks from broken ampules, from the containment device to a container in accordance with the applicable requirements of **subchapter 3**;
 - (iv) Immediately transfers any mercury resulting from spills or leaks from broken ampules from the containment device to a container in accordance with the applicable requirements of **subchapter 3**;
 - (v) Ensures that the area in which ampules are removed is well ventilated and monitored to ensure compliance with applicable OSHA exposure levels for mercury;
 - (vi) Ensures that employees removing ampules are thoroughly familiar with proper waste mercury handling and emergency procedures, including transfer of mercury from containment devices to appropriate containers;
 - (vii) Stores removed ampules in closed, non-leaking containers that are in good condition; and

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (viii) Packs removed ampules in the container with packing materials adequate to prevent breakage during storage, handling, and transportation.
 - (C) A small or large quantity handler who removes mercury-containing ampules from thermostats must determine whether the following exhibit a characteristic of hazardous waste identified in §§ 7-205 through 7-208:
 - (i) Mercury or clean-up residues resulting from spills or leaks; and/or
 - (ii) Other waste generated as a result of the removal of mercury-containing ampules (e.g., remaining thermostat units).
 - (D) Any mercury, residue, and/or other waste listed in **subsection (d)(3)(C) of this section** that exhibits a characteristic of hazardous waste must be managed in compliance with all applicable requirements of **subchapters 1 through 7**. The handler is considered the generator of the mercury, residues, and/or other waste and must comply with the applicable requirements of **subchapter 3**.
- (4) Universal waste PCB-containing fluorescent light ballasts

Small and large quantity handlers must:

- (A) Manage universal waste PCB-containing fluorescent light ballasts in a way that prevents releases of any universal waste or component of a universal waste to the environment.
- (B) Immediately contain and transfer any universal waste PCB-containing fluorescent light ballasts that show evidence of leakage or damage to a container that meets the requirements of §§ 7-311(f)(2) through (4).

Note: Fluorescent light ballasts which contain PCBs in a small capacitor that is either not intact or that is leaking, or that contain PCBs in the potting material, are subject to regulation under TSCA (i.e., **40 CFR Part 761**).

- (5) Universal waste lamps
- (A) Both small and large quantity handlers must manage universal waste lamps in a way that prevents releases of any universal waste or component of a universal waste to the environment. Small and large quantity handlers must:
 - (i) Package universal waste lamps in containers that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers must remain closed and must lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions.

- (ii) Seal full containers with tape.
- (iii) Stack containers of lamps no higher than five (5) feet.
- (iv) Immediately contain and transfer any universal waste lamps that show evidence of damage, and all residue and other waste from broken lamps to a container that meets the requirements of §§ 7-311(f)(2) through (4).

Note: Intentional breaking or crushing of mercury-containing lamps is prohibited under § 7-912(b)(2).

Note: Owners or operators of facilities that treat mercury-containing lamps using drum-top crushing equipment are subject to certification under the requirements of **subchapter 5**. Drum-top crushing of mercury-containing lamps is considered a treatment activity rather than a recycling activity.

- (B) A small or large quantity handler must determine whether residue and/or other waste from broken lamps collected pursuant to **subsection (d)(5)(A)(iv) of this section** exhibits a characteristic of hazardous waste identified in §§ 7-205 through 7-208.
 - (C) Any residue and/or other waste that exhibits a characteristic of hazardous waste must be managed in compliance with all applicable requirements of **subchapters 1 through 7**. The handler is considered the generator of the residues, and/or other waste and must comply with the applicable requirements of **subchapter 3**.
- (6) Universal waste mercury-containing devices

Both small and large quantity handlers must manage universal waste mercury-containing devices in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

- (A) Package universal waste mercury-containing devices in containers that are structurally sound, adequate to prevent breakage, and compatible with the contents of the thermostats. Such containers must remain closed and must lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions.
- (B) A small or large quantity handler may remove mercury-containing ampules from universal waste mercury-containing devices, provided the handler adheres to the practices for removing mercury containing ampules from universal waste thermostats set forth in **subsections (d)(3)(B) through (D) of this section**.
- (C) Any residue and/or other waste that exhibits a characteristic of hazardous waste must be managed in compliance with all applicable requirements of

subchapters 1 through 7 of these regulations. The handler is considered the generator of the mercury, residues, and/or other waste and must comply with the applicable requirements of **subchapter 3**.

(7) Universal waste cathode ray tubes (CRTs)

Both small and large quantity handlers must manage universal waste CRTs in a way that prevents breakage, or releases of any universal waste or component of a universal waste to the environment, as follows:

(A) Package universal waste CRTs in a manner adequate to prevent breakage during transportation, and when necessary during storage and handling. Such packaging must lack evidence of damage that could cause breakage under reasonably foreseeable conditions;

(B) Store universal waste CRTs within a structure or transportation unit such that the CRTs are protected from precipitation; and

(C) Place any universal waste CRT that shows evidence of breakage, leakage, spillage, or damage that could cause the release of glass particles under reasonably foreseeable conditions in a container. Any such container shall be closed, structurally sound, and compatible with the cathode ray tube(s) and shall be capable of preventing leakage, spillage or releases of broken cathode ray tubes, glass particles or other hazardous constituents from such broken tubes to the environment.

(e) Labeling and marking.

Small and large quantity handlers must label and mark universal waste to identify its type as specified below:

(1) [Reserved]

(2) A container, (or multiple container package unit), tank, transport vehicle or vessel in which recalled universal waste pesticides as described in §§ **7-903(a)(1) and (2)** are contained must be labeled and marked clearly with:

(A) The label that was on or accompanied the product as sold or distributed; and

(B) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s)."

(3) A container, tank, or transport vehicle or vessel in which unused pesticide products as described in § **7-903(a)(3)** are contained must be labeled and marked clearly with:

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (A) A label as follows:
 - (i) The label that was on the product when purchased, if still legible;
 - (ii) If using the labels described in **subsection (e)(3)(A)(i) of this section** is not feasible, the appropriate label as required under the Department of Transportation regulation **49 CFR Part 172**;
 - (iii) If using the labels described in **subsections (e)(3)(A)(i) and (e)(3)(A)(ii) of this section** are not feasible, another label prescribed or designated by the waste pesticide collection program administered or recognized by a state; and
- (B) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s)."
- (4) Containers holding universal waste thermostats must be labeled or marked clearly with one of the following phrases: "Universal Waste-Mercury Thermostat(s)," or "Waste Mercury Thermostat(s)," or "Used Mercury Thermostat(s)."
- (5) Universal waste PCB-containing fluorescent light ballasts (i.e., each ballast), or a container in which the ballasts are contained, must be labeled or marked clearly with one of the following phrases: "Universal Waste-PCB Ballast(s)," or "Waste PCB Ballast(s)," or "Used PCB Ballast(s)."
- (6) Containers holding universal waste lamps must be labeled or marked clearly with one of the following phrases: "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamp(s)."
- (7) Containers holding universal waste mercury-containing devices must be labeled or marked clearly with one of the following phrases: "Universal Waste-Mercury Device(s)," or "Waste Mercury Device(s)," or "Used Mercury Device(s)."
- (8) Universal waste cathode ray tubes (i.e., each CRT), or packages or containers holding universal waste cathode ray tubes, must be labeled or marked clearly with one of the following phrases: "Universal Waste-Cathode Ray Tube(s)," or "Waste Cathode Ray Tube(s)," or "Used Cathode Ray Tube(s)" or "Universal Waste-CRT(s)," or "Waste CRT(s)," or "Used CRT(s)."
- (f) Accumulation time limits
 - (1) A small or large quantity handler may not accumulate universal waste for longer than one year from the date the universal waste is generated, or received from another handler, unless the requirements of **subsection (f)(2) of this section** are met.
 - (2) A small or large quantity handler may accumulate universal waste for longer than one year from the date the universal waste is generated, or received from another handler,

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

if such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal. However, the handler bears the burden of proving that such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal.

- (3) A small or large quantity handler who accumulates universal waste must be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration by:
 - (A) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received;
 - (B) Marking or labeling each individual item of universal waste (e.g., each thermostat, ballast or lamp) with the date it became a waste or was received;
 - (C) Maintaining an inventory system on-site that identifies the date each universal waste became a waste or was received;
 - (D) Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers of universal waste became a waste or was received;
 - (E) Placing the universal waste in a specific accumulation area and identifying the earliest date that any universal waste in the area became a waste or was received; or
 - (F) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.

(g) Employee training

Both small and large quantity handlers must ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relative to their responsibilities during normal facility operations and emergencies.

(h) Response to releases

- (1) Both small and large quantity handlers must respond to and manage a discharge or release of a universal waste in accordance with the requirements and procedures of § **7-105**.
- (2) Both small and large quantity handlers must determine whether any material resulting from the discharge or release is hazardous waste, and if so, must manage the

hazardous waste in compliance with all applicable requirements of **subchapters 1 through 7** of these regulations. The handler is considered the generator of the material resulting from the discharge or release, and must comply with the applicable requirements of **subchapter 3**.

- (i) Off-site shipments
 - (1) Both small and large quantity handlers of universal waste are prohibited from sending or taking universal waste to a place other than another universal waste handler, a destination facility, or a foreign destination.
 - (2) If a small or large quantity handler self-transportes universal waste off-site, the handler becomes a universal waste transporter for those self-transportation activities and must comply with the transporter requirements of **§ 7-913** while transporting the universal waste.
 - (3) If a universal waste being offered for off-site transportation meets the definition of a hazardous material under **49 CFR Parts 171 through 180**, the small or large quantity handler must package, label, mark and placard the shipment, and prepare the proper shipping papers in accordance with the applicable Department of Transportation regulations under **49 CFR Parts 172 through 180**;
 - (4) Prior to sending a shipment of universal waste to another universal waste handler, the originating handler must ensure that the receiving handler agrees to receive the shipment.
 - (5) If a small or large quantity handler sends a shipment of universal waste to another handler or to a destination facility and the shipment is rejected by the receiving handler or destination facility, the originating handler must either:
 - (A) Receive the waste back when notified that the shipment has been rejected, or
 - (B) Agree with the receiving handler on a destination facility to which the shipment will be sent.
 - (6) Small and large quantity handlers may reject a shipment containing universal waste, or a portion of a shipment containing universal waste received from another handler. If a handler rejects a shipment or a portion of a shipment, the handler must contact the originating handler to provide notification of the rejection and to discuss reshipment of the load. The handler must:
 - (A) Send the shipment back to the originating handler, or
 - (B) If agreed to by both the originating and receiving handler, send the shipment to a destination facility.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (7) If a small or large quantity handler receives a shipment containing hazardous waste that is not a universal waste, the handler must immediately notify the Secretary of that shipment, and provide the name, address, and phone number of the originating shipper.

- (j) Tracking universal waste shipments
 - (1) A small quantity handler is not required to keep records of shipments of universal waste.
 - (2) A large quantity handler is subject to the following tracking requirements:
 - (A) Receipt of shipments

A large quantity handler must keep a record of each shipment of universal waste received at the facility. The record may take the form of a log, invoice, manifest, bill of lading, or other shipping document. The record for each shipment of universal waste received must include the following information:

 - (i) The name and address of the originating universal waste handler or foreign shipper from whom the universal waste was sent;
 - (ii) The quantity of each type of universal waste received;
 - (iii) The date of receipt of the shipment of universal waste.
 - (B) Shipments off-site

A large quantity handler must keep a record of each shipment of universal waste sent from the handler to other facilities. The record may take the form of a log, invoice, manifest, bill of lading or other shipping document. The record for each shipment of universal waste sent must include the following information:

 - (i) The name and address of the universal waste handler, destination facility, or foreign destination to whom the universal waste was sent;
 - (ii) The quantity of each type of universal waste sent;
 - (iii) The date the shipment of universal waste left the facility.
 - (C) Record retention

- (i) A large quantity handler must retain the records described in **subsection (j)(2)(A) of this section** for at least three years from the date of receipt of a shipment of universal waste.
- (ii) A large quantity handler must retain the records described in **subsection (j)(2)(B) of this section** for at least three years from the date a shipment of universal waste left the facility.

(k) Exports

Both small and large quantity handlers who send universal waste to a foreign destination other than to those OECD countries specified in **40 CFR § 262.58(a)(1)** (in which case the handler is subject to the requirements of **40 CFR Part 262, Subpart H**) must:

- (1) Comply with the requirements applicable to a primary exporter in §§ **7-705(b)(1) through (6), 7-710(d) and (e), and 40 CFR §§ 262.56(a)(1) through (4), (6), and (b)**;
- (2) Export such universal waste only upon consent of the receiving country and in conformance with the EPA Acknowledgment of Consent as defined in **§ 7-103**; and
- (3) Provide a copy of the EPA Acknowledgment of Consent for the shipment to the transporter transporting the shipment for export.

§ 7-913 STANDARDS FOR UNIVERSAL WASTE TRANSPORTERS

(a) Applicability

This section applies to universal waste transporters (as defined in **§ 7-911**).

(b) Prohibitions

A universal waste transporter is:

- (1) Prohibited from disposing of universal waste; and
- (2) Prohibited from diluting or treating universal waste, except by responding to releases as provided in **§ 7-913(e)**.

(c) Waste management

- (1) A universal waste transporter must comply with all applicable U.S. Department of Transportation regulations in **49 CFR Part 171 through 180** for transport of any universal waste that meets the definition of hazardous material in **49 CFR § 171.8**. For purposes of the Department of Transportation regulations, a material is

- considered a hazardous waste if it is subject to the hazardous waste manifest requirements of the U.S. Environmental Protection Agency specified in **40 CFR Part 262**. Because universal waste does not require a hazardous waste manifest, it is not considered hazardous waste under the Department of Transportation regulations.
- (2) Some universal waste materials are regulated by the Department of Transportation as hazardous materials because they meet the criteria for one or more hazard classes specified in **49 CFR § 173.2**. As universal waste shipments do not require a manifest under **40 CFR Part 262**, they may not be described by the DOT proper shipping name "hazardous waste, (l) or (s), n.o.s.", nor may the hazardous material's proper shipping name be modified by adding the word "waste".
 - (3) Universal waste transporters are subject to the solid waste permit requirements of **10 V.S.A § 6607a**.
- (d) Storage time limits
- (1) A universal waste transporter may only store the universal waste at a universal waste transfer facility for ten days or less.
 - (2) If a universal waste transporter stores universal waste for more than ten days, the transporter becomes a universal waste handler and must comply with the applicable requirements of **§ 7-912** of this subchapter while storing the universal waste.
- (e) Response to releases
- (1) A universal waste transporter must immediately contain all releases of universal wastes and other residues from universal wastes.
 - (2) A universal waste transporter must determine whether any material resulting from the release is hazardous waste, and if so, it is subject to all applicable requirements of **subchapters 1 through 7**. If the waste is determined to be a hazardous waste, the transporter must manage such waste in accordance with the applicable generator requirements of **subchapter 3**.
- (f) Off-site shipments
- (1) A universal waste transporter is prohibited from transporting universal waste to a place other than a universal waste handler, a destination facility, or a foreign destination.
 - (2) If the universal waste being shipped off-site meets the Department of Transportation's definition of a hazardous material under **49 CFR § 171.8**, the shipment must be properly described on a shipping paper in accordance with the applicable Department of Transportation regulations under **49 CFR Part 172**.

(g) Exports

A universal waste transporter transporting a shipment of universal waste to a foreign destination other than to those OECD countries specified in **40 CFR § 262.58(a)(1)** (in which case the transporter is subject to the requirements of **40 CFR Part 262, Subpart H**) may not accept a shipment if the transporter knows the shipment does not conform to the EPA Acknowledgment of Consent. In addition the transporter must ensure that:

- (1) A copy of the EPA Acknowledgment of Consent accompanies the shipment; and
- (2) The shipment is delivered to the facility designated by the person initiating the shipment.

§ 7-914 STANDARDS FOR DESTINATION FACILITIES

(a) Applicability

- (1) The owner or operator of a destination facility (**as defined in § 7-911**) is subject to all applicable requirements of **subchapters 1, 2, 3, 5, 6 and 7**.
- (2) The owner or operator of a destination facility that recycles a particular universal waste without storing that universal waste before it is recycled must comply with the applicable requirements of **subchapter 6**.

(b) Off-site shipments.

- (1) The owner or operator of a destination facility is prohibited from sending or taking universal waste to a place other than a universal waste handler, another destination facility or a foreign destination.
- (2) The owner or operator of a destination facility may reject a shipment containing universal waste, or a portion of a shipment containing universal waste. If the owner or operator of the destination facility rejects a shipment or a portion of a shipment, the owner must contact the shipper to provide notification of the rejection and to discuss reshipment of the load. The owner or operator of the destination facility must:
 - (A) Send the shipment back to the original shipper, or
 - (B) If agreed to by both the shipper and the owner or operator of the destination facility, send the shipment to another destination facility.
- (3) If the owner or operator of a destination facility receives a shipment containing hazardous waste that is not a universal waste, the owner or operator of the destination facility must immediately notify the Secretary of that shipment, and provide the name, address, and phone number of the shipper.

- (c) Tracking universal waste shipments
 - (1) The owner or operator of a destination facility must keep a record of each shipment of universal waste received at the facility. The record may take the form of a log, invoice, manifest, bill of lading, or other shipping document. The record for each shipment of universal waste received must include the following information:
 - (A) The name and address of the universal waste handler, destination facility, or foreign shipper from whom the universal waste was sent;
 - (B) The quantity of each type of universal waste received; and
 - (C) The date of receipt of the shipment of universal waste.
 - (2) The owner or operator of a destination facility must retain the records described in **subsection (c)(1) of this section** for at least three years from the date of receipt of a shipment of universal waste.

§ 7-915 IMPORT REQUIREMENTS

Persons managing universal waste that is imported from a foreign country into the United States are subject to the applicable requirements of this section, immediately after the waste enters the United States, as indicated in **subsections (a) through (c) of this section**:

- (a) A universal waste transporter is subject to the universal waste transporter requirements of § **7-913**.
- (b) A universal waste handler is subject to the small or large quantity handler requirements of § **7-912**, as applicable.
- (c) An owner or operator of a destination facility is subject to the destination facility requirements of § **7-914**.
- (d) Persons managing universal waste that is imported from an OECD country as specified in **40 CFR § 262.58(a)(1)** are subject to paragraphs (a) through (c) of this section, in addition to the requirements of **40 CFR Part 262, Subpart H**.

§ 7-916 PETITIONS TO INCLUDE OTHER WASTES AS UNIVERSAL WASTES UNDER THIS SUBCHAPTER

- (a) General

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- (1) Any person seeking to add a hazardous waste or a category of hazardous waste to this subchapter may petition the Secretary for a regulatory amendment under this section.
 - (2) To be successful, the petitioner must demonstrate to the satisfaction of the Secretary that regulation of the waste or category of waste under the provisions of this subchapter is: appropriate for the waste or category of waste; will improve management practices for the waste or category of waste; and will improve implementation of the hazardous waste program. The petition must address as many of the factors listed in **subsection (b) of this section** as are appropriate for the waste or waste category addressed in the petition.
 - (3) The Secretary will evaluate petitions using the factors listed in **subsection (b) of this section**. The decision of whether or not to amend this subchapter will be based on the weight of evidence showing that regulation under this subchapter is appropriate for the waste or category of waste, will improve management practices for the waste or category of waste, and will improve implementation of the hazardous waste program.
- (b) Factors for petitions to include other wastes as universal wastes
- (1) The waste or category of waste, as generated by a wide variety of generators, is listed in **§§ 7-210 through 7-215**, or (if not listed) a proportion of the waste stream exhibits one or more characteristics of hazardous waste identified in **§§ 7-205 through 7-208**. (When a characteristic waste is added to the universal waste regulations of this subchapter by using a generic name to identify the waste category, the definition of universal waste in **§§ 7-103 and 7-911** will be amended to include only the hazardous waste portion of the waste category.) Thus, only the portion of the waste stream that does exhibit one or more characteristics (i.e., is hazardous waste) is subject to the universal waste regulations of this subchapter;
 - (2) The waste or category of waste is not exclusive to a specific industry or group of industries, and is commonly generated by a wide variety of types of establishments (including, for example, households, retail and commercial businesses, office complexes, conditionally exempt generators, small businesses, government organizations, as well as large industrial facilities);
 - (3) The waste or category of waste is generated by a large number of generators (e.g., more than 1,000 nationally) and is frequently generated in relatively small quantities by each generator;
 - (4) Systems to be used for collecting the waste or category of waste (including packaging, marking, and labeling practices) would ensure close stewardship of the waste;
 - (5) The risk posed by the waste or category of waste during accumulation and transport is relatively low compared to other hazardous wastes, and specific management standards proposed or referenced by the petitioner (e.g., waste management

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

- requirements appropriate to be added to §§ **7-912(d)**, **and 7-913(c)**; and/or applicable U.S. Department of Transportation requirements) would be protective of human health and the environment during accumulation and transport;
- (6) Regulation of the waste or category of waste under this subchapter will increase the likelihood that the waste will be diverted from non-hazardous waste management systems (e.g., the municipal waste stream, non-hazardous industrial or commercial waste stream, municipal sewer or stormwater systems) to recycling, treatment, or disposal in compliance with **subchapters 1 through 7**.
 - (7) Regulation of the waste or category of waste under this subchapter will improve implementation of and compliance with the hazardous waste regulatory program; and/or
 - (8) Such other factors as may be appropriate.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

APPENDIX I

Hazardous Wastes from Specific Sources

The following wastes are referred to in § 7-212 and are hazardous wastes from specific sources.

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
Wood preservation:		
K001	Bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote and/or pentachlorophenol.	(T)
Inorganic pigments:		
K002	Wastewater treatment sludge from the production of chrome yellow and orange pigments.	(T)
K003	Wastewater treatment sludge from the production of molybdate orange pigments.	(T)
K004	Wastewater treatment sludge from the production of zinc yellow pigments.	(T)
K005	Wastewater treatment sludge from the production of chrome green pigments.	(T)
K006	Wastewater treatment sludge from the production of chrome oxide green pigments (anhydrous and hydrated).	(T)
K007	Wastewater treatment sludge from the production of iron blue pigments.	(T)
K008	Oven residue from the production of chrome oxide green pigments.	(T)
Organic chemicals:		
K009	Distillation bottoms from the production of acetaldehyde from ethylene.	(T)
K010	Distillation side cuts from the production of acetaldehyde from ethylene.	(T)
K011	Bottom stream from the wastewater stripper in the production of acrylonitrile.	(R, T)
K013	Bottom stream from the acetonitrile column in the production of acrylonitrile.	(R, T)
K014	Bottoms from the acetonitrile purification column in the production of acrylonitrile.	(T)
K015	Still bottoms from the distillation of benzyl chloride.	(T)
K016	Heavy ends or distillation residues from the production of carbon tetrachloride.	(T)
K017	Heavy ends (still bottoms) from the purification column in the production of epichlorohydrin.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K018	Heavy ends from the fractionation column in ethyl chloride production.	(T)
K019	Heavy ends from the distillation of ethylene dichloride in ethylene dichloride production.	(T)
K020	Heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production.	(T)
K021	Aqueous spent antimony catalyst waste from fluoromethanes production.	(T)
K022	Distillation bottom tars from the production of phenol/acetone from cumene.	(T)
K023	Distillation light ends from the production of phthalic anhydride from naphthalene.	(T)
K024	Distillation bottoms from the production of phthalic anhydride from naphthalene.	(T)
K025	Distillation bottoms from the production of nitrobenzene by the nitration of benzene.	(T)
K026	Stripping still tails from the production of methy ethyl pyridines.	(T)
K027	Centrifuge and distillation residues from toluene diisocyanate production.	(R, T)
K028	Spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane.	(T)
K029	Waste from the product steam stripper in the production of 1,1,1-trichloroethane.	(T)
K030	Column bottoms or heavy ends from the combined production of trichloroethylene and perchloroethylene.	(T)
K083	Distillation bottoms from aniline production.	(T)
K085	Distillation or fractionation column bottoms from the production of chlorobenzenes.	(T)
K093	Distillation light ends from the production of phthalic anhydride from ortho-xylene.	(T)
K094	Distillation bottoms from the production of phthalic anhydride from ortho-xylene.	(T)
K095	Distillation bottoms from the production of 1,1,1-trichloroethane.	(T)
K096	Heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane.	(T)
K103	Process residues from aniline extraction from the production of aniline.	(T)
K104	Combined wastewater streams generated from nitrobenzene/aniline production.	(T)
K105	Separated aqueous stream from the reactor product washing step in the production of chlorobenzenes.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K107	Column bottoms from product separation from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides.	(C,T)
K108	Condensed column overheads from product separation and condensed reactor vent gases from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides.	(I,T)
K109	Spent filter cartridges from product purification from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides.	(T)
K110	Condensed column overheads from intermediate separation from the production of 1,1-dimethylhydrazine (UDMH) from carboxylic acid hydrazides.	(T)
K111	Product washwaters from the production of dinitrotoluene via nitration of toluene.	(C,T)
K112	Reaction by-product water from the drying column in the production of toluenediamine via hydrogenation of dinitrotoluene.	(T)
K113	Condensed liquid light ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.	(T)
K114	Vicinals from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.	(T)
K115	Heavy ends from the purification of toluenediamine in the production of toluenediamine via hydrogenation of dinitrotoluene.	(T)
K116	Organic condensate from the solvent recovery column in the production of toluene diisocyanate via phosgenation of toluenediamine.	(T)
K117	Wastewater from the reactor vent gas scrubber in the production of ethylene dibromide via bromination of ethene.	(T)
K118	Spent adsorbent solids from purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.	(T)
K136	Still bottoms from the purification of ethylene dibromide in the production of ethylene dibromide via bromination of ethene.	(T)
K149	Distillation bottoms from the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups, (This waste does not include still bottoms from the distillation of benzyl chloride.).	(T)
K150	Organic residuals, excluding spent carbon adsorbent, from the spent chlorine gas and hydrochloric acid recovery processes associated with the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups.	(T)
K151	Wastewater treatment sludges, excluding neutralization and biological sludges, generated during the treatment of wastewaters from the production of alpha- (or methyl-) chlorinated toluenes, ring-chlorinated toluenes, benzoyl chlorides, and compounds with mixtures of these functional groups.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K156	Organic waste (including heavy ends, still bottoms, light ends, spent solvents, filtrates, and decantates) from the production of carbamates and carbamoyl oximes. This listing does not apply to wastes generated from the manufacture of 3-iodo-2-propynyl n-butylcarbamate.).	(T)
K157	Wastewaters (including scrubber waters, condenser waters, washwaters, and separation waters) from the production of carbamates and carbamoyl oximes. (This listing does not apply to wastes generated from the manufacture of 3-iodo-2-propynyl n-butylcarbamate.).	(T)
K158	Bag house dusts and filter/separation solids from the production of carbamates and carbamoyl oximes. (This listing does not apply to wastes generated from the manufacture of 3-iodo-2-propynyl n-butylcarbamate.).	(T)
K159	Organics from the treatment of thiocarbamate wastes.	(T)
K161	Purification solids (including filtration, evaporation, and centrifugation solids), bag house dust and floor sweepings from the production of dithiocarbamate acids and their salts. (This listing does not include K125 or K126.).	(R, T)
K174	Wastewater treatment sludges from the production of ethylene dichloride or vinyl chloride monomer including sludges that result from commingled ethylene dichloride or vinyl chloride monomer wastewater and other wastewater), unless the sludges meet the following conditions: (i) they are disposed of in a subtitle C or non-hazardous landfill licensed or permitted by the state or federal government; (ii) they are not otherwise placed on the land prior to final disposal; and (iii) the generator maintains documentation demonstrating that the waste was either disposed of in an on-site landfill or consigned to a transporter or disposal facility that provided a written commitment to dispose of the waste in an off-site landfill. Respondents in any action brought to enforce the requirements of subtitle C must, upon a showing by the government that the respondent managed wastewater treatment sludges from the production of vinyl chloride monomer or ethylene dichloride, demonstrate that they meet the terms of the exclusion set forth above. In doing so, they must provide appropriate documentation (e.g., contracts between the generator and the landfill owner/operator, invoices documenting delivery of waste to landfill, etc.) that the terms of the exclusion were met.	(T)
K175	Wastewater treatment sludges from the production of vinyl chloride monomer using mercuric chloride catalyst in an acetylene-based process.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K181	Nonwastewaters from the production of dyes and/or pigments (including nonwastewaters commingled at the point of generation with nonwastewaters from other processes) that, at the point of generation, contain mass loadings of any of the constituents identified in 40 CFR § 261.32(c) that are equal to or greater than the corresponding 40 CFR § 261.32(c) levels, as determined on a calendar year basis. These wastes will not be hazardous if the nonwastewaters are: (i) disposed in a Subtitle D landfill unit subject to the design criteria in 40 CFR § 258.40 , (ii) disposed in a Subtitle C landfill unit subject to either 40 CFR § 264.301 or § 265.301 , (iii) disposed in other Subtitle D landfill units that meet the design criteria in 40 CFR § 258.40 , § 264.301 , or § 265.301 , or (iv) treated in a combustion unit that is permitted under Subtitle C, or an onsite combustion unit that is permitted under the Clean Air Act. For the purposes of this listing, dyes and/or pigments production is defined in 40 CFR § 261.32(b)(1) . 40 CFR § 261.32(d) describes the process for demonstrating that a facility's nonwastewaters are not K181. This listing does not apply to wastes that are otherwise identified as hazardous under 40 CFR §§ 261.21-261.24 and 40 CFR 261.31-261.33 at the point of generation. Also, the listing does not apply to wastes generated before any annual mass loading limit is met.	(T)
Inorganic chemicals:		
K071	Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used.	(T)
K073	Chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using graphite anodes in chlorine production.	(T)
K106	Wastewater treatment sludge from the mercury cell process in chlorine production.	(T)
K176	Baghouse filters from the production of antimony oxide, including filters from the production of intermediates (e.g., antimony metal or crude antimony oxide).	(E)
K177	Slag from the production of antimony oxide that is speculatively accumulated or disposed, including slag from the production of intermediates (e.g., antimony metal or crude antimony oxide).	(T)
K178	Residues from manufacturing and manufacturing-site storage of ferric chloride from acids formed during the production of titanium dioxide using the chloride-ilmenite process.	(T)
Pesticides:		
K031	By-product salts generated in the production of MSMA and cacodylic acid.	(T)
K032	Wastewater treatment sludge from the production of chlordane.	(T)
K033	Wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane.	(T)
K034	Filter solids from the filtration of hexachlorocyclopentadiene in the production of chlordane.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K035	Wastewater treatment sludges generated in the production of creosote.	(T)
K036	Still bottoms from toluene reclamation distillation in the production of disulfoton.	(T)
K037	Wastewater treatment sludges from the production of disulfoton.	(T)
K038	Wastewater from the washing and stripping of phorate production.	(T)
K039	Filter cake from the filtration of diethylphosphorodithioic acid in the production of phorate.	(T)
K040	Wastewater treatment sludge from the production of phorate.	(T)
K041	Wastewater treatment sludge from the production of toxaphene.	(T)
K042	Heavy ends or distillation residues from the distillation of tetrachlorobenzene in the production of 2,4,5-T.	(T)
K043	2,6-Dichlorophenol waste from the production of 2,4-D.	(T)
K097	Vacuum stripper discharge from the chlordane chlorinator in the production of chlordane.	(T)
K098	Untreated process wastewater from the production of toxaphene.	(T)
K099	Untreated wastewater from the production of 2,4-D.	(T)
K123	Process wastewater (including supernates, filtrates, and washwaters) from the production of ethylenebisdithiocarbamic acid and its salt.	(T)
K124	Reactor vent scrubber water from the production of ethylenebisdithiocarbamic acid and its salts.	(C, T)
K125	Filtration, evaporation, and centrifugation solids from the production of ethylenebisdithiocarbamic acid and its salts.	(T)
K126	Baghouse dust and floor sweepings in milling and packaging operations from the production or formulation of ethylenebisdithiocarbamic acid and its salts.	(T)
K131	Wastewater from the reactor and spent sulfuric acid from the acid dryer from the production of methyl bromide.	(C,T)
K132	Spent absorbent and wastewater separator solids from the production of methyl bromide.	(T)
Explosives:		
K044	Wastewater treatment sludges from the manufacturing and processing of explosives.	(R)
K045	Spent carbon from the treatment of wastewater containing explosives.	(R)
K046	Wastewater treatment sludges from the manufacturing, formulation and loading of lead-based initiating compounds.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
K047	Pink/red water from TNT operations.	(R)
Petroleum refining:		
K048	Dissolved air flotation (DAF) float from the petroleum refining industry.	(T)
K049	Slop oil emulsion solids from the petroleum refining industry.	(T)
K050	Heat exchanger bundle cleaning sludge from the petroleum refining industry.	(T)
K051	API separator sludge from the petroleum refining industry.	(T)
K052	Tank bottoms (leaded) from the petroleum refining industry.	(T)
K169	Crude oil storage tank sediment from petroleum refining operations.	(T)
K170	Clarified slurry oil tank sediment and/or in-line filter/separation solids from petroleum refining operations.	(T)
K171	Spent Hydrotreating catalyst from petroleum refining operations, including guard beds used to desulfurize feeds to other catalytic reactors (this listing does not include inert support media).	(I, T)
K172	Spent Hydrorefining catalyst from petroleum refining operations, including guard beds used to desulfurize feeds to other catalytic reactors (this listing does not include inert support media).	(I, T)
Iron and steel:		
K061	Emission control dust/sludge from the primary production of steel in electric furnaces.	(T)
K062	Spent pickle liquor generated by steel finishing operations of facilities within the iron and steel industry (SIC Codes 331 and 332).	(C,T)
Primary aluminum:		
K088	Spent potliners from primary aluminum reduction.	(T)
Secondary lead:		
K069	Emission control dust/sludge from secondary lead smelting. (Note: This listing is stayed administratively for sludge generated from secondary acid scrubber systems. The stay will remain in effect until further administrative action is taken. If EPA takes further action effecting this stay, EPA will publish a notice of the action in the Federal Register).	(T)
K100	Waste leaching solution from acid leaching of emission control dust/sludge from secondary lead smelting.	(T)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Industry	Hazardous Waste	<i>Hazard Code</i>
EPA Hazardous Waste Code		
Veterinary pharmaceuticals:		
K084	Wastewater treatment sludges generated during the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.	(T)
K101	Distillation tar residues from the distillation of aniline-based compounds in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.	(T)
K102	Residue from the use of activated carbon for decolorization in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.	(T)
Ink formulation:		
K086	Solvent washes and sludges, caustic washes and sludges, or water washes and sludges from cleaning tubs and equipment used in the formulation of ink from pigments, driers, soaps, and stabilizers containing chromium and lead.	(T)
Coking:		
K060	Ammonia still lime sludge from coking operations.	(T)
K087	Decanter tank tar sludge from coking operations.	(T)
K141	Process residues from the recovery of coal tar, including, but not limited to, collecting sump residues from the production of coke from coal or the recovery of coke by-products produced from coal. This listing does not include K087 (decanter tank tar sludges from coking operations).	(T)
K142	Tar storage tank residues from the production of coke from coal or from the recovery of coke by-products produced from coal.	(T)
K143	Process residues from the recovery of light oil, including, but not limited to, those generated in stills, decanters, and wash oil recovery units from the recovery of coke by-products produced from coal.	(T)
K144	Wastewater sump residues from light oil refining, including, but not limited to, intercepting or contamination sump sludges from the recovery of coke by-products produced from coal.	(T)
K145	Residues from naphthalene collection and recovery operations from the recovery of coke by-products produced from coal.	(T)
K147	Tar storage tank residues from coal tar refining.	(T)
K148	Residues from coal tar distillation, including but not limited to, still bottoms.	(T)

APPENDIX II

Hazardous Constituents

Common Name	Chemical Abstracts Name	Chemical Abstracts No.	Hazardous Waste Code
A2213	Ethanimidothioic acid, 2- (dimethylamino) -N-hydroxy-2-oxo-, methyl ester	30558-43-1	U394
Acetonitrile	Same	75-05-8	U003
Acetophenone	Ethanone, 1-phenyl-	98-86-2	U004
2-Acetylaminefluorone	Acetamide, N-9H-fluoren-2-yl-	53-96-3	U005
Acetyl chloride	Same	75-36-5	U006
1-Acetyl-2-thiourea	Acetamide, N-(aminothioxomethyl)-	591-08-2	P002
Acrolein	2-Propenal	107-02-8	P003
Acrylamide	2-Propenamamide	79-06-1	U007
Acrylonitrile	2-Propenenitrile	107-13-1	U009
Aflatoxins	Same	1402-68-2	
Aldicarb	Propanal, 2-methyl-2-(methylthio)-, O-[(methylamino)carbonyl]oxime	116-06-3	P070
Aldicarb sulfone	Propanal, 2-methyl-2-(methylsulfonyl) -, O-[(methylamino) carbonyl] oxime	1646-88-4	P203
Aldrin	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-, (1 alpha,4alpha,4abeta,5alpha,8alpha,8abeta)-	309-00-2	P004
Allyl alcohol	2-Propen-1-ol	107-18-6	P005
Allyl chloride	1-Propane, 3-chloro	107-05-1	
Aluminum phosphide	Same	20859-73-8	P006
4-Aminobiphenyl	[1,1'-Biphenyl]-4-amine	92-67-1	
5-(Aminomethyl)-3-isoxazolol	3(2H)-Isoxazolone, 5-(aminomethyl)-	2763-96-4	P007
4-Aminopyridine	4-Pyridinamine	504-24-5	P008
Amitrole	1H-1,2,4-Triazol-3-amine	61-82-5	U011

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Common Name	Chemical Abstracts Name	Chemical Abstracts No.	Hazardous Waste Code
Ammonium vanadate	Vanadic acid, ammonium salt	7803-55-6	P119
Aniline	Benzenamine	62-53-3	U012
o-Anisidine (2-methoxyaniline)	Benzenamine, 2-Methoxy-	90-04-0	
Antimony	Same	7440-36-0	
Antimony compounds, N.O.S. ¹			
Aramite	Sulfurous acid, 2-chloroethyl 2-[4-(1,1-dimethylethyl)phenoxy]-1-methylethyl ester	140-57-8	
Arsenic	Same	7440-38-2	
Arsenic compounds, N.O.S. ¹			
Arsenic acid	Arsenic acid H ₃ AsO ₄	7778-39-4	P010
Arsenic pentoxide	Arsenic oxide As ₂ O ₅	1303-28-2	P011
Arsenic trioxide	Arsenic oxide As ₂ O ₃	1327-53-3	P012
Auramine	Benzenamine, 4,4'-carbonimidoylbis[N,N-dimethyl	492-80-8	U014
Azaserine	L-Serine, diazoacetate (ester)	115-02-6	U015
Barban	Carbamic acid, (3-chlorophenyl) -, 4-chloro-2-butynyl ester	101-27-9	U280
Barium	Same	7440-39-3	
Barium compounds, N.O.S. ¹			
Barium cyanide	Same	542-62-1	P013
Bendiocarb	1,3-Benzodioxol-4-ol, 2,2-dimethyl-, methyl carbamate	22781-23-3	U278
Bendiocarb phenol	1,3-Benzodioxol-4-ol, 2,2-dimethyl-,	22961-82-6	U364
Benomyl	Carbamic acid, [1- [(butylamino) carbonyl]- 1H-benzimidazol-2-yl] -, methyl ester	17804-35-2	U271
Benz[c]acridine	Same	225-51-4	U016
Benz[a]anthracene	Same	56-55-3	U018

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Common Name	Chemical Abstracts Name	Chemical Abstracts No.	Hazardous Waste Code
Benzal chloride	Benzene, (dichloromethyl)-	98-87-3	U017
Benzene	Same	71-43-2	U019
Benzenearsonic acid	Arsonic acid, phenyl-	98-05-5	
Benzidine	[1,1'-Biphenyl]-4,4'-diamine	92-87-5	U021
Benzo[b]fluoranthene	Benz[e]acephenanthrylene	205-99-2	
Benzo[j]fluoranthene	Same	205-82-3	
Benzo(k)fluoranthene	Same	207-08-9	
Benzo[a]pyrene	Same	50-32-8	U022
p-Benzoquinone	2,5-Cyclohexadiene-1,4-dione	106-51-4	U197
Benzotrichloride	Benzene, (trichloromethyl)-	98-07-7	U023
Benzyl chloride	Benzene, (chloromethyl)-	100-44-7	P028
Beryllium powder	Same	7440-41-7	P015
Beryllium compounds, N.O.S. ¹			
Bis(pentamethylene)-thiuram tetrasulfide	Piperidine, 1,1[prime]-(tetrathiodicarbonothioyl)-bis-	120-54-7	
Bromoacetone	2-Propanone, 1-bromo-	598-31-2	P017
Bromoform	Methane, tribromo-	75-25-2	U225
4-Bromophenyl phenyl ether	Benzene, 1-bromo-4-phenoxy-	101-55-3	U030
Brucine	Strychnidin-10-one, 2,3-dimethoxy-	357-57-3	P018
Butyl benzyl phthalate	1,2-Benzenedicarboxylic acid, butyl phenylmethyl ester	85-68-7	
Butylate	Carbamothioic acid, bis(2-methylpropyl)-, S-ethyl ester	2008-41-5	
Cacodylic acid	Arsinic acid, dimethyl-	75-60-5	U136
Cadmium	Same	7440-43-9	
Cadmium compounds, N.O.S. ¹			
Calcium chromate	Chromic acid H ₂ CrO ₄ , calcium salt	13765-19-0	U032

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Common Name	Chemical Abstracts Name	Chemical Abstracts No.	Hazardous Waste Code
Calcium cyanide	Calcium cyanide Ca(CN) ₂	592-01-8	P021
Carbaryl	1-Naphthalenol, methylcarbamate	63-25-2	U279
Carbendazim	Carbamic acid, 1H-benzimidazol-2-yl, methyl ester	10605-21-7	U372
Carbofuran	7-Benzofuranol, 2,3-dihydro-2,2-dimethyl-, methylcarbamate	1563-66-2	P127
Carbofuran phenol	7-Benzofuranol, 2,3-dihydro-2,2-dimethyl-	1563-38-8	U367
Carbon disulfide	Same	75-15-0	P022
Carbon oxyfluoride	Carbonic difluoride	353-50-4	U033
Carbon tetrachloride	Methane, tetrachloro-	56-23-5	U211
Carbosulfan	Carbamic acid, [(dibutylamino) thio] methyl-, 2,3-dihydro-2,2-dimethyl-7-benzofuranyl ester	55285-14-8	P189
Chloral	Acetaldehyde, trichloro-	75-87-6	U034
Chlorambucil	Benzenebutanoic acid, 4-[bis(2-chloroethyl)amino]-	305-03-3	U035
Chlordane	4,7-Methano-1H-indene, 1,2,4,5,6,7,8,8-octachloro-2,3,3a,4,7,7a-hexahydro-	57-74-9	U036
Chlordane (alpha and gamma isomers)			U036
Chlorinated benzenes, N.O.S. ¹			
Chlorinated ethane, N.O.S. ¹			
Chlorinated fluorocarbons, N.O.S. ¹			
Chlorinated naphthalene, N.O.S. ¹			
Chlorinated phenol, N.O.S. ¹			
Chlornaphazin	Naphthalenamine, N,N'-bis(2-chloroethyl)-	494-03-1	U026
Chloroacetaldehyde	Acetaldehyde, chloro-	107-20-0	P023
Chloroalkyl ethers, N.O.S. ¹			

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS

PROPOSED EMERGENCY RULE

APPENDIX III

Hazardous wastes which are Discarded Commercial Chemical Products or Off-Specification Batches of Commercial Chemical Products or Spill Residues of Either.

The following hazardous wastes are referred to in § 7-214.

Note: For the convenience of the regulated community, the primary hazardous properties of these materials have been indicated by the letters T (Toxicity), R (Reactivity), I (Ignitability) and C (Corrosivity). Absence of a letter indicates that the compound is only listed for toxicity.

Hazardous Waste Code	Chemical Abstracts No.	<i>Substance</i>
U394	30558-43-1	A2213
U001	75-07-0	Acetaldehyde (I)
U034	75-87-6	Acetaldehyde, trichloro-
U187	62-44-2	Acetamide, N-(4-ethoxyphenyl)-
U005	53-96-3	Acetamide, N-9H-fluoren-2-yl-
U240	¹ 94-75-7	Acetic acid, (2,4-dichlorophenoxy)-, salts & esters
U112	141-78-6	Acetic acid ethyl ester (I)
U144	301-04-2	Acetic acid, lead(2+) salt
U214	563-68-8	Acetic acid, thallium(1+) salt
see F027	93-76-5	Acetic acid, (2,4,5-trichlorophenoxy)-
U002	67-64-1	Acetone (I)
U003	75-05-8	Acetonitrile (I,T)
U004	98-86-2	Acetophenone
U005	53-96-3	2-Acetylaminofluorene
U006	75-36-5	Acetyl chloride (C,R,T)
U007	79-06-1	Acrylamide
U008	79-10-7	Acrylic acid (I)
U009	107-13-1	Acrylonitrile
U011	61-82-5	Amitrole
U012	62-53-3	Aniline (I,T)
U136	75-60-5	Arsinic acid, dimethyl-
U014	492-80-8	Auramine
U015	115-02-6	Azaserine

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Chemical Abstracts No.	<i>Substance</i>
U010	50-07-7	Azirino[2',3':3,4]pyrrolo[1,2-a]indole-4,7-dione, 6-amino-8-[[aminocarbonyloxy]methyl]-1,1a,2,8,8a,8b-hexahydro-8a-methoxy-5-methyl-, [1aS-(1aalpha, 8beta,8aalpha,8balpha)]-
U280	101-27-9	Barban
U278	22781-23-3	Bendiocarb
U364	22961-82-6	Bendiocarb phenol
U271	17804-35-2	Benomyl
U157	56-49-5	Benz[j]aceanthrylene, 1,2-dihydro-3-methyl-
U016	225-51-4	Benz[c]acridine
U017	98-87-3	Benzal chloride
U192	23950-58-5	Benzamide, 3,5-dichloro-N-(1,1-dimethyl-2-propynyl)-
U018	56-55-3	Benz[a]anthracene
U094	57-97-6	Benz[a]anthracene, 7,12-dimethyl-
U012	62-53-3	Benzenamine (I,T)
U014	492-80-8	Benzenamine, 4,4'-carbonimidoylbis[N,N-dimethyl-
U049	3165-93-3	Benzenamine, 4-chloro-2-methyl-, hydrochloride
U093	60-11-7	Benzenamine, N,N-dimethyl-4-(phenylazo)-
U328	95-53-4	Benzenamine, 2-methyl-
U353	106-49-0	Benzenamine, 4-methyl-
U158	101-14-4	Benzenamine, 4,4'-methylenebis[2-chloro-
U222	636-21-5	Benzenamine, 2-methyl-, hydrochloride
U181	99-55-8	Benzenamine, 2-methyl-5-nitro-
U019	71-43-2	Benzene (I,T)
U038	510-15-6	Benzeneacetic acid, 4-chloro-alpha-(4-chlorophenyl)-alpha-hydroxy-, ethyl ester
U030	101-55-3	Benzene, 1-bromo-4-phenoxy-
U035	305-03-3	Benzenebutanoic acid, 4-[bis(2-chloroethyl)amino]-
U037	108-90-7	Benzene, chloro-
U221	25376-45-8	Benzenediamine, ar-methyl-
U028	117-81-7	1,2-Benzenedicarboxylic acid, bis(2-ethylhexyl) ester
U069	84-74-2	1,2-Benzenedicarboxylic acid, dibutyl ester
U088	84-66-2	1,2-Benzenedicarboxylic acid, diethyl ester
U102	131-11-3	1,2-Benzenedicarboxylic acid, dimethyl ester

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Chemical Abstracts No.	<i>Substance</i>
U107	117-84-0	1,2-Benzenedicarboxylic acid, dioctyl ester
U070	95-50-1	Benzene, 1,2-dichloro-
U071	541-73-1	Benzene, 1,3-dichloro-
U072	106-46-7	Benzene, 1,4-dichloro-
U060	72-54-8	Benzene, 1,1'-(2,2-dichloroethylidene)bis[4-chloro-
U017	98-87-3	Benzene, (dichloromethyl)-
U223	26471-62-5	Benzene, 1,3-diisocyanatomethyl- (R,T)
U239	1330-20-7	Benzene, dimethyl- (I)
U201	108-46-3	1,3-Benzenediol
U127	118-74-1	Benzene, hexachloro-
U056	110-82-7	Benzene, hexahydro- (I)
U220	108-88-3	Benzene, methyl-
U105	121-14-2	Benzene, 1-methyl-2,4-dinitro-
U106	606-20-2	Benzene, 2-methyl-1,3-dinitro-
U055	98-82-8	Benzene, (1-methylethyl)- (I)
U169	98-95-3	Benzene, nitro-
U183	608-93-5	Benzene, pentachloro-
U185	82-68-8	Benzene, pentachloronitro-
U020	98-09-9	Benzenesulfonic acid chloride (C,R)
U020	98-09-9	Benzenesulfonyl chloride (C,R)
U207	95-94-3	Benzene, 1,2,4,5-tetrachloro-
U061	50-29-3	Benzene, 1,1'-(2,2,2-trichloroethylidene)bis[4-chloro-
U247	72-43-5	Benzene, 1,1'-(2,2,2-trichloroethylidene)bis[4- methoxy-
U023	98-07-7	Benzene, (trichloromethyl)-
U234	99-35-4	Benzene, 1,3,5-trinitro-
U021	92-87-5	Benzidine
U202	¹ 81-07-2	1,2-Benzisothiazol-3(2H)-one, 1,1-dioxide, & salts
U278	22781-23-3	1,3-Benzodioxol-4-ol, 2,2-dimethyl-,methyl carbamate
U364	22961-82-6	1,3-Benzodioxol-4-ol, 2,2-dimethyl-,
U203	94-59-7	1,3-Benzodioxole, 5-(2-propenyl)-
U141	120-58-1	1,3-Benzodioxole, 5-(1-propenyl)-

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Hazardous Waste Code	Chemical Abstracts No.	<i>Substance</i>

APPENDIX IV

Acutely Hazardous Wastes

The following list of acutely hazardous wastes is referred to in § 7-215.

Note: For the convenience of the regulated community the primary hazardous properties of these materials have been indicated by the letters T (Toxicity), and R (Reactivity). Absence of a letter indicates that the compound only is listed for acute toxicity.

Hazardous Waste Code	Chemical Abstracts No.	<i>Substance</i>
P023	107-20-0	Acetaldehyde, chloro-
P002	591-08-2	Acetamide, N-(aminothioxomethyl)-
P057	640-19-7	Acetamide, 2-fluoro-
P058	62-74-8	Acetic acid, fluoro-, sodium salt
P002	591-08-2	1-Acetyl-2-thiourea
P003	107-02-8	Acrolein
P070	116-06-3	Aldicarb
P203	1646-88-4	Aldicarb sulfone
P004	309-00-2	Aldrin
P005	107-18-6	Allyl alcohol
P006	20859-73-8	Aluminum phosphide (R,T)
P007	2763-96-4	5-(Aminomethyl)-3-isoxazolol
P008	504-24-5	4-Aminopyridine
P009	131-74-8	Ammonium picrate (R)
P119	7803-55-6	Ammonium vanadate
P099	506-61-6	Argentate(1-), bis(cyano-C)-, potassium
P010	7778-39-4	Arsenic acid H ₃ AsO ₄
P012	1327-53-3	Arsenic oxide As ₂ O ₃
P011	1303-28-2	Arsenic oxide As ₂ O ₅
P011	1303-28-2	Arsenic pentoxide
P012	1327-53-3	Arsenic trioxide
P038	692-42-2	Arsine, diethyl-

APPENDIX V

**Instructions for Completing the Uniform Hazardous Waste Manifest
(U.S. EPA Form 8700–22) and Continuation Sheet (U.S. EPA Form 8700–22A)**

- *Read all instructions before completing these forms.*
- *These forms have been designed for use on a 12-pitch (elite) typewriter and are compatible with standard computer printers; a firm point pen may also be used—press down hard.*

Manifest (U.S. EPA Form 8700–22; See page Appendix-9 for an example)

I. Instructions for Generators

Item 1. Generator's U.S. EPA Identification Number

Enter the generator's U.S. EPA twelve digit identification number, or the State generator identification number if the generator site does not have an EPA identification number.

Item 2. Page 1 of _

Enter the total number of pages used to complete this Manifest (*i.e.*, the first page (EPA Form 8700–22) plus the number of Continuation Sheets (EPA Form 8700–22A), if any).

Item 3. Emergency Response Phone Number

Enter a phone number for which emergency response information can be obtained in the event of an incident during transportation. The emergency response phone number must:

1. Be the number of the generator or the number of an agency or organization who is capable of and accepts responsibility for providing detailed information about the shipment;
2. Reach a phone that is monitored 24 hours a day at all times the waste is in transportation (including transportation related storage); and
3. Reach someone who is either knowledgeable of the hazardous waste being shipped and has comprehensive emergency response and spill cleanup/incident mitigation information for the material being shipped or has immediate access to a person who has that knowledge and information about the shipment.

Note: Emergency Response phone number information should only be entered in Item 3 when there is one phone number that applies to all the waste materials described in Item 9b. If a situation (*e.g.*, consolidated shipments) arises where more than one Emergency Response phone number applies to the various wastes listed on the manifest, the phone numbers associated with each specific material should be entered after its description in Item 9b.

Item 4. Manifest Tracking Number

This unique tracking number must be pre-printed on the manifest by the forms printer.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Item 5. Generator's Mailing Address, Phone Number and Site Address

Enter the name of the generator, the mailing address to which the completed manifest signed by the designated facility should be mailed, and the generator's telephone number. Note, the telephone number (including area code) should be the normal business number for the generator, or the number where the generator or his authorized agent may be reached to provide instructions in the event the designated and/or alternate (if any) facility rejects some or all of the shipment. Also enter the physical site address from which the shipment originates only if this address is different than the mailing address.

Item 6. Transporter 1 Company Name, and U.S. EPA ID Number

Enter the company name and U.S. EPA ID number of the first transporter who will transport the waste. Vehicle or driver information may not be entered here.

Item 7. Transporter 2 Company Name and U.S. EPA ID Number

If applicable, enter the company name and U.S. EPA ID number of the second transporter who will transport the waste. Vehicle or driver information may not be entered here.

If more than two transporters are needed, use a Continuation Sheet(s) (EPA Form 8700–22A).

Item 8. Designated Facility Name, Site Address, and U.S. EPA ID Number

Enter the company name and site address of the facility designated to receive the waste listed on this manifest. Also enter the facility's phone number and the U.S. EPA twelve digit identification number of the facility.

Item 9. U.S. DOT Description (Including Proper Shipping Name, Hazard Class or Division, Identification Number, and Packing Group)

Item 9a. If the wastes identified in Item 9b consist of both hazardous and nonhazardous materials, then identify the hazardous materials by entering an "X" in this Item next to the corresponding hazardous material identified in Item 9b.

If applicable, enter the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

Item 9b. Enter the U.S. DOT Proper Shipping Name, Hazard Class or Division, Identification Number (UN/NA) and Packing Group for each waste as identified in 49 CFR 172. Include technical name(s) and reportable quantity references, if applicable.

Note: If additional space is needed for waste descriptions, enter these additional descriptions in Item 27 on the Continuation Sheet (EPA Form 8700–22A). Also, if more than one Emergency Response phone number applies to the various wastes described in either Item 9b or Item 27, enter applicable Emergency Response phone numbers immediately following the shipping descriptions for those Items.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Item 10. Containers (Number and Type)

Enter the number of containers for each waste and the appropriate abbreviation from Table I (below) for the type of container.

Table I Types of Containers

BA = Burlap, cloth, paper, or plastic bags.
CF = Fiber or plastic boxes, cartons, cases.
CM = Metal boxes, cartons, cases (including roll-offs).
CW = Wooden boxes, cartons, cases.
CY = Cylinders.
DF = Fiberboard or plastic drums, barrels, kegs.
DM = Metal drums, barrels, kegs.
DT = Dump truck.
DW = Wooden drums, barrels, kegs.
HG = Hopper or gondola cars.
TC = Tank cars.
TP = Portable tanks.
TT = Cargo tanks (tank trucks).

Item 11. Total Quantity

Enter, in designated boxes, the total quantity of waste. Round partial units to the nearest whole unit, and *do not* enter decimals or fractions. To the extent practical, report quantities using appropriate units of measure that will allow you to report quantities with precision. Waste quantities entered should be based on actual measurements or reasonably accurate estimates of actual quantities shipped. Container capacities are not acceptable as estimates.

Item 12. Units of Measure (Weight/Volume)

Enter, in designated boxes, the appropriate abbreviation from Table II (below) for the unit of measure.

Table II Units of Measure

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

G = Gallons (liquids only).
K = Kilograms.
L = Liters (liquids only).
M = Metric Tons (1000 kilograms).
N = Cubic Meters.
P = Pounds.
T = Tons (2000 pounds).
Y = Cubic Yards.

Note: Tons, Metric Tons, Cubic Meters, and Cubic Yards should only be reported in connection with very large bulk shipments, such as rail cars, tank trucks, or barges.

Item 13. Waste Codes

Enter up to six federal and state waste codes to describe each waste stream identified in Item 9b. State waste codes that are not redundant with federal codes must be entered here, in addition to the federal waste codes which are most representative of the properties of the waste.

Pursuant to § 7-702(a)(5), a generator of waste subject to an alternative tax rate must use the appropriate tax code listed in **Appendix VI** in order for the Secretary to recognize the alternative rate.

Item 14. Special Handling Instructions and Additional Information.

1. Generators may enter any special handling or shipment-specific information necessary for the proper management or tracking of the materials under the generator's or other handler's business processes, such as waste profile numbers, container codes, bar codes, or response guide numbers. Generators also may use this space to enter additional descriptive information about their shipped materials, such as chemical names, constituent percentages, physical state, or specific gravity of wastes identified with volume units in Item 12.
2. This space may be used to record limited types of federally required information for which there is no specific space provided on the manifest, including any alternate facility designations; the manifest tracking number of the original manifest for rejected wastes and residues that are re-shipped under a second manifest; and the specification of PCB waste descriptions and PCB out-of-service dates required under 40 CFR 761.207. Generators, however, cannot be required to enter information in this space to meet state regulatory requirements.

Item 15. Generator's/Offeror's Certifications

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

1. The generator must read, sign, and date the waste minimization certification statement. In signing the waste minimization certification statement, those generators who have not been exempted by statute or regulation from the duty to make a waste minimization certification under section 3002(b) of RCRA are also certifying that they have complied with the waste minimization requirements. The Generator's Certification also contains the required attestation that the shipment has been properly prepared and is in proper condition for transportation (the shipper's certification). The content of the shipper's certification statement is as follows: "I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked, and labeled/placarded, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent." When a party other than the generator prepares the shipment for transportation, this party may also sign the shipper's certification statement as the offeror of the shipment.
2. Generator or Offeror personnel may preprint the words, "On behalf of" in the signature block or may hand write this statement in the signature block prior to signing the generator/offeror certification, to indicate that the individual signs as the employee or agent of the named principal.

Note: All of the above information except the handwritten signature required in Item 15 may be pre-printed.

II. Instructions for International Shipment Block

Item 16. International Shipments

For export shipments, the primary exporter must check the export box, and enter the point of exit (city and state) from the United States. For import shipments, the importer must check the import box and enter the point of entry (city and state) into the United States. For exports, the transporter must sign and date the manifest to indicate the day the shipment left the United States. Transporters of hazardous waste shipments must deliver a copy of the manifest to the U.S. Customs when exporting the waste across U.S. borders.

III. Instructions for Transporters

Item 17. Transporters' Acknowledgments of Receipt

Enter the name of the person accepting the waste on behalf of the first transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt. Only one signature per transportation company is required. Signatures are not required to track the movement of wastes in and out of transfer facilities, unless there is a change of custody between transporters.

If applicable, enter the name of the person accepting the waste on behalf of the second transporter. That person must acknowledge acceptance of the waste described on the manifest by signing and entering the date of receipt.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Note: Transporters carrying imports, who are acting as importers, may have responsibilities to enter information in the International Shipments Block. Transporters carrying exports may also have responsibilities to enter information in the International Shipments Block. See above instructions for Item 16.

IV. Instructions for Owners and Operators of Treatment, Storage, and Disposal Facilities

Item 18. Discrepancy

Item 18a. Discrepancy Indication Space

1. The authorized representative of the designated (or alternate) facility's owner or operator must note in this space any discrepancies between the waste described on the Manifest and the waste actually received at the facility. Manifest discrepancies are: significant differences (as defined by § 7-704(g)(2)) between the quantity or type of hazardous waste designated on the manifest or shipping paper, and the quantity and type of hazardous waste a facility actually receives, rejected wastes, which may be a full or partial shipment of hazardous waste that the TSDF cannot accept, or container residues, which are residues that exceed the quantity limits for “empty” containers set forth in § 7-203(j).
2. For rejected loads and residues (§§ 7-704(g)(1)(B) and (C), and § 7-704(g)(4)), check the appropriate box if the shipment is a rejected load (i.e., rejected by the designated and/or alternate facility and is sent to an alternate facility or returned to the generator) or a regulated residue that cannot be removed from a container. Enter the reason for the rejection or the inability to remove the residue and a description of the waste. Also, reference the manifest tracking number for any additional manifests being used to track the rejected waste or residue shipment on the original manifest. Indicate the original manifest tracking number in Item 14, the Special Handling Block and Additional Information Block of the additional manifests.
3. Owners or operators of facilities located in unauthorized States (i.e., states in which the U.S. EPA administers the hazardous waste management program) who cannot resolve significant differences in quantity or type within 15 days of receiving the waste must submit to their Regional Administrator a letter with a copy of the Manifest at issue describing the discrepancy and attempts to reconcile it (§ 7-704(g)(3)).
4. Owners or operators of facilities located in authorized States (i.e., those States that have received authorization from the U.S. EPA to administer the hazardous waste management program) should contact their State agency for information on where to report discrepancies involving “significant differences” to state officials.

Item 18b. Alternate Facility (or Generator) for Receipt of Full Load Rejections

Enter the name, address, phone number, and EPA Identification Number of the Alternate Facility which the rejecting TSDF has designated, after consulting with the generator, to receive a fully rejected waste shipment. In the event that a fully rejected shipment is being returned to the generator, the rejecting TSDF may enter the generator's site information in this space. This field is not to be used to forward partially rejected loads or residue waste shipments.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Item 18c. Alternate Facility (or Generator) Signature

The authorized representative of the alternate facility (or the generator in the event of a returned shipment) must sign and date this field of the form to acknowledge receipt of the fully rejected wastes or residues identified by the initial TSDF.

Item 19. Hazardous Waste Report Management Method Codes

Enter the most appropriate Management Method code, found in the Hazardous Waste Report (EPA Form 8700-13A/B), for each waste listed in Item 9. The Hazardous Waste Report Management Method code is to be entered by the first treatment, storage, or disposal facility (TSDF) that receives the waste and is the code that best describes the way in which the waste is to be managed when received by the TSDF.

Item 20. Designated Facility Owner or Operator Certification of Receipt (Except As Noted in Item 18a)

Enter the name of the person receiving the waste on behalf of the owner or operator of the facility. That person must acknowledge receipt or rejection of the waste described on the Manifest by signing and entering the date of receipt or rejection where indicated. Since the Facility Certification acknowledges receipt of the waste except as noted in the Discrepancy Space in Item 18a, the certification should be signed for both waste receipt and waste rejection, with the rejection being noted and described in the space provided in Item 18a. Fully rejected wastes may be forwarded or returned using Item 18b after consultation with the generator. Enter the name of the person accepting the waste on behalf of the owner or operator of the alternate facility or the original generator. That person must acknowledge receipt or rejection of the waste described on the Manifest by signing and entering the date they received or rejected the waste in Item 18c. Partially rejected wastes and residues must be re-shipped under a new manifest, to be initiated and signed by the rejecting TSDF as offeror of the shipment.

Continuation Sheet (U.S. EPA Form 8700-22A; See page Appendix V-10 for an example)

This form must be used as a continuation sheet to U.S. EPA Form 8700-22 if:

- More than two transporters are to be used to transport the waste; or
- More space is required for the U.S. DOT descriptions and related information in Item 9 of U.S. EPA Form 8700-22.

V. Instructions for Generators

Item 21. Generator's ID Number

Enter the generator's U.S. EPA twelve digit identification number or, the State generator identification number if the generator site does not have an EPA identification number.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Item 22. Page _—

Enter the page number of this Continuation Sheet.

Item 23. Manifest Tracking Number

Enter the Manifest Tracking number from Item 4 of the Manifest form to which this continuation sheet is attached.

Item 24. Generator's Name—

Enter the generator's name as it appears in Item 5 on the first page of the Manifest.

Item 25. Transporter—Company Name

If additional transporters are used to transport the waste described on this Manifest, enter the company name of each additional transporter in the order in which they will transport the waste. Enter after the word “Transporter” the order of the transporter. For example, Transporter 3 Company Name. Also enter the U.S. EPA twelve digit identification number of the transporter described in Item 25.

Item 26. Transporter—Company Name

If additional transporters are used to transport the waste described on this Manifest, enter the company name of each additional transporter in the order in which they will transport the waste. Enter after the word “Transporter” the order of the transporter. For example, Transporter 4 Company Name. Each Continuation Sheet can record the names of two additional transporters. Also enter the U.S. EPA twelve digit identification number of the transporter named in Item 26.

Item 27. U.S. D.O.T. Description Including Proper Shipping Name, Hazardous Class, and ID Number (UN/NA)

For each row enter a sequential number under Item 27b that corresponds to the order of wastes from one continuation sheet to the next, to reflect the total number of wastes being shipped. Refer to instructions for Item 9 of the manifest for the information to be entered.

Item 28. Containers (No. And Type)

Refer to the instructions for Item 10 of the manifest for information to be entered.

Item 29. Total Quantity

Refer to the instructions for Item 11 of the manifest form.

Item 30. Units of Measure (Weight/Volume)

Refer to the instructions for Item 12 of the manifest form.

Item 31. Waste Codes

Refer to the instructions for Item 13 of the manifest form.

Item 32. Special Handling Instructions and Additional Information

Refer to the instructions for Item 14 of the manifest form.

VI. Instructions for Transporters

Item 33. Transporter—Acknowledgment of Receipt of Materials

Enter the same number of the Transporter as identified in Item 25. Enter also the name of the person accepting the waste on behalf of the Transporter (Company Name) identified in Item 25. That person must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

Item 34. Transporter—Acknowledgment of Receipt of Materials

Enter the same number of the Transporter as identified in Item 26. Enter also the name of the person accepting the waste on behalf of the Transporter (Company Name) identified in Item 26. That person must acknowledge acceptance of the waste described on the Manifest by signing and entering the date of receipt.

VII. Instructions for Owner and Operators of Treatment, Storage, or Disposal Facilities

Item 35. Discrepancy Indication Space

Refer to Item 18. This space may be used to more fully describe information on discrepancies identified in Item 18a of the manifest form.

Item 36. Hazardous Waste Report Management Method Codes

For each field here, enter the sequential number that corresponds to the waste materials described under Item 27, and enter the appropriate process code that describes how the materials will be processed when received. If additional continuation sheets are attached, continue numbering the waste materials and process code fields sequentially, and enter on each sheet the process codes corresponding to the waste materials identified on that sheet.

APPENDIX VI

Vermont Tax Codes

Unless one of the following tax codes apply, all manifested shipments of hazardous waste initiated in Vermont will be taxed at the rate specified in **32 VSA § 10103(a)(2)**. These tax codes must be entered into the Waste Codes section of the federal Uniform Hazardous Waste Manifest (Forms 8700-22 and 8700-22A (Rev. 3-05)) for a reduced tax rate or exemption to apply.

SPECIAL TAX RATE CODES:

VX50 Aggregated Waste [32 VSA § 10103(a)(3)]

Hazardous waste destined for any form of management shall be taxed at the rate of 1.0 cent per pound, if all of the following apply:

- (A) it is shipped from a storage or collection facility for which financial responsibility is required and maintained under section 6605 or 6606 of Title 10 or the rules adopted under those sections;
- (B) it is not generated by the owner or operator of the storage or collection facility;
- (C) it has not been previously taxed in Vermont; and
- (D) it has not been held on-site for more than 180 days.

VX51 Recycling Rate [32 VSA § 10103(a)(1)]

Hazardous waste destined to be recycled for a beneficial purpose as defined in section 7-602 of these regulations, except if it meets the criteria for aggregated waste (VX50) above, shall be taxed at the rate of 11 cents per gallon of liquid or 1.4 cents per pound of solid.

TAX EXEMPT CODES:

The following wastes and materials are not subject to the tax imposed at 32 VSA § 10103(a):

VX60 Household Hazardous Waste (HHW) [VHWMR § 7-203(a)]

Household hazardous waste, including household waste that has been collected, transported, stored, treated, disposed, recovered (e.g., refuse-derived fuel) or reused. Household waste does not include hazardous waste generated at home-based businesses.

VX61 Federal Generators

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Wastes generated by the federal government or federal governmental entities. This exemption generally does not apply to federal contractors.

VX62 Environmental Contingency Fund (ECF) [32 VSA § 10103(b)(1)]

Hazardous waste which is generated as a result of any action taken under section 1283 of Title 10 for which disbursements from the environmental contingency fund have been or will be made by the secretary.

VX63 Internal Shipments

Internal shipments within captive storage facilities. Waste from captive storage facilities is taxed when it is shipped to an off-site designated facility.

VX64 Previously Taxed Waste [32 VSA § 10103(b)(6)]

Hazardous waste that has been previously subject to the tax of 32 § VSA 10103, provided: (a) the person shipping the previously taxed waste has not held the waste for more than 180 days, and (b) if the waste has been mixed, the resulting mixture does not change the applicable U.S. Department of Transportation shipping description from that which applied before the waste was mixed.

VX65 Imports from a Foreign Country [32 VSA § 10103(c)(2)]

Any person who initiates a manifest to import hazardous waste into Vermont from a foreign country shall not be required to pay a tax under 32 VSA § 10103(a).

VX66 Redevelopment of Contaminated Properties Program (RCPP) [32 VSA § 10103(b)(7)]

Hazardous waste shipped in implementing a corrective action plan approved under 10 V.S.A. § 6615a, the redevelopment of contaminated properties program, provided that the secretary issues a certificate of completion, as provided under that section.

VX67 Specific Waivers [32 VSA § 10102(a)(2)]

Where the secretary of natural resources has determined, on a case-by-case basis, that this tax should not apply to a particular waste or generator.

Note: The VT99 Code should be used to describe non-hazardous wastes that do not require a unique identity on a manifest for either data tracking or tax purposes.

APPENDIX VII

Examples of Potentially Incompatible Waste

Many hazardous wastes, when mixed with other waste or materials at a hazardous waste facility, can produce effects which are harmful to human health and the environment, such as (1) heat or pressure, (2) fire or explosion, (3) violent reaction, (4) toxic dusts, mists, fumes, or gases, or (5) flammable fumes or gases.

Below are examples of potentially incompatible wastes, waste components, and materials, along with the harmful consequences which result from mixing materials in one group with materials in another group. The list is intended as a guide to owners or operators of treatment, storage, and disposal facilities, and to enforcement and permit granting officials, to indicate the need for special precautions when managing these potentially incompatible waste materials or components.

This list is not intended to be exhaustive. An owner or operator must, as the regulations require, adequately analyze his or her wastes so that he or she can avoid creating uncontrolled substances or reactions of the type listed below, whether they are listed below or not.

It is possible for potentially incompatible wastes to be mixed in a way that precludes a reaction (e.g., adding acid to water rather than water to acid) or that neutralizes them (e.g., a strong acid mixed with a strong base), or that controls substances produced (e.g., by generating flammable gases in a closed tank equipped so that ignition cannot occur, and burning the gases in an incinerator).

In the lists below, the mixing of a **Group A** material with a **Group B** material may have the potential consequence as noted.

Group 1-A	Group 1-B
Acetylene sludge	Acid sludge
Alkaline caustic liquids	Acid and water
Alkaline cleaner	Battery acid
Alkaline corrosive liquids	Chemical cleaners
Alkaline corrosive battery fluid	Electrolyte, acid
Caustic wastewater	Etching acid liquid or solvent
Lime wastewater	Pickling liquor and other corrosive acids
Lime and water	Spent acid
Spent caustic	Spent mixed acid
	Spent sulfuric acid

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Potential consequences: Heat generation; violent reaction.

Group 2-A	Group 2-B
Aluminum Beryllium Calcium Lithium Magnesium Potassium Sodium Zinc powder Other reactive metals and metal hydrides	Any waste in Group 1-A or 1-B

Potential consequences: Fire or explosion; generation of flammable hydrogen gas.

Group 3-A	Group 3-B
Alcohols Water	Any concentrated waste in Groups 1-A or 1-B Calcium Lithium Metal hydrides Potassium SO ₂ Cl ₂ , SOCl ₂ , PCl ₃ , CH ₃ SiCl ₃ Other water-reactive waste

Potential consequences: Fire, explosion, or heat generation; generation of flammable or toxic gases.

Group 4-A	Group 4-B
Alcohols Aldehydes Halogenated hydrocarbons Nitrated hydrocarbons Unsaturated hydrocarbons	Concentrated Group 1-A or 1-B wastes Group 2-A wastes

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

Other reactive organic compounds and solvents	
---	--

Potential consequences: Fire, explosion, or violent reaction.

Group 5-A	Group 5-B
Spent cyanide and sulfide solutions	Group 1-B wastes

Potential consequences: Generation of toxic hydrogen cyanide or hydrogen sulfide gas.

Group 6-A	Group 6-B
Chlorates	Acetic acid and other organic acids
Chlorine	Concentrated mineral acids
Chlorites	Group 2-A wastes
Chromic acid	Group 4-A wastes
Hyphochlorites	Other flammable and combustible wastes
Nitrates	
Nitric acid, fuming	
Perchlorates	
Permanganates	
Peroxides	
Other strong oxidizers	

Potential consequences: Fire, explosion, or violent reaction.

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

APPENDIX IX

Basis for Listing Hazardous Waste

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
F001	Tetrachloroethylene, methylene chloride trichloroethylene, 1,1,1-trichloroethane, carbon tetrachloride, chlorinated fluorocarbons
F002	Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, 1,1,2-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane
F003	N.A.
F004	Cresols and cresylic acid, nitrobenzene
F005	Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, 2-ethoxyethanol, benzene, 2-nitropropane
F006	Cadmium, hexavalent chromium, nickel, cyanide (complexed)
F007	Cyanide (salts)
F008	Cyanide (salts)
F009	Cyanide (salts)
F010	Cyanide (salts)
F011	Cyanide (salts)
F012	Cyanide (complexed)
F019	Hexavalent chromium, cyanide (complexed)
F020	Tetra- and pentachlorodibenzo-p-dioxins; tetra and pentachlorodi-benzofurans; tri- and tetrachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amine and other salts
F021	Penta- and hexachlorodibenzo-p-dioxins; penta- and hexachlorodibenzofurans; pentachlorophenol and its derivatives
F022	Tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlorodibenzofurans
F023	Tetra-, and pentachlorodibenzo-p-dioxins; tetra- and pentachlorodibenzofurans; tri- and tetrachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amine and other salts

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
F024	Chloromethane, dichloromethane, trichloromethane, carbon tetrachloride, chloroethylene, 1,1-dichloroethane, 1,2-dichloroethane, trans-1-2-dichloroethylene, 1,1-dichloroethylene, 1,1,1-trichloroethane, 1,1,2-trichloroethane, trichloroethylene, 1,1,1,2-tetra-chloroethane, 1,1,2,2-tetrachloroethane, tetrachloroethylene, pentachloroethane, hexachloroethane, allyl chloride (3-chloropropene), dichloropropane, dichloropropene, 2-chloro-1,3-butadiene, hexachloro-1,3-butadiene, hexachlorocyclopentadiene, hexachlorocyclohexane, benzene, chlorobenzene, dichlorobenzenes, 1,2,4-trichlorobenzene, tetrachlorobenzene, pentachlorobenzene, hexachlorobenzene, toluene, naphthalene
F025	Chloromethane; Dichloromethane; Trichloromethane; Carbon tetrachloride; Chloroethylene; 1,1-Dichloroethane; 1,2-Dichloroethane; trans-1,2-Dichloroethylene; 1,1-Dichloroethylene; 1,1,1-Trichloroethane; 1,1,2-Trichloroethane; Trichloroethylene; 1,1,1,2-Tetrachloroethane; 1,1,2,2-Tetrachloroethane; Tetrachloroethylene; Pentachloroethane; Hexachloroethane; Allyl chloride (3-Chloropropene); Dichloropropane; Dichloropropene; 2-Chloro-1,3-butadiene; Hexachloro-1,3-butadiene; Hexachlorocyclopentadiene; Benzene; Chlorobenzene; Dichlorobenzene; 1,2,4-Trichlorobenzene; Tetrachlorobenzene; Pentachlorobenzene; Hexachlorobenzene; Toluene; Naphthalene
F026	Tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlorodibenzofurans
F027	Tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlorodibenzofurans; tri-, tetra-, and pentachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amine and other salts
F028	Tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlorodibenzofurans; tri-, tetra-, and pentachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amine and other salts
F032	Benz(a)anthracene, benzo(a)pyrene, dibenz(a,h)-anthracene, indeno(1,2,3-cd)pyrene, pentachlorophenol, arsenic, chromium, tetra-, penta-, hexa-, heptachlorodibenzo-p-dioxins, tetra-, penta-, hexa-, heptachlorodibenzofurans
F034	Benz(a)anthracene, benzo(k)fluoranthene, benzo(a)pyrene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene, naphthalene, arsenic, chromium.
F035	Arsenic, chromium, lead
F037	Benzene, benzo(a)pyrene, chrysene, lead, chromium
F038	Benzene, benzo(a)pyrene, chrysene, lead, chromium
F039	All constituents for which treatment standards are specified for multi-source leachate (wastewaters and nonwastewaters) under 40 CFR 268.43, Table CCW

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
K001	Pentachlorophenol, phenol, 2-chlorophenol, p-chloro-m-cresol, 2,4-dimethylphenyl, 2,4-dinitrophenol, trichlorophenols, tetrachlorophenols, 2,4-dinitrophenol, creosote, chrysene, naphthalene, fluoranthene, benzo(b)fluoranthene, benzo(a)pyrene, indeno(1,2,3-cd)pyrene, benz(a)anthracene, dibenz(a)anthracene, acenaphthalene
K002	Hexavalent chromium, lead
K003	Hexavalent chromium, lead
K004	Hexavalent chromium
K005	Hexavalent chromium, lead
K006	Hexavalent chromium
K007	Cyanide (complexed), hexavalent chromium
K008	Hexavalent chromium
K009	Chloroform, formaldehyde, methylene chloride, methyl chloride, paraldehyde, formic acid
K010	Chloroform, formaldehyde, methylene chloride, methyl chloride, paraldehyde, formic acid, chloroacetaldehyde
K011	Acrylonitrile, acetonitrile, hydrocyanic acid
K013	Hydrocyanic acid, acrylonitrile, acetonitrile
K014	Acetonitrile, acrylamide
K015	Benzyl chloride, chlorobenzene, toluene, benzotrichloride
K016	Hexachlorobenzene, hexachlorobutadiene, carbon tetrachloride, hexachloroethane, perchloroethylene
K017	Epichlorohydrin, chloroethers [bis(chloromethyl) ether and bis (2-chloroethyl) ethers], trichloropropane, dichloropropanols
K018	1,2-dichloroethane, trichloroethylene, hexachlorobutadiene, hexachlorobenzene
K019	Ethylene dichloride, 1,1,1-trichloroethane, 1,1,2-trichloroethane, tetrachloroethanes (1,1,2,2-tetrachloroethane and 1,1,1,2-tetrachloroethane), trichloroethylene, tetrachloroethylene, carbon tetrachloride, chloroform, vinyl chloride, vinylidene chloride
K020	Ethylene dichloride, 1,1,1-trichloroethane, 1,1,2-trichloroethane, tetrachloroethanes (1,1,2,2-tetrachloroethane and 1,1,1,2-tetrachloroethane), trichloroethylene, tetrachloroethylene, carbon tetrachloride, chloroform, vinyl chloride, vinylidene chloride
K021	Antimony, carbon tetrachloride, chloroform

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
K022	Phenol, tars (polycyclic aromatic hydrocarbons)
K023	Phthalic anhydride, maleic anhydride
K024	Phthalic anhydride, 1,4-naphthoquinone
K025	Meta-dinitrobenzene, 2,4-dinitrotoluene
K026	Paraldehyde, pyridines, 2-picoline
K027	Toluene diisocyanate, toluene-2, 4-diamine
K028	1,1,1-trichloroethane, vinyl chloride
K029	1,2-dichloroethane, 1,1,1-trichloroethane, vinyl chloride, vinylidene chloride, chloroform
K030	Hexachlorobenzene, hexachlorobutadiene, hexachloroethane, 1,1,1,2-tetrachloroethane, 1,1,2,2-tetrachloroethane, ethylene dichloride
K031	Arsenic
K032	Hexachlorocyclopentadiene
K033	Hexachlorocyclopentadiene
K034	Hexachlorocyclopentadiene
K035	Creosote, chrysene, naphthalene, fluoranthene benzo(b) fluoranthene, benzo(a)pyrene, indeno(1,2,3-cd) pyrene, benzo(a)anthracene, dibenzo(a)anthracene, acenaphthalene
K036	Toluene, phosphorodithioic and phosphorothioic acid esters
K037	Toluene, phosphorodithioic and phosphorothioic acid esters
K038	Phorate, formaldehyde, phosphorodithioic and phosphorothioic acid esters
K039	Phosphorodithioic and phosphorothioic acid esters
K040	Phorate, formaldehyde, phosphorodithioic and phosphorothioic acid esters
K041	Toxaphene
K042	Hexachlorobenzene, ortho-dichlorobenzene
K043	2,4-dichlorophenol, 2,6-dichlorophenol, 2,4,6-trichlorophenol
K044	N.A.
K045	N.A.
K046	Lead
K047	N.A.
K048	Hexavalent chromium, lead
K049	Hexavalent chromium, lead

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
K050	Hexavalent chromium
K051	Hexavalent chromium, lead
K052	Lead
K060	Cyanide, naphthalene, phenolic compounds, arsenic
K061	Hexavalent chromium, lead, cadmium
K062	Hexavalent chromium, lead
K069	Hexavalent chromium, lead, cadmium
K071	Mercury
K073	Chloroform, carbon tetrachloride, hexachloroethane, trichloroethane, tetrachloroethylene, dichloroethylene, 1,1,2,2-tetrachloroethane
K083	Aniline, diphenylamine, nitrobenzene, phenylenediamine
K084	Arsenic
K085	Benzene, dichlorobenzenes, trichlorobenzenes, tetrachlorobenzenes, pentachlorobenzene, hexachlorobenzene, benzyl chloride
K086	Lead, hexavalent chromium
K087	Phenol, naphthalene
K088	Cyanide (complexes)
K093	Phthalic anhydride, maleic anhydride
K094	Phthalic anhydride
K095	1,1,2-trichloroethane, 1,1,1,2-tetrachloroethane, 1,1,2,2-tetrachloroethane
K096	1,2-dichloroethane, 1,1,1-trichloroethane, 1,1,2-trichloroethane
K097	Chlordane, heptachlor
K098	Toxaphene
K099	2,4-dichlorophenol, 2,4,6-trichlorophenol
K100	Hexavalent chromium, lead, cadmium
K101	Arsenic
K102	Arsenic
K103	Aniline, nitrobenzene, phenylenediamine
K104	Aniline, benzene, diphenylamine, nitrobenzene, phenylenediamine
K105	Benzene, monochlorobenzene, dichlorobenzenes, 2,4,6-trichlorophenol
K106	Mercury
K107	1,1-Dimethylhydrazine (UDMH)

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
K108	1,1-Dimethylhydrazine (UDMH)
K109	1,1-Dimethylhydrazine (UDMH)
K110	1,1-Dimethylhydrazine (UDMH)
K111	2,4-Dinitrotoluene
K112	2,4-Toluenediamine, o-toluidine, p-toluidine, aniline
K113	2,4-Toluenediamine, o-toluidine, p-toluidine, aniline
K114	2,4-Toluenediamine, o-toluidine, p-toluidine
K115	2,4-Toluenediamine
K116	Carbon tetrachloride, tetrachloroethylene, chloroform, phosgene
K117	Ethylene dibromide
K118	Ethylene dibromide
K123	Ethylene thiourea
K124	Ethylene thiourea
K125	Ethylene thiourea
K126	Ethylene thiourea
K131	Dimethyl sulfate, methyl bromide
K132	Methyl bromide
K136	Ethylene dibromide
K141	Benzene, benz(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene
K142	Benzene, benz(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene
K143	Benzene, benz(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene
K144	Benzene, benz(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene
K145	Benzene, benz(a)anthracene, benzo(a)pyrene, dibenz(a,h)anthracene, naphthalene
K147	Benzene, benz(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene
K148	Benz(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene

VERMONT HAZARDOUS WASTE MANAGEMENT REGULATIONS
PROPOSED EMERGENCY RULE

EPA Hazardous Waste Code	<i>Hazardous constituents for which listed</i>
K149	Benzotrichloride, benzyl chloride, chloroform, chloromethane, chlorobenzene, 1,4-dichlorobenzene, hexachlorobenzene, pentachlorobenzene, 1,2,4,5-tetrachlorobenzene, toluene
K150	Carbon tetrachloride, chloroform, chloromethane, 1,4-dichlorobenzene, hexachlorobenzene, pentachlorobenzene, 1,2,4,5-tetrachlorobenzene, 1,1,2,2-tetrachloroethane, tetrachloroethylene, 1,2,4-trichlorobenzene
K151	Benzene, carbon tetrachloride, chloroform, hexachlorobenzene, pentachlorobenzene, toluene, 1,2,4,5-tetrachlorobenzene, tetrachloroethylene
K156	Benomyl, carbaryl, carbendazim, carbofuran, carbosulfan, formaldehyde, methylene chloride, triethylamine
K157	Carbon tetrachloride, formaldehyde, methyl chloride, methylene chloride, pyridine, triethylamine
K158	Benomyl, carbendazim, carbofuran, carbosulfan, chloroform, methylenechloride
K159	Benzene, butylate, eptc, molinate, pebulate, vernolate
K161	Antimony, arsenic, metam-sodium, ziram
K169	Benzene
K170	Benzo(a)pyrene, dibenz(a,h)anthracene, benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, 3-methylcholanthrene, 7, 12-dimethylbenz(a)anthracene
K171	Benzene, arsenic
K172	Benzene, arsenic
K174	1,2,3,4,6,7,8-Heptachlorodibenzo-p-dioxin (1,2,3,4,6,7,8-HpCDD), 1,2,3,4,6,7,8-Heptachlorodibenzofuran (1,2,3,4,6,7,8-HpCDF), 1,2,3,4,7,8,9-Heptachlorodibenzofuran (1,2,3,6,7,8,9-HpCDF), HxCDDs (All Hexachlorodibenzo-p-dioxins), HxCDFs (All Hexachlorodibenzofurans), PeCDDs (All Pentachlorodibenzo-p-dioxins), OCDD (1,2,3,4,6,7,8,9-Octachlorodibenzo-p-dioxin, OCDF (1,2,3,4,6,7,8,9-Octachlorodibenzofuran), PeCDFs (All Pentachlorodibenzofurans), TCDDs (All tetrachlorodi-benzo-p-dioxins), TCDFs (All tetrachlorodibenzofurans)
K175	Mercury
K176	Arsenic, Lead
K177	Antimony
K178	Thallium
K181	Aniline, o-anisidine, 4-chloroaniline, p-cresidine, 2,4-dimethylaniline, 1,2-phenylenediamine, 1,3-phenylenediamine

FOOTNOTE: N.A. -- Waste is hazardous because it fails the test for the characteristic of ignitability, corrosivity, or reactivity.
