

**Twenty-second Report on the  
Status of the Petroleum Cleanup Fund**

**10 VSA § 1941**

**January, 2010**

This report includes a review of Petroleum Cleanup Fund receipts and disbursements for the fiscal year 2009. An evaluation of the effectiveness of the Fund in meeting its legislative intent, and a review of the reasonableness of remediation costs is also included. This report also includes recommendations to address funding shortfalls in the heating fuel account. This report will also address two studies as mandated by the 2009 legislature.

Prepared by: The Petroleum Cleanup Fund Advisory Committee

## PETROLEUM CLEANUP FUND ADVISORY COMMITTEE MEMBERS

Jonathan Wood: Secretary, Agency of Natural Resources

P. Howard Flanders: Designated representative of the Commissioner,  
Department of Environmental Conservation (DEC)

Walt Daly: Designated representative of the Commissioner,  
Department of Banking and Insurance

Joe Choquette: Vermont Petroleum Association

Senator Mark MacDonald

Representative Gale Courcelle

Scott Bigger: Designated representative of Lowell T. Spillane,  
Retail gasoline dealer

Dick Barnes: A.R. Sandri, a licensed gasoline distributor

Matt Cota: Vermont Fuel Dealers Association

Peter Bourne: Bourne's Incorporated, a licensed fuel dealer

Rep. Leo Valliere Vermont Country Properties, a licensed real estate broker

## Executive Summary

This is the twenty-second annual report for the Petroleum Cleanup Fund (PCF). This report will provide a review of receipts and disbursements for fiscal year 2009, in accordance with 10 V.S.A. § 1941 and will evaluate the effectiveness of the PCF in meeting its legislative intent. This report will highlight serious financial challenges within the fund and will include proposed legislative changes. This report will also address two studies as mandated by the 2009 legislature.

The PCF continues to provide valuable assistance to both commercial and residential tank owners; **however under current conditions, the PCF is financially unsound.** A low fund balance will prevent the PCF from fulfilling its mission. Most importantly this means that:

- Future releases of petroleum contamination will not be cleaned up which will result in increased contaminant exposure to Vermonters and the environment;
- Existing contaminated sites will not be properly addressed;
- EPA will withdraw its approval of the PCF as a viable financial assurance mechanism. As a result tank owners will need to seek an alternative financial assurance mechanism, such as private insurance which is currently unavailable or unaffordable for most tank owners in Vermont; and,
- Suspension of the residential tank grant program. This program has been highly successful and helps to reduce the number of future releases. Failing to fund this program will result in increased cleanup costs.

The financial difficulties in the PCF are the result of transfers to the General Fund and expenses consistently exceeding revenues in the heating oil account. Since the establishment of the heating oil account in 2004 heating fuel expenditures have exceeded annual revenues. In each year since 2005, the heating fuel account had to be balanced by transferring \$750,000 to this account from the motor fuel account. A lack of funds in the heating oil account has **delayed** the cleanup of contaminated sites which increases the risk of human exposure to petroleum contamination. In addition, property owners and environmental cleanup contractors were put in a difficult financial situation while they waited to receive reimbursements. In FY10 there is likely to be very limited revenue to support heating oil cleanups, therefore it is likely that a number of **serious** releases do **not** get properly addressed. Vermonters and the environment will suffer from this situation. **To address this serious situation, the Committee recommends that the fee on heating oil be increased from 0.5 cents per gallon to one cent per gallon, effective as soon as possible.** Failure to take action will have serious consequences as future petroleum releases will not be able to be cleaned up.

The PCF helps Vermont tank owners by providing a financial responsibility mechanism and by providing financial resources necessary to remediate petroleum contamination at schools, homes, businesses, farms, churches, public work facilities and many other locations. The PCF provides a means to remediate releases that threaten public health and the environment. Petroleum releases have been discovered at more than 3,000 separate properties, with contamination discovered in drinking water wells, in the indoor air of homes and businesses, seeping into surface water bodies and at dangerous levels in public utility lines. Without the PCF many Vermont homeowners would be left struggling to fund expensive cleanups.

## **Description and Purpose**

This is the twenty-second annual report on the status of the PCF. This report will look at the effectiveness of the fund in meeting its intended purpose, will review the status of cleanups from motor fuel and heating oil releases from both aboveground and underground heating oil storage tanks, will review the farm and residential underground storage tank (UST) and aboveground (AST) grant program and will provide future PCF projections and recommendations for changes to the PCF. This report will also address two studies as mandated by the 2009 legislature.

In 1985, the General Assembly enacted Vermont's first law to regulate the construction, maintenance and operation of underground steel tanks used for the storage of petroleum products. Act 66 of the 1985 session established standards for new construction, and set a deadline of June 30, 1998, later amended to December 22, 1998, for the removal or replacement of unprotected USTs.

In 1988 the Legislature created the PCF, and appointed this Advisory Committee to oversee the financing, effectiveness and conduct of the program. The primary purpose of the PCF is to protect public health and the environment by paying for cleanup and restoration of contaminated soil and groundwater caused by releases from underground petroleum storage tanks, and to compensate third parties for property damage and bodily injury. Many changes have been made since 1988, including the inclusion of pollution coverage for aboveground storage tanks (ASTs) and a farm and residential UST and AST grant program. The Fund also provides loans to small marketers and small towns for tank replacement, and to all tank owners for upgrades to spill and overfill leak detection equipment.

The PCF provides financial assurance to UST owners, who are required by state and federal law to provide coverage for up to \$1 million for cleanup and \$1 million for third party liability. Since such affordable comprehensive insurance coverage continues to be difficult to find for tank owners, the PCF enables tank owners to meet their financial responsibility (FR) requirements. By law, the U.S. EPA must approve the operation and viability of a state fund before it may serve as a financial responsibility mechanism for UST owners. EPA accepted Vermont's fund as a financial assurance mechanism in 1990, with the requirement that a minimum balance of \$1 million be maintained.

In 2004, the Legislature extended coverage to homeowner heating oil tanks and enacted a fee on heating fuel to create a revenue source for the heating oil related activities covered by the PCF. The PCF was also divided into two separate accounts: a motor fuel account and a heating oil account, with both revenue and expenditures to be managed within each account.

**AST failure results in 100 gallon release in Lincoln, VT on January 5, 2009**

Revenue for the motor fuel account comes from an annual assessment fee of up to \$100 per tank on most underground tanks, and a “distributor licensing fee” of one cent per gallon of motor fuel sold in the state. Additional revenue comes from the repayment of loans, recovery of some costs from responsible parties, and interest accruing upon any cash balance in the fund. Revenue for the heating fuel account is generated from a licensing fee of one-half cent per gallon of heating oil and kerosene sold in the state.

Expenditures include the cost of cleanup, third party payments, loans to businesses and municipalities, grants to homeowners to assist in the removal of heating oil USTs and administrative expenses. Each uninsured cleanup undertaken in the state becomes eligible for fund assistance after the party responsible for the tank meets a certain “deductible,” a co-insurance payment based on the circumstances of ownership. For commercial entities, the deductible is set at \$10,000 per occurrence. For homeowners, a deductible of \$250 must be met. Owners of commercial heating oil ASTs meet a \$1,000 deductible.

The sunset date for collection of the motor fuel and heating fuel fees is April 1, 2016.

**100 gallon release from AST in Waterbury on May 26, 2009**

### **Risks to Fund Solvency**

The cash balance in the motor fuel account was sufficient enough to address all high priority cleanups in FY09. **However, the solvency of the fund is in jeopardy due to insufficient revenue for the heating oil account and legislative transfers of funds.** The table below details disbursements from the fund from both the motor fuel account and the heating fuel account. This table highlights the shortfalls in the heating oil account from 2005 until the present, as years 2005 -2008 required a \$750,000 transfer from the motor fuel account. In 2009 there were not sufficient funds to allow for a transfer of \$750,000, as needed to balance this account. This table also displays the legislative transfers since the fund was established in 1989. An actuarial study completed in 2005 found that the fund is technically insolvent (projected liabilities exceed assets of the fund) through 2011. A \$2.8 million transfer of funds out of the PCF in 2008 has further increased the gap between projected liabilities and fund assets.

## Annual Petroleum Cleanup Fund Expenses

Year	Motor Fuel (MF)	Heating Fuel (HF)	3rd Party (MF)	UST Loans (MF)	UST/AST Grants	MF to HF Transfers	Legislative Transfers
1989	\$954,767			\$104,725			(\$700,000)*
1990	\$854,456			\$1,091,742			\$1,000,000
1991	\$1,667,352		\$91,356	\$568,875			\$1,975,000
1992	\$2,735,743		\$246,653	\$473,567			\$750,000
1993	\$3,338,482		\$163,207	\$254,550			
1994	\$4,134,140	\$440,183	\$128,579	\$669,144			
1995	\$3,500,732	\$345,593	\$201,995	\$524,100			
1996	\$3,310,563	\$488,150	\$102,564	\$428,431			\$700,000
1997	\$3,214,204	\$204,487	\$183,473	\$989,125			
1998	\$3,522,001	\$229,284	\$180,275	\$208,740	\$6,412		(\$700,000)**
1999	\$3,738,822	\$409,768	\$548,796	\$349,800	\$20,600		
2000	\$5,118,522	\$813,761	\$229,195	\$80,000	\$52,000		
2001	\$5,257,006	\$676,352	\$394,092	\$234,245	\$80,665		
2002	\$3,106,777	\$297,238	\$216,969	\$322,418	\$120,211		\$1,776,000
2003	\$4,207,188	\$467,880	\$313,835	\$114,170	\$79,860		
2004	\$4,252,202	\$904,078	\$184,517	\$132,596	\$116,502		(\$530,000)**
2005	\$2,903,051	\$1,314,386	\$201,811	\$64,591	\$165,201	\$750,000	
2006	\$2,395,493	\$1,226,169	\$263,432	\$40,000	\$133,652	\$750,000	
2007	\$3,133,207	\$1,186,023	\$390,125	\$103,298	\$96,938	\$750,000	
2008	\$4,140,308	\$1,788,703	\$228,681	\$384,680	\$192,131	\$750,000	\$2,807,618
2009+	\$4,190,028	\$1,622,814	\$687,323	\$197,979	\$229,924	\$400,000	
<b>Total</b>	<b>\$69,675,044</b>	<b>\$12,414,869</b>	<b>\$4,956,878</b>	<b>\$7,336,776</b>	<b>\$1,294,096</b>	<b>\$3,400,000</b>	<b>\$7,078,618</b>

+ Projections for 2009 based on data up to 9/24/09.

\* The legislature provided a \$700,000 initial appropriation to the fund in 1989

\*\* repayment of past transfer

An unsound fund will prevent the PCF from fulfilling its mission. This includes:

- Future releases of petroleum contamination will not be cleaned up which will result in increased contaminant exposure to Vermonters and the environment;
- Existing contaminated sites will not be properly addressed;
- EPA will withdraw its approval of the PCF as a viable financial assurance mechanism. As a result tank owners will need to seek an alternative financial assurance mechanism, such as private insurance which is currently unavailable or unaffordable for most tank owners in Vermont; and,
- Suspension of the residential tank grant program. This program has been highly successful and helps to reduce the number of future releases. Failing to fund this program will result in increased cleanup costs.

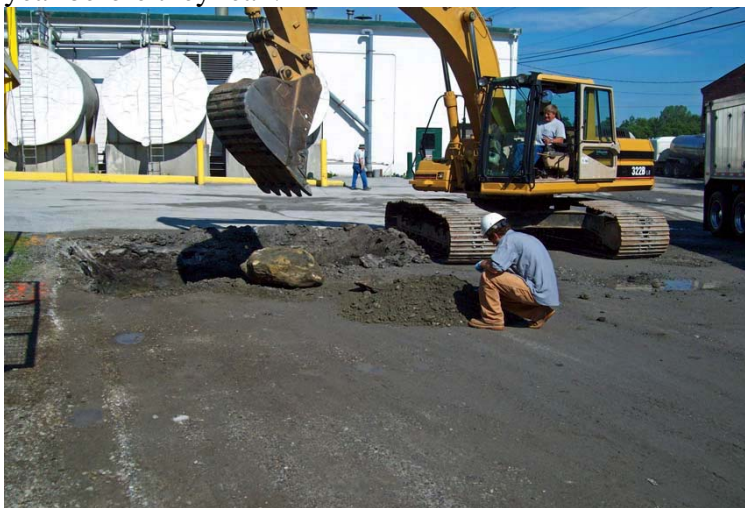

The large number of contaminated properties that are eligible for reimbursement under the Fund will continue to require significant PCF monies. Seventy-three new sites were discovered in 2009 adding to

the total of over 3,000 sites discovered statewide since 1988. This large number of contaminated properties will result in continued disbursements from the PCF. Additional funds are expected to be disbursed at older sites in part due to an EPA grant requirement to address our site backlog. Over 1,200 sites remain in an active status where PCF eligible work needs to be completed; with over 700 of these sites the result of a leaking motor fuel UST. **Due to a limited fund balance some low to medium priority motor fuel cleanups had to be put on hold resulting in increased contaminant exposure to Vermonters and the environment.** The sites that are on hold are detailed in the table below.

Reimbursements for releases at heating fuel sites remain consistent from year to year, averaging slightly more than \$1.5 million per year, while income has been on a general decline each year. In 2005 the heating fuel fee generated \$930,367. In FY09 that same fee raised only \$698,810. Although the heating oil account ended the fiscal year with a positive balance, this was only accomplished due to a \$750,000 transfer of funds from the motor fuel account. Heating fuel releases continue to be discovered each year at a consistent level due in part to an aging heating fuel storage infrastructure as well as an increased awareness of this program. In addition, more and more owners of property in Vermont are removing their heating fuel tanks, many of these the result of private insurance companies requiring the removal of the heating fuel UST as a condition of renewing the homeowner's insurance policy. Heating fuel reimbursements have ensured remediation of petroleum contamination at schools, homes, businesses, farms, churches, public work facilities and many other locations. Attachment 3 provides a detailed list of properties that have received reimbursements from the PCF for heating fuel releases. The farm and residential grant program for heating fuel tanks continues to remain very successful, as hundreds of tanks are removed each year before they leak.

<b>PCF Sites with Cleanups on Hold</b>	
Site Name	Site Town
Steve's Mobil	Hartford
Springfield Jiffy Mart	Springfield
Fuel Stop	Rutland
former Portland Street Mini-Mart	St. Johnsbury
Pepsi Cola	Brattleboro

Terminal	Barton
Georgia Mobil	Georgia
7-11	Dover

**Petroleum contaminated soil excavation at bulk storage facility in St. Albans, June 2009**

The PCF's highest priority is to protect human health and the environment from exposure to petroleum-based solvents from tank releases. More than 3,000 separate properties have been discovered with contamination and many of these have affected drinking water wells, contaminated indoor air of homes and businesses, have migrated into surface water bodies and have been found at dangerous levels in public utility lines. For example, more than 200 separate sites have been discovered where nearly 1,000 public or private drinking water wells have been contaminated. Attachment 4 provides a list of the number of sites discovered each year that have had a direct affect on a sensitive receptor. To address human health and environmental exposures to releases the fund has authorized proactive measures which include rapid initial response to releases, providing bottled water and point-of-entry treatment for contaminated drinking water, aggressively recovering free product, protecting surface water bodies, indoor air remediation and mitigation of dangerous petroleum vapors.

Sites that have a direct affect on public health and the environment are the program's most critical priority and demand the greatest level of effort. These same sites also present the greatest risk to fund solvency. Over the history of the program, the sites that have affected public water supplies or sensitive environmental areas have required extensive remediation at a high cost to the PCF. A site discovered in 2002 in Hartland has over 30 public and private wells that have been contaminated with a gasoline additive, MTBE. This site will require a large disbursement of PCF monies to address this problem.

Third party claims constitute an uncertain risk. Cumulative third party claims of \$3.9 million to date represent only four percent of the total disbursements from the Fund. However, a major release in a critical area, such as a public water supply or high density residential area could result in a costly third party claim. It is important to maintain a sufficient balance in the PCF to ensure there are adequate funds to provide an immediate and effective response where public health is at risk.

Contaminated water supplies represent the majority of all third party claims. Future discovery of contaminated public water supplies is anticipated, since there are 47 leaking underground storage tank sites located in close proximity to public water supplies. There are an approximate 468 private wells at 156 sites serving an estimated population of over 1,400 people that have been contaminated by petroleum from leaking USTs. Attachment 4 shows the distribution of sites with a direct and immediate effect on public health and the environment over the past twenty-two years. The Fund continued to provide reimbursements to municipalities where petroleum contaminated soils were encountered during public water or sewer lines projects.

Legislative transfer of funds continues to be a risk to fund solvency. In FY09, \$2.8 million was transferred out of the PCF and as a result some cleanups have had to be delayed. According to a 2005 actuarial study, **“The Fund is projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011.”** This assessment did not foresee any potential legislative transfers of assets from the fund. Maintaining a healthy cash balance is important to the long-term success of the fund. The \$2.8 million legislative transfer of PCF funds expands the gap between projected liabilities and fund assets.

## **Review of Receipts to the Fund**

A review of fund receipts for FY09 is summarized in Attachment 1. In FY09, total fund receipts for the motor fuel account were \$5,317,224. Owners of “Category One” storage tanks paid \$182,300 in tank assessment fees, which was also a reduction over past years tank assessment fees. The distributor licensing fee, a one cent assessment per gallon of motor fuel sold in the state, contributed \$3,923,556.

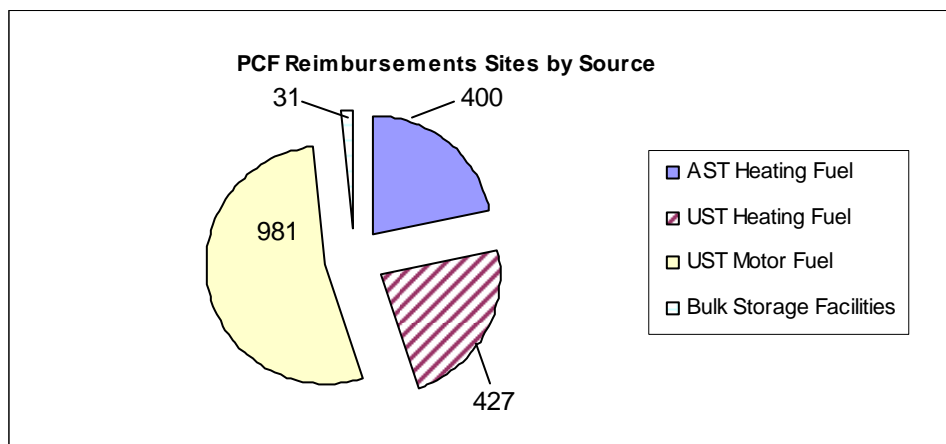

Other income includes the repayment of loans, \$201,928, and interest income of \$43,560. In addition, the state successfully recovered funds, most from settlements with insurance companies, totaling \$965,879.

In FY09, total fund receipts for the heating fuel account were \$698,810. This represented the collection of the half-cent per gallon fee on heating fuels. In addition, there was \$750,000 transferred from the motor fuel account.

### Review of Disbursements from the Fund

A review of fund disbursements for FY09 is summarized in Attachments 1, 2, and 3. In FY09, motor fuel account disbursements totaled \$8,589,510 and heating fuel disbursements totaled \$1,688,325. These included \$4,063,130 for remedial action for UST motor fuel sites, a \$2.8 million legislative transfer to the general fund, \$325,645 for the UST replacement loan program, \$39,000 for the residential UST removal grant program, \$150,360 for the residential AST removal grant program, \$618,012 for remedial action for UST heating fuel sites, \$612,721 for remedial action for AST heating fuel sites, \$291,230 for administrative costs, and \$261,863 for third party claims.

Disbursements for remediation represented a total of 1,839 different sites (Attachment 2 & 3), which includes sites where remediation occurred in prior years. The figure below provides a breakdown of the types of PCF reimbursement sites. These sites are located throughout Vermont in 196 different towns. Attachment 5 shows the distribution of these sites throughout the state.

Third party claims continue to represent a small portion of overall disbursements (four percent). To date the PCF has paid \$4,166,007 for all third party claims, with \$261,863 paid out in FY09.

### Investing in Prevention Activities

Important leak-prevention activities have been funded by the PCF over the years that have helped to mitigate risks and reduce future costs. These include providing grants to farm and residential properties to remove and replace aging aboveground and underground heating oil tanks, and providing interest free loans to upgrade underground storage tanks. The home heating oil tank removal grants were implemented (for USTs in 1998 and AST in 2004) to encourage the removal and replacement of aging tanks before leaks and releases occur. The average cleanup cost for home heating USTs has been \$17,180, and ASTs have averaged \$11,456. The PCF Committee believes these grants have been an excellent investment, as millions of dollars on cleanup have been avoided by removing these tanks before they leak. In total, 29

grants were approved in FY09 for the closure of residential heating oil USTs. Total reimbursement in FY09 for UST grants was \$42,000, which included approved grants from FY08. Since the program began in 1998 the Agency has awarded \$814,649 in UST grant funds. In addition, 157 grants were approved in FY09 for the replacement of residential heating oil ASTs. Total reimbursement in FY09 for AST grants was \$168,307, which included approved grants from FY08. This brings the total grants awarded for both ASTs and USTs to \$1,052,465 which represents the removal of well over 1,000 tanks.

In FY09, nine UST loans were closed for a total amount of \$348,175. Tank owners are slowly taking advantage of the 2007 legislative changes made to the loan program. The availability of loans to tank owners for all categories of tanks has encouraged tank owners to be proactive with removal before a release to the environment occurs. The Agency continues to contract for services of a certified accountant to review tank owner's financials for determination of ability to repay and suggested collateral for each loan. The 2009 reduction in the interest rate for an owner with more than five facilities has not produced an increase in loan applications. So far only one multiple facility owner is subject to an interest charge of the loan. Due to a number of tanks being notified as either having a failed inner wall or failed cathodic protection, the UST Program anticipates in FY 10 an increase in loan applications for upgrades or the removal of tanks with no replacement.

### **Effectiveness of the Fund in Meeting Its Purpose**

The fund was effectively able to meet its purpose of funding cleanups and providing financial assurance for **underground** gasoline storage tank owners in Vermont in FY09, but remedial activity was slowed by a lack of sufficient funding. For most of the year, there was an adequate balance in the motor fuel account and claims were processed in a timely manner.

The fund was not able to effectively meet its purpose in addressing contamination from heating fuel tanks. There was an inadequate balance in the heating fuel account to cover all the costs of remediating heating fuel releases. A legislatively authorized transfer of \$750,000 from the motor fuel account allowed for the continued cleanup at identified sites. Without this transfer, there would likely have been delays in site cleanup which would have increased the risk of exposure to petroleum contamination in the environment.

### **Reasonableness of the Cost of Cleanup**

In past years, the committee has reviewed the written policies and procedures of the DEC related to UST replacement, eligible costs and reimbursement procedures. In assessing the reasonableness of the cost of cleanup, the committee has reviewed national averages and comparative data from other states. The PCF Advisory Committee has concluded that agency staff responsible for this program has exercised prudent cost containment measures. A review of an annual survey conducted by the Association of State Underground Storage Tank Cleanup Funds shows that Vermont's cost of cleaning up contaminated sites is below those of other states. The continued efforts of Agency staff have helped to maintain reasonable cleanup costs in Vermont.

### **Recommended Statutory Changes to Chapter 59**

The PCF Advisory committee recommends that the following statutory changes be considered by the 2009 legislature: **the fee on heating oil should be increased from 0.5 cent per gallon to one cent per gallon.**

## **1. Amend § 1942(b). Petroleum distributor licensing fee**

(b) There is assessed against every seller receiving more than \$10,000.00 annually for the retail sale of heating oil or kerosene, sold in this state and not used to propel a motor vehicle, a licensing fee of one-half-cent per gallon of such heating oil or kerosene.

## **2. Amend § 1941(b)(1)(A). Expand limit on coverage**

(A) an underground storage tank defined as a category one tank after the first \$10,000.00 of the cleanup costs have been borne by the owners or operators of tanks used for commercial purposes, or after the first \$250.00 of the cleanup costs have been borne by the owners or operators of tanks with capacities equal to or less than 1,100 gallons used for farms or residential purposes. Disbursements on any site shall not exceed ~~\$990,000.00~~ **1,240,000**. These disbursements shall be made from the motor fuel account;

## **Legislative Studies**

The 2009 legislature directed the PCF Advisory Committee to evaluate the following issues:

(a) determine whether the fees assessed pursuant to subsections 1942(a) and (b) of Title 10 should be collected by the department of motor vehicles or the department of taxes, develop a plan for implementing a single-agency collection; and

(b) examine how disbursements from the petroleum cleanup fund are authorized when an owner or operator of an underground storage tank removes a tank for inspection, replacement, or remediation. The committee shall review whether an owner or operator of an underground storage tank should be compensated the maximum eligible amount for expenses related to remediation when contamination is identified and such contamination was caused by a prior spill or leaking underground storage tank that previous remediation failed to address.

### **(A) Fee Collection Study**

#### **Background**

There are two fees collected by petroleum distributors that provide revenue for the Petroleum Cleanup Fund. There is a one-cent per gallon fee collected at the distributor level on all motor fuels. This fee is collected monthly by the Department of Motor Vehicles (DMV) on the same form and at the same time as the excise tax. There is a half-cent per gallon fee collected at the retail level on all heating fuels. This fee is collected quarterly by the Tax Department. The information including the gallons of motor fuel reported to DMV each month is public information and can be readily accessible to the public. This information has long been collected and reported, and is the only source for accurate consumption and sales data for the state. In contrast, the individual information on the gallons of heating fuels reported to the Tax Department each quarter is confidential. It was felt that a uniform system for the collection of the fees may provide benefits to the Petroleum Cleanup Fund as well as fuel distributors and others in Vermont.

#### **Summary of Findings**

Representatives of the PCF Advisory Committee met with officials from the DMV and the Tax Department to discuss the pros and cons of implementing a single-agency collection system. It was determined that there are a number of good reasons to merge the fee collection which include the ability for petroleum dealers to file all of their fuel taxes together on one form with one state agency, a consistent filing period, the potential for improved transparency of information, and the ability to more accurately forecast future petroleum usage trends.

The committee also identified a number of potential problems associated with a single-agency collection system. Distillate fuel oil comes in many forms and is called many different names depending on the quality of the fuel, its chemical composition and its intended use, and as such both the collection of federal and state taxes, as well as the PCF fee is influenced by the fuel usage. Fuel types include high sulfur, low sulfur and ultra-low sulfur fuels, on-road diesel, off-road diesel, kerosene, jet fuel and home heating oil. According to its taxable status, identical fuels can be either clear indicating that they are taxed, or dyed denoting non-taxed fuel. The complexity of these fuels and the nuances of the different rules that apply to them (sales tax, gross receipts tax, PCF fees) make the transition to a single-agency collection system anything but straight forward.

The committee also learned that there is a separate study under way which is looking at the possibility of creating a single Department of Revenue. Since consideration of this possibility also entails looking at taxpayer confidentiality versus public information, the committee concluded that this issue would be evaluated under this larger study and that it did not make sense to make recommendations that would be in conflict with this study.

## Recommendations

As a result of these finding, the Committee concluded that the difficulty in merging the two collections systems may outweigh the benefits unless it is part of a general restructuring or state revenue collection. If there is a new fee collection system developed in the future the committee recommends that such a system have a consistent collection period such as monthly, be as clear as possible to ensure that those selling petroleum products remain in compliance with state and federal laws and be as transparent and open as possible. The committee believes it is critical to maintain the availability of motor fuel sales data.

## **(B) PCF Disbursement Review**

### Background

A reimbursement decision at a UST facility in FY08 prompted the legislature to request a review of PCF disbursement policies under the PCF. Most specifically the Committee was asked to evaluate how an owner or operator of an underground storage tank should be compensated when contamination is identified and such contamination was caused by a prior spill or leaking underground storage tank that previous remediation failed to address.

In 1988 the legislature created the PCF (10 V.S.A. §1941) and appointed this Committee to oversee the program conduct. Under this enabling legislation, the primary purpose of the PCF was to protect human health and the environment by paying for cleanup and restoration of contaminated soil and groundwater, and to compensate third parties for property damage and bodily injury. In past years the Committee has reviewed the written policies and procedures of the SMS related to eligible costs and reimbursement procedures.

## Summary of Findings

To evaluate this issue, the Committee relooked at a past PCF reimbursement policy decision involving the reimbursement of costs associated with the treatment and disposal of petroleum contaminated soils removed not as part of a cleanup but to accommodate the replacement of any existing UST. In 1990, a policy was established that limited the amount of reimbursement for the treatment and disposal of petroleum contaminated soils up to 80 cubic yards when the soil was removed as part of a UST replacement. This cost control measure was put in place early in the program as it was recognized that there were not enough resources in the PCF to provide full reimbursement of all these type of costs. It was also felt that the reason these costs were being incurred were not part of a necessary cleanup but were incurred as a result of a capital improvement on a property. This measure results in shared costs between the PCF and the tank owner while at the same time putting a limitation on what is reimbursed. This coverage restriction has helped to keep the PCF solvent through the large number of replacements around the 1998 removal/replacement deadline for unprotected USTs. Lack of such early controls was one of the reasons that other state funds became insolvent, e.g., Texas and Michigan.

Another cost that falls under this policy is the treatment of contaminated groundwater during UST installation. PCF coverage is more strictly tied to preapproval of a corrective action plan, i.e., there is no automatic partial coverage during tank installations. Unlike removal of petroleum contaminated soil in the contaminant source area, treatment of a short duration dewatering event typically does not result in significant residual mass reduction. There are allowable alternatives to the off-site treatment of contaminated groundwater during UST replacement such as discharging the water back on site where conditions allow for this option. There are some sites where the limited size of the property or soil types limits this option.

## Recommendations

For the fiscal health of the PCF, the Committee does not recommend any changes to the existing reimbursement policy that limits the coverage provided where treatment and disposal of petroleum contaminated soils and groundwater are necessary only because of a UST replacement. The PCF should continue focusing coverage for onsite work on the investigation and cleanup costs, with priority given to sites with the most significant risk to human health and the environment. The Committee will review the policy in detail during the coming year and recommend changes in department policy as appropriate.

For each site with an affected receptor the number of actual Vermonters exposed to contamination can vary. The actual users for public water supplies can be as low as 25 people per system to as high as many thousands of users. For sites with affected private water supplies, the number of contaminated wells depends on the specific conditions of the site. On average there are approximately three contaminated wells discovered per site, with an average of 3 users per household. However, one of the 156 sites listed above involved contamination to over 80 wells affecting approximately 240 users, and a site discovered in 2002 involves contamination to over 30 wells, including a public water supply, affecting hundreds of users. Sites with surface water impacts can affect both public health and the environment. High concentrations of petroleum in a stream can cause detrimental affects to biota, and lead to an increased exposure to stream users. Lastly, sites with indoor air impacts can lead to the greatest risk to public health. Petroleum vapors entering a home can be at levels that are explosive. More often petroleum vapors reach levels that pose a serious health risk. Of the 137 sites with indoor air impacts, the number of exposed individuals varied from site to site. An average site involves three homes affected with approximately three persons per home.

Sites that are discovered with contamination affecting a sensitive receptor requires immediate response. It is critical that the Petroleum Cleanup Fund maintain an adequate balance so that there are no delays in efforts to mitigate the serious public health and environmental threats presented at these sites.
