enforcement, call or email MST1 Jennifer Haggins, Marine Safety Unit Pittsburgh, U.S. Coast Guard; telephone 412–221–0807, email Jennifer.L.Haggins@uscg.mil.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zones for the annual Pittsburgh Pirates Fireworks list at 33 CFR 165.801, Table 1, line 1 from 8 p.m. through 11:59 p.m. each day on April 7, April 28, May 18, June 22, July 28, August 18, and September 21, 2018. Should inclement weather require rescheduling, the safety zone will be effective following games on a rain date to occur within 48 hours of the scheduled date. Entry into the safety zone is prohibited to all vessels not registered with the sponsor as participants or official patrol vessels, unless authorized by the Captain of the Port Marine Safety Unit Pittsburgh (COTP) or a designated representative. Persons or vessels desiring to enter into or pass through the safety zone must request permission from the COTP or a designated representative. If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative. This notice of enforcement is issued under authority of 33 CFR 165.801 and 5 U.S.C. 352(a). In addition to this notice of enforcement in the Federal Register, the Coast Guard will provide the maritime community with advance notification of these enforcement periods via Local Notice to Mariners and updates via Marine Information Broadcasts.

Dated: March 8, 2018.
L. McClain, Jr., Commander, U.S. Coast Guard, Captain of the Port Marine Safety Unit Pittsburgh.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Air Plan Approval; Vermont; Nonattainment New Source Review and Prevention of Significant Deterioration Permit Program Revisions; Infrastructure Requirements for National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving several different revisions to the State Implementation Plan (SIP) submitted to the EPA by the Vermont Department of Environmental Conservation (VT DEC). On May 23, 2017, Vermont submitted revisions to the EPA satisfying the VT DEC’s earlier commitment to adopt and submit revisions that meet certain requirements of the Federal Prevention of Significant Deterioration (PSD) air permit program. Vermont’s submission also included revisions relating to the federal nonattainment new source review (NNSR) permit program. This action approves those revisions and also fully approves certain elements of Vermont’s infrastructure SIPs (ISIS), which were conditionally approved by the EPA on June 27, 2017. Additionally, the EPA is approving several other minor regulatory changes to the SIP submitted by VT DEC on May 23, 2017. This action is being taken in accordance with the Clean Air Act.

DATES: This rule is effective on April 18, 2018.

ADDRESSES: The EPA has established a docket for this action under Docket Identification No. EPA–R01–OAR–2017–0589. All documents in the docket are listed on the https://www.regulations.gov website. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available at https://www.regulations.gov or at the U.S. Environmental Protection Agency, EPA New England Regional Office, Office of Ecosystem Protection, Air Quality Planning Unit, 5 Post Office Square, Suite 100, Boston, MA. The EPA requests that if at all possible, you contact the contact listed in the FOR FURTHER INFORMATION CONTACT section to schedule your inspection. The Regional Office’s official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Eric Wortman, Air Permits, Toxics, and Indoor Programs Unit, U.S. Environmental Protection Agency, EPA New England Regional Office, 5 Post Office Square, Suite 100 (Mail Code OEP05–2), Boston, MA 02109–3912, phone number (617) 918–1624, fax number (617) 918–0624, email wortman.eric@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever “we,” “us,” or “our” is used, we mean the EPA.

IV. Statutory and Executive Order Reviews

I. Background and Purpose

On December 18, 2017, the EPA published a Notice of Proposed Rulemaking (NPRM) for the State of Vermont. See 82 FR 59997. The NPRM proposed approval of several different revisions to the SIP submitted by the VT DEC. The formal SIP revision was submitted by Vermont on May 23, 2017.

As discussed in the NPRM, the VT DEC revised the Vermont Air Pollution Control Regulations (APCR) on December 15, 2016 to address the two provisions identified in the EPA’s June 27, 2017 conditional approval, which are required under the Federal PSD permit program regulations and were not included in the State’s ISIS submittal. See 82 FR 29005, June 27, 2017. Specifically, the definition of “significant” in APCR § 5–101(80) was revised to define the significant emissions rate increase for ozone as 40 tons or greater of either VOCs or NOX as ozone precursors. In addition, the VT DEC revised APCR sections 5–502(4)(c) and 5–502(5)(a) and (b) to require that PSD increment reviews and the determination of remaining PSD increment be conducted or determined in accordance with the applicable regulations at 40 CFR 51.166.

The EPA’s NPRM also proposed approval into the Vermont SIP of the requirements in Vermont’s NNSR and PSD permit program at APCR sections 5–501(9) and 5–502(9). The provision at section 5–501(9) clarifies that no action under section 5–501 relieves any person from complying with any other requirements of local, State, or Federal law. APCR section 5–502(9) requires an alternative site analysis to be conducted when: (1) A source or modification that is major is proposed to be constructed in a non-attainment area; or (2) a source or modification is major for ozone and/ or precursors to ozone.

Additionally, the NPRM proposed to incorporate into the SIP revisions to the regulations relating to particulate matter at APCR sections 5–231(4) and (5). APCR section 5–231(4) was revised to prohibit a process operation to operate without taking reasonable precautions to prevent particulate matter from becoming airborne. APCR section 5–231(5) was revised to update and replace the term “Asphalt Concrete
The EPA also proposed to approve minor revisions to the work practice standards for wood furniture manufacturers and the regulations for sampling and testing of sources. The wood furniture manufacturing regulation at APCR section 5–253.16(d)(8) was amended to limit the use of conventional air spray guns to apply finishing materials only when all emissions from the finishing application station are routed to a functioning control device. The NPRM also proposed to approve changes to the stack testing requirements at APCR section 5–404. This revision adds 40 CFR part 51, Appendix M, as a testing option and requires that all other methods be approved by the Air Pollution Control Officer and the EPA, as opposed to just the Air Pollution Control Officer. The rationale for the EPA’s proposed action is explained in the NPRM and will not be restated here. No public comments were received on the NPRM.

II. Final Action

The EPA is approving the changes in the May 23, 2017 submittal as a revision to the Vermont SIP. The EPA has determined the revisions in the May 23, 2017 are consistent with the CAA and appropriate for inclusion into the Vermont SIP. We are also converting the June 27, 2017 conditional approval of Vermont’s ISIPs for Federal PSD requirements to a full approval.

III. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the Vermont statutes described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents generally available through https://www.regulations.gov.

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4); and
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Does not have economic effects on a significant number of small entities, as specified in Executive Order 13206 (68 FR 35162, June 12, 2003); and
- Does not contain policies with federalism implications specified by Executive Order 13132 (64 FR 43255, August 10, 1999).

- Is certified as not having a Federal mandate or significant regulatory actions on States, Tribes, local governments, or small businesses; and
- Is not an action that is a significant regulatory action that may significantly affect the availability of public resources or the distribution of Federal funds.

The EPA is approving the changes in the May 23, 2017 submittal as a revision to the Vermont SIP. We are also converting the June 27, 2017 conditional approval of Vermont’s ISIPs for Federal PSD requirements to a full approval.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to the Congress and the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 18, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: March 8, 2018.
Alexandra Dapolito Dunn.
Regional Administrator, EPA Region 1.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 et seq.

Subpart UU—Vermont

2. In § 52.2370:

a. The table in paragraph (c) is amended by revising the entries for “Section 5–101”, “Section 5–231”, “Section 5–253.16”, “Section 5–404”, “Section 5–501”, and “Section 5–502”; and

b. The table in paragraph (e) is amended by revising the entries “Infrastructure SIP for 1997 PM 2.5 NAAQS”, “Infrastructure SIP for 1997 ozone NAAQS”, “Infrastructure SIP for 2006 PM 2.5 NAAQS”, “Infrastructure SIP for the 2008 Lead NAAQS”. **

**
"Infrastructure SIP for 2008 ozone NAAQS", "Infrastructure SIP for the 2010 NO₂ NAAQS", and "Infrastructure SIP for the 2010 SO₂ NAAQS".

The revisions read as follows:

III. Public Comments and EPA's Responses

EPA received six public comments on the NPR to approve West Virginia's SIP revision.

Comment 1: The commenter expressed concern over whether the facilities' emissions would be regulated through monitoring and guidelines if they were to re-open.

Response 1: CAA section 110(a)(2)(c) and Title I, Parts C and D, as well as CAA sections 172, 173, and 161 require states to implement permit programs consistent with the requirements of the CAA which regulate construction and modification of stationary sources to assure the NAAQS are achieved. These include nonattainment new source review (NSR) and prevention of significant deterioration (PSD) permit programs. West Virginia has federally enforceable NSR and PSD permit programs incorporated in the West Virginia SIP. See 45CSR19 (NSR program approved 80 FR 29973(May 26, 2015)), 45CSR14 (PSD program approved 81 FR 53009 (August 11, 2016)), and 45CSR13 (minor source NSR program approved 79 FR 42213 (July 21, 2014)). All of the facilities listed in the NPR were permanently shut down, but if any were to re-open, or if any new sources were to start operating in West Virginia in the same location, they would need to comply with the requirements of West Virginia's permit programs, as applicable including NSR, PSD or minor NSR. Specifically, West Virginia's rule 45CSR14, "Permits for the Construction and Major Modification of Major Stationary Sources of Air Pollution for the Prevention of Significant Deterioration." was approved into the West Virginia SIP in 1984 and subsequently revised several times with the latest revision to the SIP in 2015 (81 FR 53009). West Virginia’s rule 45CSR13, "Permits for Construction, Modification, or Relocation of Stationary Sources of Air Pollutants, and Procedures for Registration and Evaluation," requiring
