

Vermont Wetlands Program
Class I Rulemaking Petition
Database Form
 Under Sections 7 and 8
 of the Vermont Wetland Rules

Petition Submittal Instructions

Please submit your application via our secure online application portal:

https://anronline.vermont.gov/?formtag=WSMD_Intake. Scroll to the bottom of the landing page, click 'begin form entry,' in blue, and proceed with the 'permit application' option. Make sure you specify that the permit application is for the Wetlands Program.

Using our online form is the most efficient and secure way to submit applications. Mailing in an application may cause delays. You will receive an email notification once your application has been processed.

For application questions contact: ANR.WSMDWetlands@vermont.gov

Petitioner Name:		Petition Preparer Name:	
Town Where Wetland is Located:		County:	
Span#:		Vermont Wetlands Project (VWP)# if Known:	
Wetland Location Description: 911 street address or direction from nearest intersection			
Brief Petition Summary:			
Existing Land Use Type(s): (Check all that apply) <input type="checkbox"/> Residential (single family) <input type="checkbox"/> Residential (subdivision) <input type="checkbox"/> Undeveloped <input type="checkbox"/> Agriculture <input type="checkbox"/> Transportation <input type="checkbox"/> Forestry <input type="checkbox"/> Parks/Rec/Trail <input type="checkbox"/> Institutional <input type="checkbox"/> Industrial/Commercial			
Wetland Delineation Date(s):			
Petitioner Information: <i>If the Petitioner is someone other than the landowner, the landowner information must be included below</i>			
Petitioner Name:			
Address:		City/Town:	State: Zip:
Phone Number:		Email Address:	
		<i>(Required to receive notices via ENB)</i>	
Petitioner Certification:			
By signing this petition, you are certifying that all the information contained within is true, accurate, and complete to the best of your knowledge.			
<input type="checkbox"/> <i>By checking this box, I certify that all adjoining landowners have been provided an official notice via US mail prior to the submission of this application</i>			
Petitioner Signature: _____ Date: _____			
Petition Preparer Information: <i>Consultant, engineer, or other representative that is responsible for filling out the petition, if other than Petitioner or landowner.</i>			
Petition Preparer Name:			
Address:		City/Town:	State: Zip:
Phone Number:		Email Address:	
		<i>(Required to receive notices via ENB)</i>	
Petition Preparer Certification:			
By signing this petition, you are certifying that all the information contained within is true, accurate, and complete to the best of your knowledge.			
Petition Preparer Signature: _____ Date: _____			

<p>1. Location of wetland: <i>Location description should include the road the wetland is located on, the compass direction of the wetland in relation to the road, 911 street address if available, and any other distinguishing features.</i></p>
<p>2. Current Wetland Classification:</p>
<p>2.1. The wetland is a Class II wetland because:</p>
<p>2.2. Section 4.6 Presumption <i>If the wetland meets the Section 4.6 Presumption, it does so primarily because:</i></p>
<p>3. Description of the Wetland: <i>Answer the following questions regarding the entire wetland area proposed for a determination or Class I designation.</i></p>
<p>3.1. Size of Complex in Acres: <i>The size of the complex can be obtained from the Wetland Inventory Map for mapped wetlands, or best estimation based on review of aerial photography or site visit.</i></p>
<p>3.2. Vegetation Cover Types Present: <i>List all wetland types in the wetland or wetland complex and their percent cover and the dominant species. For example: 50 acres of softwood forested swamp dominated by hemlock; or 30% scrub swamp button bush, 70% emergent wetland dominated by reed-canary grass, sensitive fern, and jewelweed</i></p>
<p>3.3. Landscape Position: <i>Where is the wetland located on the landscape? Describe all. For example: Bottom of a basin, edge of a stream, shore of a lake, etc.</i></p>

3.4. Hydrology:

Describe the main source of water for the wetland. List any river, stream, lakes, or ponds.

3.4.1. Direction of Flow:

***For example:** Stream flows from north to south through the wetland, or the wetland drains generally to the southwest.*

3.4.2. Influence of Hydrology on the Wetland:

***For example:** The river provides floodwater to the wetland in the spring.*

3.4.3. Relation of Entire Wetland to the Project Area:

The distance between the project area and any nearby surface waters

3.4.4. Wetland Hydroperiod:

Discuss the frequency and duration of flooding, ponding, and/or soil saturation

3.5. Surrounding Land use of the Entire Wetland:

For example: Rural residential and forested; Agricultural and undeveloped

3.6. Relation of the Wetland to Other Nearby Wetlands:

Provide any information on wetlands or wetland complexes that are close enough to contribute to the overall function of the wetland in question.

3.7. Cumulative Impacts to the Wetland:

Identify any cumulative ongoing impacts that may influence the wetland.

Examples include but are not limited to: Wetland encroachments, land use management in or surrounding the wetland, or development that influences hydrology or water quality. List any past Vermont Wetland Permits or CUD's related to this property.

4. Buffer Zone:

Describe the proposed buffer zone of the wetland (default 100-foot buffer for Class I, but other may be proposed)

4.1. Buffer Size proposed:

The purpose of a buffer zone is to protect those functions that make a wetland significant. Here state the proposed size and justification. The default buffer size for a Class II is 50 feet, and 100 feet for Class I. N/A for Class III petitions.

4.1.1 Buffer Land Use:

For example: Mowed shoulder, 50% forested, old field, paved road, and residential lawns, etc.
Describe any previous and ongoing disturbance in the buffer zone.

4.1.2 Buffer Vegetation:

List the vegetation cover type and dominant plant species.

4.1.3 Buffer Soils:

Use USDA NRCS information where possible, and the ACOE Delineation Manual soil description.

5. Wetland Function and Value Summary (as defined in the Vermont Wetland Rules Section 5):

Check which functions are present in the wetland

<input type="checkbox"/> Flood/Storm Storage	<input type="checkbox"/> RTE Species
<input type="checkbox"/> Surface & Groundwater Protection	<input type="checkbox"/> Education & Research
<input type="checkbox"/> Fish Habitat	<input type="checkbox"/> Recreation/Economic
<input type="checkbox"/> Wildlife Habitat	<input type="checkbox"/> Open Space/Aesthetics
<input type="checkbox"/> Exemplary Natural Community	<input type="checkbox"/> Erosion Control

Functions and Values: For each function and value evaluate the **wetland** and check all that apply. Use Wetland Inventory Maps when necessary.

6. Water Storage for Flood Water and Storm Runoff

- ☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function
- ☐ Constricted outlet or no outlet and an unconstructed inlet.
 - ☐ Physical space for floodwater expansion and dense, persistent, emergent vegetation or dense woody vegetation that slows down flood waters or stormwater runoff during peak flows and facilitates water removal by evaporation and transpiration.

Water Storage for Flood Water and Storm Runoff Continued...

- ☐ If a stream is present, its course is sinuous and there is sufficient woody vegetation to intercept surface flows in the portion of the wetland that floods.
- ☐ Physical evidence of seasonal flooding or ponding such as water stained leaves, water marks on trees, drift rows, debris deposits, or standing water.
- ☐ Hydrologic or hydraulic study indicates wetland attenuates flooding

If any of the above boxes are checked, the wetland provides this function. Complete the following to determine if the wetland provides this function above or below a moderate level. If none of the following apply, the wetland provides this function at a moderate level.

Water Storage for Flood Water and Storm Runoff Continued...

- ☐ Check this box if any of the following conditions apply that may indicate the wetland provides this function at a **lower** level.
 - ☐ Significant flood storage capacity upstream of the wetland, and the wetland in question provides this function at a negligible level in comparison to upstream storage (unless the upstream storage is temporary such as a beaver impoundment).
 - ☐ Wetland is contiguous to a major lake or pond that provides storage benefits independently of the wetland.
 - ☐ Wetland's storage capacity is created primarily by recent beaver dams or other temporary structures.
 - ☐ Wetland is very small in size, not contiguous to a stream, and not part of a collection of small wetlands in the landscape that provide this function cumulatively.
- ☐ Check this box if any of the following conditions apply that may indicate the wetland provides this function at a **higher** level.
 - ☐ History of downstream flood damage to public or private property.
 - ☐ Any of the following conditions present downstream of the wetland, but upstream of a major lake or pond, could be impacted by loss or reduction of the water storage function.
 - ☐ Developed public or private property
 - ☐ Stream banks susceptible to scouring and erosion
 - ☐ Important habitat for aquatic life
 - ☐ The wetland is large in size and naturally vegetated.
 - ☐ Any of the following conditions present downstream of the wetland, but upstream of a major lake or pond, could be impacted by a loss or reduction of the water storage function.
 - ☐ Developed public or private property.
 - ☐ Stream banks susceptible to scouring and erosion.
 - ☐ Important habitat for aquatic life.
 - ☐ The wetland is large in size and naturally vegetated
 - ☐ Any of the following conditions present upstream of the wetland may indicate a large volume of runoff may reach the wetland.
 - ☐ A large amount of impervious surface in urbanized areas.
 - ☐ Relatively impervious soils.
 - ☐ Steep slopes in the adjacent areas.

6.1 Remarks on Water Storage function:

Add any additional remarks about the function here.

7. Surface and Ground Water Protection

☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.

- ☐ Constricted or no outlets.
- ☐ Low water velocity through dense, persistent vegetation.
- ☐ Hydroperiod permanently flooded or saturated.
- ☐ Wetlands in depositional environments with persistent vegetation wider than 20 feet.
- ☐ Wetlands with persistent vegetation comprising a defined delta, island, bar or peninsula.
- ☐ Presence of seeps or springs.
- ☐ Wetland contains a high amount of microtopography that helps slow and filter surface water.
- ☐ Position in the landscape indicates the wetland is a headwaters area.
- ☐ Wetland is adjacent to surface waters.
- ☐ Wetland recharges a drinking water source.
- ☐ Water sampling indicates removal of pollutants or nutrients.
- ☐ Water sampling indicates retention of sediments or organic matter.
- ☐ Fine mineral soils and alkalinity not low.
- ☐ The wetland provides an obvious filter between surface water or ground water and land uses that may contribute point or nonpoint sources of sediments, toxic substances or nutrients to the wetland, such as: steep erodible slopes; row crops; dumps; areas of pesticide, herbicide or fertilizer petition; feed lots; parking lots or heavily traveled road; and septic systems.

If any of the above boxes are checked, the wetland provides this function. Complete the following to determine if the wetland provides this function above or below a moderate level. If none of the following apply, the wetland provides this function at a moderate level.

- ☐ Check this box if any of the following conditions apply that may indicate the wetland provides function at a **lower** level.
- ☐ Presence of dead forest or shrub areas in sufficient amounts to result in diminished nutrient uptake.
 - ☐ Presence of ditches or channels that confine water and restrict contact of water with vegetation.
 - ☐ Wetland is very small in size, not contiguous to a stream, and not part of a collection of small wetlands in the landscape that provide this function cumulatively.
 - ☐ Current use in the wetland results in disturbance that compromises this function.

Surface and Groundwater Protection Continued...

- ☐ Check this box if any of the following conditions apply that may indicate the wetland provides function at a **higher** level.
- ☐ The wetland is adjacent to a well head or source protection area and provides ground water recharge.
 - ☐ The wetland provides flows to Class A surface water. (Check ANR Atlas)
 - ☐ The wetland contributes to the protection or improvement of water quality of any impaired waters.
 - ☐ The wetland is large in size and naturally vegetated.

7.1. Remarks on Water Protection Function:

8. Fish Habitat:

- ☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.
- ☐ Contains woody vegetation that overhangs the banks of a stream or river and provides any of the following: shading that controls summer water temperature; cover including refuges created by overhanging branches or undercut banks; source of terrestrial insects as fish food; or streambank stability.
 - ☐ Provides spawning, nursery, feeding or cover habitat for fish (documented or professionally judged). Common habitat includes deep marsh and shallow marsh associates with lakes and streams, and seasonally flooded wetlands associated with streams and rivers.
 - ☐ Documented or professionally judged spawning habitat for northern pike.
 - ☐ Provides cold spring discharge that lowers the temperature of receiving waters and creates summer habitat for salmonid species.
 - ☐ The wetland is located along a tributary that does not support fish but contributes to a larger body of water that does support fish. The tributary supports downstream fish by providing cooler water and food sources.

8.1. Remarks on Fish Habitat Function:

9. Wildlife Habitat

- ☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.
- ☐ Provides resting, feeding staging or roosting habitat to support waterfowl migration, and feeding habitat for wading birds. Good habitats for these species include open water wetlands.
 - ☐ Habitat to support one or more breeding pairs or broods of waterfowl including all species of ducks, geese, and swans. Good habitats for these species include open water habitats adjacent shallow marsh, deep marsh, shrub wetland, forested wetland, or naturally vegetated bufferzone.
 - ☐ Provides a nest site, a buffer for a nest site or feeding habitat for wading birds including but not limited to: great blue heron, black-crowned night heron, green-backed heron, cattle egret, or snowy egret. Good habitats for these species include open water or deep marsh, adjacent to forested wetlands, or standing dead trees.
 - ☐ Supports or has the habitat to support one or more breeding pairs of any migratory bird that requires wetland habitat for breeding, nesting, rearing of young, feeding, staging, roosting, or migration, including: Virginia rail, common snipe, marsh wren, American bittern, northern water thrush, northern harrier, spruce grouse, Cerulean warbler, and common loon.
 - ☐ Supports winter habitat for white-tailed deer. Good habitats for this species include softwoodswamps. Evidence of use includes browsing, bark stripping, worn trails, or pellet piles.
 - ☐ Provides important feeding habitat for black bear, bobcat, or moose based on an assessment of use. Good habitat for these types of species includes wetlands located in a forested mosaic.
 - ☐ Has the habitat to support muskrat, otter, or mink. Good habitats for these species include deep marshes, wetlands adjacent to bodies of water including lakes, ponds, rivers, and streams.
 - ☐ Supports an active beaver dam, one or more lodges, or evidence of use in two or more consecutive years by an adult beaver population.
 - ☐ Provides the following habitats that support the reproduction of uncommon Vermont amphibian species including:
 - ☐ Wood frog, Jefferson salamander, blue-spotted salamander, or spotted salamander. Breeding habitat for these species includes vernal pools and small ponds.
 - ☐ Northern dusksalamander and the spring salamander. Habitat for these species includes headwater seeps, springs, and streams.
 - ☐ The four-toed salamander, Fowler's toad, western or boreal chorus frog, or other amphibians, found in Vermont of similar significance.
 - ☐ Supports or has the habitat to support populations of Vermont amphibian species including, but not limited to, pickerel frog, northern leopard frog, mink frog, and others found in Vermont of similar significance. Good habitat for these types of species include large marsh systems with open water components.
 - ☐ Supports or has the habitat to support populations of uncommon Vermont reptile species including: wood turtle, northern map turtle, eastern musk turtle, spotted turtle, spiny softshell turtle, eastern ribbonsnake, northern watersnake, and others found in Vermont of similar significance.
 - ☐ Supports or has the habitat to support significant populations of Vermont reptile species, including smooth greensnake, DeKay's brownsnake, or other more common wetland-associated species.
 - ☐ Meets four or more of the following conditions indicative of wildlife habitat diversity:

Wildlife Habitat Continued...

- ☐ Three or more wetland vegetation classes (greater than 1/2 acre) present including but not limited to: open water contiguous to, but not necessarily part of, the wetland, deep marsh, shallow marsh, shrub swamp, forested swamp, fen, or bog.
- ☐ The dominant vegetation class is one of the following types: deep marsh, shallow marsh, shrub swamp or, forested swamp.
- ☐ Located adjacent to a lake, pond, river or stream.
- ☐ Fifty percent or more of surrounding habitat type is one or more of the following: forest, agricultural land, old field or open land.
- ☐ Emergent or woody vegetation occupies 26 to 75 percent of wetland, the rest is open water.
- ☐ One of the following:
 - ☐ Hydrologically connected to other wetlands of different dominant classes or open water within 1 mile.
 - ☐ Hydrologically connected to other wetlands of same dominant class within 1/2 mile.
 - ☐ Within 1/4 mile of other wetlands of different dominant classes or open water, but not hydrologically connected.

☐ Wetland or wetland complex is owned in whole or in part by state or federal government and managed for wildlife and habitat conservation.

☐ Contains evidence that it is used by wetland dependent wildlife species

If any of the above boxes are checked, the wetland provides this function. Complete the following to determine if the wetland provides this function above or below a moderate level. If none of the following apply, the wetland provides this function at a moderate level.

- ☐ Check box if any of the following conditions apply that may indicate the wetland provides this function at a **lower** level.
 - ☐ The wetland is small in size for its type and does not represent fugitive habitat in developed areas (vernal pools and seeps are generally small in size, so this does not apply).
 - ☐ The surrounding land use is densely developed enough to limit use by wildlife species (with the exception of wetlands with open water habitat). Can be negated by evidence of use.
 - ☐ The current use in the wetland results in frequent cutting, mowing or other disturbance.
 - ☐ The wetland hydrology and character is at a drier end of the scale and does not support wetland dependent species.
- ☐ Check box if any of the following conditions apply that may indicate the wetland provides this function at a **higher** level.
 - ☐ The wetland is large in size and high in quality.
 - ☐ The habitat has the potential to support several species based on the assessment above.
 - ☐ Wetland is associated with an important wildlife corridor.
 - ☐ The wetland has been identified as a locally important wildlife habitat by an ANR Wildlife Biologist.

9.1. Remarks on Wildlife Habitat Function:

10. Exemplary Wetland Natural Community

☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.

☐ Wetlands that are identified as high quality examples of Vermont's natural community types recognized by the Natural Heritage Information Project of the Vermont Fish and Wildlife Department, including rare types such as dwarf shrub bogs, rich fens, alpine peatlands, red maple-black gum swamps and the more common types including deep bulrush marshes, cattail marshes, northern white cedar swamps, spruce-fir-tamarack swamps, and red maple-black ash seepage swamps are automatically significant for this function

The wetland is also likely to be significant if any of the following conditions are met:

☐ Is an example of a wetland natural community type that has been identified and mapped by, or meets the ranking and mapping standards of, the Natural Heritage Information Project of the Vermont Fish and Wildlife Department.

☐ Contains ecological features that contribute to Vermont's natural heritage, including, but not limited to:

☐ Deep peat accumulation reflecting a long history of wetland formation;

☐ Forested wetlands displaying very old trees and other old growth characteristics;

☐ A wetland natural community that is at the edge of the normal range for that type;

☐ A wetland mosaic containing examples of several to many wetland community types; or

☐ A large wetland complex containing examples of several wetland community types.

List species or communities of concern:

10.1. Remarks on Exemplary Natural Communities:

11. Rare, Threatened, and Endangered Species Habitat:

☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.

☐ Wetlands that contain one or more species on the federal or state threatened or endangered lists, as well as species that are rare in Vermont, are automatically significant for this function.

The wetland is also likely to be significant if any of the following apply:

☐ There is creditable documentation that the wetland provides important habitat for any species on the federal or state threatened or endangered species lists;

☐ There is creditable documentation that threatened or endangered species have been present in past 10 years;

☐ There is creditable documentation that the wetland provides important habitat for any species listed as rare in Vermont (S1 or S2 ranks), state historic (SH rank), or rare to uncommon globally (G1, G2, or G3 ranks) by the Natural Heritage Information Project of the Vermont Fish and Wildlife Department;

☐ There is creditable documentation that the wetland provides habitat for multiple uncommon species of plants or animals (S3 rank).

List name of species and ranking:

11.1. Remarks on RTE habitat:

12. Education and Research in Natural Sciences:

☐ Function is present and likely to be significant: Any of the following characteristics indicate the wetland provides this function.

☐ Owned by or leased to a public entity dedicated to education or research.

☐ History of use for education or research.

☐ Has one or more characteristics making it valuable for education or research.

12.1. Remarks on Education and Research in Natural Sciences:

13. Recreational Value and Economic Benefits:

- ☐ Function is present and likely to be significant: Any of the following characteristics indicate the wetland provides this function.
- ☐ Used for, or contributes to, recreational activities.
 - ☐ Provides economic benefits.
 - ☐ Provides important habitat for fish or wildlife which can be fished, hunted or trapped under applicable state law.
 - ☐ Used for harvesting of wild foods.

13.1 Remarks on Recreational Value and Economic Benefits:

14. Open Space and Aesthetics:

- ☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.
- ☐ Can be readily observed by the public; and
 - ☐ Possesses special or unique aesthetic qualities; or
 - ☐ Has prominence as a distinct feature in the surrounding landscape;
 - ☐ Has been identified as important open space in a municipal, regional or state plan.

14.1 Remarks on Open Space and Aesthetics:

15. Erosion Control Through Binding and Stabilizing

- ☐ Function is present and likely to be significant: Any of the following physical and vegetative characteristics indicate the wetland provides this function.
- ☐ Erosive forces such as wave or current energy are present and any of the following are present as well:
- ☐ Dense, persistent vegetation along a shoreline or stream bank that reduces an adjacent erosive force.
 - ☐ Good interspersions of persistent emergent vegetation and water along course of water flow.
 - ☐ Studies show that wetlands of similar size, vegetation type, and hydrology are important for erosion control.

Erosion Control Through Binding and Stabilization Continued...**What type of erosive forces are present?**

- ☐ Lake fetch and waves
- ☐ High current velocities:
- ☐ Water level influenced by upstream impoundment

If any of the above boxes are checked, the wetland provides this function. Complete the following to determine if the wetland provides this function above or below a moderate level. If none of the following apply, the wetland provides this function at a moderate level.

- ☐ Check box if any of the following conditions apply that may indicate the wetland provides this function at a lower level.
- ☐ The stream is artificially channelized and/or lacks vegetation that contributes to controlling the erosive force.
- ☐ Check box if any of the following conditions apply that may indicate the wetland provides this function at a higher level.
- ☐ The stream contains high sinuosity.
 - ☐ Has been identified through fluvial geomorphic assessment to be important in maintaining the natural condition of the stream or river corridor.

15.1. Remarks on Erosion Control Function:

16. Exemplary and/or Irreplaceable Qualities (Vermont Wetland Rules Section 5): <i>Check which wetland functions and values you consider as exemplary or irreplaceable</i>	
<input type="checkbox"/> Flood/Storm Storage	<input type="checkbox"/> RTE Species
<input type="checkbox"/> Surface & Groundwater Protection	<input type="checkbox"/> Education & Research
<input type="checkbox"/> Fish Habitat	<input type="checkbox"/> Recreation/Economic
<input type="checkbox"/> Wildlife Habitat	<input type="checkbox"/> Open Space/Aesthetics
<input type="checkbox"/> Exemplary Natural Community	<input type="checkbox"/> Erosion Control
17. Class I Criteria: <i>These are criteria which support whether a wetland is exemplary or irreplaceable. Wetlands which fit one or more of these criteria typically rate high in one or more function or value.</i>	
17.1. Representative Example: <i>If applicable, describe how this wetland is a representative example of a wetland type or types. Cite literature here.</i>	
17.2 Rare Community Type: <i>If applicable, describe how this wetland is a rare wetland community type. Cite literature here.</i>	
17.3 Community Assemblage/Wetland Complex: <i>If applicable, describe the diversity of wetland types, plant, animal species, soils and topography etc.</i>	
17.4 Landscape Association: <i>If applicable, describe how the wetland's function and value is specific to its landscape position and the critical nature of its location.</i>	

18. Class I Sub Criteria: *These are qualities that contribute to a wetland being exceptional or irreplaceable.*

18.1. Rare Threatened or Endangered Species:

Cite all element occurrences by number. (do not list names for protection purposes)

18.2. Undisturbed Condition:

If applicable, describe how the wetland is in a relatively undisturbed condition.

18.3 Intact Landscape:

If applicable, describe how the wetland is part of an intact and unfragmented landscape.

18.4 Connectivity:

If applicable, describe how the wetland serves as an important wildlife or waterfowl corridor, connecting natural areas or serving in migration.

19. Additional Narrative: *Please provide any additional narrative to support the petition, including all previous decisions by the Secretary or Water Board pertaining to the wetland.*

20. Supporting Materials:****ADDITIONAL MATERIAL REQUIRED TO CALL PETITION COMPLETE****20.1. **Location Map:**

Provide a location map that is 8 ½" x 11" and separate from any site plans. The Vermont Natural Resources Atlas is appropriate using USGS topography map base layer, roads, and VSWI wetlands at a minimum.

Date	Title

20.2. **Proposed Mapping:

List as specified below. Plans must be legible and include wetland delineation or aerial interpretation and buffer zones. It is helpful to provide one map with topography and one with aerial photography as a base.

Title	Author	Date	Last Revision Date

20.3. U.S. Army Corps of Engineer Wetland Delineation Forms:

List Attachment Name, dates data was collected, cover types sampled and number of paired plots included. Required for Determinations.

Attachment #/Title	(Range of) Collection Date(s)	Vegetation Cover Types	# of Paired Plots

20.4. Other Supporting Documents:

*Examples include but are not limited to: Photographs, newspaper articles, historic documents, scientific reports, ****GIS shapefiles are required***

Date	Last Revision	Author	Title

21. Vermont Significant Wetland Inventory (VSWI) Mapping Attribute Information:

*If attribute data is not included with the shapefile it is **required** to be listed here.*

Please select wetland attribute information to be included on the VSWI from the dropdown lists below.

For information on how to create a shapefile from the VSWI go to our website:

<https://dec.vermont.gov/watershed/wetlands/maps>

Wetland Attributes		Wetland Attributes

23. Petition Signatures

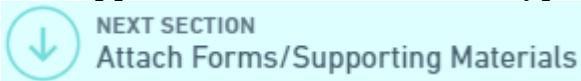

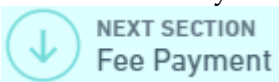

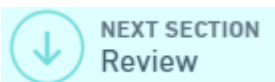

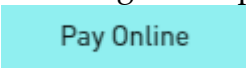

The following individuals/ organizations are in support of the petition to reclassify _____ as Class I:

Name	Signature	Date	Email address	Mailing address

SUBMIT AND PAY ONLINE TO SPEED UP YOUR APPLICATION PROCESSING!

You can submit your application and pay fees online. To start, visit:

https://anronline.vermont.gov/?formtag=WSMD_Intake

1. Scroll to the bottom of the page and click the  button.
2. Log in to an account, sign up for an account, or continue as a guest user.
3. Fill out each field in the General Information Section.
 - Type the name of the contact person, phone, and email address.
 - Select the Watershed Management Division Program. *The program name is written at the top the application.*
 - Select 'Permit Application' as the submission type.
 - Click the  button at the bottom of the page.
4. Click "Choose File" and select your application, plans, maps, or compliance notifications.
 - Click the  button at the bottom of the page.
5. Type the application fee amount.
 - Click the  button at the bottom of the page.
6. Review your data.
 - Click the  button at the bottom of the page.
 - Click the  button at the bottom of the page.
7. Sign in or continue as a guest to pay the application fee.
 - Click the  button.
8. Enter your credit/debit card or eCheck information.
 - Click the  button at the bottom of the page. *Note: You must provide your email address in the billing information section if you want a receipt emailed.*
 - Your submission will now show the fee has been paid. You may print a confirmation/receipt from here if needed.

OFFICIAL NOTICE

Hello Neighbor,

This letter is an official notice that _____ intends to apply for one or more permits from the Agency of Natural Resources, Department of Environmental Conservation (DEC). Because your property borders the location of the activity as described below, Vermont law requires the applicant to provide you with notice of the application(s).

Once each application has been submitted and deemed complete by DEC to begin the review, it will be posted to the DEC Environmental Notice Bulletin (ENB) at ENB.VERMONT.GOV, where you may register to receive notifications to stay informed as each application moves through the review process. Although the application(s) may not yet be received or processed by the DEC upon receipt of this letter from the applicant below, you may register now to receive notifications using a specified mile/distance radius from your address location (*see next page for detailed instructions on how to register*).

In the meantime, you may also contact the property owner/applicant with questions about the activity using the contact information provided below. For background, the permit process includes a public comment period and an opportunity to request a public meeting, all which can be done through the ENB link above once permit applications are posted. Note that to appeal a final permit decision you must submit comments during the public comment period.

For additional information please visit the following website: DEC.VERMONT.GOV/PERMITS/ENB/GENERAL. For general questions or assistance with registering on the ENB please call DEC's main line at (802) 828-1556 and plan to provide the permit types that are being applied for as listed below.

PROPERTY OWNER(S)/APPLICANT(S) NAME

PROPERTY OWNER(S)/APPLICANT(S) CONTACT INFORMATION (MUST PROVIDE TELEPHONE NUMBER AND/OR EMAIL)

PROPOSED ACTIVITY STREET ADDRESS/ROUTE

PROPOSED TOWN(S)

PERMIT TYPE(S) (INDICATE FOR EACH PERMIT TYPE NEW OR RENEWAL)

To register on the ENB and set up your subscription: please go through the following steps. There are illustrated instructions on Page 12 of [the ENB User Guide](#):

1. Go to ENB.VERMONT.GOV
2. Click **Register** on the upper right-hand side of the home page
3. Enter the required information (name, email address and create password) and click Register
4. You will receive an email confirmation for your email address. Once confirmed you will be able to log-in and set up your subscription.
5. Log into ENB and then click **My Subscription** at the top left-hand side of the home page
6. Click **Modify Alerts** on the My Subscription page
7. Click **Edit** for Alert #1
8. Choose the permits being applied for from the **Activity Types of Interest** list by checking the check boxes.
9. Next, choose the location using **Distance from a Point** and click the map icon to set your location.
10. Enter your own address, including Town in the **Search Address** field and set the distance large enough to capture the project activity (1 mile, 5 miles, etc.)
11. Click **OK** once the radius has been set
12. Click **SAVE** on the next page, then Click **OK** to return the main subscription page.
13. Once you receive an alert for an activity, you can choose to **Follow** the activity from your subscription page.
14. For additional instructions see the **User Guide** on ENB.VERMONT.GOV.
15. For help with registration please contact the ENB Administrator: ANR.ENBAdministrator@vermont.gov.
