

# Phase II/V Monitoring Waiver Application

## For Public Community and Non-Transient Non-Community Water Systems

---

---

### General Information

---

WSID Number

---

Public Water System Name

---

Town

---

Water System Responsible Person / Phone / Email

---

Designated Water System Operator / Phone / Email / Class

### A. Source Protection Plan

A Phase II/V Monitoring Waiver will not be considered unless the water source has an approved Source Protection Plan that has been updated and approved within the last **three years**.

Does the water source have an approved Source Protection Plan (SPP)?

Yes. The SPP was approved/updated on: \_\_\_\_\_

No. If in progress, indicate submittal date: \_\_\_\_\_

### B. Volatile Organic Chemicals (VOCs)

A water system may be deemed eligible or ineligible for a waiver from VOCs sampling requirements based entirely on the vulnerability of the source water to contamination. *Systems utilizing Lake Champlain as a water source are ineligible for a VOCs waiver.*

To be considered for a VOCs waiver, water systems must meet the following conditions:

1. The water system has conducted an initial sampling round (for new water systems, this means at least 4 consecutive quarters of VOCs sampling), and no VOCs were detected; **OR**
2. A VOC was detected historically in the water system, but the compound has not been detected for three consecutive years of annual sampling; **OR**
3. The water system has received a reduction in VOCs sampling from annual to once every 3 years, *and* no VOCs were detected during the most recent sampling (within the last three years).

Are you applying for a **VOCs** waiver? Yes No

Have there been any detections of VOCs in your water system?

Yes. Please explain on an attached sheet.

No.

If a VOCs waiver is granted, the following conditions apply:

Groundwater Systems: The waiver period is **six years**. The water system is required to sample once during the waiver period. The waiver must be renewed after the first three years the waiver is in effect. Subsequently, the waiver must be renewed every six years.

Surface Water Systems: The waiver period is **three years**. The water system is required to sample once during the waiver period. The waiver must be renewed every three years.

### **C. Synthetic Organic Chemicals (SOCs)**

A water system may be deemed eligible or ineligible for a waiver from SOCs sampling requirements based entirely on the vulnerability of the source water to contamination. *Systems utilizing Lake Champlain as a water source are ineligible for an SOCs waiver.*

To be considered for an SOCs waiver, water systems must meet the following conditions:

1. The water system has completed at least one full round of SOCs sampling in the past three years, and no SOCs were detected; **OR**
2. An SOC was detected historically in the water system, but the compound has not been detected for three consecutive years of annual sampling.

Are you applying for an **SOCs** waiver? Yes No

Have there been any detections of SOCs in your water system?

Yes. Please explain on an attached sheet.

No.

If an SOCs waiver is granted, the following conditions apply:

For both Groundwater and Surface Water Systems: The waiver period is **three years**. The waiver must be renewed at the end of the three-year period.

### **D. Inorganic Chemicals (IOCs):**

An IOCs waiver is effective for up to **nine years** (one compliance cycle). If the Division grants the waiver request, the system will be required to take a minimum of one sample during the nine-year compliance cycle.

To be considered for an IOCs waiver, the water system must have submitted results for at least three compliance samples, including at least one taken after January 1, 1990.

A water system may be deemed eligible or ineligible based solely on the test results.

Are you applying for an **IOCs** waiver? Yes No

Does the water system have at least **three** previous compliance samples (including one taken after January 1, 1990) that is representative of the same water source(s)?

Yes

No. Please explain on an attached sheet.

### **Certification**

I certify that I am a Responsible Party for this water system, I have the authority to sign this application, and the information in this application is true to the best of my knowledge.
