**CoverGrow™**  
SPREAD OR SPRAY

Mulch Pellets

## The best Pellets to quickly and easily establish vegetation

Profile® CoverGrow™ is an advanced technology pellet made from recycled wood and cellulose fibers. Once applied and activated by water, the pellets quickly expand and disperse to provide outstanding protection and water-holding performance right where it's needed. Whether you're spot treating smaller bare spots or hydrospraying larger areas, CoverGrow is the easy and convenient way to establish vegetation.

**Pellets quickly expand to create a better growing environment and provide:**

- Greater coverage
- Improved water-holding capacity
- Stronger protective cover
- More rapid germination
- Faster vegetation establishment
