EPA METHOD 533 FOR PFAS ANALYSIS

Currently, PFAS (per- and polyfluoroalkyl substances) sample analysis in Vermont is required to be conducted pursuant to EPA Method 537.1. Section 6.17.2 of the Vermont Water Supply Rule allows for sample analysis to be conducted pursuant to EPA-approved methods for monitoring PFAS compounds in drinking water if authorized by the Secretary. [EPA has approved Method 533](#) to analyze PFAS compounds in drinking water.

AUTHORIZATION

Pursuant to Water Supply Rule Section 6.17.2, the Secretary authorizes the use of EPA Method 533 for PFAS analysis at public drinking water systems in Vermont.
