Landowner(s) Failed System Application Acknowledgment

The Landowner(s), signed below, acknowledge that they are aware the application for a Vermont Wastewater System and Potable Water Supply Permit is being submitted as a replacement for a **failed** wastewater system and or potable water supply. As it is being reported as a failed system, endangering human health and the environment, the review of the application material will be prioritized by the Wastewater System and Potable Water Supply Program and **the permit for the replacement system will include a date by which construction must be completed and inspected**. The landowners may request, via email, an extension for the date of construction. The request must be submitted prior to the permitted construction date and include a reason for the need for the extension. The Program will be assured that construction of the replacement system occurred as permitted and prior to the construction completion date with the submittal of an Installation Certification indicating a final inspection date on or before the date required.
