

Digital Bedrock Geologic Map of the
Weston Quadrangle, Vermont
by
N.M. Ratcliffe¹ and W.C. Burton¹
1996

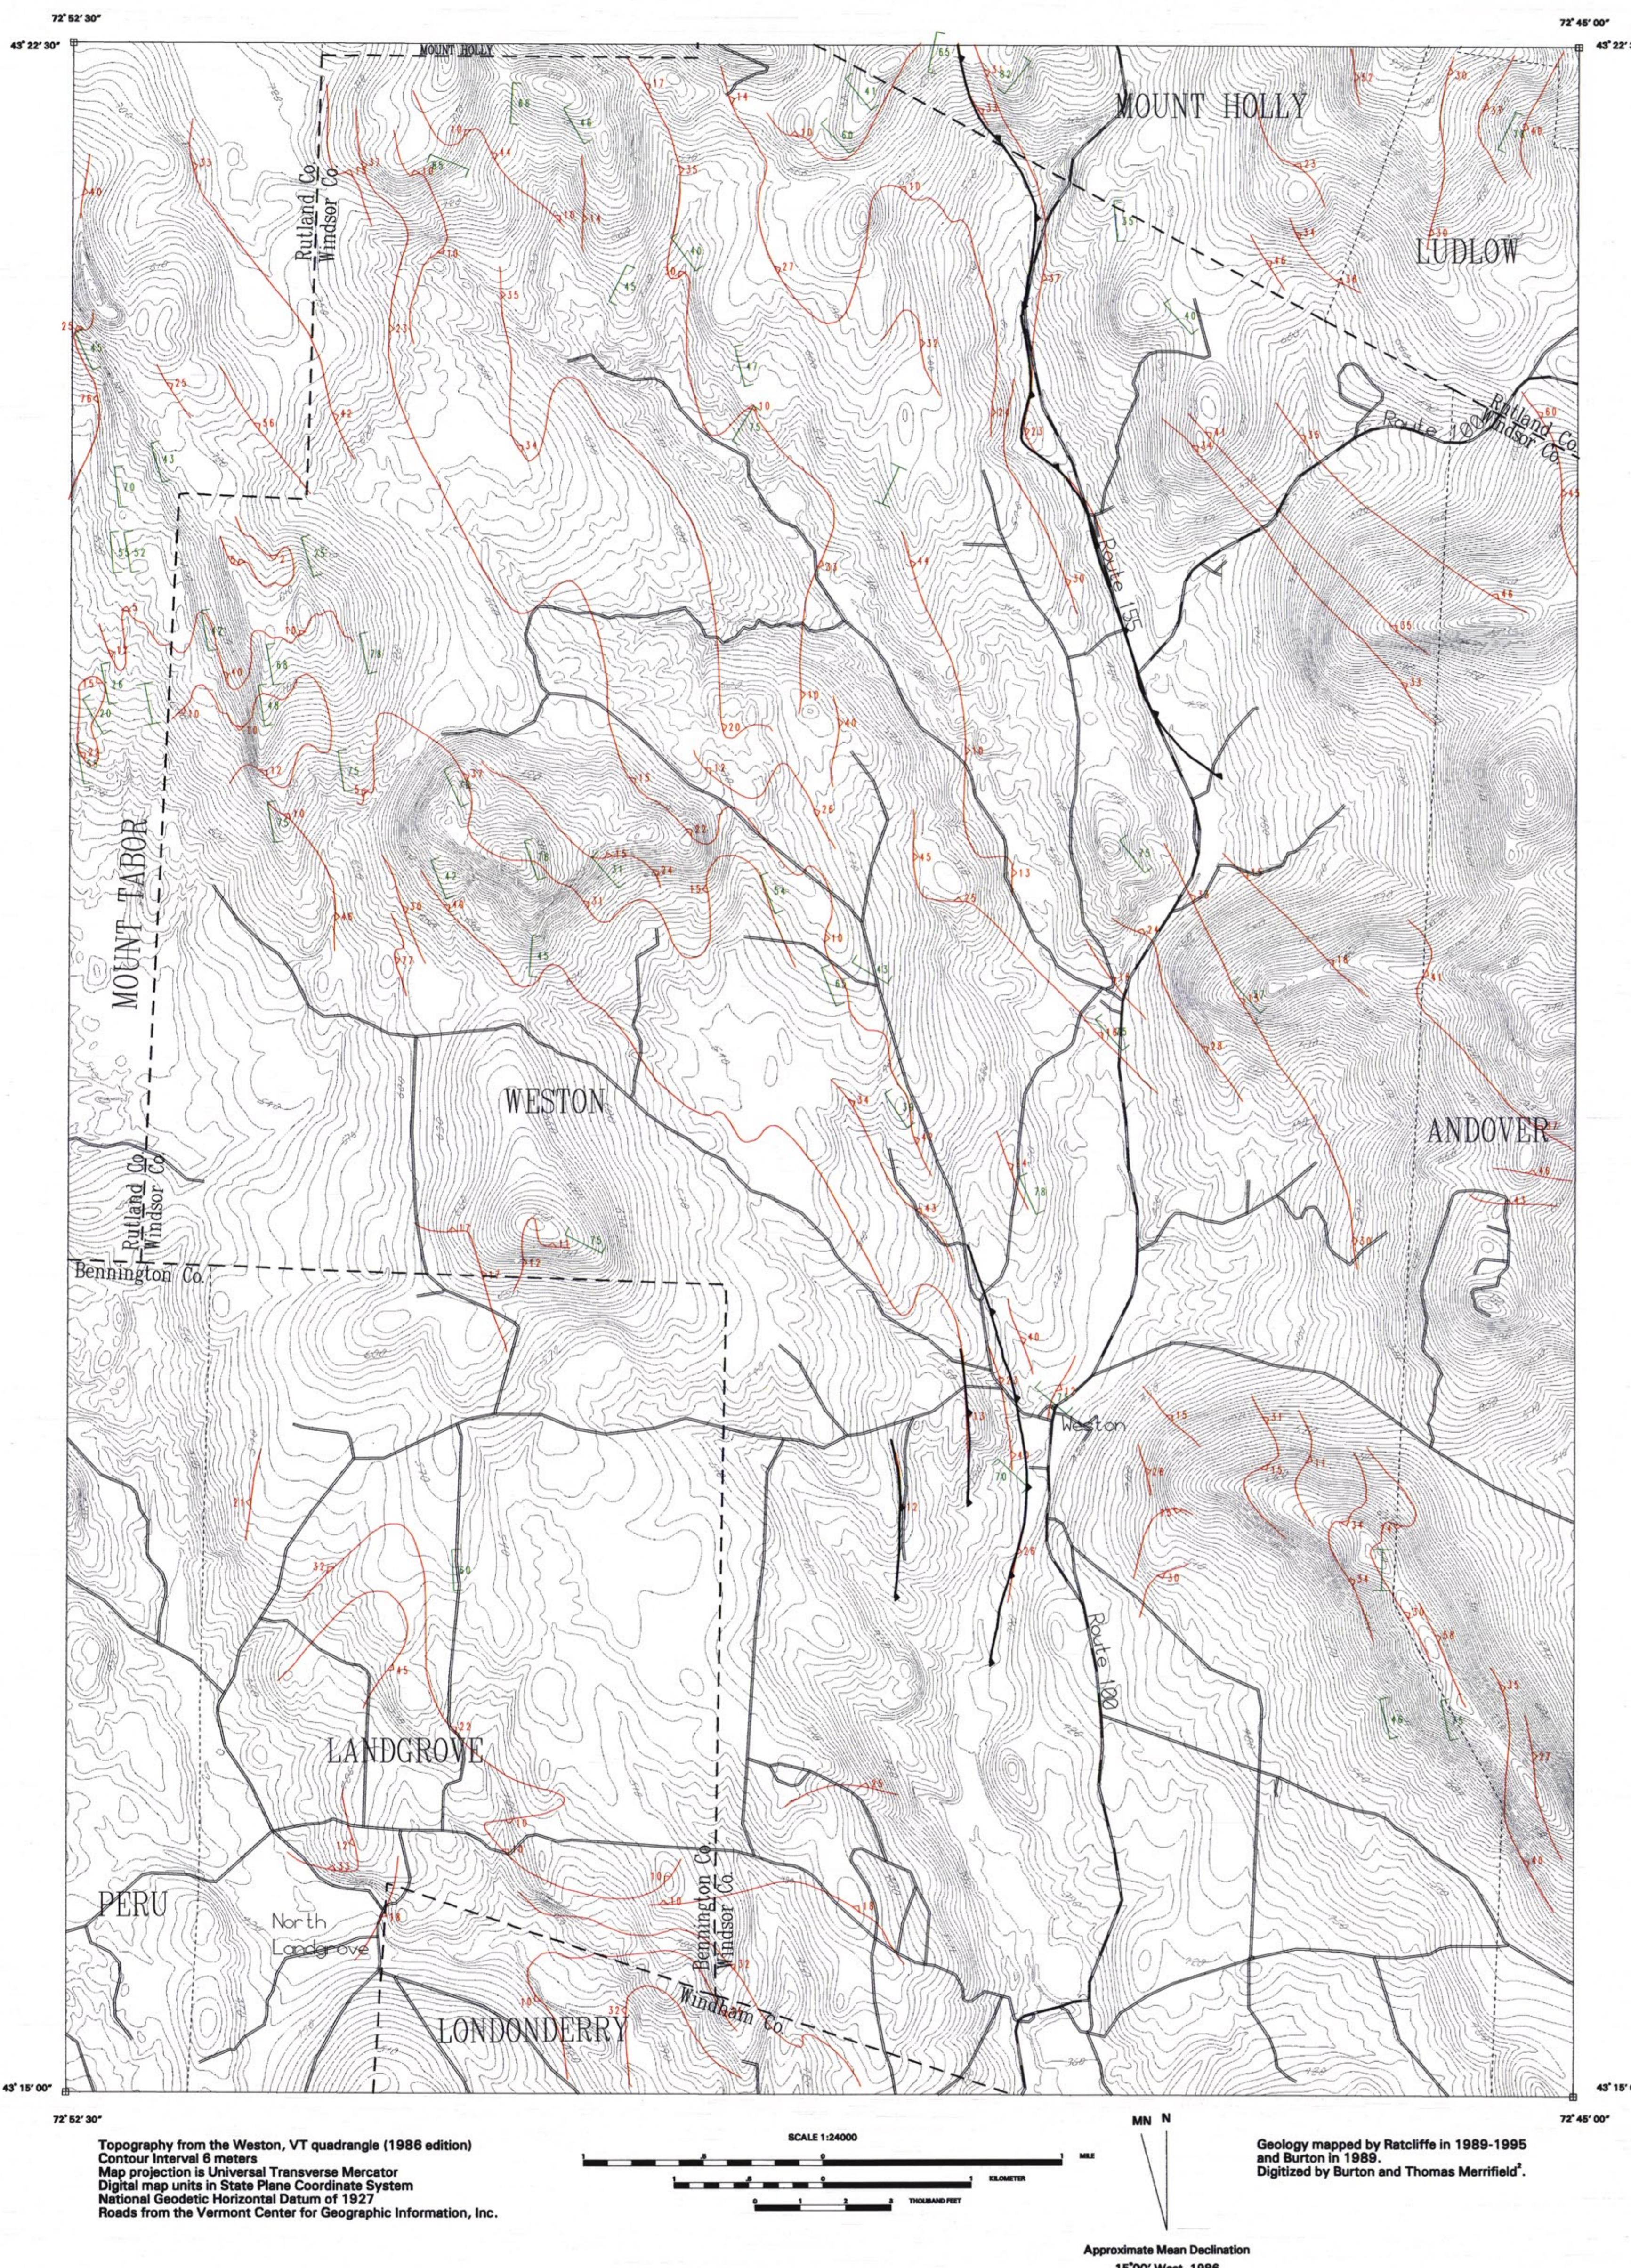

Explanation of Map Symbols

Contacts
Outcrops (areas of exposed bedrock examined in this study)
Thrust fault, teeth on upper plate

This report is preliminary and has been reviewed for
accuracy by the U.S. Geological Survey's professional staff
or with the North American Stratigraphic Code. Any use
implied endorsement by the U.S. Government.
Plate 1 and 2 are part A and the database is part B of this
Open-File Report. Both parts are available from the Vermont
Geological Survey, telephone (802) 241-3488.

Explanation of Map Symbols

	Foliation Strike and dip of inclined foliation on interpretive form-lines
	Cleavage Strike and dip of vertical foliation on interpretive form-lines
	Thrust Faults Strike and dip of inclined cleavage
	Thrust Faults Strike and dip of vertical cleavage
	Thrust Faults Thrust fault, teeth on upper plate

Plates 1 and 2 are a paper representation of the digital bedrock geologic information for the Weston Quadrangle located in Rutland, Windham, Bennington and Windham counties, Vermont. All of the bedrock geology data were obtained from Ratcliffe and Burton (unpublished data), and were digitally compiled on a personal computer system using PC ARC/INFO version 3.4D Plus by Environmental Systems Research Institute, Inc., Inc. The data from Plate 1 were exported to ARC/INFO version 7.0 where solid color fill patterns were generated, and faults were drawn using symbols from a linestat (alacnew81.lin) from ALACARTE software (Fitzgibbon and Wentworth, 1991). The compilation process was done in Windows 3.1. The data in the digital file were used in the compilation of this report, with the exception of the topography. The topography was obtained from a photographic negative separate of contour lines from the Weston, VT (1986 provisional edition) U.S.G.S. 7.5-minute topographic quadrangle. The topography was scanned with a flatbed scanner in raster format (scanned at 100 dpi) and converted to digital format using GTx OSR Contour version 2.00 by GTx Corporation, Inc., and converted into an unattributed line coverage in ARC/INFO version 7.0.
