

APPENDIX D
SECURITY PLAN

APPENDIX D

SECURITY PLAN

This plan meets the requirements of the Vermont Hazardous Waste Management Regulations (VHWMR) and 40 CFR § 264.14.

D – 1.0 SECURITY EQUIPMENT AND PROCEDURES

The site is secured from unauthorized access by:

- A chain link fence with barbed wire surrounding the facility.
- Gate access that is monitored by closed-circuit video camera and operated from the office and warning signs are posted at the access gate.
- Locks on all exterior doors of the warehouse building (including administrative offices).
- Continuous outdoor lighting during non-daylight hours.
- Controls for tank filling operations located inside the warehouse (wet dumpster).

The facility is secured by a five-foot high chain link fence in good repair and topped by three strands of barbed wire. Warning signs with the legend "Danger - Unauthorized Personnel Keep Out" are posted at the access gate and visible from twenty-five feet. The access gate remains closed and locked during non-operating hours. During operating hours, typically Monday – Friday 7:00 a.m. to 7:00 p.m., the access gate is open and monitored from the office by closed-circuit video camera and company personnel to prevent unauthorized entry. In addition, BSC warehouse and office personnel work areas are in direct line-of-sight of exterior warehouse building doors, and these personnel would observe any person making unauthorized entry during operating hours.

All visitors are required to sign a visitor logbook, maintained in the office reception area, upon arrival to the BSC and then sign out upon departure. While on site, visitors are accompanied by authorized company personnel.

The warehouse building is equipped with a security alarm system (that includes a backup battery power supply), which is activated during non-operating hours using a key code entry pad located

beside the main office door. The system is installed on personnel doors leading to the exterior of the facility, as well as two interior doors via sensor door contacts. In the event of an unauthorized entry to the warehouse during non-operating hours, an audible siren is activated, the central monitoring company (Sunrise Security) is notified automatically, and the Barre City Police Department is then notified immediately by the monitoring company.
