

**SOLID WASTE LANDFILL *POST-CLOSURE RECERTIFICATION*: APPLICATION FORM**

Last updated: March 2019

**1. Facility: Owner, Operator and Contact information**

A.	Facility Name:	
	Facility E911 Address:	

B.	Facility Owner:	
	SIGNATURE:	
	Mailing Address:	
	Email:	
	Telephone:	

C.	Facility Operator:	
	SIGNATURE:	
	Mailing Address:	
	Email:	
	Telephone:	

D.	Primary Contact:	
	Mailing Address:	
	Email:	
	Telephone:	

E.	Secondary Contact:	
	Mailing Address:	
	Email:	
	Telephone:	

**2. Preparation of Application**

A waiver of the requirement for an engineer to prepare this report has previously been requested on the following date:	<input type="checkbox"/>
I am currently requesting a waiver of the requirement for an engineer to prepare the report	<input type="checkbox"/>
I, a professional engineer licensed to practice in the State of Vermont (25 V.S.A. Chapter 20), certify to the best of my information, knowledge and belief that the attached application and associated support documents are in compliance with the applicable standards contained in the Rules.	<input type="checkbox"/>

Name:	
Signature:	
Mailing Address:	
Email:	
Engineer: License Number	
Expiration Date	

**3. Landownership**

- a. If you own the property:
  - i. Indicate the book and page where the deed is recorded and;
  - ii. attach a copy of the deed to this application

Book:		Page:		Deed Attached:	<input type="checkbox"/>
-------	--	-------	--	----------------	--------------------------

- b. If the landowner has granted you an unencumbered right to possession of the property to be used for the facility:
  - i. Attach a statement or copy of a statement from the landowner
- c. If you lease the property to be used for the facility, the landowner must complete the information below:

Landowner:	
SIGNATURE:	
Mailing Address:	
Telephone:	
Term of Lease:	

**4. Facility Location**

- a. Specify the latitude and longitude for the facility using a Global Positioning System (GPS) receiver. Alternatively, you may attach a copy of the appropriate Vermont orthophoto tax map with the location of the facility clearly and accurately marked.

Latitude:		Longitude:	
-----------	--	------------	--

- b. The groundwater beneath the facility is currently classified as:

Class III:	<input type="checkbox"/>
Class IV:	<input type="checkbox"/>
Reclassification occurred in:	

Note: all groundwater of the state is classified as Class III, unless reclassified by the Secretary through the groundwater reclassification process outlined in the Groundwater Protection Rule and Strategy. All reclassified areas are mapped on the Agency of Natural Resources *Natural Resources Atlas*.

**5. Required Supporting Documents:** The following documents and information must be submitted with this form for the application to be complete. Most of these documents require at least minimal revision from one certification period to the next; however, even if no changes are made, please include a copy of the documents with this application.

<input type="checkbox"/>	A. Evidence of landownership: See #3 above for a listing of appropriate supporting documents.
<input type="checkbox"/>	<p>B. A Post-Closure Plan: The plan should include provisions for each of the following (as applicable to the landfill infrastructure):</p> <ul style="list-style-type: none"> <li>• Groundwater Monitoring</li> <li>• Surface Water Monitoring</li> <li>• Air Monitoring</li> <li>• Leachate Monitoring</li> <li>• Erosion and Drainage Control</li> <li>• Inspections and Reporting</li> <li>• Maintenance of leachate and gas systems</li> <li>• Description of any potential planned uses of the property</li> </ul> <p>Plans should detail the specific activities and analysis that will occur each year and a schedule for implementation. Consideration should be given to the performance objectives of the post-closure activities and demonstration of conformance with the <a href="#"><i>Procedure Addressing Groundwater Quality Monitoring and Responses When a Groundwater Standard is Reached or Exceeded at Municipal Solid Waste Landfills</i></a>. Requests for reductions in monitoring should be justified by an analysis of existing data. As appropriate, a site plan(s), including applicable monitoring locations, should be included.</p>
<input type="checkbox"/>	C. Evidence that the facility is included in an adopted solid waste implementation plan: a letter from the planning entity or a copy of the appropriate documentation within the approved plan is sufficient.
<input type="checkbox"/>	D. A cost estimate for the remaining period of post-closure care or the upcoming certification period: This cost estimate must be based on the current status and post-closure activities occurring at the facility and should be updated as modifications to monitoring, inspection and reporting procedures are made over the life-time of the facility.
<input type="checkbox"/>	E. Evidence of sufficient financial responsibility or capability for post-closure care. For municipal applicants, evidence of annual appropriation of funds is acceptable (e.g. a letter from the treasurer). For private entities, financial assurance shall be established as provided within the Solid Waste Management Rules.
<input type="checkbox"/>	F. Notice of Application: The applicant shall provide notice to adjoining property owners using the Department of Environmental Conservation <a href="#">template letter</a> (2-pages) at the point of application. Included within this application, the applicant should provide a signed certification stating that all adjoining property owners, with names and addresses included, were notified by the appropriate template.
<input type="checkbox"/>	G. Background Disclosure Statements: All nonmunicipal applicants are required to complete a <a href="#">Personal History</a> Disclosure and <a href="#">Business Disclosure</a> statement in addition to the application (§10 V.S.A. 6605(h))
