

## Managing Trash and Food Scrap Carts in Bear Country

It is possible to collect trash and food scraps for a hauler without attracting nuisance bears.

### Tips for bear-proofing trash and food scrap totes:

- 1. Minimize odors.** Bears have a strong sense of smell. To contain odors in food scrap totes, cover food scraps with a thick layer of sawdust, straw, or another smell-capping compostable material. Ask your hauler what material they recommend.
- 2. Keep things clean.** Ensure no food scraps or fragrant wrappers spill on the ground or the outside of the tote.
- 3. Store totes where bears cannot access them.** If space allows, store totes in a shed, garage, or shipping container, and bring them outside immediately before pick-up. Consider at least bringing totes inside at night when bears are most active.

- 4. Connect with neighbors.** Ask neighbors to only feed birds when there is a foot of snow or more and to follow VT Fish & Wildlife's [Living with Black Bears](#) advice (secure bird seed, feed pets indoors, surround bees & chickens with electric fences, never feed bears, etc.).
- 5. Keep totes away from forest edges.** Most bears do not like to cross open areas, like yards and parking lots. Keeping totes near buildings may deter bears.
- 6. Latch totes closed.** Locks and other latches can keep bears (and other animals) out of totes. Make sure your hauler approves your latch system or undo latches for pick-up. These [instructions](#) explain how to install metal latches on plastic carts.
- 7. If outside, strap totes to a tree or pole so they are harder to tip over.** This will help the latches hold.
- 8. Surround totes with electric fencing.** Either top a wooden or chain-length fence with electric fencing or set up a ground-level electric fence. Consider baiting the electric lines with peanut butter or bacon grease; if a bear has a negative experience near your bin, it might be less likely to return.
- 9. Install a motion-sensor alarm and/or light.** Bears may be deterred by bright lights and alarms that go off as they approach a tote. Some are solar and/or battery powered so they can be installed anywhere.
- 10. Soak a rag or spray a sponge with ammonia every 2-3 weeks.** Keep it in a plastic tub next to the cart.
- 11. Train staff.** Make sure all staff know the importance of following good practices to avoid attracting bears and what to do if a bear is spotted.
- 12. If a bear is seen trying to get into a tote, try to scare it away** by banging pots together or shouting from a safe distance. If you are in a car, drive toward it slowly (not too close!) and blow the horn. Report all bear visits to VT Fish and Wildlife.

Contact VT Fish and Wildlife for more advice on deterring a bear **before** it becomes a problem. **Fill out this form to get in touch:** [Anrweb.vt.gov/FWD/FW/WildlifeBearReport.aspx](https://www.anrweb.vt.gov/FWD/FW/WildlifeBearReport.aspx)
