Vermont’s Universal Recycling Law bans throwing food and food scraps into landfills by July 1, 2020. Donating surplus food to local food rescue organizations allows your business to:

- Follow the Universal Recycling law by not throwing food into the trash
- Support your community by helping the one in four Vermonters who are in need of food
- Potentially lower trash disposal and diversion costs
- Take possible federal tax deductions (ask your accountant for details)

You are protected from liability by Federal Law, under the Bill Emerson Good Samaritan Food Donation Act, when donating properly handled food.

Extra food can only be donated to food rescue organizations if it was handled properly and not previously served. When creating a program to donate food, follow these guidelines.

### DONATING FOOD SAFELY AND SAFE FOOD HANDLING GUIDE

#### TIME & TEMPERATURE CONTROLS

The temperature of potentially hazardous foods, including prepared foods, meat, poultry, dairy, fish, seafood, tofu, eggs, and cut produce, must be managed for safety. Foods kept in the temperature danger zone, which is between 41°F and 135°F, can spoil, grow bacteria, and may cause people to become sick.

<tr>
<th>Food Type</th>
<th>Storage Requirements</th>
<th>Foods that Cannot be Donated</th>
</tr>
</thead>
</table>
| Prepared Foods                                 | Stored at 41°F or below Frozen at 0°F or below | • Foods kept in the danger zone for more than 2 hours  
|                                                 |                      | • Previously reheated foods  
|                                                 |                      | • Previously served foods |
| Chilled Perishable, Prepackaged Foods (e.g. dairy, juice) | Stored at 41°F or below  | • Foods kept in the danger zone for more than 2 hours  
|                                                 |                      | • Damaged or bulging packaging  
|                                                 |                      | • Foods stored in non-food grade packaging |
| Meat, Poultry, Fish (Unfrozen)                 | Stored at 41°F or below | • Foods kept in the danger zone for more than 2 hours  
|                                                 |                      | • Foods stored in non-food grade packaging |
| Meat, Poultry, Fish (Frozen)                   | Frozen at 0°F or below | • Foods kept in the danger zone for more than 2 hours  
|                                                 |                      | • Severe freezer burn  
|                                                 |                      | • Defrosted foods |
| Fresh Produce (Whole)                          | Stored in a cool, dry, and clean area | • Significant decay |
| Fresh Produce (Cut)                            | Stored at 41°F or below | • Foods kept in the danger zone for more than 2 hours  
|                                                 |                      | • Color change or decay |
| Baked Goods                                    | Stored in a cool, dry, and clean area | • Foods stored in non-food grade packaging  
|                                                 |                      | • Moldy or stale products |
| Canned/Boxed Foods                             | Stored in a cool, dry, and clean area | • Damaged or bulging packaging  
|                                                 |                      | • Home-canned products |
Food service facilities must properly label the food they are donating. All donated food must be kept in food-grade packaging at all times.

**ALLERGEN LABELING**
Each year, millions of Americans have allergic reactions to food. It is strongly recommended that foods for donation be labeled with ingredients so people with food allergies are aware of what is in the food. Eight major foods account for 90% of food allergic reactions and are important to label: milk, eggs, fish (e.g., bass, salmon), shellfish (e.g., crab, shrimp), tree nuts (e.g., almonds, walnuts), peanuts, wheat, and soybeans.

**DATE MARKING**
Vermont Department of Health food service regulations require date marking for prepared foods. Prepared food must be discarded after seven days. Mark the date when food is prepared and the date when food must be discarded (the day food is prepared + six days = seven days).

**Prepared Foods**
- Label the packaging with the food name, the date it was prepared, and the seven-day expiration date.
- Food that has been refrigerated for seven days or more should not be donated.
- Foods that are frozen, thawed, and then refrozen should not be donated.

- Food that will be donated can be frozen prior to donation to “stop the clock” and prevent the growth of bacteria. Label the packaging with the date it was frozen.
- Store foods in a designated area of a refrigerator or freezer while waiting for pick-up.

**Non-Perishable Foods (baked goods and canned/boxed foods)**
- “Best by,” “sell by,” and “use by” dates on food packaging are dates marked by the manufacturer. They indicate the time period the product will have the highest quality, not the date at which the food is no longer safe to eat.
- Store foods in a designated area while waiting for pick-up.

**RECOMMENDATIONS FOR TRACKING DONATIONS**
Facilities are encouraged to keep logs documenting that food is handled and served properly within the facility. Here is an example of a food donation log:

<table>
<thead>
<tr>
<th>Date</th>
<th>Name of Food Donated</th>
<th>Temperature (°F)</th>
<th>Name of Food Rescue Agency</th>
</tr>
</thead>
</table>

Food rescue agencies receiving donations should have the equipment to maintain proper food temperatures by keeping foods hot or cold during transportation, receiving, and storage.
