

<b>EPA Lake</b>	EPA Lake Champlain River Geographic Response Strategy  Malletts Creek LC-VT-08							
Tactic #	Purpose	Response Equipment	Deployment Resources	Deployment Notes				
DV-01	Redirect spilled oil from one location or direction of travel to a specific site for recovery.	400 ft protected water boom 2 marine anchor system 2 shoreline anchor system Testing Date		Deploy boom as depicted to divert incoming oil to the collection site. Anchor every 200-300'. Adjust configuration as necessary to reduce entrainment. Set up shoreside recovery. Deploy shoreside anchor first.				
SR-01	Remove spilled oil that has been diverted to a designated recovery site accessible from shore.	1 skimming system	2 shore responders  Tested	Set up shoreside recovery tactic at general location depicted on map.				
EX-02	Prohibit oil slicks from entering a sensitive area.	150 ft protected water boom 1 marine anchor system 2 shoreline anchor system Testing Date	2 shore responders	Deploy boom as depicted to exclude oil from sensitive areas. Anchor every 200-300'. Adjust configuration as necessary to reduce entrainment. Deploy shoreside anchor first. Readjust boom angle as needed to reduce entrainment
