**Subject:** Update on VWQS comments

Hello Neil,

I'm writing to provide an update on our submitted VWQS comments.

Since we submitted our comments, Brian Shupe and I met with you and Eric Smeltzer to discuss our concerns. It is my position that several of our concerns were based on a misunderstanding of the proposed criteria: the Agency proposes that ALL of the criteria listed in Table 3 of the proposed standards are considered during the assessment of waters in categories "B" and "C".

Thank you for meeting with us and for spending the time to help us better understand the Agency's proposal. Despite our best efforts, confusion still happens.

Kim
