

Report Form - Aquatic Nuisance Control - Non-Chemical Aquatic Plant Control Projects

Use this form to document non-chemical aquatic plant control projects as required by a permit and/or to document pesticide minimization measures (e.g., handpulling only). Maintain this documentation for your records and submit this to the Lakes and Ponds Program if required.

Name(s): _____ Permit Number (if applicable) & Lake: _____

Date	Location (Adjacent address or lat/long)	Project Type ¹	Target Species	Density of Growth ²	Control Location Surface Area	Volume of Material Removed ³	Non-Target Mitigation Measures Completed ⁴
							Yes: No: N/A: Comments:
							Yes: No: N/A: Comments:
							Yes: No: N/A: Comments:
							Yes: No: N/A: Comments:
							Yes: No: N/A: Comments:

¹Project types include: Handpulling only (**HP**), bottom barrier installation (**BB-I**)/maintenance (**BB-M**)/removal (**BB-R**), diver assisted suction harvesting (**DASH**), and mechanical harvesting (**MH**)

²Density of growth: *Very abundant*: 75 - 100% of the water column consists of the target species; populations are at the surface of the water, forming mats
Abundant: 50% - 75% of the water column consists of the target species; aquatic plants reach the surface of the water, mats have not yet formed
Common: 25% - 50% of the water column consists of the target species
Occasional: 5% - 25% of the water column consists of the target species
Scattered: less than 5% of the water column consists of the target species

³Volume of material removed: Not applicable for bottom barrier projects.

⁴Non-target mitigation measures: this includes permit required mitigation measures as well as any other comments related to actions taken to reduce impacts the project has on the non-target environment (e.g., search harvested material for aquatic animals and return them to the water). Provide additional documentation as needed.
