

COVID-19 Basic Infection Prevention Measures

COVID-19, caused by a new coronavirus, is a respiratory illness that can spread from person to person. By taking the following infection prevention measures, Vermont Public Access Greeters conducting courtesy boat inspections will help prevent the spread of the virus while helping boaters prevent the spread of invasive species.

	<p>Submit the self-screening form for COVID-19 symptoms before each shift. Seek medical advice and do not work or volunteer at the boat ramp if you answer “yes” to any of the screening questions.</p>
	<p>Practice physical distancing — maintain at least 6 feet between other Greeters, boaters, and the public at all times.</p>
	<p>Do not pass out any materials (brochures or decals) to boaters or the public as this violates physical distancing measures.</p>
	<p>Avoid congested situations that may make keeping at least 6 feet physical distancing difficult.</p>
	<p>Sit in your vehicle, or temporarily leave the launch, if it becomes too crowded or if you notice someone who could be sick.</p>
	<p>Do not share clipboards, pens, and boater survey sheets, or any other tools or materials with other Greeters.</p>
	<p>Wash hands frequently with soap and water or use alcohol-based hand sanitizer containing at least 60% alcohol.</p>
	<p>Clean and disinfect frequently used tools, equipment, and frequently touched surfaces (cell phones, tablets, pens, etc.) on a regular basis.</p>
	<p>Follow all CDC guidelines, and wear a non-medical grade face covering while performing Access Greeter duties. VTDEC does not recommend Greeters to wear N-95 respirators or sterile gloves as these are critical supplies that must continue to be reserved for healthcare and other frontline workers.</p>
