

Lake Encroachment Individual Permit

Under 29 V.S.A. § 401 *et seq.*

VERMONT DEPARTMENT OF
ENVIRONMENTAL CONSERVATION
WATERSHED
MANAGEMENT DIVISION
LAKES & PONDS PROGRAM

Permittee(s): William C. Rowell Trust Waterbody: Lake Caspian Permit Number: 2016-012	Project Description: Structural Retaining Wall Replacement and Dock Removal Project SPAN: 264-083-10770 Project Location: 113 North Winnimere Road, Greensboro
--	---

Based upon the findings contained in this permit, it is the decision of the Department of Environmental Conservation (the Department) that the project described herein, as set forth in the following findings and in the application on file with the Department, complies with the criteria of 29 V.S.A. § 405 and is consistent with the public trust doctrine, and is hereby approved under the following conditions and specifications.

a. Specific Conditions

1. The project shall be carried out in accordance with the final application received by the Department on May 25, 2016 and the conditions and specifications of this permit.
2. Structural retaining wall repair and replacement projects completed with existing rocks and concrete removed from the lake, wood and prefabricated concrete blocks shall be constructed in accordance with the Approved Application, the additional permit terms and conditions contained herein, and the following conditions:
 - A. The replacement wall shall be constructed no greater in height, width, and length, and no further lakeward (including footing and other design features if applicable) than the existing wall.
 - B. Existing water depths in front of the replacement wall shall be maintained.
 - C. Reference measurements shall be made and demarcated as necessary in the field using temporary grade stakes and/or lines, or another equivalent method, by the permittee prior to project implementation/construction, to ensure project compliance with permit conditions (a)(2)(A) and (a)(2)(B) above.
 - D. No new concrete will be poured for any bulkhead repair or replacement activities.
 - E. Any sandbags that may be used temporarily during construction shall be removed from the lake. In addition, sandbags shall not be left in the lake, or stored in a location that will result in a discharge of sand to the lake as a result of wind, waves, stormwater runoff, or ice.
 - F. The permittee shall install a turbidity curtain or Department approved equivalent barrier, in the lake around the project work area. The barrier shall extend above the lake's surface and be secured to the bottom of the lake to contain turbidity during the project. If turbidity is observed beyond the work area, work shall be stopped immediately and shall not recommence until the source of the turbidity is identified and corrected. The barrier shall not be installed in a way that blocks navigation in a channel, if applicable. The barrier shall remain in place and be maintained until the project is complete and observations indicate turbidity within the barrier has decreased to the level of turbidity outside the barrier.

b. Standard Conditions

1. Completion of construction. The project authorized by this permit must be completed within 5 years of the effective date of this permit.
2. Initiation of construction. Initiation of the project authorized by this permit is restricted until after July 1

of any calendar year unless explicitly approved in writing by the Department, and/or specified in the Approved Application.

3. Permit modification. All permit modifications, shall be treated as a new permit application.
4. Nuisance species spread prevention. Prior to placing any equipment (e.g., boat, trailer, vehicle, or gear) that has been in or on any other waterbody into public waters for project implementation/construction, the permittee shall decontaminate the equipment in compliance with the [Voluntary Guidelines to Prevent the Spread of Aquatic Invasive Species through Recreational Activities, Aquatic Nuisance Species Task Force, November 2013](#).
5. Erosion prevention and sediment control. Erosion prevention and sediment control best management practices shall be utilized and maintained to prevent erosion and control sediment to minimize and prevent adverse impacts to water quality during construction of the authorized project. In addition, the permittee shall comply with the following conditions:
 - A. Areas disturbed by the construction activities shall be protected from erosion through the application of seed and mulch upon completion of construction, and shall be temporarily mulched during construction in advance of precipitation events.
 - B. Work shall stop immediately if visible turbidity occurs in the lake as a result of construction activity and shall not recommence until the source of the turbidity is identified and corrected.
6. Heavy equipment operation. Heavy equipment shall work from shore, and shall not work lakeward of mean water level unless explicitly approved in writing by the Department, and/or specified in the Approved Application.
7. Spill prevention. Fuel and lubricants from equipment shall not be discharged into the water. Any spills shall be managed in accordance with all applicable local, state, and federal regulations.
8. Waste management. Any pieces of concrete, stone, construction debris, or other waste materials deposited into the lake during project implementation/construction shall be removed from the lake and disposed of properly, in accordance with all applicable local, state, and federal regulations.
9. Compliance with other regulations. This permit does not relieve the permittee from obtaining all other approvals and permits prior to commencement of activity or from the responsibility to comply with any other applicable federal, state, and local laws or regulations, including but not limited to the Vermont Solid Waste Management Rules, the Vermont Wetland Rules, and the Vermont Shoreland Protection Act.
10. Transfer of permit. Prior to transferring ownership over the encroachment authorized by this permit or the portion of property associated with the encroachment authorized by this permit, the permittee shall give the Department notice of the transfer. The notice shall include the name and contact information for the current permittee and prospective permittee, the proposed date of permit transfer, and a statement signed by the prospective permittee stating that he/she has read and is familiar with this permit and agrees to comply with and be bound by its terms and conditions.
11. Access to property. The permittee shall allow the Commissioner of the Department, or a duly authorized representative, at reasonable times and upon presentation of credentials, to enter upon permittee's property, or to otherwise access the authorized encroachment, if necessary, to inspect the project to determine compliance with this permit.
12. Legal responsibilities for damages. The Department, by issuing this individual permit, accepts no legal responsibility for any damage direct or indirect of whatever nature and by whoever suffered arising out

of the approved project.

13. Rights and Privileges. This permit does not authorize any damage to private property or invasion of private rights or the violation of federal, state, or local laws or regulations. In addition, this permit does not convey any title or interest to the lands lying under public waters or waters affected.
14. Duty to comply and enforcement. The permittee shall comply with all terms and conditions of this permit. Any permit noncompliance shall constitute a violation of 29 V.S.A. Chapter 11 and may be cause for an enforcement action and revocation, modification, or suspension of this permit. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the conditions of this permit.
15. Reopener. If, after granting this permit, the Department determines that there is evidence indicating that an authorized activity does not comply with the requirements of 29 V.S.A. Chapter 11, the Department may reopen and modify this permit to include different limitations and requirements.
16. Revocation. This permit is subject to the conditions and specifications herein and may be suspended or revoked at any time for cause including: failure by the permittee to disclose all relevant facts during the application process which were known at that time; misrepresentation of any relevant fact at any time; non-compliance with the conditions and specifications of the permit; or a change in the factors associated with the encroachment's effect on the public trust or public good so that on balance the Department finds that the encroachment adversely affects the public trust or public good.
17. Severance. The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
18. Appeals.
 - A. Renewable Energy Projects – Right to Appeal to Public Service Board. If this decision relates to a renewable energy plant for which a certificate of public good is required under 30 V.S.A. § 248, any appeal of this decision must be filed with the Vermont Public Service Board pursuant to 10 V.S.A. § 8506. This section does not apply to a facility that is subject to 10 V.S.A. § 1004 (dams before the Federal Energy Regulatory Commission), 10 V.S.A. § 1006 (certification of hydroelectric projects), or 10 V.S.A. Chapter 43 (dams). Any appeal under this section must be filed with the Clerk of the Public Service Board within 30 days of the date of this decision; the appellant must file with the Clerk an original and six copies of its appeal. The appellant shall provide notice of the filing of an appeal in accordance with 10 V.S.A. § 8504(c)(2), and shall also serve a copy of the Notice of Appeal on the Vermont Department of Public Service. For further information, see the Rules and General Orders of the Public Service Board, available online at www.psb.vermont.gov. The address for the Public Service Board is: 112 State Street, Montpelier, Vermont, 05620-2701; Telephone #: 802-828-2358.
 - B. All Other Projects – Right to Appeal to Environmental Court. Pursuant to 10 V.S.A. Chapter 220, any appeal of this decision must be filed with the clerk of the Environmental Division of the Superior Court within 30 days of the date of the decision. The Notice of Appeal must specify the parties taking the appeal and the statutory provision under which each party claims party status; must designate the act or decision appealed from; must name the Environmental Division; and must be signed by the appellant or the appellant's attorney. The appeal must give the address or

location and description of the property, project, or facility with which the appeal is concerned and the name of the applicant or any permit involved in the appeal. The appellant must also serve a copy of the Notice of Appeal in accordance with Rule 5(b)(4)(B) of the Vermont Rules for Environmental Court Proceedings. For further information, see the Vermont Rules for Environmental Court Proceedings available at www.vermontjudiciary.org. The address for the Environmental Division is: 32 Cherry Street; 2nd Floor, Suite 303; Burlington, VT 05401 Telephone #: 802-951-1740.

c. Findings

1. Jurisdiction - 29 V.S.A. § 403: Lake Caspian in Greensboro is a public water of the state of Vermont. The project encroaches beyond the shoreline as delineated by the mean water level. Therefore, the Department has jurisdiction under 29 V.S.A. Chapter 11.
2. Application Receipt and Review - 29 V.S.A. § 404: On May 25, 2016, the Department received an application from William C. Rowell Trust (permittee), under the provisions of 29 V.S.A. Chapter 11, for authorization to replace an existing structural retaining wall and remove damaged concrete docks located within the public waters of Lake Caspian, Greensboro.
3. Public Notification - 29 V.S.A. § 405(a): The Department gave written notice of this application to the municipality in which the proposed encroachment is located, abutting property owners, and others having an interest in this matter and provided an opportunity for interested persons to file written comments or request a public information meeting. The notice period began on May 26, 2016 and closed at 4:30 PM on June 24, 2016. No comments were received.
4. Background; Lake Encroachment Permit History: None
5. Project Description: Two ageing concrete docks that have been heavily damaged from ice push will be removed from the waters of Lake Caspian. These docks were constructed from concrete and wood and extend 32.5 and 20 feet into the Lake. All non-natural material from the existing docks will be removed using an excavator that will work from shore. The docks are attached to a 47-foot long wooden bulkhead. The bulkhead will be repaired and replaced in some areas. The bulkhead will be repaired with wood, rock and concrete from the removed docks. No additional materials will be placed below mean water level. There is a terraced grassed lawn landscape at the shore that will have to be taken apart in order for the excavator to access the lake. It will be repaired after the encroachment work is complete. Measures will be taken to control sediment from the shore during construction.
6. Project Purpose: The purpose of this project is to remove hazardous and unusable docks from the lake and to repair the existing retaining wall to prevent erosion in the lake and at the shore.
7. Effect of Encroachment – Whether Excessive for Stated Purpose: This project is not excessive for the stated purpose.
8. Effect of Encroachment – Less Intrusive Feasible Alternatives: This is a less intrusive feasible alternative. If no action were taken, the damaged docks would continue to erode into the waters of Lake Caspian.
9. Effect of Encroachment – Measures to Reduce Impacts on Public Resources: A turbidity curtain will be installed in the water around the work area to contain turbidity. Heavy equipment will work from shore. Sediment will be controlled at the shore to prevent erosion from heavy equipment activities at the shore.
10. Placement of Fill: No new fill will be placed below mean water level. The fill that is removed will be used

to repair the existing bulkhead within the same footprint of the existing structure.

- 11.** Effects on Water Quality - 29 V.S.A. § 405(b): Sediment will be controlled in the shoreland area and in the water to prevent erosion and turbidity. Heavy equipment will work from shore. The project will not have a long-term adverse impact on water quality.
- 12.** Effects on Fish and Wildlife Habitat - 29 V.S.A. § 405(b): The project will not have an adverse impact on fish and wildlife habitat. The removal of the concrete docks from the water may improve fish and wildlife habitat conditions.
- 13.** Effects on Aquatic and Shoreline Vegetation - 29 V.S.A. § 405(b): The project will not have an adverse impact on shoreline or aquatic vegetation. The removal of the concrete docks from the water may improve aquatic vegetation habitat conditions.
- 14.** Effects on Navigation and Other Recreational and Public Uses, Including Fishing and Swimming - 29 V.S.A. § 405(b): This project will not have an adverse impact on navigation and other recreational public uses. This project will reduce the encroachment in the waters of Lake Caspian, improving navigation conditions.
- 15.** Consistency with the Natural Surroundings - 29 V.S.A. § 405(b): The project is consistent with the existing natural surroundings.
- 16.** Consistency with Municipal Shoreland Zoning Ordinances and Applicable State Plans - 29 V.S.A. § 405(b): No adverse comments were received during the investigation from local and state officers and the project is therefore considered to be consistent with municipal shoreland zoning ordinances and applicable state plans.
- 17.** Cumulative Impact - 29 V.S.A. § 405(b): The encroachment is the minimum necessary to stabilize the shoreline by repairing the existing bulkhead. Any additional cumulative impact from the project work will be outweighed by the benefits of long term stabilization of the shoreline and the removal of the existing concrete docks.
- 18.** Public Good Analysis Summary - 29 V.S.A. § 405(b): Based upon findings c. 11-17, the project will not adversely affect the public good.
- 19.** Public Trust Analysis: The public trust doctrine requires the Department to determine what public trust uses are at issue, to determine if the proposal serves a public purpose, to determine the cumulative effects of the proposal on the public trust uses, and to balance the beneficial and detrimental effects of the proposal. The public trust uses relevant to this proposal are fishing, boating/kayaking, swimming, ice fishing, navigation, and recreation. The impacts of the project on public trust uses are temporarily limited during the short time frame of project implementation. The concrete dock removal and bulkhead replacement provides public benefits in the form of improved navigation, water quality, and habitat. The bulkhead repair project provides public benefits in the form of long term protection of the shoreline from erosion due to wave and ice action. The public benefits outweigh the temporary negative impacts on public trust uses. The Department has therefore determined that the project is consistent with the public trust doctrine.

d. Authorization

Based upon the foregoing findings, and in consideration of the Department's Interim Procedures for the Issuance or Denial of Encroachment Permits, dated October 4, 1989, excluding Section 3, which was invalidated by Lamoille County Superior Court, Docket No. S96-91, 9/04/92, it is the decision of the Department that the project described herein, as set forth in the above findings and in the plans on file with the Department, complies with the criteria of 29 V.S.A. § 405, and is consistent with the public trust doctrine.

In accordance with 29 V.S.A. § 401 *et seq.*, the Department hereby issues this decision and permit to William C. Rowell Trust for the above named project. The Department has approved the project subject to the conditions contained herein.

This permit shall not be effective until 10 days after the Department's notice of action and permit issuance in accordance with 29 V.S.A. § 405(c) and shall expire years 5 thereafter. If the permittee wishes to modify the encroachment or conduct other jurisdictional activities not authorized by this permit, the permittee must submit a new permit application.

Alyssa B. Schuren, Commissioner
Department of Environmental Conservation
