

Individual Permit Application

For a **Lake Encroachment Permit** under

Chapter 11 of Title 29, § 401 *et seq.*

For Lake Encroachment Permitting Use Only

Application Number: **2178-LEP**

Submission of this application constitutes notice that the person in Section B intends to encroach beyond the mean water level of a lake or pond, and certifies that the project will comply with Chapter 11 of Title 29, § 401 *et seq.* All information required on this form must be provided, and the requisite fees (Section I) must be submitted made payable to the State of Vermont, to be deemed complete.

A. Project Information

1. Physical Address (911 Address): AIR Development, LLC

2a. Town- County: 71 U.S. Route 2

2b. Zip: 05486

3. Span (School Parcel Account Number is required for your application to be deemed complete. It can be obtained from your property tax bill. If you cannot locate your property tax bill, please obtain this information from your Town Clerk)

4. Name of Lake/Pond: Lake Champlain

5. Have you ever applied for a permit with the Department of Environmental Conservation associated with this parcel?
 Yes No

B. Applicant (Landowner if applicable) Contact Information

1. Name: AIR Development, LLC

2a. Mailing Address: 280 Daines Street, Suite 300

2b. Town: Birmingham

2c. State: MI

2d. Zip: 48009

3. Phone: 245-645-9220

4. Email: chris@uniprop.com

C. Application Preparer Contact Information:

1. Name: Donald L Hamlin Consulting Engineers, Inc

2a. Mailing Address: 136 Pearl Street

2b. Town: Essex Junction

2c. State: VT

2d. Zip: 05452

3. Phone: 802-878-3956

4. Email: rhamlin@dlhce.com

D. Abutting Land Owners

Using the abutter addendum available on dec.vermont.gov, attach a list of land owners who abut the proposed project.

E. Project Description

1. Describe the proposed project including the description of the materials and mechanical equipment which may be used during construction and the anticipated work schedule. Identify whether or not the project includes placement or removal of fill and if so, specify the number of cubic yards of fill or dredged materials to be placed or removed beyond the shoreline at mean water level.

Applicant proposes two projects, one to remove lake bottom material and the other to add stone stabilization to the shoreline. Both are shown on the attached aerial photo-based site plan.

The purpose of the first project is to mitigate the adverse (too shallow) launch/landing conditions of the lake bottom just offshore of the privately owned, public boat launch on the east shore of South Hero at Apple Island Resort Marina. The proposed area to be dredged is highlighted on the attached plan. The contrast in water depth between the applicant's boat launch and the adjacent State boat launch is evident in the recent Google aerial photography used in the attached plan. The proposed area of dredging is 0.05 ac, and the volume of material to be removed from the lake is estimated to be 242 cubic yards. The applicant would like to accomplish the work in the fall of 2016.

The second project proposes to add an area of stabilizing stone material along the shore, immediately north of applicant's boat launch. The area is stone proposed is 38'x25'x3'deep, 105 cubic yards, and is shown on the attached plan.

2. Describe the purpose of the proposed project:

The lake bottom just offshore of applicant's public boat launch is currently too shallow and overly prone to material transport and turbidity from propeller action. The shallow depth also hinders boat ingress and egress from the launch area. Applicant would like deepen the lake bottom just offshore of the boat launch and adjacent to the dock, to alleviate these problems.

The purpose of placing stone in the area described above is to stabilize ongoing shoreline erosion near the docks and boat launch.

3. Describe what less intrusive feasible alternatives have been considered:

No less intrusive alternatives are known while the lake is below 95.5 elevation.

4. Describe the public benefits of the proposed project:

The applicant operates a marina and public boat launch which has existed for 50 years. It serves both guests of Apple Island Resort and the general boating public, and helps to alleviate long backups at peak times during the boating season at this historically popular lake access.

The addition of stone along the shore will stabilize and protect the shoreline from erosion caused by boat wakes.

F. Encroachment Effects (describe how the proposed project will affect the following)

1. What measures are proposed to minimize the project's effects on water quality (e.g., use of a turbidity curtain)?

Prior to lake bottom disturbance and material removal, a turbidity curtain will be installed around the entire area, extending to the shore on both ends, and remaining in place until removal and placement operations are completed. The removed material will be taken offsite.

2. How will the project minimize effects to fish and wildlife habitat (e.g., project is not to commence until after fish spawning July 1 of any calendar year)?

Negative impacts to fish and habitat will be minimized by use of a turbidity curtain around the area of material removal and placement, and by confining work to the fall of the year.

3. Does the project propose removal of aquatic or shoreline vegetation? If so, what measures are proposed to reduce the effects of vegetation removal?

No removal of aquatic or shoreline vegetation is proposed.

4. Describe the surrounding shoreline. Is the project consistent with these surroundings? What measures are proposed to ensure the project is in-keeping with the surroundings?

The projects propose to maintain and protect the historical uses and services offered by the existing marina and boat launch.

5. Will the project affect navigation, recreation, and other public uses? If so, how will these effects be minimized?

The projects will not negatively affect any of the lake shore amenities historically enjoyed by the public. The project will allow the continued use of the boat launch and marina, thereby allowing continued public access for recreational use of the lake.

G. Applicant Certification

As APPLICANT, I hereby certify that the statements presented on this application are true and accurate and recognize that by signing this application, I agree to complete all aspects of the project as authorized. I understand that failure to comply with the foregoing may result in violation of the Chapter 11 of Title 29, § 401 *et seq.*, and the Vermont Agency of Natural Resources may bring an enforcement action for violations of the Act pursuant to 10 V.S.A. chapter 201.

Applicant (landowner if applicable) Signature: Chris R. Anderson Date: 8-18-16

I. Applicant Preparer Certification (if applicable)

As APPLICATION PREPARER, I hereby certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Application Preparer Signature: Richard F. Hamilton, P.E. Date: 8-18-16

J. Additional Required Documentation: (please check to ensure you have completed the following)

All sections of the application are complete or otherwise indicate "not applicable";

Application includes site plans with aerial and cross section views;

Application description includes dimensions and surface areas of cleared areas and impervious surfaces; and

Application includes photos of project area.

K. Permit Application Fees		
Select the most applicable permit description and requisite fee. If the proposed project involves more than one of the project types, multiple fees may apply. For example, a project involving structural erosion control and marina improvement will require both fees (2) and (3).		
1. Non-structural erosion control project (e.g., rip rap):		
Non-structural erosion control project: \$155.00		\$155.00
Total:		\$155.00
2. Structural erosion control project		
Structural erosion control project: \$250.00		
Total:		
3. Other Projects (e.g., marina improvements):		
Other Project: \$300.00		\$300.00
Project Cost Fee: 0.01 times project cost	Total Project Cost: <u>\$10,000</u> x 0.01	\$100.00
Total:		
	Grand Total Due:	\$555.00

Submit this form and application fee, payable to:
State of Vermont
Vermont Department of Environmental Conservation
Watershed Management Division
1 National Life Dr, Main 2
Montpelier, VT 05620-3522
