

LaRosa Partnership Program Monitoring Sites 2022

Important Updates:

Our newsletter has a new look! We have been trying to find more effective and accessible ways to communicate with partners. Please let us know what you think!

Thank you so much for all of your patience as we review 2022 LPP data. This year, we have a new database manager that will be helping us migrate LPP data to the WSMD database. We hope to share fully reviewed and approved data with you by the end of November or early December.

In other news, VTDEC staff may be submitting site nominations for 2023 in November. Relevant nominations will be shared with partners as needed.

LPP Q&A:

Q: Can LaRosa partners share the chemistry results provided by VAEL via emailed PDFs?

A: Chemistry results shared by VAEL via PDF have not undergone QAQC review by LPP staff. For this reason, these chemistry results are **subject to change**. Therefore, if you plan to share these results, please inform your audience that they are **preliminary**.

Reminders:

It may seem like the 2022 sampling season has only just ended, but 2023 site nominations are right around the corner! Please begin thinking about what sites you would like to nominate for sampling in 2023.
