Applications follow the restrictions listed on the EPA labels of the pesticides used.

4. Discharges to Water Quality Impaired Waters (See PGP Part 1.1.2.1):  Yes  No

Operators are not eligible for coverage under this permit for any discharges from a pesticide application to Waters of the State if the waters are identified as impaired by a substance which is either an active ingredient of the pesticide designated for use or is a degradate of such an active ingredient.

5. Check one:

Waters are NOT impaired by any substance which is either an active ingredient of a pesticide to be discharged or a degradate of such an active ingredient.

Waters are on a current state list as being impaired by a substance which is either an active ingredient of a pesticide to be discharged or a degradate of such an active ingredient; however, evidence is attached documenting that the waters are no longer impaired.
