

List of sites subject to the 3 acre requirements of GP 3-9050

This list contains sites with three or more acres of impervious in the Lake Champlain, Lake Memphremagog, and stormwater-impaired watershed. The area of impervious surfaces is based on 2011 and 2016 GIS mapped data where available and may differ somewhat from what is on the ground. The impervious surface associated with a given project may not be reflective of the amount of impervious surface for which permit coverage is required. Affected property owners are being notified by the Department of their permitting obligations.
