¹ If the project has been upgraded or altered from the previously issued permit, submit the project's final plan with this application; If the project is substantially deteriorated or is not constructed, include a plan and schedule for construction.

² A 3 acre site is a discharge of regulated stormwater runoff from impervious surface of three or more acres, which was never previously permitted or was permitted under an individual permit or general permit that did not incorporate the requirements of the 2002 Stormwater Management Manual or it's replacement. Incorporation of a three acre site under a MS4 authorization may affect the target reduction required under the phosphorus control plan requirements.
